1. *Zool.*: A family of Bryozoa, with the free polyzoary consisting of a plano-convex or concave disk, with one layer of cells on the convex surface.

2. *Palæont.*: From the Cretaceous onward.

sē-lēn'-āte, s. [Eng. *selenic* (a); -ate.]

Chem.: A salt of selenic acid.

selenate of lead, selenite of lead, s.

Min.: Kerstenite.

sē-lēn-ō'-thyl, s. [Eng. *selenium* (um), and *ethyl*.]

Chem.: Se(C₂H₅)₂. Selenic ethide. A fetid, oily liquid, very inflammable, obtained by distilling potassium selenide with potassium ethylsulphate. It acts as a bivalent radical, uniting with bromine, chlorine, oxygen, &c.

sē-lēn-ōt'-tēd, a. [Eng. *selenium* (um), and (*ur-*) *etied*.] Combined with selenium.

selenetted-hydrogen, s. [SELENYHYDRIC-ACID.]

sē-lēn-hy'-dric, a. [Eng. *selenium* (um); *hydr* (*ogen*), and *suff. -ic*.] Derived from or containing selenium and hydrogen.

selenhydric-acid, s.

Chem.: H₂Se. Selenetted hydrogen. Hydrogen selenide. A colourless gas produced by the action of dilute sulphuric acid on potassium or iron selenide. It is very soluble in water, and, like sulphuretted hydrogen, decomposes metallic solutions, insoluble selenides being precipitated.

sē-lē-nī'-a, s. [Lat. *selinon*, from Gr. *σελίνον* (*selinon*) = a kind of parsley.]

Bot.: The typical genus of Seleniæ (q.v.). Only one known species, from Texas.

sē-lē-nīc, a. [Eng. *selenium* (um); -ic.] Contained in or derived from selenium.

selenic-acid, s.

Chem.: SeO₂(HO)₂. Discovered in 1827 by

Mitscherlich, and prepared by fusing an alkaline selenite with nitrate of potassium, converting the selenate formed into a lead or cadmium salt, decomposing the latter with sulphuric acid, filtering and concentrating the filtrate by evaporation. It is a transparent colourless liquid, boils at 280°, has a sp. gr. = 2.6, and resembles sulphuric acid; its admixture with water being attended with considerable rise of temperature. Selenic acid, boiled with hydrochloric acid, gives off chlorine and is reduced to selenous acid.

selenio-ethide, s. [SELENETHYL.]

selenio-sulphur, s.

Min.: A variety of native sulphur of an orange or sometimes brownish colour, containing selenium. Found at Vulcano, Lipari Islands, also at Kilanea, Hawaii. Called also Selen-sulphur and Selenium-sulphur.

sē-lēn'-ī-dæ, s. *pl.* [Mod. Lat. *selenia* (a); Lat. *fem. pl. adj. suff. -idæ*.]

Bot.: A family of Pleurorhizæ.

sē-lēn'-ide, s. [Eng. *selenium* (um); -ide.]

Chem. (Pl.): Compounds of the metals, and alcohol radicals, with selenium. The metallic selenides can be produced by fusing selenium with the metal. They are mostly reddish or dark coloured, and are more difficultly acted on by nitric acid than the corresponding sulphides. Some occur in nature, as rare minerals. [¶]

¶ Selenide of copper = *Berzelianite*; Selenide of lead and copper = *Zorgite*; Selenide of copper and silver = *Eucartite*; Selenide of lead = *Clausthalite*; Selenide of mercury = *Tiemannite*; Selenide of mercury and lead = *Lehrbachite*; Selenide of silver = *Naumannite*; Selenide of thallium = *Crookesite*.

sē-lēn-īf'-ōr-ōūs, a. [Mod. Lat. *selenium*; Lat. *fem. = to bear*, to produce, and Eng. *suff. -ous*.] Yielding or containing selenium.

sē-lēn'-ī-ō, *pref.* [SELENO- (3).]

sē-lē-nī-ō-ōy'-an-āto, s. [*Pref. selenio*, and Eng. *cyanate*.]

Chem. (Pl.): CNMSe = CymSe. Compounds analogous to the sulphocyanates discovered in 1820 by Berzelius. The potassium salt is obtained by fusing potassic ferrocyanide with selenium. It crystallizes in needles, very deliquescent, and soluble in water and alcohol. All the other selenocyanates are formed, either by neutralising the acid with a base, or by precipitation, according as they are soluble or insoluble.

sē-lē-nī-ō-ōy'-ān'-īc, a. [*Pref. selenio*, and Eng. *cyanic*.] Derived from selenium and cyanic acid.

seleniocyanic-acid, s.

Chem.: CNHSe = CyHSe. Hydric seleniocyanate. Prepared by passing a stream of sulphuric acid gas through a warm aqueous solution of lead seleniocyanate, filtering, and boiling the filtrate to expel the excess of sulphuric acid. It is very unstable, the addition of almost any acid causing a precipitate of the selenium.

seleniocyanic-anhydride, s.

Chem.: C₂N₂Se = Cy } Se. Obtained by the action of iodide of cyanogen on argentic seleniocyanate. It forms limpid rhombic tables which volatilise slowly on exposure to the air, melts at 60°, soluble in water, alcohol, and ether, and readily decomposed by acids.

sē-lē-nī-ōūs, a. [Eng. *selenium* (um); -ous.] Pertaining to selenium.

selenous-acid, s.

Chem.: SeO(HO)₂. Produced by the hydration of selenous oxide, or the action of nitromuriatic acid on selenium. It is deposited from its hot aqueous solution in prismatic crystals like saltpetre and is a powerful acid, neutralising alkalis, and decomposing chlorides and nitrates with the aid of heat. It is dibasic, and forms unimportant neutral and acid salts with the alkalis and metals.

sē-lēn'-ite (1), s. [Eng. *selenium* (um); -ite.]

Chem.: A salt of selenous acid.

* **sē-lēn'-ite** (2), s. [Gr. *σεληνη* (*selēnē*) = the moon.] One of the supposed inhabitants of the moon.

sē-lēn'-ite (3), s. [Gr. *σεληνη* (*selēnē*) = the moon; *suff. -ite* (*Min.*)]

Min.: A name used by some mineralogists for the species gypsum (q.v.), by others applied to the crystallized forms only.

sē-lēn'-it-ic, **sē-lēn'-it-ic-al**, a. [Eng. *selenid* (e); -ic, -ical.]

1. Of or pertaining to selenite; resembling selenite, or partaking of its nature or properties. [SELENITE (3).]

* 2. Pertaining to the moon.

sē-lē-nī-ūm, s. [Gr. *σεληνη* (*selēnē*) = the moon. Named by Berzelius, because it was associated with tellurium (q.v.).]

Chem.: A non-metallic hexad element occupying an intermediate place between sulphur and tellurium. Symbol Se. Atomic weight 79.5. Discovered by Berzelius in 1817. Though not very abundant in nature, it enters into the composition of many minerals, and has been found in the free state in certain parts of Mexico. It is prepared from cuproplumbic selenide by heating the pulverised ore with hydrochloric acid, igniting the insoluble residue with an equal weight of potassium with boiling water. By exposing this solution to the air Selenium is deposited as a gray powder. Like sulphur, it occurs in the amorphous and crystalline states. In the former it may be drawn out into ruby-coloured threads, and when melted and quickly cooled becomes vitreous with a specific gravity of 4.3, and nearly insoluble in bisulphide of carbon.

In the crystalline condition it forms monoclinic prisms of sp. gr. = 4.5-4.7. It boils below a red heat, and gives off a deep yellow vapour which condenses in scarlet flowers, and when thoroughly heated burns with a blue flame forming selenous anhydride. It is oxidised and dissolved by nitric acid, yielding selenous acid.

selenium-chlorides, s. *pl.*

Chem.: The dichloride, SeCl₂, is obtained by passing a slow stream of chlorine over fused selenium. It condenses as a dark yellow oily liquid with very pungent odour, and is quickly decomposed with hot water into selenous and hydrochloric acids. The tetrachloride is formed by freely passing chlorine over fused selenium. It forms a white crystalline mass, which on further heating yields a yellow vapour. It dissolves in water, forming selenous and hydrochloric acids.

selenium-oxides, s. *pl.*

Chem.: Selenous oxide, SeO₂, is the only oxide of which the composition is exactly known. It is formed when selenium is burnt in a stream of oxygen. At a heat below redness it volatilises in the form of a yellow vapour which condenses in white four-sided needles. It readily takes up water, forming selenous acid. The trioxide, SeO₃, the anhydride of selenic acid, is not known.

selenium-sulphur, s. [SELENIC-SULPHUR.]

* **sē-lēn'-ī-ūr'-ēt**, **sē-lēn'-ūr'-ēt**, s. [Eng. *selenium* (um), and *uret*.]

Chem.: Selenide (q.v.).

sē-lēn'-ō, **sē-lēn'-ī-ō**, **sē-lēn'**, *pref.* [Gr. *σεληνη* (*selēnē*) = the moon, a crescent.]

1. Of or pertaining to the moon.

2. Crescentic.

3. Pertaining to, or containing selenium (q.v.).

sē-lēn'-ō-bis'-mūth'-ite, s. [*Pref. seleno-* (3), and Eng. *bismuthite*.]

Min.: A variety of bismuthinite (q.v.), stated to contain 10 per cent. of selenium. Found in Wernland, Sweden.

sē-lēn'-ō-cēn'-tric, a. [*Pref. seleno-* (1), and Eng. *centric*.] Pertaining to the centre of the moon: as seen or estimated from the centre of the moon.

sē-lēn'-ō-dont, a. [SELENOONTA.] Belonging to, or characteristic of the Selenodontia; having molars with erescentic ridges.

"The tooth of the Hæcete bearing to that of Anchitherium the same relation as that of an Ox does to the early Selenodont Artiodactyles."—*Encyc. Brit.* (ed. 9th), xiv. 432.

sē-lēn-ō-dōn'-tā, s. pl. [Pref. *selen-* (2), and Gr. *ὀδούς* (*odous*), genit. *ὀδόντος* (*odontos*) = a tooth.]

Zool. & Palaeont.: A group of Artiodactyla Mammals, with three sections, Tylopoda, Tragulina, and Pecora, or Ruminantia (q.v.). The molars have a crescentic ridged form. The earliest known member of the group is Anoplotherium (q.v.).

sē-lēn-ō-grāph, s. [SELENOGRAPHY.] A drawing or picture of the surface of the moon, or any part of it.

sē-lēn-ōg-ra-phōr, **sē-lēn-ōg-ra-phīst**, s. [Eng. *selenograph(y)*; -er, -ist.] One versed or skilled in selenography.

sē-lēn-ō-grāph-ic, **sē-lēn-ō-grāph-ic-al**, a. [Eng. *selenograph(y)*; -ic, -ical.] Pertaining or relating to selenography.

sē-lēn-ōg-ra-phŷ, s. [Pref. *seleno-* (1), and Gr. *γράφω* (*graphō*) = to write.] A description of the moon and its phenomena; the art of picturing or delineating the face of the moon.

"Evelinus, in his accurate *selenography*, or description of the moon, hath well translated the known appellations of regions, seas, and mountains, unto the parts of that luminary."—*Brown*.

sē-lēn-ō-lōg-ic-al, a. [Eng. *selenology(y)*; -ical.] Of or pertaining to selenology.

sē-lēn-ōl-ō-gŷ, s. [Pref. *seleno-* (1), and Gr. *λόγος* (*logos*) = a discourse.] That branch of astronomical science which treats of the moon.

sē-lēu-cī-dēs, s. [Mod. Lat., from Lat. *seleucis*, genit. *seleucidis* = a kind of bird on Mount Cassius (Pliny).]

Ornith.: A genus of Epimachinae. Bill longer than head, nearly straight, compressed, tip emarginate; nostrils oblong, partly hidden by frontal feathers; wings moderate; tail short, composed of twelve nearly equal feathers; tarsi moderate, acutellated; outer and middle toes nuded at base; claws curved, acute. A single species, *seleucides alba*, the Twelve-wired Bird of Paradise (q.v.). It was formerly classed with Epimachina.

sēlf, ***selfe**, ***self**, a. & s. [A.S. *self*, *self*, *self*; cogn. with Dut. *self*; Icel. *sjálf*; Dan. *selv*; Sw. *sjelf*; Goth. *silba*; Ger. *selbe*, *selbst*. According to Skeat, from a Teutonic base, *selbu* for *selba*, where *se* is the same as the Lat. *se*; Skt. *sva* = one's own self, and *lib* is the same as the base of Goth. *laiba* = a remnant: *bilaibjan* = to be left; hence, the original meaning of *self* is "left to one's self." *Self* was originally used as an adjective = same, as "That *self* mould" (*Shakespeare*: *Richard II.*, 1. 2), and was declined as a definite or indefinite adjective, as *ic self*, *ic selva* = I (my)self, and agreed with the pronoun to which it was added: as nom. *ic self*, *ic selva*; genit. *min selfes*; dat. *me silum*; accus. *me selfne*; *thu selfa* = thou (thy)self, *he selfa* = he (him)self, *we selfa* = we (our)selves, *hi selfe* = they (them)selves, &c. In Old Eng. the dative of the personal pronoun was sometimes prefixed to the nominative of *self*, as *ic me self* = I myself, *thu the self* = thou thyself, *he him self* = he himself, *we us selfe*, *ge eow selfe*, *hi him selfe*. In the thirteenth century the genitive was substituted for the dative of the prefixed pronouns in the first and second persons, as *mi self*, *thi self*, for *me self*, *the self*, and *our self*, *your self*, for *us self*, *you self*. From this the transition to *myself*, *thyself* was easy. *Self* then began to be regarded as a substantive, and the plural, *selves*, was formed on the analogy of nouns ending in *f*. In *himself*, *themselves*, *itself*, the old dative remains unchanged; *his self*, *their selves*, are provincialisms. With *own*, the possessive pronouns *his*, *our*, *your*, and *their* may be used, as "Who *his own self* bare our sins in his own body on the tree" (1 Peter II. 24), and so in Scriptural language *mine*, as "I judge not *mine own self*" (1 Cor. iv. 3).]

- A. As adjective:
 - 1. Same, very.
 - "Hell hath no limits, nor is circumscribed In one self place."—*Marlowe*: *Faustus*, II. 1.
 - 2. Of or pertaining to one's self; own.
 - "Who by *self* and violent hands took off her life."—*Shakespeare*: *Macbeth*, v. 8.
 - 3. As a pronominal affix or adjective, *self* is affixed to personal pronouns (1) to express emphasis or distinction, and (2) when the pronoun are used reflexively. Thus, for emphasis, *I myself* will go, denotes not only

my intention of going, but also my determination of going in person. Reflexively, he killed *himself*, we keep *ourselves*, &c. *Himself*, *herself*, and *themselves* are used in the nominative as well as in the objective case: as, "Jesus *himself* baptised not, but his *disciples*" (*John* iv. 2). *Self* (or *selves*) is sometimes found separated from the pronoun: as, "To *thy sweet self* too cruel" (*Shakespeare*: *Sonnet* 1), though in such cases, *self* may be regarded as a noun. Such phrases as *Cæsar's self*, *Tarquin's self*, are not, philologically speaking, so correct as *Cæsar self*, *Tarquin self*.

B. As substantive:

1. The individual as an object to his own reflective consciousness; a person as a distinct individual; one's individual person; the ego of metaphysicians; the man viewed by his own cognition; the subject of all his mental phenomena; the agent in his own activities, the subject of his own feelings, and the possessor of faculties and character.

"But whatever to some men makes a man, and consequently the same individual man, whereas perhaps few are agreed, personal identity can by us be placed in nothing but consciousness (which is that alone which makes what we call *self*) without involving us in great absurdities."—*Locke*: *Human Understanding*, bk. II., ch. xxvii.

2. Personal interest; one's own private interest: as, He is always thinking of *self*.

3. A flower or blossom of a uniform colour, especially one without an edging or border distinct from the ground colour.

4. *Self* is used as the first element in innumerable compounds, generally of sufficiently obvious meaning, in most of which it denotes either the agent or the object of the action expressed by the word with which it is joined, or the person on behalf of whom it is performed, or the person or thing to, for, or towards whom or which a quality, attribute, or feeling expressed by the following word belongs, is directed, or is exerted, or from which it proceeds; or it denotes the subject of or object affected by such action, quality, attribute, feeling, and the like (*Webster*): as *self-abhorring*, *self-accusing*, *self-deceiving*, &c.

self-abased, a. Humbled by consciousness of guilt or shame.

self-abasement, s.

1. Humiliation or abasement proceeding from consciousness of inferiority, guilt, or shame.

2. Degradation of one's self by one's own act.

self-abasing, a. Abasing or humiliating one's self through consciousness of inferiority, guilt, or shame.

self-aborrence, s. Abhorrence or hatred of one's self.

"Be shame and *self-aborrence* mine."—*Cooper*: *Utney Hymns*, xi.

self-abuse, s.

1. Abuse of one's own powers.

- "Habitual spleen . . . had sometimes urged To *self-abuse* a not inelegant tongue."—*Wordsworth*: *Excursion*, bk. vii.

* 2. Self-deception; illusion. (*Shakespeare*: *Macbeth*, iii. 4.)

* 3. Masturbation (q.v.).

* **self-accusatory**, a. Accusing one's own self. (*Dickens*: *Christmas Carol*, stave 1.)

self-accused, a. Accused by one's self to others, or by one's own conscience.

"Die *self-accused* of life run all to waste."—*Cooper*: *Bill of Mortality* (A. D. 1788).

self-acting, a. Acting of or by itself; applied to any automatic contrivance for dispensing the manipulation which would otherwise be required in the management of machines: as, a *self-acting* valve, one moved by the action of the fluid, in contradistinction to one moved by mechanical devices.

self-action, s. Action by or originating in one's self or itself.

self-active, a. Self-acting; moving one's self or itself without foreign or external aid.

self-activity, s. The power of moving one's self or itself without foreign or external aid; self-action.

self-adjusting, a. Adjusting by one's self or itself.

self-admiration, s. Admiration of one's self; self-conceit.

self-adulation, s. Flattery of one's self.

- "Fired by loud plaudits and *self-adulation*."—*Byron*: *A Distant View of Harrow-on-the-Hill*.

* **self-affairs**, s. pl. One's own private affairs; one's own business. (*Shakespeare*: *Midsummer Night's Dream*, 1. 1.)

* **self-affected**, a. Self-loving. (*Shakespeare*: *Troilus & Cressida*, ii. 3.)

self-afrighted, a. Frightened at one's self.

- "*Self-afrighted*, tremble at his sin."—*Shakespeare*: *Richard II.*, III. 2.

self-aggrandizement, s. Aggrandizement or exaltation of one's self.

self-annihilation, s. Annihilation by one's own act.

self-applause, s. Applause of one's own self; self-praise.

- "With all the attitudes of *self-applause*."—*Byron*: *Vision of Judgment*, xzv.

* **self-applying**, a. Applying to or by one's self.

self-approbation, s. Approbation of one's self; self-applause.

self-approving, a. Approving of one's own conduct, character, &c.

- "*Self-approving* dignity might never be able to shield me from ridicule."—*Goldsmith*: *The Bee*, No. 4.

self-asserting, **self-assertive**, a. Forward in asserting one's self or one's rights or claims; putting one's self forward confidently.

self-assertion, s. The act of asserting or putting one's self or one's own rights or claims forward in an assuming manner.

self-assumed, a. Assumed by one's own act or on one's own authority: as, a *self-assumed* title.

* **self-assumption**, s. Self-conceit.

- "In *self-assumption* grows Than in the note of judgment."—*Shakespeare*: *Troilus & Cressida*, II. 2.

self-banished, a. Banished or exiled voluntarily.

- "*Self-banished* from society."—*Cooper*: *Task*, I. 574.

self-begot, **self-begotten**, a. Begotten by one's self or one's own powers.

- "Know none before us, *self-begot*, *self-raised* By our own quickening power."—*Milton*: *P. L.*, v. 860.

self-beguiled, a. Self-deceived.

self-betrayed, a. Betrayed by one's own self.

- "*Self-betrayed*, and willfully undone."—*Cooper*: *Tirocinium*, 174.

self-blinded, a. Blinded or led astray by one's own actions, means, or qualities.

self-born, a. Born or begotten by one's self; self-begotten.

"Fight our native peace with *self-born arms*."—*Shakespeare*: *Richard II.*, II. 4.

* **self-bounty**, a. Inherent kindness and benevolence.

- "I would not have your free and noble nature Out of *self-bounty*, be abused."—*Shakespeare*: *Othello*, III. 4.

self-breath, s. One's own words or speech.

- "A pride that quarrels at *self-breath*."—*Shakespeare*: *Troilus & Cressida*, II. 4.

self-buried, a. Buried by one's self.

- "*Self-buried* ere they die."—*Cooper*: *Task*, v. 86.

* **self-centration**, s. The act of centring, or state of being centred, on one's self.

* **self-centred**, a. Centred in or on one's self or itself.

- "There hangs the ball of earth and water mixt *Self-centred* and unmov'd."—*Dryden*: *State of Innocence*.

self-charity, s. Love of one's self; self-love.

- "Unless *self-charity* be sometimes a vice."—*Shakespeare*: *Othello*, II. 4.

self-closing, a. Closing itself. Used of a gate, a door, &c.

* **self-cognizance**, s. Self-knowledge.

- "The first quality of thought is its *self-cognizance*."—*Poe*: *Eureka* (Works 1864, p. 131).

self-collected, a. Self-possessed, calm, cool.

- "Still in his stern and *self-collected* mien A conqueror's more than captive's air is seen."—*Byron*: *Colmar*, II. 8.

self-coloured, a. All of a single colour. (Applied to some animals and to flowers, and also to textile fabrics in which the warp and weft are of one colour.)

fāte, fāt, fāre, amīdst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pīno, pīt, sire, sir, marine; gō, pōt, or, wōre, wōlf, wōrk, whē, sōn; mūte, cūb, cūre, quīte, cūr, rūle, fūll; trŷ, Sŷrian. æ, œ = ō; ey = ā; qu = kw.

self-command, s. A state of steady equanimity in every situation, enabling a man to exert his reasoning faculties with coolness; self-possession.

"He had, what Burnet wanted, judgment, self-command, and a singular power of keeping secrets."—*Macaulay: Hist. Eng., ch. xiii.*

self-commitment, s. A committing or binding one's self, as by a promise, statement, or conduct.

self-communicative, a. Imparting or communicating by its own powers.

self-complacency, self-complacence, s. The quality or state of being self-complacent; satisfaction with one's own doings or capabilities.

"By the loss of that repose, self-complacency cannot taste."—*Cooper: Necessity of Self-Abasement.*

self-complacent, a. Pleased with one's self or one's own doings or capabilities.

"The self-complacent stupidity with which they insisted on organizing an army as if they had been organizing a commonwealth."—*Macaulay: Hist. Eng., ch. v.*

self-conceit, s. A high opinion of one's self; self-esteem, egotism, vanity.

"Philosophy, without his heavenly guide, May blow up self-conceit, and nourish pride."—*Cooper: Charley, 374.*

self-conceited, a. Having a high or overweening opinion of one's self; vain, egotistical.

"A self-conceited top will swallow anything."—*L'Estrange.*

self-conceitedness, s. The quality or state of being self-conceited; vanity, self-conceit; an overweening opinion of one's self or of one's capabilities or accomplishments.

"A contradiction of what has been said, is a mark of yet greater pride and self-conceitedness, when we take upon us to set another right in his story."—*Locke.*

self-condemnation, s. Condemnation by one's own conscience.

"Abasement and self-condemnation."—*Longfellow: Miles Standish, iv.*

self-condemned, a. Condemned by one's own conscience.

"One deeper than another, self-condemned, Through manifold degrees of guilt and shame."—*Wordsworth: Excursion, bk. iv.*

self-condemning, a. Condemning one's self.

"And could the ceaseless vultures cease to prey On self-condemning banners blown."—*Byron: Child Harold, iii. 54.*

self-confidence, s. Confidence in one's self or in one's own powers, capabilities, or strength; reliance on one's own opinions, judgment, or powers.

self-confident, a. Confident of one's own powers, capabilities, or strength; relying on one's own opinions, judgment, or powers.

self-confidently, adv. In a self-confident manner; with self-confidence.

self-confiding, a. Self-confident.

"With self-confiding, coldly patient air."—*Byron: Lara, li. 2.*

self-conscious, a.

1. Conscious of one's own acts or state as belonging to one's self.

"Yet my self-conscious worth, your high renown, Your virtue, through the neighboring nations blown."—*Dryden: (Todd).*

2. Conscious of one's self as an object of observation to others; apt to think much of how one appears to others.

self-consciousness, s.

1. Consciousness of one's own state or acts.

"Perception is the power by which we are made aware of the phenomena of the external world. Self-consciousness the power by which we apprehend the phenomena of the internal. The objects of the former are all presented to us in space and Time . . . The objects of the latter are all apprehended by us in Time and in Self."—*Hamilton: Metaphysics (ed. Mansel), i. 120.*

2. Consciousness of being an object of observation to others.

"It pays them well for pandering to its self-consciousness."—*St. James's Gazette, Sept. 1, 1886.*

self-considering, a. Considering with one's self or in one's own mind; deliberating.

"In dubious thought the king awaits, And self-considering, as he stands, debates."—*Pope: (Todd).*

self-consuming, a. Consumed by one's self or itself.

"But evil on itself shall back recoil . . . Self-fed and self-consuming."—*Milton: Comus, 597.*

self-consuming, a. Consuming one's self or itself.

"A wand'ring self-consuming fire."—*Pope: Chorus of Youth.*

self-contained, a.

1. Wrapt up in one's self; reserved, cold, not communicative. (*Dickens: Christmas Carol, stave 1.*)

2. Applied (especially in Scotland) to a house having an entrance for itself, and not approached by an entrance or stairs common to others.

Self-contained engine: A portable engine without travelling gear.

self-contempt, s. Contempt for one's self.

self-contradiction, s. The act or state of contradicting itself; the quality or state of being self-contradictory; repugnancy in terms; a proposition consisting of two members, one of which contradicts the other.

"A writer of this complexion gropes his way softly amongst self-contradiction, and grovels in absurdities."—*Addison.*

self-contradictory, a. Contradicting itself; involving a self-contradiction; repugnant in terms.

"Man had better own their ignorance, than advance doctrines which are self-contradictory."—*Spectator.*

self-control, s. Control over one's self; self-restraint, self-command.

"A man who without self-control Would seek what the degraded soul Unworthily admires."—*Wordsworth: Ruth.*

self-convicted, a. Convicted by one's own conscience; self-condemned.

self-conviction, s. Conviction proceeding from one's own consciousness, knowledge, or confession.

self-covered, a. Covered or clothed in one's native semblance.

"That changed and self-covered thing."—*Shakesp.: Lear, iv. 2.*

self-created, a. Created by one's self or one's own power.

Flowers polygamous; calyx five-cleft; petals and stamens five; styles three; nut compressed, heart-shaped, on a thick and depressed torus. Semeocarpus Anacardium is a deciduous tree, growing in the sub-Himalayan tract, from the Sutlej eastwards, and ascending to 3,500 feet. It is called the Marking-nut tree because the pericarp of the fruit contains a bitter and astringent principle used everywhere in India for marking-ink; with lime-water it is made into an ordinary ink; and it is also used as a black dye. Pounded and boiled in rape-oil, it

stays putrefaction when begun in a hide. The resin of the tree yields the varnish of Sylhet. An oil derived from it, mixed with the milk of Euphorbia, is made in the Satpura hills into birdlime. The acrid juice of the nuts is used also in rheumatism and leprosy, and to ward off the attacks of white ants. Its seeds, called Malacca-beans or Marsh-ants, are eaten; so is the yellow fleshy cap surrounding the seeds, which is roasted in ashes. The wood of the tree is sometimes burnt as charcoal. S. panduratus, a tree growing in Pegu and Masataban, and S. travancorica, found in the Tinnevely and Travancore Hills, abound in a caustic black juice or resin.

sēn-ate, ***sen-at**, s. [Fr. *senat*, from Lat. *senatus*, accus. of *senatus* = a council of elders, from *senex*, genit. *senis* = an old man; Sp. *senado*; Ital. *senato*.]

1. An assembly or council of elders; an assembly or council of citizens invested with a share in the government.

(1) In ancient Rome, a body or council of elders, appointed or elected from amongst citizens of free birth, and entrusted with the supreme legislative power. To it belonged exclusively the administration of foreign affairs, and of the exchequer. It also exercised a general superintendence over the religion of the state. It could not meet unless summoned by a magistrate. The number of the members varied at different times.

(2) The Upper House of the Congress of the United States, whose members represent the states, while those of the Lower House are the direct representatives of the people. Each state has two senators, chosen by the state legislature for six years, though there is a strong feeling in favor of having the senators directly voted for by the people. The Upper House of the French national legislature also bears the name of Senate, and the same is the case in some of the Cantons of Switzerland. The House of Lords of Great Britain differs from the Senate of the United States in being an hereditary, not a representative, body of legislators, and in other particulars.

(3) The Upper House of the various State legislatures, all members of which are chosen by direct vote of the people.

(4) Hence, legislative bodies in general; a state council; the legislative department of a government.

"While listening *senates* hang upon thy tongue." *Thomson: Autumn, 11.*

2. The governing body of the Universities of Cambridge and London.

senate-chamber, s. The chamber or hall in which a senate meets.

senate-house, s. A house in which a senate meets; a place of public council.

"As those of the one are *senated* by the ear, so those of the other are by the eye."—*Hooker: Hist. Royal Society*, III. 2.

ŝen-sa-tion, s. [Fr., as if from a Lat. *senatio*, from *senatus* = gifted with sense; Sp. *senacion*; Ital. *senazione*.]

I. Ordinary Language:

1. In the same sense as II.

2. The power of feeling or receiving impressions through organs of sense.

"This great source of most of the ideas we have, depending wholly upon our senses, and derived by them to the understanding, I call *senation*."—*Locke*.

3. Feelings, agreeable or otherwise, arising from causes that are not corporeal or material; purely spiritual or psychological affections; as, a *senation* of awe, a *senation* of novelty, &c.

4. A state of excited feeling or interest.

"One of the papers which created a *senation* at the late meeting of the Church Congress."—*Daily Telegraph*, Oct. 25, 1856.

5. That which produces *senation* or a state of excited feeling or interest.

6. Just as much as can be perceived by the senses; a very small quantity; as, a *senation* of brandy. (*Slang*.)

II. Technically:

1. *Metaph.*: The word *Sensation*, like *Perception* [See extract under *PERCEPTION*, II.], is employed in different senses:

(1) Mental consciousness of the processes of physiological *senation*. [2.]

"Our Senses, conversant about particular sensible objects, do convey into the Mind several distinct perceptions of things, according to those various ways wherein those objects do affect them: and thus we come by those ideas we have, of Yellow, White, Heat, Cold, Soft, Hard, Bitter, Sweet, and all those which we call sensible qualities, which when I say the senses convey into the Mind, I mean, they from external objects convey into the Mind what produces these perceptions. This great source of most of the ideas we have, depending wholly upon our Senses, and derived by them to the Understanding, I call *Senation*."—*Locke: Human Understanding*, bk. II., ch. I.

(2) Subjective experience, as of pleasure or pain, arising from objective experience—*e.g.*, from the sight of a beautiful landscape.

"There is all the difference in the world between the permanence or independence of tangible extension and that of the mere feeling of contact, the *senation* of taste, of pleasure or pain. In the latter cases we know that the actual *senation* ceases to be the moment it passes out of consciousness."—*Veitch: Hamilton*, p. 190.

(3) For the use of the word in Positive Philosophy, see extract. [SENSATIONAL-CENTRES.]

"By *Senation*, therefore, must be understood that form of sensibility which belongs to the organs of Sense—including, of course, those important, but generally neglected sensibilities which arise from the viscera and from muscular actions."—*G. H. Lewes: Hist. Philos.* (ed. 1880), II. 357.

2. *Physiol.*: The peculiar property of the nervous system in a state of activity, by which impressions are conveyed to the brain or sensorium. When an impression is made on any portion of the bodily surface by contact, heat, electricity, or any other agent, the mind is rendered conscious of this by *senation*. In this process there are three stages—reception of the impression at the end of the sensory nerve, the conduction of it along the nerve trunk to the sensorium, and the change it excites in the sensorium itself, through which is produced *senation*.

¶ The word is frequently used adjectively, in the sense of causing great interest or feeling; *senational*: as, *senational* dramas.

senation-novels, s. pl. Novels which produce their effect by highly exciting and

often improbable situations, having, as their ground-work, some great mystery or secret, atrocious crimes, or the like, and written in passionate and highly-wrought language.

sên-sâ'-tion-al, a. [Eng. sensation; -al.]

1. Having sensation; serving to convey sensation; sentient.

2. Pertaining or relating to, or implying sensation or perception by the senses; sensationalist.

"As a contribution to philosophy, the labours of the sensational school have mainly no direct value." - G. H. Lewes: Hist. Philos. (ed. 1880), II. 303.

3. Producing sensation or excited feeling or interest: as, a sensational novel.

4. Of or pertaining to sensationalism.

sensational-centres, s. pl.

Philos. & Physiol. (See extract).

"Every sense . . . has its own special centre or sensorium; but there seems to be no ground for assuming, with Unzer and Prochaska, the existence of any one general sensorium, to which all these centres, and I shall speak therefore of the sensational-centres as the seats of sensations derived from the stimuli which act on the organs of sense." - G. H. Lewes: Hist. Philos. (ed. 1880), II. 332.

sên-sâ'-tion-al-izm, s. [Eng. sensational; -ism]

1. Ord. Lang.: Sensational writing or language.

"The most painful of all social questions before sensationalism ever thought of taking it up." - Daily Telegraph, Sept. 11, 1882.

2. Philos.: The doctrine that knowledge is the outcome of sensation, that Psychology is a branch of the wider science of Biology, and Mind but one aspect of Life. This teaching flourished, chiefly in France, in the eighteenth century, whence Sensationalism is sometimes called Eighteenth-century Philosophy. Its precursor was Hobbes (Hobbesism), whom Condillac (1715-80) followed and amplified, attributing a sensorious origin to faculties as well as to ideas. Hartley (1705-57) and Erasmus Darwin (1731-1802) in England and de Tracy (1754-1830) and Cabanis (1757-1808) in France, also endeavoured to establish a physiological basis for mental phenomena.

"Here is stated, in the broadest manner, the principle of sensationalism. It is in direct antagonism to the doctrine of Descartes, that there are innate ideas; in direct antagonism to the old doctrine of the spirituality of Mind." - G. H. Lewes: Hist. Philos. (ed. 1880), II. 331.

sên-sâ'-tion-al-ist, s. & a. [Eng. sensational; -ist.]

A. As subst.: One who accepts or defends the theory of Sensationalism (q.v.); one who assigns a physiological origin to mental phenomena.

"He [Hobbes] takes a decided stand upon experience; he is the precursor of modern sensationalists." - G. H. Lewes: Hist. Philos. (ed. 1880), II. 331.

B. As adj.: Of or belonging to Sensationalism (q.v.); attributing a physiological origin to mental phenomena.

"We are not surprised to find that Locke was claimed as the founder of a Sensationalist school." - Ferrer. (Anecdotes).

sên-sâ'-tion-ar-ry, a. [Eng. sensation; -ary.]

Possessing, or relating to sensation; sensational.

sên-sâ'-tion-izm, s. [Eng. sensation; -ism.]

Sensationalism, I.

"Sensationalism is a grievous vice of the pulpit, and does incalculable injury to its influence. But sensationalism is only an insurrection . . . against conventionality." - Scribner's Magazine, Nov., 1875, p. 144.

sênse, s. sênçe, s. [Fr. sens, from Lat. sensum, accus. of sensus = feeling, sense, from sensus, pa. par. of sentio = to feel; to perceive; Ital. senso.]

I. Ordinary Language:

1. In the same sense as II.

"Doest thou think I have no sense, thou strik'st me thus?" - Shakesp.: Troilus & Cressida, II. 1.

8. That which is felt or held as a sentiment; an opinion, a feeling, a view, a judgment.

"In opposition to the sense of the House of Commons." - Macaulay: Hist. Eng., ch. I.

9. Meaning, import, signification.

"He in the worst sense construes their denial." - Shakesp.: Rape of Lucrece, 324.

* 10. Sensuality.

"Modesty may more betray our sense Than woman's lightness." - Shakesp.: Measure for Measure, II. 2.

II. Anat., Physiol., Metaph., &c.: Perception by means of certain bodily organs.

Five senses are universally recognized: sight, hearing, smell, taste, and touch. Each has its appropriate organ; seeing has the eye, hearing the ear, smell the nostrils, taste the tongue, and touch the fingers and the body generally. To this some add a sixth or muscular sense, by which we become aware of the position and direction of the limbs and other parts moved by means of the voluntary muscles. But the sensation is really in the nerves distributed through the muscles. If the nerves be cut sensation in the muscles ceases. Some believe that the muscular sense is not essentially distinct from the touch; it is, however, recognized by Foster. Each sense has a nerve conveying the appropriate impressions to the brain. (For the metaphysics of the senses, see SENSATION.)

¶ (1) Common sense: [COMMON-SENSE.]

† (2) In all sense: In every respect.

"You should, in all sense, be much bound to him." - Shakesp.: Merchant of Venice, V. 1.

(3) To take the sense of a meeting: To ascertain the opinions or views of a meeting by putting a question to this vote.

sense-capsules, sense-cavities, s. pl.

"The sensitive faculty may have a sensitive love of some sensitive objects."—*Hammond*.

4. Pertaining to the senses or to sensation.

"What are called sensitive nerves or nerves of common sensation."—*Toad & Bowman: Physiol. Anat.*, II. 55.

II. Technically:

1. *Chem. & Phot.*: Capable of undergoing change by exposure to light.

2. *Phys.*: Easily affected or moved; indicating readily slight changes of condition; as, a sensitive balance or thermometer.

***B. As subst.**: Something that feels; a sensorium.

"The seat of the one is in the intellectual reasonable nature; the seat of the other is in the sensitive."—*Sharp: Sermons*, vol. IV, ser. 2.

sensitive-fern, *s.*

Bot.: *Onclea sensibilis*. Named from the sensibility and delicacy of the frond.

sensitive-flames, *s. pl.* Flames which quiver and are sometimes extinguished when an appropriate musical note is sounded.

sensitive-plants, *s. pl.*

Bot.: *Mimosa pudica* and *M. sensitiva*, which

possess a vegetable irritability, causing them to shrink from the touch. If the fingers be applied to one of them, the leaflets of the bipinnate leaf overlap one another from below upwards; if greater irritation be applied, the secondary petioles bending forward approach one another, and if the irritation be still increased, the common petiole sinks down by bending at the joint uniting it with the stem. Dr. Robert Brown mentions that plants of *M. pudica* grow abundantly by the sides of the Panama Railway in New Granada, and that when a train passes they fold up their leaves. They do so also when growing by a roadside if a horseman gallop past. Most Mimosas and some other leguminous plants with compound leaves are partially sensitive; so are various Oxalidaceae, especially *Averrhoa Bilimbi*, *Oxalis sensitiva* and *O. stricta*. Of other orders, Venus's Flytrap, *Dionaea muscipula*, is sensitive, as is, to a less extent, *Barbarea vulgaris*, the Common Barberry.

sén-si-tive-ly, *adv.* [Eng. *sensitive*; -ly.] In a sensitive manner.

"The sensitive faculty, through the nature of man's sense, may express itself more sensitively towards an inferior object than towards God: this is a piece of frailty."—*Hammond*.

sén-si-tive-néss, *s.* [Eng. *sensitive*; -ness.]

1. The quality or state of being sensitive or easily affected by external objects or impressions.

***sén-sôr**, *a.* [Eng. *sens(e)*; -or.] Sensory.

sén-sôr-y-ál, *a.* [Eng. *sensory*; -al.] Of or pertaining to the sensorium or sensory.

"By neglecting the sensorial and motorial ether, or by beginning a succession of perceptions."—*Search: Light of Nature*, vol. I, ch. I, ch. III.

***sensorial-motions**, *s. pl.*

Philos. & Physiol.: The name given by Erasmus Darwin to the changes which take place in the sensorium (q.v.), as during the exertions of volition or the sensations of pleasure and pain. (*Zoonomia*, I. 10.)

sén-sôr-ý-ám, *s.* [Lat. *sensus* = sense (q.v.).]

Philosophy & Physiology:

*1. A sensory point in the human brain where the soul was supposed to be situated, or to have its chief seat. Descartes placed this in the pineal gland (q.v.).

*2. According to Erasmus Darwin, the medullary part of the brain, spinal marrow, organs of sense, and of the muscles, and that spirit of animation which resides throughout the body without being cognizable to our senses, except by its effects. (*Zoonomia*, I. 10.)

3. The brain (q.v.).

4. A sensational centre (q.v.).

sén-sôr-ý, *a. & s.* [SENSORIUM.]

A. As adj.: Pertaining or relating to the sensorium; sensorial.

"Vibrations in the sensory nerves."—*Balcham: Phil. of Human Mind*, ch. III, § 5.

B. As substantive:

1. The sensorium (q.v.).

"Unable to convey to the sensory any more than an oblique glimpse of the sovereign Good."—*Warburton: Doctrine of Grace*, bk. II, ch. II.

2. One of the organs of sense.

"The blessed organs and sensories by which it feels and perceives the joys of the world to come."—*Scott: Christian Life*, pt. I, ch. IV, § 4.

sensory-nerve, *s.*

Anat.: A nerve constituting an instrument of sensation as distinguished from a motor-nerve, which is an instrument of motion. The sensory terminal organs are three oed-bulbs, tactile corpuscles, and Pacinian bodies.

sén-su-ál, ***sén-su-ál**, *a.* [Lata Lat. *sensualis* = endowed with feeling, from Lat. *sensus* = sense (q.v.); Fr. *sensual*; Sp. & Port. *sensual*.]

*1. Belonging to the predominance of "sense," meaning bodily sensibility, over the faculties of the soul; pertaining to or affecting the senses or bodily organs of perception.

"Hath not the Son Jesus conformed thy sensual heart by sensual arguments?"—*Rogers: Nauman, the Syrian*, p. 493.

2. Pertaining to or concerning the body, in distinction to the soul; carnal, fleshy; not spiritual, not intellectual.

"The greatest part of men are such as prefer their own private good before all things, even that which is sensual before whatsoever is most divine."—*Hooker*.

3. Pertaining to or consisting in the gratification of sense, or the indulgence of the appetites or passions; luxurious, lewd, voluptuous.

"That base end sensual life which leads To want and shame."
—*Longfellow: Coplas de Manrique*. (Trans.)

¶ **Judicial separation:**

Law: The separation of a husband and wife voluntarily or by decree of court. A decree of judicial separation may be obtained by either party on the ground of adultery, cruelty, or desertion without cause for two years and upwards. Not being divorced, the parties cannot marry again. The terms of a decree of judicial separation are determined by the judge according to the merits of each case. A separation order can be granted by a magistrate on proof of cruelty, and he has also power to order the husband to allow his wife a certain sum for her support. The laws of the several states confer on a married woman, who for good cause is living apart from her husband, the right to enter into contracts, to maintain actions, and otherwise to act in business as a single woman.

"The suit for a *judicial separation* is also a cause thoroughly matrimonial. For if it becomes improper that the parties should live together; as through intolerable cruelty, a perpetual disease, and the like, the law allows the remedy of a *judicial separation*."—*Blackstone: Comment*, bk. iii, ch. 4.

šep-pōš, s. [Maharatta, &c. *šipai* = a soldier, a policeman; Hind. & Pers. *šipahi* = a soldier, from Pers. *šipāh* = army; O. Pers. *špāda* = a native soldier. Heber thought that the word was derived from *šip* = the bow and arrow with which they were originally armed.]

Hist.: A slight alteration of the ordinary word used for centuries by the natives of India for a soldier in general, but confined by Anglo-Indians to the Hindoo and Muhammanadan troops, especially to those in British pay. The French, under Labourdonnais, set the example of employing sepoys at the siege of Madras in 1746. Next year, sepoys, probably undisciplined peons or policemen, fought on the British side; and in 1748 a small corps of sepoys was raised. As the three Presidencies were established and developed, each trained sepoys, till at length there arose three great armies, which largely aided Britain in establishing its Indian empire. The battle of Inkerman (Nov. 5, 1854) having shown the superiority of the Minie rifle to the old musket, the British desired to place the Enfield, an improvement on the Minie, in the hands of the native soldiery. Unhappily the cartridges manufactured in England were made up with cows' grease, which, by the Hindoo ceremonial law, was fatal to the caste of any one putting them to his lips. The cry arose that this was done intentionally, all explanations to the contrary were rejected, and on Sunday, May 10, 1857, the troops stationed at Meerut broke into open mutiny, attended by a massacre of Europeans. The mutineers escaped to Delhi, where a fresh massacre took place. The restoration of the Mogul empire was proclaimed, and the Bengal sepoy mutiny became strengthened by a Muhammanadan rebellion. Regiment after regiment of the Bengal army mutinied, till nearly all had deserted their colours, and a death struggle took

place during the next two years between the handful of Europeans in Upper India and Bengal and those who sought their lives. Delhi was retaken, after desperate fighting, between the 14th and 20th of Sept., 1857; Lucknow reinforced on Nov. 16, 1857, and relieved in March, 1858. [EAST INDIA COMPANY.] The disproportion between sepoys and European soldiers, which had been very great at the outbreak of the mutiny was reduced at once by a large diminution of the former and a great increase of the latter. Immediately before the Mutiny the number of European officers was 6,170, of soldiers 89,352, and of natives 232,224—total 277,746. Mr. W. W. Hunter states that in 1882-3 the Bengal army numbered 105,270 officers and men, of whom 66,081 were native troops; the Madras army 46,309, of whom 34,283 were natives; and the Bombay army 38,897, of whom 27,041 were natives. The total British army in India consisted of 190,476 officers and men, of whom 63,071 were Europeans and 102,183 natives.

"In our abridged and septuagesimal ages, it is very rare."—Browne: Vulgar Errors, bk. VI, ch. VI.

sep-tu-a-gint, s. & a. [Lat. septuaginta = seventy.]

A. As substantive:

Scripture: A Greek version of the Hebrew or Old Testament Scriptures; the oldest one made into any language. A still extant letter, referred to by Josephus, Jerome, and Eusebius, purports to be from a certain Aristeas, officer at the court of Ptolemy Philadelphus. It states that after the king had founded the great Alexandrian library, he wished to have in it a copy of the Jewish sacred books. By the advice of his chief librarian, Demetrius Phalarus, he sent to the high priest at Jerusalem, requesting him to send six translators from each tribe, seventy-two in all. The request was complied with; the translators came, and completed their work in seventy-two days. From their number, and perhaps the time they occupied, the name Septuagint arose. But the letter of Aristeas is not now believed to be genuine, and Coptic words in the work show that the translators were from Egypt, and not from Jerusalem. The version was apparently made at Alexandria, and was commenced about 280 B.C. the Pentateuch being the only part translated at first. It is well done. Next in value is the book of Proverbs. Job was translated from a Hebrew text, differing both by excess and defect from that now recognized. Esther, the Psalms, and the Prophets followed, seemingly between B.C. 180 and 170. Jeremiah is the best translated, and Daniel is executed so badly that Theodotion, in the second century A.D., had to do the work again. Jesus and his Apostles frequently quoted the Septuagint in place of the Hebrew. The Jews had a high opinion of the Septuagint, but on finding the Messianic passages used effectively by the Christians in controversy with them, they established a fast to mourn that the Septuagint had ever been issued, and had a new translation by Aquila brought out for the use of the synagogues. Three Christian recensions took place late in the third or early in the fourth century. The first modern edition was the Complutensium in 1514-1517; since then several others have appeared.

B. As adj.: Of, belonging to, or contained in the Septuagint (q.v.).

3. Consequence, result, effect, event.

"For oftentimes it hath been seen, that to a new enterprise, there followeth a new manner, and strange *sequel*."
—*Strype: Eccles. Memor.*; *Henry VIII.*, bk. I., ch. III.

4. A consequence inferred; a conclusion.

"What *sequel* is there in this argument? An arch-deacon in the chief deacon; ergo, he is only a deacon."
—*Whitgift*.

II. Scots Law: [THIRLAGE].

sé-que-lá (pl. **sé-que-læ**), **s.** [Lat., from *sequor* = to follow.] [SEQUEL.]

1. *Ord. Lang.*: One who or that which follows as,

1. An adherent, a follower; a band of adherents or followers.

2. An inference; a conclusion; a consequence inferred.

II. Pathol.: A disease or morbid symptoms following upon a prior malady, as the sequelæ of measles, of scarlet fever, &c.

sequela-curiæ, s. A suit of court.

sequela-causæ, s. The process and depending issue of a cause for trial.

sé-quence, s. [Fr., from Lat. *sequentia* = a following, from *sequens*, pr. par. of *sequor* = to follow; Ital. *sequenza*.]

I. Ordinary Language:

1. The state of being sequent or following; a following or coming after; succession.

"How art thou a king, And by fair sequence and succession?"
—*Shakespeare: Richard II.*, II. 1.

2. A particular order of succession or following; an arrangement; order.

"Tell Athens, in the sequence of degrees, From high to low throughout."
—*Shakespeare: Timon of Athens*, v. 2.

3. Invariable order of succession; an observed instance of uniformity in following.

4. A series of things following in a certain order or succession; specifically, a set of cards immediately following each other in the same suit, as an ace, two, three, and four.

"Crawley again serving . . . ran up a sequence of six aces."
—*Field*, April 4, 1883.

5. Result, consequence.

"The inevitable sequences of sin and punishment."
—*Ep. Bull. Sermon on Pains civil*.

6. (PL.) Answering verses.

"Of such our patrons here, the vicent Mountacute, Hath many comely sequences, well sorted all in suite."
—*Gascoigne: Maske for Viscount Mountacute*.

II. Technically:

1. **Music**: The recurrence of a harmonic progression or melodic figure at a different pitch or in a different key to that in which it was first given. A tonal or diatonic sequence is when no modulation takes place. A chromatic or real sequence takes place when the recurrence of a phrase at an exact interval causes a change of key.

2. **Roman Ritual**: A rhythm sometimes sung between the Epistle and the Gospel. At first it was merely a prolongation of the last note of the Alleluia, but afterwards appropriate words were substituted. When the Roman Missal was revised in the sixteenth century, only four of the existing sequences were retained: *Vidimus Paschali*, for Easter; *Veni, Sancte Spiritus*, for Pentecost; *Lauda, Sion*, for Corpus Christi; and the *Dies Ira*, for Masses of the Dead. The *Stabat Mater*, for the Feast of the Seven Dolours, is of later date.

"He made dyers impen. sequences, and responde, as O Joda."
—*Fabian: Chronycle*, ch. cclii.

sé-quent, a. & s. [Lat. *sequens*, pr. par. of *sequor* = to follow.]

"In scale of culture, few among my flock Hold lower rank than this *sequester'd* pair."
—*Wordsworth: Excursion*, bk. v.

3. Deprived of property, income, &c.; under sequestration.

"Aged, *sequestered* ministers."
—*Fuller: Worthies*.

II. Law: Seized and detained for a time, to satisfy a claim or demand.

***sé-ques-tra-ble, a.** [Eng. *sequester*; -*able*.] Capable of being sequestered or separated; subject or liable to sequestration.

"Hartshorn and divers other bodies belonging to the animal kingdom, abound with a not uneasily *sequestrable* salt."
—*Boyle*.

sé-ques-trà-te, v. t. [Lat. *sequestratus*, pa. par. of *sequestro* = to sequestrate (q. v.).]

1. *Ord. Lang.*: To set apart from others; to withdraw, to seclude.

"In general contagions, more perish for want of necessities than by the malignity of the disease, they being *sequestrated* from mankind."
—*Arbuthnot: On Air*.

2. *Law*: To sequester; specif. in *Scots Law*, to take possession of for behoof of creditors; to take possession of, as of the estate of a bankrupt, with a view of realizing it and distributing it equitably among the creditors.

sé-ques-trá-tion, s. [Fr., from Lat. *sequestrationem*, accus. of *sequestratio*, from *sequestratus*, pa. par. of *sequestro* = to sequester (q. v.); Sp. *sequestracion*; Ital. *sequestrazione*.]

I. Ordinary Language:

1. The act of sequestering or setting aside; separation, withdrawal, retirement.

"There must be leisure, retirement, solitude, and a *sequestration* of a man's self from the noise of the world."
—*South: Sermons*.

2. The state of being sequestered or set aside; retirement or withdrawal from society; seclusion.

"Any *sequestration* From open haunts and popularity."
—*Shakespeare: Henry V.*, I. 1.

3. In the same sense as II.

—*Blackstone: Comment.*, bk. III., ch. xxvii.

4. Disunion, disjunction, division, rupture.

"The metals remain unsevered, the fire only dividing the body into smaller particles, hindering rest and continuity, without any *sequestration* of elementary principles."
—*Boyle*.

II. Law:

1. Civil Law:

(1) The separation of a thing in controversy from the possession of those who contend for it.

(2) The setting apart the goods and chattels of a deceased person to whom no one was willing to take out administration.

(3) A writ directed by the Court of Chancery to commissioners, commanding them to enter the lands and seize the goods of the person against whom it is directed. It may be issued against a defendant who is in contempt by reason of neglect or refusal to appear or answer or to obey a decree of court.

(4) The act of taking property from the owner for a time till the rents, issues, and profits satisfy a demand; in Britain, a form of execution in the case of a beneficed clergyman, issued by the bishop of the diocese on the receipt of a writ to that effect. The profits of the benefice are paid over to the creditor until his claim is satisfied.

(5) The gathering of the fruits of a vacant benefice for the use of the next incumbent.

(6) The seizure of the property of an individual for the use of the state; particularly applied to the seizure by a belligerent power of debts due by its subjects to the enemy.

2. *Scots Law*: The seizing of a bankrupt's estate, by decree of a competent court, for behoof of the creditors.

sequesteror (as **sék-wës-trá-tör**), **s.** [Lat., from *sequestratus*, pa. par. of *sequestro* = to sequester (q. v.).]

sé-quoi-á, s. [Native name.]

1. Botany:

(1) A genus of Abietinæ, with peltate scales, no bracts, and five to seven seeds. Two species are known, Sequoia gigantea, formerly Wellingtonia gigantea, and S. sempervirens. The former is the Mammoth-tree (q.v.); its rings have been counted, and its age has been estimated at about 1,100 years. S. sempervirens, known in the timber trade as Red-wood, is sometimes above 300 feet high. It grows from Upper California to Nootka Sound.

(2) The Mammoth-tree (q.v.).

"The waving of a forest of the giant sequoias is indescribably sublime."—Seribner's Magazine, Nov., 1873, p. 66.

2. Palæobot.: A species is found in the Eocene of Bournemouth and the Isle of Wight; Sequoia Couttsiae occurs in the Oligocene of Bovey Tracey, and S. Langsdorffii in the leaf-beds of Ardun in Mull. S. Couttsiae also occurs abundantly in the Oligocene of Switzerland, and more than thirty species are found in the Miocene (?) of the Arctic regions.

sé-quoi-í-tōg, s. [Mod. Lat. sequoi(a); -ites.]
Palæont.: A genus of Conifera, akin to Sequoia (q.v.). Three species are found in the Cretaceous rocks.

sér-á-file, s. [Fr. serrefile = close of a file.]
Mil.: The last addler of a file.

"I should think the term seraphs has been generally known in the army for the last fifty years."—Evening Standard, June 19, 1873.

seraglio (as sé-rál'-yō), s. [Ital. seraglio = an inclosure, a paddock, a park, from serrare = to shut, to lock, to inclose, from Low Lat. sero, from Lat. sera = a bar, a bolt, from sero = to join or bind together. The modern use of the word is due to confusion with Pers. and Turk. sard, sardí = a palace, a grand edifice, a king's court, a seraglio. (Skeat.)]

*1. An inclosure, a place or quarter to which certain persons or classes are confined.

"I went to the ghetto, where the Jews dwell, as in a suburb, by themselves. I passed by the Piazza Judea, where their seraglio begins, for being inviron'd with walls, they are lock'd up every night."—Evelyn's Diary, Jan. 15, 1645.

2. A palace; specifically, the palace of the Sultan of Turkey at Constantinople.

3. A harem; a place in which wives or concubines are kept; hence, a place or house of debauchery or licentious pleasure.

"Could still exclude no welcome truth from the purities of his own seraglio."—Macaulay's Hist. Eng., ch. 11.

sér-rál', s. [Pers. & Turk. sard, sardí.] [SERAGLIO.] A palace, a place of accommodation for travellers; a caravanseray, a khan.

"He to Abdallah's palace grew,
And held that post in his seral."—Byron: Bride of Abydos, II, 16.

sér-rál, a. [Lat. sera (hora) = the evening (hour).]

Geol.: Late; an epithet expressing the period of the nightfall or late twilight of the Appalachian Palæozoic day. The coal-measure of North America occupy an area of 200,000 square miles, and range from 3,000 feet to such thickness as to be unworkable. From the fossils it is evident that the Appalachian Seral series is the equivalent of the European Carboniferous series. (Prof. H. D. Rogers: Geology of Pennsylvania.)

sér-ál'-bū-mén, s. [Eng. serum, and albumen.]

Chem.: C₇H₁₂N₁₀S₂O₂₂ (?). A substance occurring in all the liquids of the animal body. It may be obtained by diluting the serum of blood with twenty times its volume of water, precipitating the globulin with carbonic anhydride, and evaporating the filtrate below 50°. It closely resembles egg albumen, but its specific rotary power for yellow light = -56°. Ether does not coagulate its solutions.

sér-rāng, s. [See def.] An East Indian name for the boatwain of a vessel.

sé-ra-pō, s. [Sp.] A blanket or shawl worn as an outer garment by the Mexicans and other natives of Spanish North America.

1. Ord. Lang. & Script.: An angel of the highest order. They are mentioned in the Bible only in Isaiah vi, 2. 6. They were of human form, with six wings, with two of which they covered their faces, with the next two flew, and with the last two covered their feet. They resembled the cherubim, which, however, had four wings and four faces.

"Fly, Seraphs! to your eternal shore,
Where winds nor howl nor waters roar."
Byron: Heaven & Earth, I, 4

¶ Sometimes seraphim, really a Hebrew plural, is used as if it were a singular. [2, 3.]

2. Entom.: The genus Lobophora, belonging to the Larentiida, and spec. Lobophora hexapterata, in which there is an additional lobe to the hinder wings, giving the moth the appearance of a six-winged creature, whence the name Seraphim. It occurs in England.

3. Palæont.: A popular name for the genus Pterygotus (q.v.).

"The workmen in the quarries to which occur, finding form without body, and struck by the resemblance which the delicately-waved scales bear to the sculptured markings on the wings of cherubs—of all subjects of the chisel the most common—fancifully termed them Seraphim."—Hugh Miller: Old Red Sandstone, ch. viii.

sé-rāph'-iō, sé-rāph'-iō-ál, a. [Fr. séraphique; Sp. seraphico.]

1. Pertaining to a seraph; angelic, sublime; of the nature of a seraph.

"Add to their own dimensions, like themselves,
The great seraphim lords and cherubim."
Milton: P. L., I, 794.

*2. Pure; refined from sensuality.

"Or whether he at last descends
To like with less seraphic ends."
Swift. (Todd.)

3. Burning or inflamed with love or zeal; zealous, ardent.

"He [William Cartwright] became the most florid and seraphic preacher in the university."—Wood: Athen. Oxon., vol. II.

sé-rās-klēr-ate, s. [Eng. seraskier; -ate.] The office of a seraskier.

Sérb, s. [Native word.] A native or inhabitant of Servia.

sérb'-x-an, s. [After Serbia = Servia, where found.]

Min.: The same as MILOSCINE (q.v.).

Sér-bō-ní-an, a. [See def.] A term applied to a bog or lake of Serbonis, lying between the mountains Cæsius and Damietta in Egypt, or one of the more eastern mouths of the Nile.

Nile. It was surrounded on all sides by hills of loose sand, which being carried into the water by high winds so thickened the lake that it could not be distinguished from the land. Whole armies are reported to have been swallowed up in it.

"A quif profaned as that Serbonian bog . . .
Where armies whole have sunk."
Milton: P. L., II, 504.

Hence, the phrase Serbonian bog is used proverbially to express a difficulty or complication from which there is no way of extricating one's self; a mess, a confusion.

"I know of no Serbonian bog deeper than a *de mering* would prove to be."—B. Disraeli, in Times, March 14, 1857.

Meteor.: Fine rain falling from a cloudless sky.

sér-ě-nāde, sér-ě-nāde, s. [Fr. sérénate, from Ital. serenata = a serenade, from serenare = to make clear.] [SERENE.]

Music: Originally a vocal or instrumental composition for use in the open air at night, generally of a quiet soothing character. The term in its Italian form, serenata, came to be applied afterwards to a cantata having a pastoral subject, and in our own days has been applied to a work of large proportions in the form, to some extent, of a symphony.

"Serenate, which the starved lover sings
To his proud fair."
Milton: P. L., IV, 704.

sér-ě-nāde, v. t. & i. [SERENADE, s.]

A. Trans.: To entertain with a serenade; to sing a serenade to.

"To dance, dress, sing, and serenade the fair,
Conduct a finger, or reclaim a hair."
P. Whitehead: State Dunces.

B. Intrans.: To perform serenades or nocturnal music.

"When I go a serenading again with 'em, I'll give 'em leave to make fiddle-strings of my small guts."—Dryden: Evening's Love, II, 1.

sér-ě-nād-ēr, s. [Eng. serenade, v.; -er.] One who serenades.

"Knight & *sergeant* als how mykelle thei helde."
R. Brunne, p. 83.

ser-geant, **ser-jeant** (er as ar), **ser-jeant**, s. [O. Fr. *sergant*, *serjant*; Fr. *sergent*, from Low Lat. *servientem*, accus. of *serviens* = a servant, a vassal, a soldier, an apparitor, from *serviens*, pr. par. of *servio* = to serve (q.v.); Low Lat. *serviens ad legem* = a sergeant-at-law; Sp. & Port. *sargento*; Ital. *sergente*.]

1. Ordinary Language:

*1. A squire, attendant upon a prince or nobleman. (*English*.)

"To avoid the vague expressions of the followers, &c., I use, after Villenardouin, the word *serjeants*, for all horsemen who are not knights. There were *serjeants* at arms, and *serjeants* at law; and, if we visit the parade and Westminster Hall, we may observe the strange result of the distinction."—*Gibbon: Roman Empire*, ch. lx. (Note O.)

2. A sheriff's officer; a bailiff.

"Your office, *serjeant*."—*Shakespeare: Henry VIII.*, l. 1.

3. In the same sense as II. 2.

ser-í-ál-y-tý, s. [Eng. *serial*; -ity.] The state or condition of following in successive order; sequence.

ser-í-al-ly, adv. [Eng. *serial*; -ly.] In a series, or in regular order; as, Things arranged serially.

Ser-í-an, a. [From Lat. *sericus*.] [SERIFORM.] Chinese. (*Fletcher: Purple Island*, xii.)

ser-í-á-na, s. [SERMANIA.]

ser-í-ate, a. [Eng. *seric(es)*; -ate.] Arranged in a series or succession; pertaining to a series.

ser-í-ate-ly, adv. [Eng. *seriate*; -ly.] In a regular series; seriatim.

ser-í-á-tim, adv. [Lat.] In regular order; one after the other.

ser-í-ca, s. [Fem. of Lat. *sericus* = silky. Named from the silky appearance of these insects, which vary in hue according as the light falls on them.]

Entom.: A genus of Melolonthine. Body ovate, convex; claws of all the tarsi divided at the apex. One, *Serica brunnea*, is British. Some of the African species are globose.

***ser-í-cate**, a. [Lat. *sericatus*.] Pertaining to silk; covered with silk; sericeous.

sê-ric-eous (c as sh), a. [Lat. *sericeus*, from *sericum* = silk.]

*1. Ord. Lang.: Pertaining to silk; consisting of silk; silky.

2. Bot.: Silky (q.v.).

sê-ric-ic, a. [Eng. *seric(in)*; -ic.] (See compound.)

sericic-acid, s. [MYRISTIC ACID.]

sê-ric-í-dês, s. pl. [Mod. Lat. *seric(a)*; Lat. masc. or fem. pl. adj. suff. -ides.]

Entom.: A section or group of Melolonthine (q.v.). Many are Australian, but one species of the genus *Serica* (q.v.) is British.

ser-í-çin, s. [Lat. *sericum* = silk; -in.]

Chem.: A name proposed for the fibroin of silk to distinguish it from the organic matter

of the sponge, for which the name fibroin would be retained. It was once applied to myristin on account of its silky aspect.

sêr-í-çite, s. [Gr. *σέρικος* (*serikos*) = silk.]

Min.: A scaly mineral found in a silky schist near Wiesbaden. Early analyses were very discordant, owing to the non-recognition of impurities. It has now been shown by Laspeyres to be a massive muscovite (q.v.), resulting from the alteration of fclapar.

sericite-gneiss, s.

Petrol.: A gneiss in which sericite constitutes the principal micaceous constituent.

sericite-schist, s.

Petrol.: A schistose rock in which sericite predominates.

sêr-í-cô, **sêr-í-**, pref. [Gr. *σέρικος* (*serikos*) = silky.] Silky; resembling silk in texture or appearance.

sêr-í-cô-lite, s. [Gr. *σέρικος* (*serikos*) = silk, and *λίθος* (*lithos*) = a stone.]

Min.: The same as SATIN-SPAR (q.v.).

sêr-í-côr-í-dês, s. pl. [Mod. Lat. *sericor(is)*; Lat. fem. pl. adj. suff. -ides.]

Entom.: A family of Tortricina. Anterior wings rather broad; costa generally much rounded, the tip sometimes pointed. Larva feeding between united leaves or in roots. Known British species, twenty-two.

sêr-íc-ór-ís, s. [Gr. *σέρικος* (*serikos*) = silky, and *κόρις* (*koris*) = a bug.]

Entom.: The typical genus of Sericoride (q.v.). *Sericoris vittalis* is a small moth, the larva of which feeds on *Armeria vulgaris*.

sêr-í-côs-tô-ma, s. [Pref. *serico-*, and Gr. *στόμα* (*stoma*) = a mouth.]

Entom.: The type-genus of Sericostomatide (q.v.). Antennæ about the length of anterior wings, joints short, with adpressed pubescence; head densely hairy; eyes large; legs long, normal in tarsal structure; abdomen short and moderately stout. Larvæ regular in form; the insects appear in summer, and do not stray far from their breeding-places; their cylindrical cases are found in moderately swift streams. MacLachlan admits sixteen species, all from Europe, one of which, *Sericostoma personatum*, is British.

sêr-í-cô-stô-mát-í-dês, s. pl. [Mod. Lat. *sericostoma*, genit. *sericostomal(is)*; Lat. fem. pl. adj. suff. -ides.]

Entom.: A family of Trichoptera (q.v.). Antennæ as long as the wings, very stout, and strongly hairy; eyes moderately large; labial palpi nearly alike, but maxillary palpi very differently formed in the sexes; head small; abdomen short; legs short, tibial spurs varying; wings often densely pubescent. Larvæ almost always inhabiting streams, and varying considerably in form; case free, usually of sand or small stones. Almost universally distributed. MacLachlan divides the family into four sections, with nineteen genera.

† **sêr-íc-tôr-í-a**, s. pl. [Gr. *σῆρ* (*ser*), genit. *σῆρος* (*seros*) = the silkworm, and *κέρπος* (*kerpos*) = the jaundice.]

*serie, s. [Fr., from Lat. *seriem*, accus. of *series* (q.v.).] A series (q.v.).

sér-í-è-ma, s. [CARIAMA.]

sér-í-èg, sér-í-èg, s. [Lat., from *sero* = to join together; Fr. *serie*; Sp. & Ital. *serie*.]

I. *Ord. Lang.*: A continued succession of similar things, or of things bearing a similar relation to each other; an extended order, line, or course; a sequence, a succession.

¶ There is always a *course* where there is a *series*, but not *vice versa*. Things must have some sort of connection with each other in order to form a *series*, but they need simply follow in order to form a *course*; thus a *series* of events respects those which follow out of each other, a *course* of events, on the contrary, respects those which happen uncon- nectedly within a certain space. (Craob.)

II. Technically:

1. *Arith. & Alg.*: An infinite number of terms following one another, each of which is derived from one or more of the preceding ones, by a fixed law, called the law of the series. Wherever a sufficient number of terms is given, and the law of the series is known, any number of succeeding terms may be deduced.

2. *Bot.*: A row or layer. In botanical classification, a grade intermediate between a class and an order.

3. *Chem.*: A group of compounds, each containing the same radical. Thus the hydro- carbon, CH₄, Methane, may take up any number of the molecules of the radical CH₂, thereby giving rise to the series, C₂H₆, Ethane, C₃H₈, Propane, C₄H₁₀, Quartane, &c.

4. *Geol.*: A term long used more or less vaguely, but now precisely, of subdivisions of sedimentary strata. [SEDIMENTARY, 11.]

¶ 1. *Arithmetical series*: An arithmetical progression (q.v.). The sum of *n* terms of such a series is given by the formula, $s = \frac{n(a+d)}{2}$ in which *a* denotes the first term, *d* the last term, and *n* the number of terms.

2. *Circular series*: A series whose terms depend on circular functions, as sines, co- sines, &c.

3. *Converging series*: [CONVERGENT, II. I.]

4. *Decreasing series*: [DECREASING-SERIES].

5. *Diverging series*: [DIVERGENT-SERIES].

6. *Exponential series*: [EXPONENTIAL- SERIES].

7. *General term of a series*: [GENERAL-TERM, ¶].

8. *Geometrical series*: A geometrical pro- gression (q.v.). The sum of *n* terms of such a series is given by the formula, $s = \frac{r^n - a}{r - 1}$ in which *r* denotes the last term, *a* the first term, and *r* the ratio.

9. *Harmonical series*: [HARMONICAL-SERIES].

10. *Increasing series*: A series in which the numerical value of each term is greater than that of the preceding.

11. *Indeterminate series*: [INDETERMINATE- SERIES].

12. *Infinite series*: [INFINITE-SERIES].

13. *Law of a series*: [LAW (1), s., 11. 1.]

14. *Logarithmic series*: A series derived by developing the logarithm of (1 + *y*) according to the ascending powers of *y*.

15. *Recurring series*: [RECURRING-SERIES].

16. *Trigonometrical series*: Series derived from developing some of the trigonometrical functions.

17. *Summation of a series*: The operation of finding an expression for the sum of any number of terms of this series.

sér-í-f, sér-í-f, sér-í-ph, s. [CERIPH.]

Sér-í-form, a. [Lat. *Seres* = the Chinese; *forma* = form.]

Anthrop.: A term collectively applied by Latham to the peoples inhabiting China, Thibet, the Indo-Chinese peninsula, and the base of the Himalayan range. He groups them together principally on account of the total absence of infection from the various tongues spoken by them.

sér-í-graph, s. An instrument of American invention for testing the uniformity of raw silk.

sér-í-ò-phús, s. [Pref. *seri-*, and Gr. *λόφος* (*lophos*) = a crest.]

Ornith.: A genus of Eurylaimiids (or, if that family is divided, of Eurylaimiine), with two species ranging from Kessal to Texas- Broadbill, feeds on fruits, and in other re- spects shows a remarkable analogy to the Chatterers.

sér-rím-ò-tér, s. An instrument for testing the tensile strength of a silk thread.

sér-in, a. [Fr.]

Ornith.: *Serinus hortulanus* (Koch), a finch closely allied to the canary, common in cen- tral and south-eastern Europe, and an occa- sional visitor to England. Mantle and back dark-grayish brown, each feather broadly edged with yellow; head, olive-gray; chin, throat, and breast, bright gamboge-yellow, paling to white on the belly.

"The *serin* is a very popular cage-bird on the con- tinent."—Farrell: *Brit. Birds*, ed. 4th, 11. 115.

serin-finch, s.

Ornith.: Any individual of the genus *Ser- inus* (q.v.).

ser-ing, s. [SAIRING.]

sér-in-ús, s. [Mod. Lat., from *serin* (q.v.).]

Ornith.: A genus of Fringillide (q.v.). Bill abort, stout, conical, broad at base; nos- trils basal, round, hidden by stiff frontal feathers directed forward, gape straight, without bristles; wings moderately long, rather pointed, tail moderate in length, deeply forked. *Serinus hortulanus*, the Serin; *S. canonicus*, Tristran's Serin; *S. oenanthe*, the Canary; and *S. pusillus*, the Red-fronted Finch, inhabit the Western Palearctic region, but species occur in the Eastern Palearctic, Oriental, and Ethiopian regions.

sér-í-ò, pref. [SERIOUS.] Having a mixture of serious interest; partly serious.

serio-comedy, s. A comedy with a vein of serious thought running through it.

"Its method is clear, its story is told, and told tunefully and gaily, as befits a *serio-comedy*."—*Pall Mall Gazette*, April 30, 1884.

serio-comic, serio-comical, a. Half serious and half comic; having a mixture of seriousness and comicality.

sér-í-ò-la, s. [Etym. not apparent.]

Ichthy.: A genus of Carangide, with twelve species, from nearly all temperate and tropi- cal seas. Body oblong, slightly compressed, abdomen rounded; first dorsal continuous, with feeble spine; villiform teeth in jaws and on vomer and palatine bones. The larger species are from four to five feet long, and are valued for food.

sér-í-ò-us, *ser-y-onse, a. [Fr. *serieux*, from Low Lat. *seriosus*, from Lat. *serius* = serious.]

1. Grave in manner or disposition; not light, flippant, or voluble; thoughtful, solemn.

"*Serious* and thoughtful was her mind."—*Wordsworth*: *Hecurion*, bk. vi.

2. Really intending what is said; not trifling, jesting, or joking; being in earnest.

3. Deeply impressed with the importance of religion.

5. Dangerous; attended with danger; giving rise to apprehension: as, a *serious* illness.

¶ For the difference between *grave* and *serious*, see GRAVE.

sér-í-ò-us-ly, adv. [Eng. *serious*; -ly.]

1. In a serious manner; gravely, solemnly; in earnest.

"Do not *seriously* set yourselves to be good. Do not put your hearts *seriously* affected with religion."—*Sharp*: *Sermons*, vol. 1, ser. 1.

2. In a serious manner or degree; weightily, gravely, dangerously.

"Evidence would have *seriously* affected many Jacobite noblemen, gentlemen, and clergymen."—*Macauley*: *Hist. Eng.*, ch. xiii.

sér-í-ò-us-ness, s. [Eng. *serious*; -ness.]

1. The quality or state of being serious; gravity of manner or of mind; solemnity; absence of jesting or frivolity.

"*Seriousness* seemed not to express *seriousness* enough."—*Stillingfleet*: *Sermons*, vol. 1, ser. 6.

2. Earnest attention, especially to religious concerns.

"The first requisite in religion is *seriousness*: no impression can be made without it."—*Paley*: *Sermons*, No. 1.

3. Danger: as, the *seriousness* of an illness.

sér-í-ò-sa, s. pl. [Mod. Lat. *seriphium*]; Lat. fem. pl. adj. suff. -*es*.]

Bot.: A sub-tribe of Senecionideæ.

sér-í-ò-üm, s. [Gr. *σέριφος* (*seriphos*) = a kind of wormwood.]

Bot.: The typical genus of Seriphieæ.

sér-í-ò-sa, s. [Not explained. (Paxton).]

Bot.: A genus of Spermocoidæ. Only known species *Serissa fedida*, a shrub with white flowers, found in India, China, and Japan. Its root is given in diarrhæa, ulcer- ation, &c.

sér-jā-ní-a, sér-í-à-na, s. [Named after Paul Sergeant, a French friar and botanist.]

Bot.: A genus of Sapindæ. The species are from tropical America. *Serjania triterinata* is used as a poison for fish. *S. lethalis* is probably one of the plants yielding a kind of deleterious honey.

*ser-jeant-çy, *ser-jeant-çy (or as ar), s. [Eng. *serjeant*; -cy.] The same as SER- JEANTSHIP (q.v.).

"The lord keeper [who] congratulated their adoption to that title of *serjeancy*."—*Hackett*: *Life of William*, p. 110.

ser-jeant (er as ar), s. [SERJEANT.]

1. Formerly an officer in England, nearly answering to the more modern bailiff of the hundred; also an officer whose duty was to attend on the king, and on his lord high- steward in court, to arrest traitors and other offenders. Now called a Serjeant-at-Arms (q.v.).

2. *English Law*: A lawyer of the highest rank. He is called serjeant-at-law (*serrens ad legem*), serjeant-counter, or serjeant of the cof. Up to 1874 all common law judges were admitted to the rank of serjeants-at-law be- fore sitting as judges. Serjeants were ap- pointed by writ or patent of the crown. The title was abolished in 1880. The number of serjeants-at-law was limited to fifteen. The most valuable privilege enjoyed by them was the monopoly of pleading in the Court of Common Pleas. This was taken away from them by the Act 9 & 10 Vict., c. 54 (1846), when the privilege was extended to barristers of any degree practising in the superior courts at Westminster. They wore scarlet robes, and in former times a coif or hood, of lawn, upon the head. This latter was afterwards represented by a small circle of black silk, of about three inches in diameter, upon the top of the wig. They were addressed as "Brothers" by the judge.

"The degree were those of barristers (first styled apprentices from apprentice, to learn, who answered to our barristers: as the state and degree of a *serjeant*, *serrens ad legem*, did to that of a doctor."—*Blackstone*: *Comment.*, (Introduct., § 1.)

3. *Mil.*: A serjeant (q.v.).

¶ (1) *Common serjeant*: [COMMON-SERJEANT].

***sēr-mūn-ċle, s.** [A dimn. from Lat. *sermo* = a discourse.] A short sermon or discourse; a sermonette.

"The essence of this devotion is a series of sermuncles, meditations, hymns, or prayers."—Church Times, April 2, 1886.

sēr-ō-lin, s. [Eng. *ser(um)*, (alcohol), and suff. -*lin*.]

Chem.: A name given to a fatty substance extracted from dried blood-serum by the action of alcohol or ether. According to Goble it is not a pure substance, but a mixture of several fats of different melting points.

sēr-ō-lis, s. [Ety. not apparent.]

Zool.: A genus of Isopoda, containing only one species, *Cymothoa paradoxa*. Formerly it was supposed to be the most closely akin of any living crustacean to the extinct Trilobites. Much nearer approaches are now known. [TRILOBITE.]

sēr-rōn, sēr-rōn, s. [Sp. *seron* = a pail, a basket.]

1. A weight varying with the substance which it measures: a seroon of almonds is 87½ lbs, a seroon of anisee-seed from three to four hundredweight.

2. A bale or package made of hide or leather, or formed of pieces of wood covered or fastened with hide for holding drugs, &c.; a seroon.

sēr-rōs-i-tŷ, s. [Fr. *serosité*; Sp. *serosidad*; Ital. *serosità*.]

1. The quality or state of being serous.

2. A serous fluid; serum; the watery part of the blood which exudes from the serum when it is coagulated by heat.

"The serum is a general investment, containing the nutritious or thin serosity perspirable through the skin."—Browne: Vulgar Errors, bk. v, ch. xxi.

sēr-ō-tine, s. [SEROTINUS.]

Zool.: *Vesperugo serotinus*, a bat occurring only in the south-eastern counties of England, commoner in France, and distributed over a great part of Europe, temperate Asia, and the north of Africa. Head and body together about three inches long; fur soft and silky, usually chestnut-brown above and yellowish-gray beneath, but varying somewhat in different individuals.

†sēr-ōt-in-ōus, a. [Lat. *serotinus*, from *serus* = late.]

Bot.: (1) Appearing late in a season; (2) Evening flowered.

sēr-ōus, *sēr-ōae, a. [Fr. *seroux*, from Lat. *serosus*.] [SERUM.]

1. Of or pertaining to serum.

"This disease [dropsy] may happen wherever there are serous vessels."—Astruc: On Diet, ch. iv.

2. Thin, watery; like whey. (Applied to that part of the blood which separates in evaporation from the grumous or red part, also to the fluid which lubricates a serous membrane.)

"[This] cannot keep it from squeezing on all sides, and pressing out the milky and serous humour in the butter, if there were any such pressure, as is supposed."—More: Antidote against Atheism, bk. li, ch. li.

serous-apoplexy, s.

Pathol.: Apoplexy produced by serous effusion on the brain.

serous-membrane, s.

Anat. (Pl.): Membranes having their surface moistened by serum. They line cavities of the body from which there is no outlet. The chief are the peritoneum, the two pleurae, the pericardium, and the arachnoid membrane. Serous membranes differ from mucous membranes in having thinner layers, finer fibres, and an epithelium with only a single layer of polygonal cells.

Sēr-pēns, s. [Lat. = a serpent.] [SERPENT, s., A. II. 1.]

sēr-pent, s. & a. [Fr., from Lat. *serpentem*, accus. of *serpens* = a serpent; lit. = a creep-

ing thing, from *serpens*, pr. par. of *serpo* = to creep; Gr. *ἔρπω* (*herpō*) = to creep.]

A. As substantive:

I. Ordinary Language:
 1. *Lit.:* In the same sense as II. 4.
 2. *Fig.:* A subtle, treacherous, and malicious person.

II. Technically:

1. *Astron.:* One of the forty-eight ancient constellations extending serpent-like through a wide expanse of sky. The head is under *Corona borealis*, the body winds through Ophiuchus, and the tail reaches the Milky Way near the constellation Aquila. Its stars are generally very small, the largest, *Cor serpens*, being intermediate between the second and the third magnitude.

2. *Music:* An almost obsolete bass instrument of a powerful character. It is a wooden tube, about eight feet long, increasing conically from ½ inch diameter at the mouthpiece to four inches at the open end, twisted into V-shaped turns, followed by a large circular convolution. This is covered with leather, and has a mouth-piece like a horn or trombone, and keys for the several notes to be produced. It was invented by a French priest at Auxerre in 1590, and is frequently used in the orchestra to strengthen the bass part; but it requires to be very skilfully blown. The serpent is a transposing instrument, being in a flat, and the part it is to take is therefore written a note higher than its real sound. Its compass is three octaves and one note.

3. *Pyrotechny:* A small paper tube, filled with mealed powder or rocket composition, and very compactly driven. Serpents are used for filling paper shells or the pots of rockets, and pursue a wavering serpentine course through the air when ignited.

"In fireworks give him leave to vent his spite, These are the only serpents he can write." Dryden: Abolom & Achitophel, II. 451.

4. *Zool. (Pl.):* Ophidia, an order of Reptiles popularly distinguished from the rest of the class by having a very elongated body and no external limbs. They are very widely distributed, abounding in the tropics, where they attain their greatest size, absent only from the Arctic and Antarctic regions, and they are mentioned in the earliest records of the human race. The body and tail are covered with scales, and the head often with plates or shields. Locomotion is effected either entirely by means of the ribs, the free extremities of which are attached by muscular connections to the abdominal scales—the animals walking, so to speak, on the ends of their ribs, or aided by rudimentary hind limbs, the only external trace of which is a horny claw or spur, as in the case of the Boas and Pythonas (to which the name serpent is often popularly confined). They are divided into three groups: Innocuous, Venomous, and Viperine, the last two groups possessing poison-fangs, the Boas, which kill their prey by constriction, belonging to the first. Broadly speaking, the innocuous serpents are oviparous, the venomous are oviviparous. Most of the former, like the Common English Snake (*Tropidonotus natrix*), deposit the eggs in a long string in some heap of decaying vegetable matter, and leave them; while some of the larger serpents coil round their eggs, and hatch them by the heat of their bodies. The senses of smell and taste are probably not acute; the ear has no external opening, but they are sensible of sound, and especially of sharp, shrill notes (*Stereocentronotus*); the eyes are small, and protected from injury by a transparent integument, which comes away with the slough when the animal casts its skin, which happens at least once a year. [TROPIDONOTUS.] Serpents are very variously coloured; some are extremely beautiful; but, as a rule, the venomous kinds are of darker and more uniform coloration than those which are not poisonous. Some of the innocuous kinds are capable of being tamed; the Rat-snake (*Ptyas mucosus*) is often kept in houses in India for the purpose of destroying rats and mice, but by the generality of mankind serpents are regarded with aversion and horror; and Brehm and Darwin both note the terror which they excite in monkeys—zoologically so near akin to man. There are numerous species in the United States,

SERPENT.

fāte, fāt, fāre, amidst, whāt, fāl, father; wō, wēt, hēre, camēl, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, wnite, cūr, rāle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā; qu = kw.

including several poisonous species of rattlesnakes, copperheads and moccasins. In England the bite of the viper is venomous but rarely of never fatal. Ireland has no snakes. [SNAKE.]

B. As adjective:

1. Serpentine, winding.

2. Deceitful, treacherous, subtle. (Pope.)

serpent-bearer, s. [SERPENTARIUS.]

serpent-boat, s. [PAMBAN-MANCHE.]

serpent-charmer, s. One who charms or professes to charm serpents; a snake-charmer.

"In general these serpent-charmers were, and are, distinct tribes of men in their several countries, professing the power they claim to be an inherent and natural function."—McCintock & Strong: *Bib. Cyclop.*, ix. 566.

serpent-charming, s. A fascination exercised over a serpent by simple music. Many itinerant showmen make a living in the East by exhibiting their powers over venomous snakes. The practice has come down from remote antiquity, and is alluded to in Psalm lviii. 4, 5, and Jer. viii. 17. In most cases the cobra (*Naja tripudians*) is the serpent charmed, and the poison-fangs are generally extracted; if this is not done the performer holds a cloth in one hand which he allows the serpent to strike, and so exhaust the supply of venom. A large proportion of so-called serpent charmers are, however, mountebanks who perform with non-venomous serpents or those drugged into harmlessness.

serpent-cucumber, s.

Bot.: *Trichosanthes colubrina*

serpent-deity, snake-deity, s.

Compar. Relig.: A serpent worshipped as a divinity or as the avatar of some deity or spirit.

"Serpent worship . . . appears to have maintained no mean place in early Indian Buddhism, for the sculptures of the Sanchi top show scenes of adoration of the five-headed snake-deity in his temple."—Tyler: *Prim. Cult.* (ed. 1878), II. 240.

serpent-eagle, s.

Ornith.: The genus *Spilornis* (q.v.).

serpent-eater, s.

1. Ornith.: The Secretary-bird.

2. Zool.: [MARKHOOR.]

serpent-fence, s. A zigzag fence made by placing the ends of the rails upon each other.

serpent-fish, s.

Ichthy.: *Cepola rubescens*.

serpent-like, a. Like a serpent.

"Struck me with her tongue,
Most serpent-like, upon the very heart."
Shaksp.: *Lear*, II. 4.

serpent-race, s.

Compar. Relig.: A race which at one time probably had a serpent as a totem, and so came to attribute their descent to a serpent. [OPHOENE; see extract.]

"The Sanskrit name of the snake, 'adga,' becomes also the accepted designation of its adorers, and thus mythological interpretation has to reduce to reasonable sense legends of serpent-races, who turn out to be simply serpent-worshippers."—Tyler: *Prim. Cult.* (ed. 1878), II. 240.

serpent-withe, s.

Bot.: A plant, *Aristolochia odoratissima*.

serpent-wood, s. [OPHIOXYLON.]

serpent-worship, s.

Compar. Relig.: Ophiolatry; the worship of serpents as symbols or avatars of a deity, a branch of animal-worship [ZOOLOGY], with a wide range in time and space. Fergusson connects it with Tree-worship (q.v.). He considers that the curse pronounced on the Serpent (Gen. iii. 14, 15) had reference to serpent-worship, and was put in by the writers of the Pentateuch, who "set themselves to introduce the purer and loftier worship of the Elohim, or of Jehovah," in order to discountenance an older faith, to which from time to time some of the Jews seem to have reverted (2 Kings xviii. 4; Exodus xi. 15, Story of Bel). In Greece the centre of serpent-worship was the grove of Epidaurus, whence the Romans, on the occasion of a plague, A. V. C. 462, sent for a serpent, and brought it to Rome with great ceremony (*Liv.* x. 47; *On. Met.* xv. 626-744); at the siege of Troy a serpent appears as an omen of victory to the Greeks (*Il.* ii. 304; cf. *On. Met.* xi. 1-23), and from Pline we know that Alexander was reputed to have

been of a serpent-race. In Roman history many traces of serpent-worship appear. In addition to the embassy to Epidaurus, may be cited the fate of Laocoon (*Æn.* ii. 201-33), the snake which glided from the tomb of Anchises (ib. v. 84-99), and which Æneās considered to be either the *genius loci*, or the spirit of his father; and the sacred serpent of Lanuvium (*Prop.* iv. 8); whilst from Persians (*I.* 113), and from discoveries at Pompeii and Herculaneum it is clear that the serpent was a sacred emblem. In modern times serpent-worship is prevalent among some of the Indians of North America, on the west coast of Africa, and, to a great extent, in India.

"When we first meet serpent-worship either in the wilderness of Sinal, the groves of Epidaurus, in Sarmatian huts, or Indian temples, the serpent is always the Agathodæmon, the bringer of health and good fortune. He is the teacher of wisdom, the oracle of future events. His worship may have originated in fear, but long before we become practically acquainted with it, it had passed to the opposite extreme among its votaries."—Fergusson: *Pris & Serpent Worship*, p. 8.

serpent-worshipper, s.

Compar. Relig.: One who pays divine honours to serpents. [SERPENT-WORSHIP.]

"A race of serpent-worshippers, figuratively represented with snakes growing from their shoulders, and whose king himself has a five-headed snake arching hood-wise over his head."—Tyler: *Prim. Cult.* (ed. 1878), II. 240.

serpent's beard, s.

Bot.: *Ophiopogon japonica*.

Serpent's heart, s. [COR, ¶ 4.]

serpent's tongue, s.

1. Bot.: *Ophioglossum vulgatum*.

* 2. Paleont.: A popular name for the tooth of a particular shark. It resembles a serpent's tongue with its root.

* **sér-pent, v. i. & t.** [SERPENT, s.]

A. Intrans. To wind like a serpent; to meander.

"This moon, that sun . . .
Did the serpentine seasons interchain."
Drummond, a 18.

B. Trans. To curl or wind round; to encircle.

"Fruit trees whose boles are serpented with excellent vines."—Evelyn: *Memoirs*, I. 137.

sér-pén-tár-í-á, s. [SERPENTARY.]

sér-pén-tá-rí-í-dæ, s. pl. [Mod. Lat. *serpentari(us)*; Lat. fem. pl. adj. suff. *-idæ*.] [SERPENTARIUS, 2.]

sér-pén-tár-í-üs, s. [Lat.]

1. Astron.: Ophiuchus (q.v.).

2. Ornith.: A genus of doubtful affinities, sometimes placed with the Falconide, but, according to Prof. Newton, properly made the type of a family Serpentariide. There is but one species, *Serpentarius cristatus*, the Secretary-bird (q.v.).

3. Paleont.: One species, *S. robustus*, from the Miocene of the Allier.

sér-pen-tar-ý, sér-pén-tár-í-á, s. [Lat. *serpentaria*.]

1. Bot.: *Aristolochia serpentaria*. The root has an aromatic and camphoraceous odour, and a bitter camphoraceous taste.

2. Pharm.: The root is used to form an infusion and a tincture of serpentary. They are stimulant, tonic, diaphoretic, and diuretic. Sometimes used in atonic rheumatism, in low fever, and to promote eruption in exanthemata.

* **sér-pén-tôs, s. pl.** [Lat. pl. of *serpens* = a serpent (q.v.).]

Zool.: The second order of Linnaeus's Amphibia. It consisted of six genera: Crotalus (five species), Boa (ten species), Coluber (ninety-five species), Anguis (fifteen species), Amphibœna (two species), and Cœcilia (two species).

* **sér-pént-í-form, a.** [Lat. *serpens*, genit. *serpentis* = a serpent, and *forma* = form.] Having the form of a serpent; serpentine.

* **sér-pén-tig-én-ous, a.** [Lat. *serpens*, genit. *serpentis* = a serpent, and *gigno*, pa. t. *genúi* = to beget.] Born or bred of a serpent.

sér-pén-tins, a. & s. [Fr. *serpentin*, from Lat. *serpentinus*, from *serpens*, genit. *serpentis* = a serpent; Sp. & Ital. *serpentino*.]

A. As adjective:

I. Ordinary Language:

1. Pertaining to or resembling a serpent; having the qualities of a serpent; subtle.

"Heart-stung with a serpentine desire."
A. C. Swinburne: *Tristram of Lyonesse*, I.

2. Winding, or turning one way and the other, like a moving serpent; meandering, crooked, anfractuoso.

"In a state of health accompanying youth, the outlines are waving, flowing, and serpentine."—Raphael: *Art of Painting*, No. 85.

II. **Manège:** Applied to a horse's action when he is constantly moving it and sometimes passing it over the bit.

B. As substantives:

* 1. **Ord. Lang.:** A winding in and out; a curve; a serpentine figure.

"Keeping up an amount of warmth that is denied to the more sedate delineator of the S. Q. serpentine, and what not!"—*Field*, March 13, 1866.

II. **Technically:**

1. **Ordin.:** An old form of cannon of seven inches bore. The handles represented serpents.

2. **Min.:** An abundant mineral occurring in one or other of its numerous varieties in all parts of the world. Crystallization, probably orthorhombic, but when found in distinct crystals always pseudomorphous. Occurs usually massive, but sometimes fibrous, foliated, fine granular to cryptocrystalline. Hardness, 2.5 to 4; but varying according to purity; sp. gr. 2.6 to 2.65; lustre, sub-resinous to greasy, pearly, dull; colour, many shades of green, yellow; streak, white, shining; translucent to opaque; feel, greasy; fracture, either conchoidal or splintery. Comp.: silica, 44.14; magnesia, 42.97; water, 12.89 = 100, corresponding with the usually-accepted formula, 2MgO.SiO₂ + MgO.2HO. Dana divides this species as follows:

A. Massive: (1) Ordinary massive, comprising precious and common serpentine; (2) Bœotian, embracing Actinaitic and Vorhauserite; (3) Porcellanous; (4) Bowenite.
B. Lamellar: (5) Antigorite, (6) Williamsite.
C. Thin Foliated: (7) Maroonite, (8) Thermo-phylite.
D. Fibrous: (9) Chrysotile, (10) Picroite, including Mica-like and Balmuirite.
E. Crystallized.
F. Serpentine rocks.

3. **Petrol.:** A rock consisting essentially of a hydrated silicate of magnesia, resulting from the alteration of magnesian rocks, of all geological ages, especially those of olivine. It contains also some protoxide of iron, and other impurities which cause a dull green, but is also marbled and mottled with red and purple. It takes a high polish, and is turned into ornamental articles. The accessory minerals are numerous, the most frequent being pyrope, brozite, magnetite, and chromite.

4. **Geol.:** Serpentine is considered an altered intrusive rock, originally a trap or dolerite with olivine. Prof. Bonney limits the term to the type found at the Lizard, in Cornwall. It has been maintained that in some cases serpentine may have arisen from the alteration of sedimentary rocks.

serpentine-stone, s. [SNAKE-STONE.]

serpentine-verse, s. A verse which begins and ends with the same word; as, "Crescit amor natum, quantum ipsa pecunia crescit."
"Greater grows the love of gold, as gold itself grows greater."

"Ambo florescens etatibus, Arcades ambo."
Both in the spring of life, Arcadians both.

* **sér-pén-tine, v. t. & t.** [SERPENTINE, a.]

A. Trans. To wind or twine round; to encircle.

"My dear," said Hiram, serpentine his long arm about her."—*D. C. Murray: Fat. Strange*, ch. xlv.

B. Intrans. To wind in and out like a serpent; to meander.

"In those fair valleys by Nature found to please,
Where Guadalupe serpentine with ease."
Harte: *Vision of Death*.

* **sér-pén-tine-ly, adv.** [Eng. *serpentine*, s.; *-ly*.] In a serpentine manner.

sér-pen-tin-íng, pr. par. or a. [SERPENTINE, v.]

* **sér-pén-tin-íng-ly, adv.** [Eng. *serpentine*; *-ly*.] Serpentine.

"They . . . serpentine-ly enrich the roof."
A. Browning: *Botanist's Adventure*.

sér-pén-tin-ite, s. [Eng. *serpentin(e)*; suff. *-ite* (Petrol.).]

Petrol.: A name used to designate the rock serpentina to distinguish it from the mineral of the same name.

* **sér-pén-tin-ous, a.** [Lat. *serpentinus*.] Pertaining or relating to, or of the nature of a serpent; serpentine.

boil, boy; pouit, jowli; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f. -cian, -tian = shan. -tion, -sion = shün; -tion, -sion = zhün. -cious, -tious, -sious = shüs. -ble, -dle, &c = bel, del.

- ser-pent-ize**, v.t. [Eng. *serpent*; -ize.] To wind in and out like a serpent; to meander.
"The lane serpentine for many a mile."—*Mason: Note on Urug, let. 4.*
- ser-pent-ry**, s. [Eng. *serpent*; -ry.]
1. A winding in and out, like that of a serpent; a meandering.
2. A place infested by serpents.
3. (A collective noun.) Serpents; beings having the characteristics of serpents.
"Left by men-slugs, and human serpents."
Keats: Endymion, l. 821.
- ser-pot**, s. [Lat. *stipiculus* = a basket made of rushes; *stipus, scirpus* = a rush.] A basket.
- ser-plér-ite**, s. [After M. Serpier(i); suff. -ite (Min.).]
Min.: An orthorhombic mineral occurring in small crystals of a greenish-blue colour, and stated to be a basic sulphate of copper and zinc. Made a new species principally on optical grounds, but (as suggested by Dans, jun.) needs further chemical examination. Found at the Laurium mines, Greece.
- ser-pig-in-ous**, a. [Lat. *serpigo*, genit. *serpiginis*.]
1. *Ord. Lang.*: Affected with *serpigo* (q.v.).
2. *Pathol.*: Extending from several points in the form of portions of circles. Used spec. of serpiginous chancre.
"It began with a *serpigo*, making many round spots, such as are generally called ring-worms, with extram itching, which by frequent scratching heated and matted, and afterwards scabbed, and in progress overpread her limbs with a dry white scurf, under which the *serpiginous* circles lay covered."—*Wiemann: Surgery, bk. 1, ch. xxv.*
- ser-pi-gō**, s. [Lat.] A kind of tetter, or dry eruption on the skin. (*Nares*.)
"For thy own bowels, which do call thee sir,
Do curse the goat, *serpigo*, and the rheum."
Shakspeare: Measure for Measure, III. 1.
- ser-pláth**, s. [A corrupt, of *serpillar*.] A weight equal to 80 atones. (*Scottish*.)
- ser-pó-lót**, s. [Fr.]
1. Wild thyme.
2. An oil from *Thymus Serpyllum*. It is used in perfumery.
- ser-pu-la**, s. [Lat. = a little serpent (q.v.).]
Zool.: The type-genus of Serpulinæ. Tube long and shelly, more or less tortuous, sometimes solitary, sometimes aggregated and fixed to some foreign body by part of its surface; well-marked operculum, horny, rarely calcareous. The United States has several species, but the largest are from tropical seas. [SERPULIDÆ.]
- ser-pū-lē-an**, s. [SERPULA.] Any one of the Serpulinæ.
- ser-pū-li-dæ**, s. pl. [Lat. *serpula*(a); fem. pl. adj. suff. -idæ.]
1. *Zool.*: A family of Tubicolous Annelides, with two sub-families: Sabellinæ and Serpulinæ (q.v.). Tube calcareous or membranous; animal vermiform; thoracic and abdominal regions usually well defined, mouth situate between spiral or semicircular branchial fans or lamina; tentacular cirri present.
2. *Palæont.*: The family commences in the Upper Silurian, in which the type-genus, with others, occurs, and is found also in Secondary and Tertiary formations.
- ser-pū-lī-dan**, s. [SERPULIDÆ.] Any member of the family Serpulinæ.
- ser-pū-lī-næ**, s. pl. [Lat. *serpula*(a); fem. pl. adj. suff. -næ.]
Zool.: The typical sub-family of Serpulinæ (q.v.), with several genera. Tube calcareous; animal with ciliated thoracic membrane, dorsal and ventral surfaces partly covered with cilia; operculum usually present.
- ser-pū-line**, a. & s. [SERPULINÆ.]
A. As adj.: Of, belonging to, or resembling the Serpulinæ (q.v.).
B. As subst.: Any individual of the Serpulinæ. (*Cassell's Nat. Hist., vi. 249.*)
- ser-pū-lite**, s. [SERPULITES.]
1. Any individual of the genus Serpulites (q.v.).
2. A fossil Serpula (q.v.).
- ser-pū-lī-tēs**, s. [Lat. *serpula*(a); -itēs.]
Palæont.: A genus instituted by Murchison, for certain smooth semi-calcareous tubes,

often of great length, and apparently unattached, which occur in the Silurian series. These tubes in some species reach a length of over a foot, with a diameter of an inch, and their true nature is not yet satisfactorily ascertained. (*Nicholson*.)

ser-ré, v.t. [Fr. *serrer* = to compact, to press together, to lock; Low Lat. *sero* = to bolt, from Lat. *sera* = a bolt.] To crowd, press, or drive together; to contract. [SERRIED.]

"Grinding of the teeth is caused (likewise) by a gathering and setting of the spirits together to resist."
—*Bacon: Nat. Hist., § 714.*

ser-ra, (pl. **ser-ræ**), s. [Lat. = a saw.]

Bot., Anat., &c. (Pl.): The saw-like toothings on the margins of leaves, in the serrated sutures of the skull, &c.

ser-ra-dil-la, s. [Fr. *serradelle*.]

Bot.: *Ornithopus sativus*, a fodder-plant.

ser-rā-nūs, s. [Mod. Lat., from *serra* = a saw, from the serrated dorsal fin.]

1. *Ichthy.*: Sea-perches; a genus of Percidæ. They are found on the shores of all temperate seas, and abound in the tropics, some of the latter species entering brackish and even fresh water, but all spawn in the sea. Body oblong, compressed, with small scales; teeth villiform, with distinct canines in each jaw, teeth on vomer and palatine bones; one dorsal, mostly with nine or eleven spines, anal with three. Two species, *Serranus cabrilla*, the Smooth Serranus, and *S. gigas*, the Dusky Perch, are met with in the British Channel, and are common in the Mediterranean. (See extract.)

"In the European species of *Serranus* a testicle-like body is attached to the lower part of the ovary; but many specimens of this genus are undoubtedly males."—*Günther: Study of Fishes, p. 187.*

2. *Palæont.*: From the Eocene of Monte Bolca.

ser-ra-sál-mō, s. [Lat. *serra* = a saw, and *salmō* = a salmon.]

Ichthy.: A genus of Characinidæ. The species are found in the South American rivers, where they grow to a large size.

ser-ráte, **ser-rát-éd**, a. [Lat. *serratus*, pa. par. of *serro* = to saw.]

*1. *Ord. Lang.*: Notched on the edge, like a saw; toothed.

2. *Bot. (Of a leaf, &c.)*: Having sharp, straight-edged teeth, pointing to the apex. [BISERRATE.]

"In the figure they are represented too stiff and too much serrated."—*Dampier: Voyages; Plants in New Holland, vol. III.*

serrated-suture, s. [DENTATED-SUTURE.]

ser-rā-tion, s. [SERRATE.] Formation in the shape of a saw.

ser-rát-ū-la, s. [Mod. Lat., from *serrula* = a little saw, referring to the serrated margins of the leaves. In Class. Lat. *serrulata* = betony, a different genus.]

Bot.: Sawwort; the typical genus of Serratulæ (q.v.). Heads solitary or corymbose, sometimes dioecious, purple or white; involucre oblong, imbricated with straight unarmed scales; receptacle chaffy; the scales split into linear bristles; corolla regular, tubular; pappus persistent, pilose; hairs filiform, in several rows, the interior the longest; filaments papillose; anthers with a short blunt appendage, ecaudate at the base. Known species about thirty. One, *Serratula tinctoria*, is British. It is two to three feet high, generally with pinnatifid or lyrate and finely serrated leaves, and reddish-purple flowers, the males with blue, the females with white anthers. Not wild in Scotland, and absent from Ireland. It yields a green or a yellow dye.

ser-ra-tū-lē-æ, s. pl. [Mod. Lat. *serratulæ*(a); Lat. fem. pl. adj. suff. -æ.]

Bot.: A tribe of Cynaræ (q.v.).

ser-ra-ture, s. [Lat. *serratura*.]

1. *Ord. Lang.*: A notching in the edge of anything, like that of a saw.

"These are serrated on the edges; but the serratures are deeper and grosser than any of the rest."—*Woodward.*

2. *Bot. (Pl.)*: The teeth of a serrated leaf.

ser-ri-corn, a. & s. [SERRICORNES.]

A. As adj.: Pertaining or relating to the

group or tribe *Serricornis* (q.v.); having serrated antennæ.

I. Ordinary Language:

1. One who serves or does service, voluntarily or involuntarily; a person male or female who is employed by another to perform menial offices or for other labour, and is subject to his orders; a person who labours or exerts himself for the benefit of another, his master or employer; a subordinate helper or assistant. The term usually implies the idea of one who performs certain duties or offices for another according to an agreement; it is thus distinguished from a slave, who is the property of his master, and is entirely subject to his will. Legally, any person is the servant of another, in whose business or under whose order or direction he is acting for the time being. Colloquially the term is applied distinctly to domestic servants, forming part of a household for the time being.

* 2. One in a state of bondage or subjection.
"Remember that thou wast a servant in Egypt."
Deuteronomy v. 15.

* 3. Anything which serves to assist or aid; as, fire is a good servant, but a bad master.

4. An expression of civility used by equals; formerly a term of gallantry denoting an admirer of a lady.

"Who calls? Your servant and your friend."
Shakesp.: *Two Gentlemen of Verona*, iv. 2.

II. English Law: Servants are of various kinds—servants in husbandry, or laborers;

servants in particular trades, and menial or domestic servants. Servants in husbandry are generally hired by the year, as from Michaelmas to Michaelmas, and unless there be a stipulation to the contrary, no wages are due till the year expires. Unless by express agreement, the engagement with a domestic servant can be terminated if a month's notice be given on either side. A master cannot deduct from a servant's wages the

price of articles broken or lost, however gross the negligence may have been. It is not legally compulsory on a master or mistress to give a discharged servant a character; if, however, one be given, it must be true. If a servant, dishonest in one house, obtain a situation in another one through a false character given by the person who dismissed the servant, and if as the result of this untruthfulness the second house is robbed, an action for the entire amount taken lies against the writer of the false character. A tax on male servants was imposed in 1777; one on female servants, imposed in 1785, was repealed in 1792.

¶ In the term *servant* is included the idea of the service performed. The term *drudge* includes drudgery. We hire a *servant* at a certain rate, and for a particular service; we employ a *drudge* in any labour however hard and disagreeable. (Crabb.)

¶ (1) *Servants of the Ever Blessed Virgin:* [SEAVITES].

(2) *Your obedient servant, your humble servant:* Phrases of civility used especially in the conclusion of a letter, and expressing, or supposed to express, the willingness of the writer or speaker to do service to the person addressed.

2. The state of mind generally produced by a state of servility; mean submission; slavish obsequiousness; baseness.

"Submission and faith, such as at a later period would be justly called servility and credulity."—Macaulay: *Hist. Eng.*, ch. 1.

serv-ing, *pr. par.*, *a.*, & *s.* [SERVE.]

A. & B. *As pr. par. & particip. adj.*: (See the verb).

C. *As substantive*:

I. *Ord. Lang.*: The act or state of being a servant, helper, or assistant in any manner.

II. *Naut.*: The act of wrapping spun-yarn round a rope after it has been wormed and parcelled.

serv-ing-board, *s.*

Naut.: A flat board used in serving ropes.

serv-ing-maid, *s.* A servant-maid.

serv-ing-mallet, *s.*

Naut.: A mallet-shaped tool used for wrapping spun yarn tightly around a rope. Several turns of the stuff are taken around the mallet, and, as the mallet is rotated around the rope which lies in the hollow, the stuff is tightly and closely wrapped around the rope.

serv-ing-man, *s.* A servant-maid.

"Your niece did more favours to the duke's serving-man than ever she bestowed on me."—*Shakesp.*: *Twelfth Night*, iii. 2

serv-ite, *s.* & *a.* [Ital. *servitore* = a servant.]

A. *As substantive*:

Church Hist. (Pl.): The name commonly given to a monastic order, the Religious Servants of the Holy Virgin, founded in 1233 by seven Florentine merchants, at Mount Senario, near Florence. St. Philip Benoit, the fifth general, saved the order from suppression in 1276, and in 1487 Pope Innocent VIII, bestowed on the Servites the privileges of the four great mendicant orders. The life is one of austerity and continual prayer; the habit is black, with a leather girdle, a scapular, and a cloak, and the rule is a modification of that of St. Augustine. The strength of the order lay chiefly in Italy and Germany; it had no houses in England before the Reformation. [See extract under B.] Since the French Revolution many houses have been founded in different countries.

B. *As adj.*: Of, pertaining to, or characteristic of the Order described under A.

"In England there is a flourishing *Servite* community established in the Fulham Road, London, with an affiliated house at Bognor; also three convents of *Servite* nuns, two in London, and one in Arundel."—*Adair & Arnold's Cath. Dict.*, p. 761.

serv-ít-í-úm (t as sh), *s.* [Lat.]

Lav.: Service, servitude.

serv-ít-tór, *s.* [Fr. *serviteur*; Lat. *servitor*; Sp. & Port. *servidor*; Ital. *servitore*.]

* 1. A male servant or attendant.

"These are poor *servitors* . . . Constrain'd to watch in darkness, rain, and cold."—*Shakesp.*: *1 Henry VI.*, II. 1.

* 2. A follower, an adherent.

"Our Norman conqueror gave away to his *servitors* the lands and possessions of such as did oppose his invasion."—*Darley*.

* 3. One who professes duty and obedience. "Henceforth I am thy true *servitor*."—*Shakesp.*: *3 Henry VI.*, III. 2.

4. In Oxford University, an undergraduate who is partly supported out of the college funds, and whose duty it was formerly to wait at table on the fellows and gentlemen commoners. They corresponded to the sizars at Cambridge and Dublin.

"No ordinary undergraduates could appear in public with a *servitor*."—*Daily Telegraph*, March 4, 1886.

serv-ít-tór-shíp, *s.* [Eng. *servitor*; -ship.] The office or position of a servitor.

"He found *servitorship* at Oxford a rise in life."—*Daily Telegraph*, March 4, 1886.

serv-ít-túde, *s.* [Fr., from Lat. *servitutum*, accus. of *servitudo*, from *servio* = to serve (q.v.).]

I. *Ordinary Language*:

1. The quality or condition of a slave; slavery, bondage; the state of involuntary subjection to a master.

"You would have sold your king to slaughter, His princes and his peers to *servitude*."—*Shakesp.*: *Henry V.*, II. 2.

* 2. The condition of a menial or underling; service.

3. Compulsory service or labour, such as a criminal has to undergo as a punishment. (Only used in the compound Penal servitude.)

[PENAL.]

* 4. A state of slavish dependence; servility.

* 5. Servants collectively.

"After him a cumbrous train Of herds, and flocks, and numerous *servitude*."—*Milton*: *P. L.*, xii. 132.

II. Civil & Scots Law: A term used to signify a right, whereby one thing is subject to another thing or person for use or convenience contrary to common right. Servitudes are divided into personal and predial. A predial servitude is a right constituted over one subject or tenement by the owner of another subject or tenement. Predial servitudes are either rural or urban, according as they affect land or houses. The usual rural servitudes are: passage or road, or the right which a person has to walk or drive to his house over another's land; pasture, or the right to send cattle to graze on another's land; feal and divot, or the right to cut turf and peat on another's land; aqueduct, or the right to have a stream of water conveyed through another's land; thirriage, or the right to have other people's corn sent to one's own mill to be ground. Urban servitudes consist chiefly in the right to have the rain from one's roof to drop on another's land or house; the right to prevent another from building so as to obstruct the windows of one's house; the right of the owner of the flat above to have his flat supported by the flat beneath, &c. A personal servitude is a right constituted over a subject in favour of a person without reference to possession or property, and now consists only in life-tenure or usufruct.

* **serv-ít-túre**, *s.* [SERVE.] Servants collectively. (*Milton*.)

* **serv-vú-láte**, *v. í.* [Lat. *servulus*, dimin. from *servus* = a slave.] To do petty services.

"I embrace their love, Which well repay with *servulatings*."—*Beaumont & Fletcher*: *Elder Brother*, I. 2.

ses'-á-mě, *s.* [From *sesameum*, the Egyptian name of one of the species.]

Bot.: *Sesamum orientale* and *S. indicum*. [SESAMUM.]

"Open *Sesame*: The charm by which the door of the robbers' dungeon in the tale of "Ali Baba and the Forty Thieves" flew open; hence, a specific for obtaining entrance into any place, or means of exit from it.

sesame-oil, *s.*

Chem.: C₁₉H₃₅O₂. A non-drying, fatty oil, obtained from the seeds of *Sesamum orientale*, and used in India as an article of food. It has a yellowish colour, is inodorous, and has a slight taste of hemp; sp. gr. 0.923 at 15. The crude oil is used in soap-making, and for burning in lamps. [GISELLY-OIL.]

ses'-á-mě-ě, *s. pl.* [Mod. Lat. *sesamum*; Lat. fem. pl. adj. suff. -*ě*.]

Bot.: A tribe of Pedaliaceæ.

ses'-á-móid, **ses'-á-móid-ál**, *s.* [Eng. *sesam(e)*; -oid.] Resembling the seeds of sesame in form.

sesamoid-bones, *s. pl.*

Anat.: Bones in form somewhat resembling the seeds of Sesame. The sesamoid-bones of the toes are the small bones at the articulations of the great toes; those of the fingers are the joints of the thumbs. There are also radial and ulnar sesamoid-bones.

ses'-á-múm, *s.* [SESAME.]

Bot.: Sesame; the typical genus of Sesameæ (q.v.). Calyx five-parted, corolla with a short tube, the limb five-cleft, somewhat bilabiate; stamens four, didynamous, with the rudiments of a fifth one; capsule oblong, four-celled, many-seeded. Annuals, with axillary, solitary flowers, in form resembling those of the English Foxglove. *Sesamum orientale* is a very common plant in India in uncultivated ground, flowering at the close of the rains. Several varieties are cultivated in warm countries for the oil obtained from the seeds. Two in India are distinguished, one by having white and the other black seeds. [SESAME-OIL.]

ses'-ban, *s.* [SESBANIA.]

Bot.: *Sesbania egyptiaca*.

ses'-bá-ní-ě, *s.* [From *sesban*, the Arabic name of *Sesbania egyptiaca*.]

Bot.: A genus of Galegeæ. Shrubs or herbs, with abruptly-pinnate leaves, having many pairs of leaflets; flowers axillary, in racemes, generally yellow; and the legumes long, slender, torulose, many-seeded. *Sesbania aculeata*, a slightly prickly annual, is cultivated in India for its fibre. [DANERI.] The plant occurs also in tropical Africa and the West Indies. The wood of *S. egyptiaca*, which grows also in India, is made into good charcoal, and the bark into rupe. An ointment made with the seeds is applied in India to eruptions, and the bark is given internally as a stimulant and an emmenagogue. The leaves are applied in the form of poultices to hydrocele and rheumatic swellings. The old *S. grandiflora* is now *Agati grandiflora*. [AGATI.]

ses'-ě-íl, *s.* [Lat. *seseli*, *seselis*, from Gr. *σέσέλις* (*seselis*) = hartwort, *Seseli elatum*.]

Bot.: Meadow-saxifrage; the typical genus of Seselidæ (q.v.). Umbels compound, the bracts many, few, or wanting; bracteoles many; calyx teeth acute; petals obovate, with an inflexed point. Fruit oval or oblong, with long reflexed styles; carpels dorsally compressed, with five prominent, obtuse, corky ribs, having single vittæ on the interstices. Known species about forty, from the eastern hemisphere, one of which is *Seseli Libanotis*, the Mountain Meadow-saxifrage. It is one to two feet high, with a furrowed stem, bipinnate leaves, pinnatifid leaflets, and white flowers. It is found in English chalk pastures, but is rare. The seeds of *S. indicum* are carminatives, and are used as a medicine for cattle.

ses'-ě-lín'-ě-ě, *s. pl.* [Lat. *seseli* (f); fem. pl. adj. suff. -*inez*.]

Botany:

1. A tribe of Umbelliferae. Fruit globose or ovoid, not laterally compressed, commissura broad, lateral ridges, generally distinct, rarely winged—if so, wings of opposite carpels not in contact. Sub-tribes, Seselineæ proper, Coriandreae, Cachrydææ, Erantheæ, Schultzeæ, Selinææ, and Angelicæ. (*Sir J. Hooker*.)

2. A sub-tribe of No. 1 (q.v.). Fruit subtetres, edges not thickened or corky. Common genera, Seseli and Feniciculum. (*Sir J. Hooker*.)

ses'-ě-lín'-í-dě, *s. pl.* [Lat. *seseli* (f); fem. pl. adj. suff. -*idae*.]

Bot.: A family of Apiaceæ. (Umbelliferae.) (*Lindley*.)

ses'-sí-ě, *s.* [Mod. Lat., from Gr. *σής* (*sēs*) = a moth. (*Brande*).]

Entom.: The typical genus of Sesiidæ (q.v.). Two species are *Sesia bombyliiformis*, the Narrow-bordered Bee Hawk-moth, and *S. fuciformis*, the Broad-bordered Bee Hawk-moth. Both have transparent wings, only the margins being clothed with dense opaque brown or reddish-brown scales. With their transparent wings and hairy, yellow bodies, surrounded by a reddish-brown belt, they present considerable resemblance to humble bees. They fly swiftly during the day, and extract honey from flowers. The larva of the first feeds on *Scabiosa succisa*; that of the second on the honeysuckle.

ses'-sí-í-dě, *s. pl.* [Mod. Lat. *sesi* (a); Lat. fem. pl. adj. suff. -*idae*.]

Entom.: A family of Sphingina. Antennæ much thickened beyond the middle, ending in a hooked bristle; wings short, broad; abdomen thick, with a broad tuft at the tip (whence Swainson calls them Brush-tipped). Larva long, smooth, with a horn rising upward from the twelfth segment. Pupa on the ground among leaves. Two European genera, with several species, are *Sesia* and *Macroglossa*. (*Stamton*.)

ses'-lór-í-ě, *s.* [Named after Sesler, an Italian botanist.]

Bot.: Moor-grass, a genus of Bromidæ. Panicle spiked, rounded or slightly unilateral; spikelets sessile, laterally compressed, with two or more perfect florets; empty glumes two, longer than the flowering ones, generally one-nerved; scales two- to five-toothed. Known species eight. One, *Sesleria cœrulea*, the Blue Moor-grass, is British, being found in mountainous regions in the North of England and Scotland, and flowering from April to June.

ból, **bóy**; **póut**, **jówl**; **cat**, **çell**, **chorus**, **çhin**, **bençh**; **gò**, **gém**; **thín**, **thís**; **sin**, **ag**; **expeçt**, **Xenophon**, **exíst**. **ph = f**. -**çlan**, -**tian = shan**. -**tíon**, -**çion = shùn**. -**çious**, -**tíous**, -**çious = shüs**. -**ble**, -**dle**, &c. = **bel**, **dél**.

ses-qui-, *pref.* [Lat. = *sesqui*; *semis* = a half, and *qui* = *que* = and.] A prefix denoting one integer and a half: as, *sesquicyathus* = a cyathus and a half. It is used in:

† 1. *Chem.*: To denote that two atoms of a metal were combined with three atoms of oxygen or other non-metallic element: as thus, *sesquioxide* of iron, Fe₂O₃, now called ferric oxide; *sesquiphosphide* of iron, or ferric sulphide, Fe₂S₃, &c. This definition does not hold good unless the valency of the metal is taken into consideration. Thus *sesquichloride* of iron is Fe₂Cl₆, the iron being quadrivalent, whilst *sesquichloride* of antimony is SbCl₃, the antimony being trivalent.

† 2. *Geom.*: To express a ratio in which the greater term contains the less one, and leaves a certain aliquot part of the less one.

† 3. *Music*: To signify a whole and a half: as, *sesquialtera*, *sesquiterza*, &c.

* **ses-qui-âl-tër**, *s. & c.* [Lat. *sesquialter*; Fr. *sesquialtre*.]

A. *As subst.*: The same as **SESQUIALTERA** (q.v.).

B. *As adj.*: *Sesquialteral*.

"The periodical times are in a *sesquialter* proportion to the mean distance."—*Cheyne*.

ses-qui-âl-tër-a, *s.* [**SESQUIALTER**.]

Music: A compound organ stop consisting of several ranks of pipes. Various combinations of intervals are used, but they only represent different positions of the third, fifth, and eighth of the ground tone in the third or fourth octave. (*Grove*.)

* **ses-qui-âl-tër-al**, *a.* [Lat. *sesquialter*.]

Math.: A term applied to a ratio where one quantity or number contains another once and half as much more, as the ratio of 3 to 2. "In the same *sesquialteral* proportion of their periodical motions to their orbit."—*Bentley*: *Sermons*, No. 2.

sesquialteral-floret, *s.*

Bot.: A perfect floret, with an abortive one beside it.

* **ses-qui-âl-tër-ate**, * **ses-qui-âl-tër-ous**, *a.* [**SESQUIALTER**.] *Sesquialteral*.

* **ses-qui-cën-tën-ni-äl**, *s.* [Pref. *sesqui-*, and Eng. *centennial* (q.v.).] The hundred and fiftieth anniversary. "In Oct., 1860, Baltimore celebrated its *sesquicentennial*."—*Harpur's Magazine*, June, 1861, p. 21.

* **ses-qui-chlör-ide**, *s.* [Pref. *sesqui-*, and Eng. *chloride*.] (See compound.)

sesquichloride of iron, *s.* [**FERRIC CHLORIDE**.]

* **ses-qui-dü-ple**, *a.* [Pref. *sesqui-*, and Lat. *duplex* = double.] *Sesquiduplicate* (q.v.).

* **ses-qui-dü-pli-cate**, *a.* [Pref. *sesqui-*, and Lat. *duplicatus* = doubled.] Denoting the ratio of two and a half to one, or where the greater term contains the lesser twice and a half, as that of 50 to 20.

* **ses-qui-öx-ide**, *s.* [Pref. *sesqui-*, and Eng. *oxide*.] (See compound.)

sesquioxide of iron, *s.* [**FERRIC OXIDE**.]

* **ses-qui-pë-dä-ly-an**, * **ses-quip'-ë-däl**, *a.* [Lat. *sesquipedalis*, from pref. *sesqui-*, and *pedalis* = pertaining to a foot. [**PEDAL**.] Containing or measuring a foot and a half. Often applied in humour to very long words in imitation of Horace's *sesquipedalia verba* (*De Arte Poet.*, 97).

"Language whose ponderous absurdity was never equalled in the most *sesquipedalium* period of dramatic literature."—*Daily Telegraph*, Oct. 31, 1866.

* **ses-quip-ë-dä-ly-an-ism**, *s.* [Eng. *sesquipedalian*; -ism.] *Sesquipedalism*.

"These masters of hyperpolysyllabic *sesquipedalianism*."—*Fitzedward Hall*: *Modern English*, p. 30.

* **ses-quip'-ë-däl-ism**, *s.* [Eng. *sesquipedal*; -ism.] The use of very long words.

"No *sesquipedalium* and barbarous Latinising disfigure his explanations of phenomena."—*Daily Telegraph*, Dec. 28, 1866.

* **ses-qui-pë-däl-I-ty**, *s.* [Eng. *sesquipedal*; -ity.]

1. The quality or condition of being *sesquipedalian*.

2. The use or habit of using very long words; *sesquipedalism*.

* **ses-quip'-li-cate**, *a.* [Pref. *sesqui-*, and Eng. *picate* (q.v.).]

Math.: Designating the proportion one quantity or number has to another in the ratio of one and a half to one.

"The periodical times of the planets are in *sesquipedal* proportion."—*Cheyne*: *Phil. Principles*.

* **ses-qui-tër-tial** (*ti* as *sh*), * **ses-qui-tër-tian**, * **ses-qui-tër-tion-al**, *a.* [Pref. *sesqui-*, and Lat. *tertius* = third.]

Math.: Designating the ratio of one and one-third to one.

* **ses-qui-töne**, *s.* [Pref. *sesqui-*, and Eng. *tone* (q.v.).]

Music: A minor third or interval of three semitones.

* **sess**, * **sesse**, *s.* [A shortened form of *asses* (q.v.).] A tax.

"The English suffered more damage by the *ses* of his soldiers, than they gained profit or security by abating the pride of their enemies."—*Davies*: *Hist. of Ireland*.

* **sess**, * **sesse**, *v.* [**SESS**, *s.*] To assess, to tax.

"To consider of the matter in variance, and to *sess* the penalty."—*Goldings*: *Cæsar*, fol. 108.

* **sess-san**, **säs-sen**, *s.* [**SARSEN**.]

* **sess-ile**, *a.* [Lat. *sessilis* = pertaining to sitting; *sedeo* = to sit.]

1. *Bot.*: Sitting close upon the body that supports it without any sensible stalk: as, a *sessile leaf*, &c., one without a petiole.

2. *Zool.*, &c.: Destitute of a peduncle, attached simply by a base.

sessile-cirripedes, *s. pl.*

Zool.: The Balanidae. [**ACORN-SHELL**.]

sessile-eyed, *a.*

Zool.: Having the eyes fixed on the surface of the head without the intervention of a foot-stalk. Applied to the *Etriophthalmia* (q.v.). [**STALK-EYED**.]

* **sess-il-l-i-a**, *s. pl.* [Nont. pl. of Lat. *sessilis*.] [**SESSILE**.]

Zool.: A lapsed order of *Rotifers* (q.v.).

* **sess-ion** (*ss* as *sh*), *s.* [Fr., from Lat. *sessio*, accns. of *sessio* = a sitting, from *sedum*, sup. of *sedeo* = to sit; Sp. *sesion*; Ital. *sessione*.]

I. Ordinary Language:

* 1. The act of sitting; the state of being seated.

"His *session* at the right hand of God."—*Hooker*: *Eccles. Polity*.

2. The sitting together of a body of individuals for the transaction of business; the sitting of a court, council, legislature, academic body, or the like, or the actual assembly of the members of such or like bodies for the transaction of business.

"The said Lord President and Council shall keep four general sittings or *sessions* in the year."—*Burnet*: *Records*, pt. II., bk. I., No. 56.

3. The time, space, or term during which a court, council, legislature, or the like meets for business, or transacts business regularly without breaking up or dissolving. Thus, the *session* of a congress is the time from its meeting till its prorogation or dissolution. The *session* of a judicial court is called a term.

"But the last day of that parliament or *session* the prince cometh in person in his parliament robes, and sitteth in his state: all the vpper house sitteth about the prince in their states and order in their robes."—*Smith*: *Commonwealth*, bk. II., ch. III.

II. Technically:

1. *Law*: A sitting of justices in court upon commission. (Generally used absolutely in the plural.)

2. *Church of Scotland*: The same as **KIRK-SESSION** (q.v.).

¶ (1) *Clerk of the session*: A clerk of the court of session.

(2) *Court of session*: [**COURT**, *s.*, ¶ (9)].

(3) *General session of the peace*: A meeting of the justices held for the purpose of acting judicially for the whole district comprised within their commission. The sessions that are held once every quarter of the year are called the *General quarter sessions of the peace*.

* (4) *Great session of Wales*: A court abolished by stat. I., William IV., c. 70, circuits being held in Wales and Cheshire, as in other English counties, by two judges of the superior courts.

(5) *Petty sessions*: The meeting of two or

more justices for trying offences in a summary way under various acts of parliament empowering them so to do.

(6) *Quarter sessions*: [**QUARTER**.]

(7) *Sessions of the peace*: The general name for sessions held by justices of the peace, whether petty, special, quarter, or general.

(8) *Special sessions*: Sessions held by justices acting for a division of a county or riding, or for a burgh, for the transaction of special business, such as granting licences, &c.

(9) *Sessions clerk*: One who officially keeps the books and documents of a kirk-session, makes all entries, and manages the proclamation of banns of marriage. (*Scotch*.)

* **sess-ion-al** (*ss* as *sh*), *a.* [Eng. *session*; -al.] Pertaining or relating to a session or sessions.

sessional-orders, *s. pl.* In Parliament certain orders agreed to by both Houses of Parliament, at the beginning of each session, which are renewed from year to year, and are not intended to endure beyond the existing session. (*Str T. E. May*.)

* **sess-pool**, *s.* [**CESSPOOL**.]

* **sess-törpe**, **ses-tër-ti-üs** (*ti* as *sh*), *s.* [Lat. *sesterilis* = a sesterce; lit. = that which contains two and a half; from *semis* = a half, and *tertius* = third; Fr. *sesterce*.]

Roman Antiq.: A silver coin, properly of the value of two asses and a half, the fourth part of a denarius, or about 2d. sterling. The Romans were accustomed to reckon sums of money in *sesterces*, large sums in *aurea*, or sums of a thousand *sesterces*.

"In reckoning by *sesterces*, the Romans had an art, which may be illustrated by these three rules; the first is, if a numeral noun agree in case, gender, and number, with *sesterium*, then it denotes precisely so many *sesteria*, as dozen *sesteria*, just so many; the second is this: if a numeral noun of another case be joined with the genitive plural of *sesterium*, it denotes so many thousand, as decem *sesterium* signifies ten thousand *sesteria*."—*Kenner*: *Roman Antiquities*, bk. v., ch. XIII.

* **sess-tët**, **ses-tët-tö**, *s.* [Ital.]

Music: A composition for six instruments or voices.

"A vocal *setet* in the second act shows fancy and skill of a high order."—*Daily Telegraph*, Nov. 16, 1866.

* **sess-tine**, *s.* [**SEXTAIN**.]

Pros.: A stanza of six lines; a certain.

* **sess-vë-se**, *s. pl.* [Mod. Lat. *sessivum*]; Lat. fem. pl. adj. suff. -*ecæ*.]

Bot.: A sub-order of *Tetragoniaceæ*. Capsule circumscissile. (*Linley*.) Sometimes made an order, *Sesuviaceæ*.

* **sess-vi-ä-pë-se**, *s. pl.* [Mod. Lat. *sessivum*]; Lat. fem. pl. adj. suff. -*accæ*.] [**SE-SUVEÆ**.]

* **sess-vi-üm**, *a.* [Etym. doubtful.]

Bot.: The typical genus of *Sesuvium* (q.v.). *Sesuvium portulacastrum* and *S. repens* are cultivated in tropical Asia as a substitute for spinach.

Seventh-day, s. Saturday, the seventh day of the week or the sabbath of the Jews [SABBATH.]

Seventh-day Baptists:

Church Hist. & Ecclesiol.: Baptists who, holding that the Fourth Commandment expressly named the seventh as the sacred day, and that there is no express command in the New Testament to alter that day to the first of the week, observe Saturday as their Sabbath. This view arose in the sixteenth century among a minority of the continental Anabaptists. Erasmus (*De Amab. Concord.*, col. 506), in an obscure passage, perhaps alludes to a sect of this nature among the Bohemians. In 1620 John Traske, Trasque, or Thraske, published a work advocating a seventh-day Sabbath. Even before this, he had made known his opinions, and in 1618 had been censured by the Star Chamber, set in the pillory at Westminster, and thence whipped to the Fleet, where he was imprisoned till he nominally retracted his views. In 1628 Theophilus Brabourne, a Puritan minister in Norfolk, published a sermon, followed shortly after by another publication, in favour of Seventh-day Sabbatarianism. He was induced by the High Commission Court to abandon his views, which, however, continued to be maintained by his followers. Mr. Edward Stennet, writing from Abingdon, in Berkshire, in 1668, said that there were about nine or ten churches (congregations) in England holding that the seventh day is the Sabbath. In 1851 there were only three congregations in England. In New England and other parts of America they are more numerous, and issue tracts and republish works bearing on their opinions.

sewage (as sū-ĭg), s. [Eng. *sew* (4), v.; -age.]

1. The foul matter which passes through the drains, conduits, or sewers of a town, village, collection of houses, &c., or individual houses. It consists of the excreted matter, liquid and solid, the water by which such matter is carried off, the waste water of baths, wash-houses, and other domestic operations, the liquid waste product of various manufacturing operations, and, in most cases, of the greater part of the surface drainage of the area drained. In most cases the sewage of towns, &c., is allowed to run to waste into some river, the sea, &c.; but the value of its manurial constituents being now recognized, many towns and districts and large establishments have adopted systems of sewage utilization. Of these, the chief is irrigation of land especially prepared for the purpose. Attempts have also been made to produce a dry, portable manure from the sewage by treatment with chemicals, deposition, &c. The quantity of sewage passing from a town, &c., is estimated, according to circumstances, at about thirty gallons per head per day.
 "Sewage generally yields ammonia at the rate of about seven grains in a gallon."—*Brand & Cox*.

2. The same as SEWERAGE, I. (q.v.).

¶ The words *sewage* = that which is carried off by the sewers, and *Sewerage* = the system of sewers of a town, are said to have been first used by Mr. James Pilbrow, F.S.A., civil engineer, Worthing, in 1850, in a report to the Board of Works for Tottenham, Middlesex.

1. Math.: The sixth part of the circumference of a circle.

2. Surv. & Navig.: An instrument used in measuring angles, founded upon the optical principle that a ray of light twice reflected from plane reflectors makes, with the ray before reflection, an angle equal to twice the angle of inclination of the reflecting surfaces. It resembles a quadrant, but has an arc of about 65°. The reflecting sextant is an improved form of the quadrant of reflection, invented by Newton in 1699 [QUADRANT], and is capable of measuring angles of 120° or more. It consists of a frame, generally of metal, but sometimes of ebony, stiffened by cross-braces, and having an arc embracing about 65° of a circle. This is divided into double the number of degrees actually embraced between the two extreme graduations of the arc, as the fixed and movable glasses, owing to the double reflection, only form with each other an angle equal to half the angular distance between the two objects observed, one of which is seen directly and the other by reflection from the index-glass.

3. Astron.: Sextans: one of the constellations introduced by Hevelius. It extends a little more than from the equator to the ecliptic, between Regulus and *Cor Hydrae*.

shad-bush, s.

Bot.: *Amelanchier canadensis*. It is found in Canada and the northern United States, putting forth its racemes of white, roseate flowers in April or May, when the shad is ascending the rivers; hence the name Shad-bush. Called also June-berry, because the fruit, which is edible, is ripe in June. [SARVICO-BERRY.]

shad-frog, s.

Zool.: *Rana habecina*, called also *R. virginica*; an American frog, resembling the common species, but with a much more pointed snout, and generally only two inches long. It is very common in Carolina, is a persistent croaker, leaps several feet, and comes to land about the time that shads come to the shore.

shad-salmon, s.

Ichthy.: *Coregonus clupeiformis*, from Lakes Erie and Ontario. Called also the Fresh-water Herring.

shadde, pret. of v. [SHED, v.]

shād-dōck, s. [Named after Capt. Shaddock, who first introduced the fruit from China into the West Indies early in the eighteenth century.]

Bot. & Hort.: *Citrus decumana*. The shoots are pubescent; the leaves ovate, generally sub-acute, large, with their stalk winged; the flowers large and white; the fruit nearly round, with a pale yellow skin, and a white or reddish pulp. It is large, sometimes weighing from ten to twenty pounds. When abnormally large, it is a Pomponelo, when small, a Forbidden fruit, while a small sub-variety with clustered fruit is a Grape-fruit.

shāde, *schade, s. [A.S. *scād*, *scæde* = shadow (q.v.).]

I. Ordinary Language:

1. A state of comparative obscurity, caused by the interception, cutting off, or interruption of the rays of light; comparative dimness or gloom caused by the interception of light.

2. Darkness, obscurity. (In this sense often used in the plural.)

"The shades of night were falling fast."

Longfellow: Excelsior.

3. A shaded or obscure place; a space sheltered from the rays of the sun, as a grove or wood; hence, a secluded retreat.

"He eaded—or she heard no more;

He led her from the yew-tree shade."

Wordsworth: White Doe, II.

Patriotic spirit less was pleased."

Byron: Siege of Corinth, xix.

11. (Pl.): The shade of spirits; Hades; the invisible world of the ancients.

12. (Pl.): Wine vaults. Brewer says that the expression originated at Brighton, when the old bank "was turned by Mr. Savage into a smoking-room and gin-shop. . . . This term was not inappropriate, as the room was in reality shaded by the opposite house."

II. Paint.: The dark or darker part of a picture; deficiency or absence of illumination.

"The means by which the painter works, and on which the effect of his pictures depends, are light and shade, warm and cold colours."—*Reynolds: Art of Painting, Note 20.*

¶ Both shade and shadow express that darkness which is occasioned by the sun's rays being intercepted by any body; but shades simply expresses the absence of the light, and shadow signifies also the figure of the body which thus intercepts the light. Trees naturally produce a shade by means of their branches and leaves; and wherever the image of the tree is reflected on the earth, that forms its shadow. (Crabb.)

shade-fish, s.

Ichthy.: A translation of the Lat. *umbra*, the old Roman name of the Maigre (q.v.).

shade-hook, s. A hook for holding a curtain-cord.

sha-doōf, sha-dūf, s. [Arab. *shādūf*.] The oldest known contrivance for elevating water, being found represented on monu-

ments of as early date as 1432 a.c. It is still very common along the Nile, being used for purposes of irrigation. It consists of a long stout pole or rod suspended on a frame at about one-fifth of its length from the end. The short end is weighted to act as a counterpoise of a lever, and from the long end a bucket of leather or earthenware is suspended by a rope. The worker dips the bucket in the river, and aided by the counterpoising weight, raises it, and empties the water into a hole dug in the bank, from which a channel conducts it to the lands to be irrigated.

SHADPOOF.

shād-ōw, *schad-ewe, *schad-ue, s. [A.S. *scædu*, accus. pl. *scæduru*; cogn. with Dut. *schaduw*; G. H. Ger. *scato* (genit. *scat-ewe*); Ger. *schatten*; Goth. *skadus*; Gr. *σκατός, σκαρία* (*skotos, skotia*); Ir. & Gael. *sgath*, from the same root as Gr. *σκία* (*skia*) = shade; Sansc. *shāyā* = shade; Eng. *sky*.]

I. Ordinary Language:**1. Literally:**

(1) Shade within defined limits; the figure of a body projected on the ground, &c., by the interception of light; obscurity or deprivation of light, apparent on a surface or plane, and representing the form of the body which intercepts the rays of light.

"Nearchus assures us, that during his voyage along the coast of India (for an part of India extends beyond the Orize) the 3 shadows fall not the same way, as in other parts; for when they sail'd far into the ocean, towards the south, there, the shadows, which noon-day declin'd southward; and when the sun was upon the meridian, they had no shadows at all."—*Rooke: Arrian; Alexander's Expedition, bk. vi., ch. xxv.*

(2) Darkness, gloom, shade, obscurity.

"By the revolution of the skies
Night's sable shadows from the ocean rise."
Denham: (Todd).

(3) Shade; comparative obscurity or gloom.

"(4) An obscure or shady place; a secluded retreat.

"To the secret shadows I retire,
To pay my penance till my years expire."
Dryden: Virgil; Aeneid vi. 733.

(5) The dark part of a picture; the representation of comparative deficiency or deprivation of light; shade.

"A shadow is a diminution of the first and second light. The first light is that which proceeds immediately from a lightened body, as the beams of the sun. The second is an accidental light, spreading itself into the air, or medium, proceeding from the other. Shadows are threefold: the first is a single shadow, and the least of all; and is proper to the plain surface, where it is not wholly possessed of the light. The second is the double shadow, and it is used when the surface begins one to forsake your eye, as in columns. The third shadow is made by crossing over your double shadow, again, which darketh by a third part. It is used for the utmost shadow, and farthest from the light, as in gulfs, wells, and caves."—*Peacock: On Drawing.*

(6) A reflected image, as in a mirror or water hence, any image or portrait.

"To your shadow will I make true love."

Shakespeare: Two Gentlemen of Verona, iv. 2.

"(7) A shade or protection for the face.

"For your head here's precious gear,
Bonnet, cross-cloths, squares, and shadows,
Dressings which your worship made us
Work upon above a year."
Milton: P. L., xii. 232.

2. Figuratively:

(1) A spirit, a ghost, a shade.

"Came wandering by a shadow like an angel."
Shakespeare: Richard III., I. 4.

"(2) An imperfect or faint representation; an adumbration, a prefiguration; a dim fore-showing or bodying forth.

"The law having a shadow of good things to come, and not the very image of the things."—*Hebrews x. 1.*

"(3) A type, a mystical representation.

"Types and shadows of that destined seed."
Milton: P. L., xii. 232.

"(4) A slight or faint appearance; a shade.

"With whom is no variableness, neither shadow of turning."—*James i. 17.*

"(5) Something unsubstantial or unreal, though presenting the appearance of reality; an image produced by the imagination.

"To worship shadows, and adore false shapes."
Shakespeare: Two Gentlemen of Verona, iv. 2.

"(6) A constant or inseparable companion or attendant.

"Sin and her shadow, death, and misery."
Milton: P. L., ix. 12.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pine, pīt, sire, sir, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, ūnite, ūir, rāle, fāll; trȳ, Sȳrian. æ, ce = ē; ey = ā; qu = kw.

(7) An uninvited guest, introduced to a feast by one who is invited. (A translation of the Latin *umbra*.)

"I must not have my board pestered with shadows. That under other men's protection break in without invitation."

Macbeth: Unnatural Combat.

(8) Shelter, protection.

"Within the shadow of your power."

Shakespeare: Timon of Athens, v. 4.

II. Optics: Shadows are, theoretically considered, of two kinds, geometrical and physical. If a shadow be supposed to be produced by the interception of light proceeding from a single mathematical point, it will be well defined by straight lines proceeding from the point, and grazing the intervening object.

SHADOW.

But as every luminous body is possessed of some magnitude, and, therefore, emits light from many points, the shadow is not precisely defined, but consists of a portion in perfect shadow, or to which no luminous rays have access, and penumbra, to which some rays have access. In the former case the theoretical shadow is a geometric one, in the latter physical, i. e., such as actually occurs in nature.

"May your shadow never be or grow less: May you escape the clutches of the devil; hence, May you be fortunate. It was fabled that when students of magic had attained a certain proficiency, they had to run round a subterranean hall, pursued by the devil. If he succeeded in catching only their shadow, they became first-rate magicians, but were thenceforth shadowless. (Brewer.)

"The recipients . . . hope that Sara's shadow may never grow less."—*Referer*, Jan. 2, 1887.

2. Church Hist. (Pl.):

(1) A name given to an American sect of celibates of both sexes, founded by Ann Lee, an English emigrant, about 1776, from their using a kind of dance in their religious exercises, but who call themselves the United Society of Believers in Christ's Second Appearing. Their chief settlement is at Mount Lebanon, in the State of New York. Their founderess was called the Elect Lady, and Mother of all the Elect, and claimed to be the woman mentioned in Rev. xii. The Shakers profess to have passed through death and the resurrection into a state of grace—the Resurrection order, in which the love which leads to marriage is not allowed, and are known as brothers and sisters. They abstain from wine and pork, live on the land, and shun towns. They cultivate the virtues of sobriety, prudence, and meekness, take no oaths, deprecate law, avoid contention, and repudiate war. They affect to hold communion with the dead, and believe in angels and spirits, not as a theological dogma, but as a practical fact.

'In many of their ideas the Shakers would appear to be followers of the Essenes. . . . Their church is based on these grand ideas: The kingdom of heaven has come, Christ has actually appeared on earth; the personal rule of God has been restored; the old law is abolished; the command to multiply has ceased; Adam's sin has been atoned; the intercourse of heaven and earth has been restored; the curse is taken away from labour; the earth, and all that is on it, will be redeemed; angels and spirits have become, as of old, the familiars and ministers of men.'—W. H. Dixon: New America (ed. 1869), p. 282.

(2) An English Millenarian sect founded by Mrs. Mary Anne Girding, who gave out that she was a new incarnation of the Deity, and could never die. Her followers established a community on the borders of the New Forest; but Mrs. Girding died on Sept. 18, 1886, and shortly afterwards her followers dispersed.

'Under a railway arch at Walworth she commenced her meetings, and it was there that, owing to the dancing and jumping practised by some of her followers at their devotion, they were called Shakers.'—Christian Age, Oct. 13, 1886.

B. As adj.: Of, pertaining to, or characteristic of the Shakers. [A. II. 2. (1).]

'Gentiles working on the Shaker lands.'—W. H. Dixon: New America (ed. 1869), p. 280.

Shāk'-er-ess, s. [Eng. Shaker; -ess.] A female Shaker.

shālk'-īto, s. [After Shalka, India, where it fell (Nov. 30, 1850); suff. -ite (Min.).]

Min.: An extra-terrestrial rock, of which the meteorite of Shalka is the type. It consists principally of olivine and bronzite, with a little chromite.

shāl', *shal, *shal (pa. t. *shoide, *shoide, *shulde, should), aux. v. [A.S. sceal, an old pa. t., used as a present, and thus conjugated: ic sceal, thū scealt, he sceal; pl. sceolan, sceolan; ic sceolde, thū sceoldest, he sceolde; pl. sceolden. Hence was formed a pa. t. sceolde, sceolde, pl. sceoldon. The infinitive form is sceulan = to owe, to be under an obligation to

do a thing, the verb following being put in the infinitive mood, as ic sceal gān = I must go; hence, the modern use of the word as an auxiliary verb. Cogn. with Dut. ik zal = I shall, ik soude = I should, infin. scullen; Icel. skal, pl. skulum, pa. t. skyldi, skyldu, infin. skulu; Sw. skall, pa. t. skulle, infin. skola; Dan. skal, pa. t. skulde, infin. skulle; Ger. soll, pa. t. sollte, infin. sollen; Goth. skal, pl. skulum, pa. t. skulda, infin. skulan. All from the same base as A.S. scold = guilt, i.e., desert of punishment; Ger. schuld = guilt, fault, debt. (Skeat.)]

* I. Originally as an independent transitive verb: To owe; to be under an obligation of or for. (Chaucer: Troilus & Cressida, 1, 600.)

II. As an auxiliary verb:

* 1. To be under the obligation; to be bound.

'Al drery was his chere and his loking When that he shoude out of the chambre go.'—Chaucer. (Todd.)

(1) Forming the first persons singular and plural of the future tense, shall is used to denote simple futurity, and simply foretelling or declaring something which is to take place, and thus equivalent to am to, are to, as, I shall go to town to-morrow, i.e., I am to, or I intend to go to town. Shall in this case expresses mere futurity, without any idea of determination or decision, to denote which in the first persons singular and plural will is used (WILL (1), v.); that is, the simple future in full is, I shall, thou wilt, he will; we shall, you will, they will. In indirect narration, however, shall is used in the second and third persons to denote simple futurity: as, He thinks he shall go.

(2) In the second and third persons shall is used:

(a) To denote control or authority on the part of the speaker, as when a promise, command, or determination is applied: as, You shall go, i.e., You must go, Thou shalt not kill, &c.

(b) To denote necessity or inevitability in the mind of the speaker; futurity though inevitable and answered for by the speaker.

'Beasts shall tremble at thy din.'—Shakespeare: Tempest, I. 2.

(3) When used interrogatively, in the first and third persons, shall asks for direction or refers the question to the decision of the person asked: as, Shall I go? Shall they go? But in the second person shall, used interrogatively, merely asks for information as to the future: as, Shall you come?

(4) After conditionals, as if or whether, and in dependent clauses generally, shall, in all the persons, denotes simple futurity.

'If we shall shake off our slavish yoke.'—Shakespeare: Richard II., II. 2.

* 2. Shall and should are used elliptically with adverbs, for shall (or should) go, as:

'I shall go more to sea.'—Shakespeare: Tempest, II. 2.

3. Should, though in form the past of shall, is not used to express simple past futurity, except in indirect speech: as, I said I should go. It is used:

(1) To express present duty or obligation: as, We (they, &c.) should practise virtue; or

(2) Past duty or obligation: as, I (thou, he, &c.) should have gone, i.e., I (thou, he, &c.) ought to have gone, i.e., it was the duty of me (you, him, &c.) to have gone.

(3) To express a simple hypothetical case or a contingent future event, standing in the same relation to would that shall does to will: as, I shall be pleased if you will come, and I should be pleased if you would come. So also in conditional and dependent clauses should is, like shall, used to denote simple futurity: as, If it should rain to-morrow, he will not come.

'He had expected that he should be able to push forward without a moment's pause, that he should find the French army in a state of wild disorder, and that his victory would be easy and complete.'—Macaulay: Hist. Eng., ch. xix.

(4) It is used to soften or modify a statement: as, I should not like to say so.

(5) It should seem was formerly used for "it seems," where we now say, It would seem.

4. Shall was sometimes colloquially or provincially abbreviated into 's: as,

'Thou'st hear our counsel.'—Shakespeare: Romeo & Juliet, I. 4.

"Wretches who live upon the shark and other men's sin, the common poisoners of youth."—South: Bertram, II. 514.

II. Technically: 1. Ichthy.: The English popular name for the individual of the group Selachoidi (q.v.). The body is generally elongated; the muzzle, on the under side of which the nustrils are placed, projects over the mouth, and the males have claspers (with the function of intermittent organs) attached to the ventral fins. The ova are large and few in number, impregnated, and in some genera developed, within an uterine cavity; in others deposited in a tough, horny case, from which the young fish, carrying a yolk-bag, for its nourishment till it is able to seek food, is discharged; in this stage the gill-laminae are prolonged into filaments projecting beyond the gill-cavities, but these are soon absorbed. The teeth are generally large, sharp, and formed for outting, often with serrated edges, but in some genera they form a solid pavement-like mass. Sharks are scaleless, and the skin is usually very rough. [SHAOREEN.] They are most numerous in tropical seas, becoming scarcer as they recede from the warmer regions, a few only reaching the Arctic circle. They are rapid swimmers, with great power of endurance; the larger sharks are exclusively carnivorous, and some of them extremely dangerous to man. They scent their food from a distance, and are readily attracted by the smell of blood or decomposing bodies. The smaller sharks are popularly known as Dog-fishes or Hound, and, though not dangerous to man, do great damage to fishermen's lines and nets. The flesh of sharks is coarse, but it is sometimes eaten; the Chinese use sharks' fins for making thick gelatinous soups, and the liver yields an oil, for the sake of which a shark-fishery is prosecuted on the coast of Ceylon. Their rough skin is employed by joiners to polish fine-grained wood, and by cutlers to cover the hilts of swords to make them firmer in the grasp. The most important species are described in this Dictionary under their popular names. [BASKING-SHARK, DOGFISH, HAMMER-HEADED SHARK, TIGER-SHARK, WHITE SHARK, &c.]

2. Entom.: [SHARK-MOTH].

6. A sharper, as a card sharp; hence, an adept at anything. (U. S.)

II. Technically:

1. Music:

(1) A note artificially raised a semitone.

(2) The sign (♯) which raises a note one semitone above the normal or natural scale. A note so affected is restored to its normal pitch by the use of a natural. In old music sharps were often used to raise notes which had been previously flattened, for which purpose a natural is always now used. When placed on a line or space of the staff at the commencement of a movement, it raises all the notes on that line or space, or their octaves a semitone; if placed before a note in the course of a movement, it raises that note or the repetition of it a semitone, but only within the same bar. A double-sharp (×) is used in chromatic music to raise a note two semitones above its natural pitch.

2. Phonetics: A sharp consonant. [A. II. 2.]

¶ Sharp is often used in compounds, the meanings being in most cases sufficiently obvious, as sharp-cornered, sharp-edged, sharp-pointed, &c.

shear-plan, s. [SHEER-PLAN.]

shear-steel, s. Blister-steel, heated, rolled, and tilted to improve the quality. Several bars are welded together and drawn out. The bar is sometimes cut, faggoted, reheated, and again tilted. This may be repeated. The terms Single-shear and Double-shear indicate the extent to which the process is carried. It is named from its applicability to the manufacture of cutting-instruments, shears, knives, acythes, &c.

* sheard, s. [SHARD.]

shear-er, s. [Eng. shear, v.; er.]

1. One who shears.

"Kicked the shears out of the shearer's hand."
Boyle: *Works*, VI. 473.

2. One who reaps corn. (Scotch.)

shear-ing, pr. par., a., & s. [SHEAR, v.]

A. & B. As pr. par. & particip. adj.: (See the verb).

C. As substantive:

I. Ordinary Language:

1. The act or operation of clipping or cutting with shears or by a machine: as, the shearing of a sheep, the shearing of metallic plates, &c.

2. The proceeds of the operation of clipping by shears: as, the shearing of a flock.

3. A sheep that has been but once sheared; a shearing.

4. The act or operation of reaping. (Scotch.)
"His men were gone home to the shearing, and he would not call them before the ritual was got in."
—Scott: *Waverley*, ch. xviii.

II. Mining: The making of vertical cuts at the ends of a portion of an undercut seam of coal, serving to destroy the continuity of the strata and facilitate the breaking down of the mass. [HOLLINO.]

shearing-machine, s.

1. *Woolen-manuf.*: A machine through which cloth is passed after leaving the gig-mill, to shorten the nap evenly, so as to secure a smooth surface.

2. *Mach.*: A machine for cutting plates and bars of iron and other metal.

shearing-table, s.

shear-ling, s. [Eng. shear, v.; dimin. suff. -ling.] A sheep that has been but once shorn.

"Disposed of several shearings at from 100 to 200 guineas each."
—*Daily Telegraph*, Sept. 14, 1885.

* shear-man, s. [Eng. shear, and man.] One whose occupation is to shear cloth.

"Thy father was a plasterer;
And thou thyself a shearman."
Shakspeare: *2 Henry VI.*, IV. 2.

* shearn, s. [SHARN.]

shears, s. pl. [SHEAR, s.]

I. Ordinary Language:

1. A cutting-instrument, operating like scissors, but on a larger scale and somewhat differently shaped. In one variety the edges of the blades are bevelled, and the handles adapted for thumb and fingers respectively, instead of being duplicated. They are adapted for tailors' use. Timmen's shears have relatively shorter jaws, and are either grasped in the hand, or one leg placed in the vice while the other is worked by hand. They are used

for cutting tin-plate and sheet-metal of moderate thickness. The shears used by farriers, sheep-shears, weavers, &c., are made of a single piece of steel bent round until the blades meet, which open of themselves by the elasticity of the metal. Garden shears and grass shears have long wooden handles to which the blades are attached at an angle of about 45°.

2. The ways or track of a lathe upon which the lathe-head, puppet-head, and rest are placed, and on which the latter is adjusted in the common lathe or slides in the traversing lathe.

* 3. The same as SHEERS (q.v.).

* 4. A wing. (Spenser: *F. Q.*, II. viii. 5.)

shear-tail, s. [Eng. shear, s., and tail, s.]

1. *Ornith.*: The genus *Thaumastura* (q.v.); brilliantly coloured Humming-birds from Central America. The slender Shear-tail (*Thaumastura curvica*) has the tail deeply forked; in Cors's Shear-tail (*T. corce*) the two central tail-feathers are double the length of the next pair, the others being regularly graduated, and the exterior pair the shortest.

2. *Entom.*: *Hadena dentina*, a widely-distributed British night-moth.

shear-wa-ter, sheoer-wa-ter, * shere-wa-ter, s. [See def.]

Ornith.: The popular name of any species of the genus *Puffinus* (q.v.), found distributed over nearly all seas, usually at no great distance from land, to which however they only resort at the breeding season. Four Shearwaters visit the United Kingdom, but only one, *Puffinus anglorum*, the Manx Shearwater, is at all common. It is a plain-looking bird, about the size of a pigeon, black above and white beneath. Sir T. Browne (*Willughby's Ornithologia* (ed. Ray), p. 334) calls it, "A Sea-fowl which doth, as it were, *radere aquam* shear the water, from whence, perhaps it has its name." Their habits appear to be the same all over the world, laying a single white egg in a hole under ground. The young are clothed with thick long down, are extremely fat, and are said to be good eating.

"A sea-fowl called a *shearwater*, somewhat billed like a curlew, but much lesser; a strong and fierce fowl, hovering about ships when they cleanse their fish."
—Browne: *On Norfolk Birds*.

sheat, s. [Ger. *scheid*, *scheid*, *scheidfisch*.] (See compound.)

sheat-fish, s.

Ichthy.: A name applied to any fish of the family Siluridae (q.v.), but specifically to *Silurus glanis*, called also the Sly Silurus, with the exception of the Sturgeon, the largest European freshwater fish, and the only European member of the family. It occurs in the Rhine, and is common in Germany, Poland, Styria, the Danube, and the rivers of southern Russia. It attains a weight of from 300 to 400 lbs., and the flesh of the young fish is firm, flaky, and well-flavoured. The fat is used in dressing leather, and the air-bladder is made into gelatine. The Marquis of Bath presented two specimens to the Zoological Society of London in 1885.

"A mighty sheat-fish smokes upon the festive board."
—Kingsley: *Hypatia*, ch. x.

sheath, * sheathe, s. [A.S. *scēth*, *scōth*, *scēth*; cogn. with Dut. *scheede*; Icel. *skēthir* (fem. pl.); Dan. *skede*; Sw. *skida*; Ger. *scheide*.]

I. *Ord. Lang.*: A case for the reception of a sword or long knife, or similar instrument; a scabbard.

"Putte thou th sword into thy sheathe."
—*Wycliffe*: *John* xviii.

II. Technically:

1. *Bot.*: A petiole when it embraces the branch from which it springs. Called also a vagina. The toothed sheaths of Equisetaceae are formed by the coalescence of the leaves at their base.

2. *Entom.*: The wing-case of an insect.

3. *Hydr.-eng.*: A structure of loose stones for confining a river within its banks.

* sheath-claw, s.

Zool.: The English translation of Mod. Lat. *Thecadactylus* (q.v.).

sheath-winged, a. Having cases for covering the wings; coleopterous.

"Vagilipennis or sheath-winged insects, as beetles."
—Browne: *Vulgar Errors*, bk. III, ch. xxvii.

* sheath, v. [SHEATH, v.]

sheath'-bill, s. [Eng. *sheath*, s., and *bill* (1), s.] Named by Pennant, in 1781, from the fixed horny sheath inclosing the base of the bill; this sheath is almost level in *Chlonis alba*, but rises in front in *C. minor* like the pommel of a saddle.]

Ornith.: The genus *Chlonis*, made known by the naturalists of Cook's second voyage, a specimen of *Chlonis alba* having been met with on New-Year Island, on Dec. 31, 1774. It resembles a pigeon in size and general appearance; plumage pure white; bill yellow at base [see def.], passing into pink at tip; round the eyes the skin is bare, and dotted with cream-coloured papillae; legs bluish-gray. In the Falkland Islands it is called the Kelp-pigeon. Another species was discriminated in 1842 by Dr. Hartlaub; it is smaller than *C. alba*, with similar plumage, but having the bill and bars akin of the face black and the legs much darker. The scapula of Kerguelen Land call it the Sore-eyed Pigeon, from its prominent fleshy orbit.

sheathe, * sheath * shethe, v. [SHEATH, s.]

1. To put up into a sheath or scabbard; to inclose, cover, or hide in a sheath or case, or as with a sheath or case.

"He who hath drawn his sword against his prince ought to throw away the scabbard, never to think of sheathing it again."
—Clarendon: *Civil War*, III. 113.

2. To inclose or cover up with a defensive covering.

"Many a bosom, sheathed in brass,
Strew'd the earth like broken glass."
Byron: *Siege of Corinth*, v. 23.

3. To protect by a casing or covering; to case or cover as with boards, metal, &c.

"Iron ships may be sheathed with copper or alloy by attaching to the iron skin a complete wooden surface to hold the sheathing-usia."
—Knight: *Dict. Mechanical*.

4. To cover up, to hide.

"Her eyes, like marigolds, had sheathed their light."
Shakspeare: *Rape of Lucrece*, 307.

* 5. To take away sharpness or acidity from; to obviate the acidity of; to blunt, to obtund.

"Other substances, opposite in acrimony, are called demulcent or mild, because they blunt or sheath those sharp salts; as pease and beans."
—Arbuthnot.

(1) Used in contempt for a silly, bashful fellow.

(2) (Pl.): God's people, as being under the government and care of Christ, the Good Shepherd. (*John* x. 11.)

(3) A congregation, considered as under a spiritual shepherd or pastor; a flock.

II. Zool.: The genus *Ovis* (q.v.), or any individual of that genus, particularly *Ovis aries*, the Common Sheep, or any of its numerous breeds. Sheep form a small group of Cavicorn Ruminants, characterized by their thick, heavy, transversely-ridged horns, curved spirally outwards, and by their peculiar physiognomy, quite distinct from that of their nearest allies.

They have been known and domesticated from remote antiquity, and it is now almost impossible to ascertain the ancestral stock from which they are descended; probably they have a mixed origin from several wild species, and were introduced into Europe in prehistoric times. Wild sheep are essentially mountainous; they have their head-quarters in Asia, with species in Africa and North

America. They are gregarious, and this character is retained in the domesticated state. The male of the sheep is called a ram, and the female a ewe; the former often exhibits great pugnacity, rushing straight at a foe, and butting with its strongly-armed forehead. The sheep is one of the most profitable domestic animals, nearly every part serving some useful purpose; the fleece yields wool, the flesh is used for food, the skin is made into leather for bookbinding and gloves, or into parchment, and the intestines into strings for musical instruments. [CAROUI.] The milk was formerly much used, as it is still in some countries; and cheese is made from it on the continent. The disposition of the sheep is patient and peaceable, its constitution is sufficiently hardy to endure extremes of temperature, it thrives on a variety of pastures, and sheep-farming, both for the production of wool and mutton, is an important industry in all agricultural countries. The ewe generally brings forth one lamb, frequently twins, sometimes three, at a birth. The lambing season is generally in early spring, but sometimes late in the winter, in order to furnish young lambs to the market. In Great Britain the breeds of sheep are numerous: the Dishley, or Improved Leicesters, are in high repute for weight of carcass and fatting qualities. The Lincoln, the Cotswold, the Teeswater, and Romney Marsh are heavy breeds, exceeding the Leicester in quantity of wool and hardness of constitution; the Shortwooled Southdowns have a close-set fleece of fine wool, and their mutton is of superior quality. They were first bred on the chalky downs in the south of England, and have since spread all over the country; in Hampshire, Shropshire, and Dorsetshire local breeds replace the Southdowns. The Black-faced, the Cheviot, and the Welsh sheep are moutain breeds; the Cheviot are the least hardy of the three, but they all yield excellent mutton. The Iceland sheep have three, four, and sometimes five horns; the Broad-tailed sheep of Asia have the tall so loaded with fat on each side as to weigh seventy or eighty pounds. As the tail is considered a great delicacy, the shepherd sometimes protects it from being injured by dragging on the ground by attaching to it a small board on rough wheels. The Fat-rumped sheep of Southern Tartary has a similar development of fat on the rump. The Wallachian sheep is noted for the size of its horns; and the Astracan and Circassian sheep yield the fur known as Astracan (q.v.). Among the wool-producing breeds one of the most important is the Merino (q.v.). This breed has been so widely raised in the United States that now 95 per cent. of our sheep are mainly of Merino origin, though not all of pure breed. No important breed of native origin exists in this country, but the finer English breeds have been imported.

The head has a distant resemblance to that of a sheep.
 (2) *Corvina oscula*, a freshwater Sciænid, of little value for the table.

sheep's scabious, s.
Bot.: The genus *Jasione* (q.v.).

sheep's sorrel, s.
Bot.: *Rumex acetosella*.

sheep-cot, sheep-côte, s. [Eg. sheep, and cot or cote.]
 1. A small inclosure for sheep; a sheep-pen.
 "But cottage, herd, or sheepcote, none He saw."
Milton: P. R., ii. 337.
 *2. The cottage of a shepherd. (*Shakespeare: As You Like It*, iv. 3.)

sheep-fold, s. [Eg. sheep, and fold, s.] A fold or pen for sheep.
 "There, by the sheepfold, sometimes was he seen."
Wordsworth: Michael.

***sheep-hook, s.** [Eg. sheep, and hook.] A shepherd's crook.
 "Thou a sceptre's heir,
 That thus affect'st a sheephook?"
Shakespeare: Winter's Tale, iv. 4.

sheep-ish, a. [Eg. sheep; -ish.]
 *1. *Lit.*: Of or pertaining to sheep.
 2. *Fig.*: Like a sheep; bashful, diffident; timid to excess; mealy diffident.
 "Two or three sheepish young men slouched awkwardly on the platform."—*Daily Telegraph*, Oct. 14, 1886.

sheep-ish-ly, adv. [Eg. sheepish; -ly.] In a sheepish manner; bashfully; over modestly or diffidently.
 "Billy, my dear, how sheepishly you look!"
Pope: Wives of Bath, 183.

sheep-ish-ness, s. [Eg. sheepish; -ness.] The quality or state of being sheepish; bashfulness; excessive timidity or diffidence.
 "Sheepishness and ignorance of the world, the faults imputed to a private education."—*Locke: On Education*, § 69.

***sheep-y, a.** [Eg. sheep; -y.] Pertaining to or resembling sheep; sheepish.

sheer, *schocre, *shère, n. & adv. [Icel. *skerr* = bright, clear; Dan. *skær*; allied to Icel. *skirr* = clear, bright; A.S. *scir*; Goth. *skairs*; Ger. *schier*.]
A. As adjective:
 *1. Bright, shining.
 "The shere sonne." *Lydgate: Storie of Thebes*, l.
 *2. Pure, unmixed.
 "They had scarcely sunk through the uppermost course of sand above, when they might see small sources to boil up at the first troubled, but afterwards they began to yield sheer and clear water in great abundance."—*P. Holland: Liry*, p. 1191.
 *3. Being only what it seems or pretends to be; unmingled, simple, mere, pure, downright; as, sheer nonsense.
 4. Applied to very thin fabrics of cotton or muslin.
 5. Straight up and down; perpendicular, precipitous.
 "Perched on its flat-topped rock of sandstone and basalt, naturally sheer in some places."—*Daily Telegraph*, Dec. 4, 1885.
B. As adv.: Clean, quite, completely, right, at once.
 "Bow'd their stiff necks, loaden with stormy blasts,
 Or torn up sheer."
Milton: P. R., iv. 419.

sheer (1), v. t. & i. [SHEAR, v.]

sheer (2), v. t. [Dut. *scheren* = to shear, . . . to withdraw or go away.]
Naut.: To decline or deviate from the line of the proper course; to slip or move aside; as, A ship sheers from her course.
 ¶ (1) To sheer alongside: To come gently alongside any object.
 (2) To sheer off: To turn or move aside to a distance; to move off; to go away.
 (3) To sheer up: To turn and approach to a place or ship.

sheer, s. [SHEER (2), v.]
 1. *Shipbuilding*:
 (1) The upward curvature of the lines of a vessel toward the bow and stern. Sharp vessels generally have more than full-built ones; small vessels more than large ones; and merchantmen more than men-of-war. When the deck is perfectly flush from stem to stern, a vessel is said to have a straight sheer.
 (2) The after-strake of a vessel.
 2. *Naut.*: The position of a ship riding at single anchor with the anchor ahead. When riding at short scope of cable, when she swings at right angles to the cable, exposing a larger surface to the wind or current, and causing the anchor to drag, she is said to break her sheer.
 ¶ (1) To quicken the sheer: *Shipbuild.*: To shorten the radius which strikes out the curve.
 (2) To straighten the sheer: *Shipbuild.*: To lengthen the radius.

sheer-batten, s.
 1. *Shipbuild.*: A strip nailed to the ribs to indicate the position of the wales or bends preparatory to those planks being bolted on.
 2. *Naut.*: A horizontal batten seized to the shrouds above the dead-eye to keep the latter from turning.

sheer-boom, s.
Lumbering: A boom in a stream to catch logs and direct them towards a log-pond. [Boom (2), s., 111.]

sheer-draught, sheer-draft, s.
Shipbuild.: The same as SHEER-PLAN (q.v.).

***sheer-hook, s.** [SHEAR-HOOK.]

sheer-hulk, s.
Naut.: An old vessel fitted with sheers for taking out and putting in masts of vessels. [SHEERAS.]

sheer-lashing, s.
Naut.: The mode of lashing together the legs of the sheer at the cross. The middle of the rope is passed around the cross, the ends passed up and down respectively, then returned on their own parts and lashed together.

sheer-line, s.
 1. *Shipbuild.*: The line of the deck at the side of the ship.
 2. *Mil.*: The stretched hawser of a flying bridge along which the boat passes.

sheer-mast, s.
Naut.: A mast formed of a pair of spars, between which the yard of the sail is slung.

sheer-mould, s.
Shipbuild.: A long, thin plank for adjusting the ram-line on the ship's side, in order to form the sheer of the ship. One of its edges is curved to the extent of sheer intended to be given.

sheer-plan, s.
Shipbuild.: The plan of elevation of a ship, wherein is described the outboard works, as the wales, sheer-rails, ports, drifts, heads, quarters, post, and stem, &c., the hang of each deck inside, the water-lines, &c.

sheer-rail, s.
Shipwright.: A rail surrounding a ship on the outside, under the gunwale. Also called a Waist-rail.

sheer-strake, s.
Shipbuild.: The strake under the gunwale in the top side.

***sheer-ly, adv.** [Eg. sheer, a.; -ly.] At once, quite, completely, sheer. (*Beaum. & Flot.: Mad Lover*, v. 1.)

fåte, fát, fáre, amidst, whát, fáll, father; wê, wêt, hère, camel, hër, thère; pine, pít, síre, sír, marine; gô, pôt, or, wære, wôlf, wôrk, whó, sôn; müte, cúb, cüre, quite, cür, rüle, füll; trý, Sýrian. æ, œ = ē; ey = ā; qu = kw.

sheers, ***shēars**, *s. pl.* [The same word as *shear, s.*, and so called from the resemblance to a pair of shears.]

Naut.: An apparatus consisting of two masts, or legs, secured together at the top, and provided with ropes or chains and pulleys; used principally for masting or dismantling ships, hoisting in and taking out boilers, &c. The legs are separated at their feet to form an extended base, and are lashed together at their upper ends, to which the guy-ropes and tackle are attached. The sheers have one motion on the steps describing an arc, and are inclined from the perpendicular to a greater or less extent as required, by slackening or hauling on the guy-ropes or fall of the sheer-tackle. Temporary sheers are made of two spars lashed together at the top and unstayed by guys. Permanent sheers are sloped together at top and crowned with an iron cap bolted thereto. They are now usually mounted on a wharf, but were formerly placed on a shear-hulk (q.v.).

SHEERS.

†**sheer-wā-tēr**, *s.* [SHEARWATER.]

sheēt, ***sheete**, ***schete**, ***shete**, *s.* [A.S. *scēte*, *scēte* = a sheet, original meaning = a projection, being allied to *scēd* = a corner, a nook of ground, a fold of a garment, from *scēdan* = to shoot (q.v.); cf. A.S. *scēta* = the foot of a sail; lecl. *skaut* = a sheet, a corner of a square cloth, sheet, or rope attached to a sail; Dut. *school* = a shoot, sprig, boom, lap; Sw. *skot* = the sheet of a sail.]

I. Ordinary Language:

1. A large, broad, and thin piece of anything, as paper, linen, glass, iron, &c.; specifically—
(1) A broad and large piece of cloth, as of linen or cotton, used as part of the furniture of a bed.

“O'er the blanched sheet her raven hair
Lies in disordered streams.”
Matthew Arnold: Tristram & Isolt, II.

(2) A broad piece of paper, either unfolded as it comes from the manufacturer, or folded into pages. Sheets of paper are of various sizes; as royal, demy, foolscap, &c. [PAPER.]

“A sheet of blank paper that must have this new imprimatur clapt upon it.”—*Addison: Spectator*, No. 445.

(3) (Pl.) A book or pamphlet.

“To this the following sheets are intended for a full and distinct answer.”—*Waterland*.

(4) A sail.

2. Anything expanded; a broad expanse or surface.
“Such sheets of fire, such bursts of horrid thunder,
I never remember to have heard.”
Shakespeare: Lear, III. 2.

II. Naut.: A rope attached to the clew of a sail in order to extend it. Lower square sails, or courses, have another rope, the tack (q.v.).

“(1) A sheet in the wind: Slightly intoxicated; somewhat tipsy. (*Colloq. & slang*.)

(2) In sheets:

Print.: Lying flat or expanded; not folded, or folded but not bound. (Said especially of printed pages.)

sheet-anchor, ***shoot-anchor**, *s.* [Orig. and properly *shoot-anchor*, i.e., an anchor to be shot out or lowered in case of great danger.]

1. *Lit. & Naut.*: The largest anchor of a ship, let go in cases of extreme danger.

2. *Fig.*: The chief support; the last refuge or resort for safety.

“This saying they make their shoot-anchor.”—*Cramer: Answer to Gardiner*, p. 117.

sheet-bend, *s.*

Nautical:

1. A double hitch, formed by laying the bight of one rope over that of another, passing its two parts under the two parts of the other, and upward through its bight crosswise and overlaying it.

2. The strongest cable on board ship; bent to the sheet-anchor.

sheet-cable, *s.*

Naut.: The cable attached to the sheet-anchor; the strongest and best cable in the ship.

sheet-copper, *s.* Copper in broad, thin plates.

sheet-glass, *s.* A kind of crown-glass, formed first into an elongated spheroidal form, and then swung around in a vertical circle and reheated two or three times, until the end not attached flies open, and the glass assumes the form of a hollow cylinder. The cylinders are cut longitudinally with a diamond, and placed in a furnace, where they open out into sheets under the influence of heat. Glass made in this way is also known as cylinder, broad, spread, or German glass.

sheet-iron, *s.* Iron in broad, thin plates.

sheet-lead, *s.* Lead formed in broad, thin plates.

sheet-lightning, *s.*

Elect. & Meteor.: Lightning which, not being compressed by a dense atmosphere, is free to expand into a sheet of flame. [LIGHTNING, II.]

sheet-pile, *s.* The same as SHEETING-PILE (q.v.).

***sheēt**, *v.t.* [SHEET, *s.*]

1. To furnish with a sheet or sheets.

2. To cover or wrap in a sheet; to shroud.

“Where damps hang mould’ring on the ivied wall,
And sheeted ghosts drink up the midnight dew.”
Shelley: Love Elogy.

3. To cover, as with a sheet; to shroud.

“Yes, like the stag, when snow the pasture sheets,
The barks of trees thou brows’st.”
Shakespeare: Antony & Cleopatra, I. 4.

***sheēt-ēd**, *a.* [Eng. *sheet*; -*ed*.]

1. Shrouded or wrapped in a sheet. (*Shakespeare: Hamlet*, I. 1.)

2. Formed into or resembling a sheet.

“Blasls from Niffelheim
Lifted the sheeted mists.”
Longfellow: Tegner’s Drapa.

***sheēt-ēn**, *a.* [Eng. *sheet*; -*en*.] Made of sheeting. (*Davies: Paper’s Complaint*, 250.)

sheēt-fūl, *s.* [Eng. *sheet*; -*ful*(l).] As much as a sheet will hold; enough to fill a sheet.

sheēt-īng, *s.* [Eng. *sheet*; -*ing*.]

1. **Fabric**: Common calico, bleached or unbleached. Sometimes made of double width for sheets.

“Dispers were made in one town or district, damasks in another, sheeting in a third, fine wearing linen in a fourth, coarse in a fifth.”—*Berkeley: The Querist*, § 62.

2. **Hydr. Eng.**: A lining of timber or metal for protection of a river-bank. Timber is the usual material, and consists of sheet-piles or of guide piles and planking, fortified by anchoring to the bank in the rear.

3. **Tobacco**: The act or process of laying the leaves flat to be piled in books.

4. **Wool-man.**: A form of batting; a process of bringing the fibre into an even sheet.

sheeting-pile, **sheet-pile**, *s.*

Hydr. eng.: A plank, tongued and grooved, driven between two principal piles, to shut out the water. The exterior piles of a cofferdam or other structure, serving to sustain a filling in of earth, masonry, or other material.

***sheēt-ŷ**, *a.* [Eng. *sheet*; -*y*.] Forming a sheet or broad expanse; broad.

“Were the Niagara thus broken, at least if some considerable parts of it were not left broad and sheety, it might be a grand scene of confusion.”—*Gilpin: Tour to the Lakes*, vol. I, § 3.

***shefe**, *s.* [SHEAF, *s.*]

shēik, **shēikh**, *s.* [Arab. *shaykh* = an elder, a chief.] The head of a Bedouin family of importance with its retainers, or of a clan or tribe. He is sovereign within the portion of the desert occupied or traversed by his people, but, if too despotic, can be kept within bounds by the knowledge that a portion of his clan may transfer its allegiance to some other sheik. When war exists, the sheiks of a region confederate together and choose one of their number as a sheik or chief. The position of Abraham with his allies, Aner and Eshcol of Mamre, much resembled that of an Arab sheik with his confederates (Gen. xiv. 13, 14). When a traveller passes through the territories of a sheik he pays for guidance and safe conduct, a process which requires repetition whenever the petty dominions of some new sheik are reached.

shelk-ul-islam, *s.* The highest Muhammadan ecclesiastical functionary in Turkey, in whom the primacy is vested.

shēil, **shēil-īng**, *a.* [SHEAL, SHEALING.]

shēil-drāke, *s.* [SHELDRAKE.]

shē-kār-rŷ, *s.* [SHIKAREE.]

shēk-ēl, *s.* [Heb. שֶׁקֶל (*sheqel*) (see def.), from שָׁקַף (*shaqaf*) = to weigh, to weigh out.]

1. **Hebrew weights**: The fundamental weight in the Hebrew scale. It is believed to have weighed 8.78 dra. avoirdupois, 10 dwt. troy. Half a shekel was called a bekah, which was divided into ten gerahs. Three hundred shekels constituted a talent.

2. **Hebrew money**: A coin, believed to have been worth 2s. 3-3/4d., or 54-7/4 American cents, but money was then, perhaps, ten times as valuable as now. Shekels of the Maccabee period still exist. In shekels of three years, struck under Simon Maccabeus, the obverse has a vase, over which are the Hebrew letters aleph, shin with a beth, and shin with a gimel; the reverse, a twig with three buds and an inscription, Jerusalem Kedushah, or Hakedushah (Jerusalem the Holy). The character is the Samaritan. Other so-called shekels in the square Hebrew letters are considered forgeries.

shē-kī-nah, *s.* [SHECHINAH.]

shēld, *s. & a.* [A.S. *scylde*, *scild*.]

* **A.** As subst.: A shield.

* **B.** As adj.: Speckled, flecked, piebald. (*Prov.*)

sheld-duck, *s.*

Ornithology:

1. The Shelduck (q.v.).

2. *Mergus serrator*, the Red-breasted Merganser.

“In Ireland this species is more or less common in winter . . . being generally known to the fishermen and fowling by the name of *sheld-duck*, and, occasionally as *Speck-Wigson*, on account of the sharp serrated bill.”—*Farrall: British Birds* (ed. 4th), IV, 495.

shēld-āf-le, **shēld-āp-le** (le as ēl), *s.* [SHELD, *a.*] The chaffinch. (*Prov.*)

***shēlde**, *s.* [SHELD, *s.*] A French crown, so called from having the figure of a shield on one side.

shēil-drāke, *s.* [From East Anglian *sheld* = parti-coloured (*Ray: Eng. Words*, p. 74); the Old Norse name was *skjöldungr*, from *skjöldr* = (1) a patch, (2) a piebald horse. Some make *skjöldr* = a shield, and refer it to the shield-like patch on the breast of the bird, thus ac counting for the English form *sheldrake*.]

Ornith.: *Tadorna cornuta* (or *vulpanser*) of modern ornithologist; *Anas tadorna* (Linn.). It is somewhat larger than an ordinary duck, with a fleshy protuberance at the base of the bill, whence its specific name. It is a very handsome bird; head and upper neck dark glossy green, broad white collar, below which a broader band of bright bay extends from the back across the breast; outer scapulars, primaries, a median abdominal stripe, and a bar on tip of middle tail-quills black; inner secondaries and lower tail-coverts gray; speculum rich bronze-green; rest of plumage white. The female is smaller, and less brilliantly coloured. It frequents sandy coasts in Britain, Europe, North Africa, ranging across Asia to Japan; nesting under cover, usually in a rabbit-hole. The Ruddy Sheldrake (*Tadorna casarca*) sometimes strays to the British Islands, but is a native of Barbary, south-eastern Europe, and central Asia. Its colour is an almost uniform bay, the male with a black ring round the neck. The Common Sheldrake breeds freely in captivity, crossing readily with other species, and the offspring show a remarkable tendency to reversion.

***shēld-trōme**, ***sheld-trume**, ***shel-trōme**, **shel-trōm**, ***shel-trōin**, ***shel-trun**, ***schil-trum**, *s.* [A.S. *scild-truma* = a shield-troop, from *scild* = a shield, and *truma* = a troop of men.] A body of troops used to protect anything; a guard, a squadron.

shēil-dūck, *s.* [SHELDRAKE.]

Ornith.: The female of the Sheldrake (q.v.).

shēlf, ***schelfe**, ***sholfe**, *s.* [A.S. *scylfe* = a plank or shelf, cogn. with Low Ger. *schelpe* = a shelf, *schelfern* = to scale off, to peel; cf. Dut. *schelpe* = a shell; Ger. *schelpe* = a husk, a paring, a shell; lecl. *skjálf* = a shelf.]

bōil, **bōy**; **pōut**, **jōwl**; **cat**, **çell**, **chorus**, **çhin**, **bench**; **go**, **gem**; **thin**, **this**; **sin**, **as**; **expect**, **çenophon**, **exist**. **ph = f**

-cian, **-tian = shān**. **-tion**, **-sion = shūn**. **-fion**, **-sion = zhūn**. **-clous**, **-tious**, **-sious = shūa**. **-hle**, **-dle**, &c. = **bel**, **del**

I. Ordinary Language:

1. A ledge for holding articles secured to a wall, &c.; a board or platform of boards secured horizontally to a wall, &c., or on a frame apart, to hold vessels, books, or the like; a ledge.

"These shelves admit not any modern book."
Pope: *Moral Essays*, iv. 140.

2. A projecting layer of rock; a stratum lying horizontally.

3. A rock or ledge of rocks rendering the water shallow; a shoal, a sandbank. [In this sense there is a confusion with *shelves*.]

"Sure of his pilot's loss, he takes himself
The helm, and steers aloof, and shows the shelf."
Dryden: *Virgil*; *Æneid* v. 1, 132.

II. Shipbuilding: An inner timber following the sheet of the vessel and bolted to the inner side of the ribs to strengthen the frame and sustain the deck-beams.

¶ To lay (or put) on the shelf: To put aside as out of use, or date, or unfit for further service.

shēlf, *v.t.* [SHELF, *s.*] To put or lay on a shelf; to elve.

shēlf-ŷ, *a.* [Eng. *shelf*; *-y*.]

1. Full of or abounding with sandbanks or rocks rising nearly to the surface, and so rendering navigation dangerous.

"Gildes by the syrens' cliffs, a shēlfy coast,
Long infamous for ships and sailors lost."
Dryden: *Virgil*; *Æneid* v. 1, 132.

2. Full of strata of rock; having rocky ledges cropping up.

"The tillable fields are in some places so tough, that the plough will scarcely cut them: and in some so shēlfy, that the corn hath much ado to sustain its root."
Carew: *Survey of Cornwall*.

shēll, *schelle, *shelle, *s.* [A.S. *scell*, *scyll*; cogn. with Dut. *schel*; Icel. *skel*; Goth. *skalja* = a tile. Allied to *scale* (1), *s.*]

I. Ordinary Language:

1. The hard outside covering of anything, especially that which serves as the covering of certain fruits and animals: as—

(1) The outside or covering of a nut.

(2) In the same sense as II. 8.

"These [torches] being laid aside, shells of fishes succeeded, which they sounded in the manner of trumpets."
Pott: *Antiquities of Greece*, bk. iii, ch. ix.

(3) The covering or outside layer of an egg.

"Think him as a serpent's egg . . .
And kill him in the shell."
Shakspeare: *Julius Cæsar*, II. I.

2. Any framework or exterior structure, regarded as not being completed or filled in; a carcase.

"The marquis of Medina Sidonia made the shell of a house that would have been a very noble building, had he brought it to perfection."
Addison: *On Italy*.

3. Any slight hollow structure or vessel, incapable of sustaining rough usage.

4. A coarse kind of coffin; or a thin interior coffin inclosed by the more substantial one.

5. The exterior plates of a steam-boiler.

6. In the same sense as II. 5.

7. A musical instrument, such as a lyre, the first lyre being made, according to the classic legend, of strings stretched across a tortoise-shell.

"The hollow of that shell,
That spoke so sweetly, and so well."
Dryden: *St. Cecilia's Day*.

8. Outward show without inward substance or reality.

"So devout are the Romanists about this outward shell of religion, that if an altar be moved, or a stone of it broken, it ought to be re-consecrated."
Aylife: *Parergon*.

9. A name given to one of the forms at several public schools.

10. A shell-jacket.

II. Technically:

1. *Calico-work*: An engraved copper roller used in calico printing.

2. *Entom.*: An elytron (q.v.).

"Converted into cases or shells (elytra)."
Swainson & Shuckard: *Insecta* (1840), p. 51.

3. Nautical:

(1) The wooden outer portion or casing of a block, which is mortised for the sheave, and bored at right angles to the mortise for the pin, which is the axis of the sheave or sheaves.

(2) A kind of thimble dead-eye block employed in joining the ends of two ropes.

4. *Optics*: A concave-faced tool of cast-iron, in which convex lenses are ground. The glasses are attached to the face of a runner,

which is worked around with a circular winging stroke, so as not to wear either the glasses or the shell into ridges.

5. *Ordn.*: A hollow projectile containing a bursting-charge, which is exploded by a time or percussion fuse. Invented at Venlo, 1495; used by the Turks at the siege of Rhodes, 1522. Shells are usually made of cast-iron, and for mortars and smooth-bore cannon are spherical; but for rifled guns they are, with the exception of Whitworth's and a few others, cylindrical and have a conoidal point. Palliser shells are made of "chilled" cast iron, and are much harder. Shells are caused to take the grooves in a rifled gun; to receive a rotary motion, by means of studs, as in the French and early Woolwich and Armstrong systems; by a leaden casing, as in many of Armstrong's first guns, and, more recently, by means of a disc or ring, the sabot, which is expanded in the act of firing. Hardened steel shells of from six to thirteen-lobed caliber, now being made for the United States Government, will penetrate several inches of Harveyized armor plate without crumbling or showing serious abrasion.

6. *Ormith.*: [EGG-SHELL.]

7. *Weaving*: The bars of the lay, which are grooved to receive the reed.

8. *Zool.*: A calcareous defence for the soft and vulnerable bodies of the various animals, specif., of the Mollusca. The relation of the shell to the breathing-organ is so close that Mr. S. P. Woodward regarded the former as a pneumoskeleton, essentially a calcified portion of the mantle, with the breathing organ as the most specialised part. So many mollusca have shells that the whole sub-kingdom has been called Testacea, or popularly "shell-fish;" but some are without shells, while the great Crustacean sub-class of the Entomostraca possess them, and the fossil bivalve, *Biogelias* shell of the Crustacean genus *Estheria* was long mistaken for the hinged shell of *Poaidonomya*, a true mollusc. Shells are said to be external when the animal is contained in them, and internal when they are concealed in the mantle. In form, the shells of mollusca may be univalves or bivalves. Formerly there was a category also of multivalves, including the cirripedes; but these are now classed with the crustacea. Shells are composed of carbonate of lime with a little animal matter. The former is derived from the food. In structure they may be fibrous, laminated, horny, or glossy and translucent; in lustre they may be dull, porcellanous, or nacreous. The shell is formed by the mantle. The more it is exposed to light the brighter it is. [For their geological value see Fossil.] The distribution of sea-shells in the ocean is easily accounted for: freshwater shells, in Darwin's view, are transferred to new regions by adhering, as young ones often do, to the feet of water-birds. The means for dispersing land-shells are less effective, and in fact they are often confined to single islands or similar limited areas. [CARAPACE, ECHINODERMATA, FORAMINIFERA, TEST, TORTOISESHELL, &c.]

shell-auger, *s.* A pump-bit (q.v.).

shell-bark, *s.*

Bot.: *Carya alba*. [SHAO-BARK, HICKORY.] Thick Shell-bark Hickory is *Carya sulcata*.

shell-binder, *s.*

Zool.: *Terebella conchilega*, plentiful on some parts of the British coast. The tube is of great length, and built up almost entirely of sand.

shell-bit, *s.* A wood-boring tool used in a brace. It has a semi-cylindrical form, terminates in a sharp edge, and has a hollow shank.

shell-board, *s.* A frame placed on a cart or wagon for the purpose of carrying hay, straw, &c.

shell-boat, *s.* A boat with a light frame and thin covering; one kind of racing-boat.

shell-button, *s.* A hollow button made of two pieces, front and back, joined by a turn-over seam at the edge, and usually covered with silk or cloth; also a button made of mother-of-pearl.

shell-cameo, *s.* A cameo cut on a shell instead of a stone; the shells used having different layers of colour, so as to exhibit the peculiar effects of a cameo.

shell-fish, *s. pl.* A popular, but incorrect,

name for marine or fluviatile animals used for food, and having a defensive covering. This may be a carapace, as in the Crab, the Lobster, and the Crayfish; a spiral or conical univalve shell, as in the Whelk and Limpet respectively; or a bivalve shell, as in the Oyster and Mussel.

"Crabs and other shell-fish which abound don't pay the carriage."
St. James's Gazette, Nov. 6, 1855.

¶ Sometimes the name is limited to the Mollusca, and Woodward (*Mollusca* (ed. 1850), p. 28) says that this popular name, "though not quite accurate, cannot be replaced by any other epithet in common use."

shell-flower, *s.*

Bot.: *Chelone glabra*, a variety of *Chelone obliqua*. The corollas, which are in spikes, are tubular and inflated.

shell-fougass, *s.*

Fort.: A mine charged chiefly with shells, and covered with earth. [FOUSSAS.]

shell-gauge, *s.*

Ordn.: An instrument for verifying the thickness of hollow projectiles.

shell-gold, *s.* Chips or thin laminae of gold prepared by beating; applied to surfaces for decorative purposes.

shell-gun, *s.* A gun or cannon for throwing bombs or shells.

shell-hook, *s.*

Ordn.: A pair of tongs with hooks, which are inserted into the ears of a shell, and by which it is carried to the mortar.

shell-insects, *s. pl.* [SHELLED-INSECTA.]

shell-jacket, *s.*

Mil.: An address military jacket.

shell-lac, *s.* [SHELLAC.]

shell-lime, *s.* Lime obtained by burning sea-shells.

shell-limestone, *s.*

Geology:

1. *Gen.*: A limestone composed mainly of shells. A stratum of this type is at present forming in shallow water at Shell Ness, on the east of Shetpney. (Seeley.)

shēr-iff (2), *sche-rif, shēr-ēve, *shēr-rife, *shē-royve, *shī-riffe, *sherife, *shrieve, s. [A. S. *scir-gerifa* = a shire-reeve, from *scir* = a shire (q.v.), and *gerifa* = a reeve (q.v.).]
1. In the United States the principal duties of the public official known as sheriff are to maintain peace and order, to attend as administrative officer during sessions of court to guard prisoners and juries, to preside at inquisitions, to serve processes and execute the judgments of the courts, as in the sale of property condemned for debt, &c. An unpleasant duty of the sheriff is the execution of criminals condemned to death. In most of the states the sheriff is elected by the people, and in large cities, where the fees of the office are important, the position is a highly coveted one. In some of the states under-sheriffs are appointed, who replace the sheriff in his absence; while in all of them there are deputy sheriffs, the servants and agents of the sheriff in the performance of his duties.
2. In England, the chief officer of the Crown in every county or shire, to whom the charge of the county is committed by letters patent. He is appointed (except in the case of London and the county of Middlesex) by the Crown out of three names submitted for each county by the judge who goes on circuit. [PAIR-INO, ¶.] Unless specially exempted, or in case of legal disability, the person nominated is bound under penalty to serve the office. As keeper of the Queen's peace, the sheriff is the first man in the county, and during his year of office is superior in rank to any nobleman in the county. He is especially intrusted with the execution of the law and the preservation of the peace in his county, for which purposes he has at his disposal the whole civil force of the county. [POSSE COMITATUS.] Personally the sheriff performs only such duties as are purely honorary, as attendance upon the judges on circuit, or duties of dignity or public importance, as presiding over elections and the holding of county meetings. The ordinary functions, such as execution of writs, &c., are discharged through an under-sheriff, so called to distinguish him from the sheriff, who is often popularly known as the High-sheriff.
"Originally the high sheriff was the official deputy of the Crown, for enforcement—in the county to which he belonged—of law and order and of the Crown's decrees. Did the Crown require an armed force, the sheriff levied it. The sheriff was responsible for providing that the Royal writ of summons should run to his shirealty, that it should be duly served and obeyed. When the courts of law, as representing the Crown, had recorded a judgment, it was the duty of the sheriff to see that judgment enforced, whether against goods or person of the individual who was the subject of the judgment. The sheriff was the incarnation of police, militia, high bailiff, &c., rolled into one. He was the precursor, in days of more primitive civilisation, of forces and functions most of which have now passed from his hands. To this day he is still the recipient of the Royal writ for election of a member of Parliament, and is responsible for the conduct of the same. He still enforces, through his under-sheriffs, the judgments of the superior courts; he seizes the goods of judgment debtors, though he has been relieved (by the abolition of imprisonment for debt in 1859) of the odious duties of *capias ad satisfactionem*; and he is still responsible for the due carrying out of the sentence *suæ per coll.* in the case of criminals sentenced to capital punishment. Also—and this is the most onerous and least useful of his functions—he is still the nominal guardian and escort of the Crown, represented by judges in eyre, when county assizes are being held. Up to the days of railroads, the sheriff actually escorted their lordships from one confine of his county to the other, meeting his neighbouring brother sheriff on the county border, and there receiving from him or transferring to him his august charges. In older days his 'javelin men' were a really armed and necessary force, requisite to ensure the safety of the Crown and its deputies on the march."—*Field*, Jan. 2, 1886.
3. A law officer in Scotland, whose functions seem to have been originally, like those of the sheriffs in England, mainly executive, but who now is judge in a county court. At one time the office was hereditary; but it is now

in the appointment of the Crown. Nearly all the sheriffs are now practicing lawyers resident in Edinburgh, sheriff-substitutes acting for them as local judges in the several counties.

sheriff-clerk, s. In Scotland, the clerk of the sheriff's court, who has charge of the records. He registers the judgments of the court, and issues them to the proper parties.

shēr-rý, s. [From the town of Xeres, near Cadiz, in Spain, whence it was brought. The original form of the word was *sherry*, the final *a* of which was dropped from a mistaken idea that it was the plural ending, as in the case of *pea* for *pease*, &c.]

1. *Comm.*: A favourite Spanish white wine, prepared from small white grapes grown in the province of Andalusia, those which furnish the better qualities being cultivated in the vineyards of Xeres. In the manufacture of sherry the grapes are not gathered until they are quite ripe, and the fermentation is continued until nearly all the sugar has been converted into alcohol. At first it is of a pale straw colour, but it darkens with age. Sherrys may be divided into natural, containing from 20 to 26 per cent. of proof spirit, and fortified, containing from 30 to 40 per cent.; the reason given for the addition of so much spirit is that the wine will not otherwise stand the voyage. Sherry is not adulterated to any great extent, but many of the cheap sherrys now usually sold are mixtures of low-classed sherrys with ordinary white wine, the strength being increased by the addition of alcohol.

2. *Pharm.*: Sherry is used in many of the wines of the pharmacopœia, as *Vinum ferri*, &c.

sherry-cobbler, s. Sherry, sugar, and iced water sucked up through a straw.

Numis.: A British coin of currency and account, now equal in value to twelve pennies, or to one-twentieth of the pound sterling. It has varied considerably in value at different times, from four pennies to twenty pence. In 1590 the pound troy was coined into sixty shillings, in 1600 into sixty-two shillings, and by the Act, 56 George III., it was ordered to be coined into sixty-six shillings, which is the rate at which shillings are now struck. The term shilling was also applied to a weight equivalent to the twentieth part of a pound; thus, the statute of Henry II., A.D. 1266, decreed that "if the corn be at twelvecence a quarter, the furthing loaf shall weigh six pounds sixteen shillings," i.e., six pounds and $\frac{1}{2}$ of a pound.

"The first current shilling or silver pieces of twelve pence stamped within memorie, were coined by K. Henrie the eight, in the twentieth year of his reigne." *Holinshed: Descrip. of Eng.*, bk. II., ch. xxv.

5. To be noticeably visible or apparent; to be prominent.

"Love, sweetness, goodness, in her person *shined*," Milton; *On his Deceased Wife*.

B. Trans.: To cause to shine or be bright. (Vulgar.)

¶ To *shine* is a steady emission of light; to *glitter* is an unsteady emission of light, occasioned by the reflection on transparent or bright bodies. The sun and moon *shine* whenever they make their appearance; but a set of diamonds *glitter* by the irregular refraction of the light on them. *Shine* specifies no degree of light, it may be barely sufficient to render itself visible, or it may be a very strong degree of light; *glare* on the contrary denotes the highest possible degree of light; the sun frequently *glares*, when it *shines* only at intervals; and all naked light, the strength of which is diminished by any shade, will produce a *glare*.

¶ To cause the face to *shine*: *Script.*: To be propitious.

Shin'-tò, s. [Chinese = the way of the gods.]

Comparative Religions:

The religious belief of the people of Japan, prior to the introduction of Buddhism from Corea in A. D. 552. This new belief almost entirely absorbed the old, being, however, itself modified in the process. Shinto possesses no moral code. Motoóri (1730-1801) maintained that the will of the Mikado was the criterion of right and wrong. Shinto holds the Mikado to be the direct descendant and representative of the Sun-goddess; has associated with it a system of hero-worship, and attributes spiritual agencies to the powers of nature. (See extract.)

"The three great commandments, issued by the department of religion in 1872, intended to be the basis of a reformed Shinto and natural religion, are as follows: (1) Thou shalt honour the gods, and love thy country; (2) Thou shalt clearly understand the principles of heaven and the duty of man; (3) Thou shalt revere the emperor as thy sovereign, and obey the will of his court. In its higher form, Shinto is a cultured and intellectual deity; in its lower form it consists in blind obedience to governmental and priestly dictates." *Ripley & Dana: Amer. Cyclop.*, ix. 582.

2. A Shintoist.

"The Shintos believe in a past life, and they live in fear and reverence of the spirits of the dead." *Ripley & Dana: Amer. Cyclop.*, ix. 587.

Shin'-tò-ísm, s. [Eng. *Shinto*; -ism.]

Compar. Relig.: The same as SHINTO, 1 (q.v.).

"The great end and aim of *Shintoism* is obedience to the edicts of the government, as shown in the sermons of lecturers and priests." *Ripley & Dana: Amer. Cyclop.*, ix. 588.

Shin'-tò-íst, s. [Eng. *Shinto*; -ist.]

Compar. Relig.: A believer in Shinto (q.v.).

"The Shintoists have very obscure notions about the immortality of the soul, a supreme creator, or a future state of rewards and punishments." *Ripley & Dana: Amer. Cyclop.*, ix. 588.

* **shup, s.** [A.S. *scip*, *scop* (pl. *scipu*); cogn. with Dut. *schif*; Icel. *skip*; Dan. *skib*; Sw. *skepp*; Goth. *skip*; Ger. *schiff*; O. H. Ger. *scif*. From the same root as *shape* and *shave*; Gr. *σκάφος* (*skapfos*) = a digging, a trench, the hull of a ship, a ship, from *σκάπτω* (*skapto*) = to dig, delve, hollow out; Lat. *scapha* = a bowl, a boat, a skiff.]

1. Strictly, a three-masted vessel with square sails on each mast, but applied in ordinary language to vessels of whatever kind, excepting boats, adapted for navigation. Ships are of various sizes, and fitted for various purposes, and are called by various names according to their rig and the purposes to which they are applied, as men-of-war, merchantmen, brigs, sloops, schooners, galleys, &c. A ship, strictly so called, has a bowsprit and three masts—main-mast, fore-mast, and mizzen-mast—each square-rigged, and composed of a lower-mast, a top-mast, and a top-gallant mast. A ship distinguished from a barque by the square sails on the mizzen, where a barque has only fore-and-aft sails. In order to meet the increase in size, and especially in length, some ships are now built with four masts. Ships were,

superseded by iron and steel, by the adoption of which lightness and strength are combined. Vessels of war are often constructed on the composite system, that is, of wood with a skin or coating of iron or steel.

"The proper definition of a ship is a vessel with three masts, each mast being square-rigged. She would be a ship, even if she did not carry anything above her cross-trees, for she is made so by her cross-jack and mizzen top-sail yard and mizzen top; yet, if you add a fourth mast to a ship she is still a ship, even if it be what is termed a spanker mast—that is, a mast rigged like the mizzen-mast of a barque."—*Daily Telegraph*, Nov. 26, 1855.

* 2. A dish or utensil formed like the hull of a ship for holding incense.

shít'-tah (pl. shít'-tím), s. [Heb. שִׁטָּה (shittah), for שִׁיטָּה (shintah) (see def. (pl. שִׁיטָּה (shittim); Coptic syl, sant, santh = acacia.)

Script.: A tree mentioned in the singular in Isa. xli. 19, and repeated in the plural, as used in constructing the ark of the covenant (Exod. xxv. 10, xxxvii. 1; Deut. x. 3, &c.), staves (Exod. xxv. 13, 28), a table (xxv. 23, xxxvii. 10), boards for the tabernacle (xxvii. 15, xxxvi. 20), and pillars (xxvi. 32, 37, xxxvi. 36). The tree is almost certainly an acacia. Some think it was A. Seyal, others S. nilotica or A. arabica. Dr. Livingstone believed it to have been A. giraffa. Dean Stanley, preferring A. Seyal, considered that the plural form was suggested by the tangled thickets produced by the stems of this tree.

shò'-gùn, s. [Japanese = generalissimo.] The so-called "secular" emperor of Japan; in reality the governor and generalissimo of that country. (See extract.)

"The Mikado . . . was the true sovereign of Japan, and the *shogun* was a usurper, and in no sense of the word a king or emperor. He was but a military governor, a commander-in-chief . . . The term *taikun* (or *tycoon*) means great sovereign, and was an absurd title, to which the *shogun* had no right whatever, and which was invented to deceive foreigners . . . The assumption of this title by the *shogun* helped to bring on the civil war of 1868, which reduced his power to that of a *Daimio*, and restored the emperor to his ancient power and rights. There never were two emperors in Japan, and the loose statements about a 'secular' and an 'ecclesiastical' emperor originated in deception."—Ridley & Duna: *Amer. Cyclop.*, ix. 542.

shò'-gùn-àte, s. [Eng. *shogun*; -ate.] The office, jurisdiction, or dignity of a shogun (q.v.).

Shorter Catechism, s.

Church Hist.: A catechism composed under the direction of the Westminster Assembly. It was called Shorter to distinguish it from the Larger Catechism, which had been finished just previously. A small Committee of Assembly was appointed on August 5, 1647, to prepare the Shorter Catechism. When completed, it was presented to Parliament on November 26. Both Houses of Parliament thanked the divines who had composed it, and ordered six hundred copies, but requested that proofs should be appended. This being done, the Catechism with proofs was presented to Parliament on April 16, 1648, and ordered to be printed. It was adopted by the Scottish General Assembly on July 28, 1648, the decision being ratified by the Scottish Parliament on February 7, 1649. It is still most extensively used among English-speaking Presbyterians all over the world.

short-händ, s. [Eng. short, and hand.] A general term for any system of contracted writing; specif., a method of writing in which straight lines and curves, struck in different directions, are substituted for the ordinary letters, as — = k, ~ = m, \ = f. The vowels are generally represented by dots and short dashes placed before or after these strokes. On the Continent, the system of shorthand most practised is composed of curvilinear lines and loops, leaning from left to right, as in ordinary writing. The art was practised by the Romans, was lost in the Dark Ages, and was revived in England in the reign of Elizabeth. Some 300 different systems have since been published. The most important of these are:—Rich (1654), Mason (1672), Gurney (1740), Byrom (1767), Mavor (1780), Taylor (1786), Lewis (1812), Harding (1823), Moat (1833). The most popular system of shorthand in vogue is Isaac Pitman's Phonography, invented in 1837, based on the sounds of the English language. The alphabet contains six long and six short vowels, five diphthongs, and twenty-four consonants, or forty-one letters in all. Hooks and circles at the beginning and end of the consonant strokes make double and treble consonants for abbreviating the writing.

"Shorthand, an art, as I have been told, known only in England, may perhaps be thought worth the learning."—*Locke: On Education*.

2. Small spherical pellets of lead or shot metal, used for shooting birds and other small game. They were originally made by rolling an ingot of lead into a sheet of a thickness corresponding to the size of the shot to be made, then cutting the lead into cubes and placing the latter in a "tumbler"; the action of the leaden cubes when rubbed against each other in the operation of the apparatus gradually rounding them until brought to a more or less spherical form. This was superseded by the method now employed of dropping the molten metal, in a finely divided state, from a height into water, invented by Watts, of Bristol, about 1782. To obviate the necessity for the high tower, the metal is sometimes dropped through a tube, up which a strong current of cold air is driven, and in another process the lead is dropped through a column of glycerine or oil instead of air.

"The action of the fire set the powder in a blaze, that of the powder forced out the shot, that of the shot wounded the bird, and that of gravity brought her to the ground."—*Search: Light of Nature*, pt. I, ch. II.

3. A missile, particularly a ball or bullet. It is generally applied to solid projectiles, and also to hollow projectiles without bursting charges. Originally rounded stones were used, but were afterwards superseded by balls

of lead or iron. The introduction of rifling into firearms has caused the adoption of the elongated shot, round shot being retained only for use with mortars or smooth-bore arms. In the case of the Palliser shot, the same projectile may be used with or without a bursting charge, it being cast hollow so as to serve as a shell or an ordinary shot. Various forms of shot are manufactured, which will be found described under their respective heads.

"The first shot struck one of the holsters of Prince George of Hesse, and brought his horse to the ground."—*Macaulay: Hist. Eng.*, ch. xvi.

4. The flight or range of a missile; the distance to which a projectile passes.

"She sat over against him, a good way off, as it were a bow shot."—*Genesis* xxi. 16.

Judaism: A word modelled on the German *schaubrode*, Luther's rendering of the Heb. *לֶחֶם הַדָּבָר* (*lehem hapandim*) = bread of the faces or face, perhaps meaning, designed for the presence of Jehovah. It is called also the "continual shew-bread" (2 Chron. ii. 4), or, more briefly, the "continual bread" (Num. iv. 7), or "hallowed bread" (1 Sam. xxi. 4-6). It was to be set on a table of alittim wood (q.v.), overlaid with gold (Exod. xxv. 23-29; 1 Kings vii. 48), and having a blue covering (Num. iv. 7). The shew-bread consisted of twelve cakes baked with fine flour, two tenth deals being in each cake (Lev. xxiv. 5). It was to stand in the Holy Place, and, being sprinkled with frankincense, was there to be eaten each Sabbath by Aaron and his priestly descendants (Lev. xxiv. 9). When the old shew-bread was removed, new and hot bread was to take its place (1 Sam. xxi. 6). When David was in want of food, he ate the shew-bread, though he was not a priest (1 Sam. xxi. 3-6), and Jeans approved the deed (Matt. xii. 4; Mark ii. 26; Luke vi. 4). The twelve cakes of shew-bread were apparently one for each tribe; the deeper spiritual significance of the bread has been variously interpreted.

- "Such an injury would vex a very saint, Much more a shrew of thy impatient humour."—Shakespeare: Taming of the Shrew, II. 2.

II. Zool.: A popular name for any individual of the Soricida, particularly the Common (Sorex vulgaris) and the Lesser Shrew (S. pygmaeus). The former, common in Europe, is about the size of a mouse, which it somewhat resembles in the shape of the body, feet, and tail, but has the muzzle produced, with prominent nostrils, far beyond the lip; the eyes are small, and scarcely discernible through the fur; ears wide and short; the tail is four-sided, with the angles rounded off; fur usually reddish-gray above, grayish beneath, but the colour varies, and pied specimens often occur. [LESSER-SHREWS.] They feed on insects and worms and the smaller molluscs; they are extremely pugnacious, and two males scarcely ever meet without a battle, when the weaker is killed and eaten. They breed in the spring; the female makes a nest of dry herbage in a hole in the ground, and brings forth from five to seven young, but their increase is checked by the weasel and barn-owl. In former times the bite of the Shrew was erroneously considered venomous, and the animal itself played an important part in folk-medicine. [SHREW-ASH, OARED-SHREW, WATER-SHREW.]

SHREWS. 1. Common Shrew, 2. Lesser, or Pigmy, Shrew.

B. As adj.: Churlish, shrewish. "Yet was he to me the moste shrew."—Chaucer: C. T., 6. 607.

shrew-ash, s. (See extract.)

"A shrew-ash is an ash whose twigs or branches, when applied to the limbs of cattle, will immediately relieve the pains which a beast suffers from the running of a shrew-mouse over the part affected. . . . Into the body of the tree a deep hole was bored with an auger, and a poor devoted shrew-mouse was thrust in alive, and plugged in, no doubt with several incantations long since forgotten."—White: Nat. Hist. of Selborne, pt. II, ch. xxvii.

shrew-footed ursipile, s.

Zool.: Uropsilus soricipes, the sole species of the genus, discovered in Eastern Tibet by Père David. The general characters are like those of Urotrichus (q.v.); the tail is naked and scaly, fur slate-colour, with a brownish tinge.

shrew-mole, s.

Zool.: Scalops aquaticus, often called the Mole in the United States, through which it is widely distributed. The snout is slender and elongated, and the toes of the hind feet are webbed. [SCALOPS.]

shrew-mouse, s.

Zool.: Sorex vulgaris. [SHREW, s., II.]

*shrew-struck, a. Injured or affected by a Shrew. [SHREW-ASH.]

"When a horse in the fields happened to be suddenly seized with anything like a numbness in his legs, he was immediately judged by the old persons to be either plaut-struck or shrew-struck. The mode of cure which they prescribed, and which they considered in all cases infallible, was to drag the animal through a piece of bramble that grew at both ends."—White: Selborne, let. xxviii. [Sole.]

*shrew, *shrewe, v.t. [SHREW, s.] To beshrew, to curse.

"Shrew me If I would lose it for a revenue."—Shakespeare: Cymbeline, II. 2.

shright (sh silent), pret. of v. [SHRIE, v.]
 A shriek. (*Spenser: F. Q., VI. IV. 2.*)

shrike, s. [From the cry of the bird.]
Ornith.: A popular name for any individual of the Laniidae (q.v.), applied especially for the last three centuries to *Lanius excubitor*, the Great Gray Shrike, the largest European species. The length of the adult male is about ten inches; pearl gray on upper part of body; chin, breast, and abdomen white; tail feathers black, variegated, and tipped with white; a black band crosses the forehead, runs under the eyes, and expands into a patch on the ear-coverts. Of the large family of the Shrikes, containing in all over one hundred species, the United States possesses but a fragmentary representation, there being here only two species of *Lanius*, the leading genus. These are *L. borealis*, the Northern Butcher-bird, and *L. ludovicianus*, the Southern Logger-head. Europe is better provided, having, in addition to the species named, *L. minor*, the Lesser Gray Shrike. Like *L. septentrionalis*, it is often called in England the Nine-killer (q.v.), and is sometimes placed, with some other small Shrikes, in a separate genus. The only other European species is *L. auriculatus*, the Woodchat (q.v.). Shrikes feed on insects and small birds, and have a remarkable habit of impaling their prey on thorns in the neighborhood of their nests, which may thus be easily discovered. They kill and impale many insects that they do not eat, and even in confinement they push portions of the food given them between the wires of their cages, or transfix it on a sharp nail, if one be provided for the purpose. [BUTCHER-BIRD.]

"The mayday is torn by the swallow, the sparrow
 speared by the shrike."
Tennyson: Maud, I. v. 4.

shrike-crow, s.
Ornith.: Swainson's name for the genus *Baritta* (q.v.).

shrill, schril, shril, shrille, shrile, shril, s. shrimp, v.t. & t. [The same as SCRIMP (q.v.).] Probably there was an A.S. verb *scrimpan* (pa. t. *scramp*, pa. par. *scrampen*), whence also *crimp, cramp*, and *crumple*.
A. Trans.: To contract, to make small or paltry.
 "But what dimly shrimped things would they appear,
 turned into English. — *Richard: Contempt of the Clergy, D. 44.*

B. Intrans.: To catch or fish for shrimps.

shrimp, s. [SHRIMP, v.]
 1. Literally & Zoology:

(1) A popular name for any individual of the genus *Crangon* (q.v.), allied to Lobster, Crayfish, and Prawn. The form is elongated, tapering, and arched. The rostrum is very short, claws small, the fixed finger being merely a small tooth, the movable finger uniform. The whole structure is delicate and sub-transparent, and of such hues that the species may readily escape observation, whether resting on a sandy bottom or moving through the water. When alarmed they bury themselves in the sand by a peculiar motion of the telson. The Common Shrimp (*Crangon vulgaris*), about two inches long, greenish-gray dotted with brown, plentiful on the European coasts, is esteemed as an article of food; other species, from warmer latitudes, are equally prized. They are usually taken by means of a shrimp-net. (See extract.)

"The common shrimp is an exception to the general rule that the cuticle of the Crustaceans is either red in the living animal or becomes so on boiling. The cuticle of *C. vulgaris* in the living state is light-brown or almost white, and the animal is somewhat translucent. . . . After boiling, the cuticle assumes its well-known brown colour."
Ency. Brit. (ed. 9th), xii. 847.

(2) *Panulirus camulicornis*, taken on the east and south coast of England, occurring also in Scotland, Ireland, Shetland, and Iceland. When alive its colour is reddish-gray, with red spots. When boiled it becomes a deep red. It is smaller than the Prawn (*Palaeon serratus*), with which, however, it is sometimes confounded.

2. Fig.: A dwarfish creature; a little wrinkled person; a pigmy, a manikin.
 "It cannot be, this weak and writhed shrimp
 Should strike such terror in his enemies."
Shaksp.: I Henry VI., II. 2.

¶ *Cup shrimps:* A local name in the south of England for the young of *Palaeon serratus*, from their being measured in small cups instead of being sold by tale, as they are when full grown.

shrimp-net, s. A small-meshed bag-net, mounted on a hoop and pole for catching shrimps.

shrimp-er, s. [Eng. *shrimp*, v.; -er.] One who fishes for or catches shrimps.

shrine, schrin, schryne, srine, s. [A.S. *scrin* = the ark (of the covenant), from Lat. *scrinium* = a chest, case, or box.] [SCRINE.]

I. Literally:
 1. A case, box, or reliquary in which the bones or other remains of saints were deposited. They were often richly ornamented with gold, precious stones, and elaborate carvings, and were generally placed near the altar of the church. The earliest form of the shrine was that of a diminutive model of a church, with a high-pitched roof. The illustration shows the shrine of St. Etheldreda, formerly in Ely Cathedral, whither her body was removed early in the twelfth century.

SHRINE.

2. A tomb of shrine-like form; the mausoleum of a saint in a church.
 "And let the coase enbaume, and forth she lette
 This dead coase, and in the shrine it abete."
Chaucer: Legend of Cleopatra.

II. Fig.: A place or object sacred or hallowed from its associations or history; an altar.
 "Lovers are in rapture at the name of their fair idol; they lavish out all their incense upon that shrine."
Watts.

Maccusway: Hist. Eng., ch. xxi.

5. To express or indicate fear, horror, or pain, by a contraction or shrugging of the body.
 "And when I boud, retire and shrink,
 Says, 'Well—'tis more than one would think."
Cowper: Foot, Oyster, & Sensitive Plant.

B. Transitive:
 1. To cause to shrink or contract.
 "Return, Alpheus, the dread voice is past,
 That shrink thy streams."
Milton: Lycidas, 132.
 * 2. To withdraw. (Milton.)

¶ **To shrink on:** To fix firmly on by causing to shrink, as a tire on a wheel or a hoop round a cannon is shrunk on by making it slightly smaller than the part it is to fit, expanding it by heat till it can be slipped into its place, and then allowing it to cool.

shrink, s. [SHRINK, v.]
 1. The act or state of shrinking; a spontaneous contraction into less compass.
 2. A withdrawing, recoiling, or drawing back, as in fear or horror; recoil.
 "Receiv'd with such a cheer,
 As not a sigh, a look, a shrink bewrays."
Daniel: Civil Wars, I.

shrink-age (age as ig), s. [Eng. *shrink*, v.; -age.]

1. **Weaving:** An instrument used by weavers for shooting or passing the thread of the weft from one side of the web to the other, between the threads of the warp. It is a boat-shaped piece of wood which carries a bobbin or cop, containing the yarn of the weft or woof. The shuttle sometimes has wheels to facilitate its motion. It is thrown by hand or by the fly. In the latter case, the ends of the shuttle-race form boxes into which the shuttle is received, and out of which it is driven by a smart blow from a pin called a driver or picker. There is one of these pins on each side of the loom, and they are connected by a cord to which a handle is attached. Holding the handle in his right hand, the weaver moves the two pins together in each direction alternately by a sudden jerk. The fly-shuttle was invented by John Kay, of Bury, in 1735. The shuttle for haircloth weaving has no pins, but a spring-catch to hold the ends of the hair forming the weft, and carry them through the shed when the shuttle is thrown.

"Ye weavers all your *shuttles* throw, And bid broad-cloths and serges grow."—*Gay: Shepherd's Week, l.*

Si-**ýl**, * **Sýb**-**il**, * **Sýb**-**ill**, *s.* [Lat. *Sibylla*, from Gr. *Σιβύλλα* (*Sibylla*) = a Sibyl.]

1. Class. Myth.: One of a number of certain women supposed to be inspired by heaven, who flourished in different parts of the ancient world. According to Varro, the Sibyls were ten in number: Persica, Delphica, Cumea (of Cume, in Italy), Erythraea, Samia, Cumana (of Cumæ, in Æolis, called Amalthea, Herophile, and Demophile), Helleaspoetica, Phrygia, who prophesied at Ancyra, Libyssa, and Tibur, called Albunea, worshipped at Tibur. Besides these there were a Hebrew, a Chaldean, a Babylonian, an Egyptian, a Sardinian Sibyl, and some others. It is considered, however, most probable that the first eight of these were in reality identical. The most celebrated of the whole number was the Cumean (Amalthea), who is said to have offered the Sibylline Books, originally nine in number, and which were supposed to contain the fate of the Roman Empire, to Tarquin the Proud. Tarquin refusing to give the price she asked, she went away and burnt three of them. Returning with the remainder, she again offered these to the king at the same price, and on his second refusal departed again, and returned with three, which she still offered at the same price as the original nine. The king, struck with her conduct, at last acceded to her offer, and entrusted the care of the books to certain priests (the quinceciviri). They were preserved in a stone chest beneath the temple of Jupiter Capitolinus, and were consulted in times of public danger or calamity. They were destroyed by the fire that consumed the Capitol in the Maric war. After this calamity, ambassadors were sent to collect fragments of Sibylline prophecies in various countries; from these Augustus formed two new books, which were deposited in the temple of the Palatine Apollo. Sibylline verses are often quoted by Christian writers, as containing prophecies of Christianity; but these are forgeries of the second century. (*Ramsay*.)

2. A prophetess, a soothsayer, a fortune-teller, a witch. (*Byron: Dream*.)

si-**ýl**-**ine**, *a.* [Lat. *sibyllinus*.] Of or pertaining to the Sibyls; written, composed, or uttered by a Sibyl; prophetic, like the utterances of the Sibyls.

"The other extrem may be, in concluding the whole business of the sibylline oracles (as any way relating to Christianity) to have been a mere cheat and imposture."—*Cudworth: Intel. System*, p. 232.

Sick Man, s.

Hist.: A term applied to Turkey on January 15, 1854, by the Czar Nicholas, in a conversation with Sir Hamilton Seymour, the British ambassador at St. Petersburg. The Czar intimated his opinion that Turkey was sick and dying. He therefore proposed that, to avoid a European war when the demise took place, Russia and Great Britain should come at once to a private arrangement as to the disposal of the Sick Man's effects. As France was ignored in the arrangement, there was some doubt as to the good faith of the Czar. The British Government rejected the proposal, intimated its belief in the recovery of the Sick Man, and soon after fought by his side in the Crimean war.

1. Pertaining or relating to the stars; sideral.

2. Affecting unfavorably by the supposed influence of the stars; baleful.

"With large and juicy offspring, that defies
The vernal nippings and cold siderat' blasts."
—*Philips: Cider.*

***si-dēr-āt-ēd**, *a.* [Lat. *sideratus*, pa. par. of *sidero* = to be blasted by a constellation; *sidus*, genit. *sideris* = a star.] Blasted, planet-struck.

"So parts canterized, gangrenated, siderated, and mortified become black."—*Browne: Vulgar Errors*, bk. vi., ch. xii.

***si-dēr-ā-tion**, *s.* [Lat. *sideratio*, from *sideratus*, pa. par. of *sidero*.] [SIDERATED.] A blasting or blast in plants; the state of being planet-struck; a sudden deprivation of sense; an apoplexy.

"The contagious vapour of the very eggs produced a mortification or sideration in the parts of plants on which they were laid."—*Ray: On the Creation*, pt. II.

si-dēr-ā-zōte, *s.* [Eng. *siderite*], and *azote* (q.v.).

Min.: A mineral occurring as a very thin coating on lavas, and incrusting small rounded fragments ejected from certain mnd volcanoes in Algeria. Lustre, metallic; colour, brass-yellow. Compos.: iron, 90.86; nitrogen, 9.14 = 100, corresponding to the formula, Fe_3N_2 , like that of the artificial preparation.

si-dēr-ō-al, *a.* [Lat. *sidericus*, from *sidus*, genit. *sideris* = a star.]

1. Of or pertaining to the stars; starry, astral.

2. Measured or determined by the apparent motions of the stars: as, a *sideral* day.

sideral-aggregation, *s.*

Astron.: The hypothesis that stars are condensed by the gradual cooling down of the phosphorescent vapour of nebulae.

sideral-clock, *s.* A clock regulated to measure sideral time, reckoned by sideral days of 23 h. 56 m. 4 s. mean solar time, which are measured by the interval between two successive passages of any fixed star over the same meridian, and divided into twenty-four sideral hours.

sideral-day, *s.* [DAY (1), *s.*, ¶.]

sideral-magnetism, *s.*

Animal magnetism: A beneficial effect alleged to be produced by the stars in certain circumstances on persons who are afflicted with disease.

† sideral-system, *s.*

Astron.: An expression modelled on the appellation Solar-system. It is the system to which all suns with their planets belong. It embraces the Solar-system.

sideral-time, *s.* [SIDEREAL-CLOCK.]

sideral-year, *s.*

Astron.: The time occupied by a complete revolution of the earth around the sun. It is measured by the recurrence of some fixed star, and is 365 days, 6 hours, 10 m. nearly.

***si-dēr-ō-ōs**, *a.* [Lat. *sidericus*.] Sideral.

"The mystical conjunction of hawk and lions implies either the genial or the siderous sun."—*Browne: Vulgar Errors*.

si-dēr-ēt-ine, *s.* [Eng. *siderite*], and Gr. *σίδηρος* (*rhētine*) = resin.]

Min.: The same as **PITTCITE** (q.v.).

***si-dēr-is-mūs**, *s.* [Mod. Lat., from Gr. *σίδηρος* (*sidēros*) = iron.]

Mesmerism: The effect alleged to be produced by the loadstone or by a metallic rod on the human body, the real agent being the imagination of the patient. [METALLIC-TRACTOR.]

si-dēr-ite, **sid-ēr-ite**, *s.* [Gr. *σίδηρος* (*sidēros*) = iron.]

Mineralogy:

1. A species belonging to the rhombohedral group of carbonates. Forms mostly rhombohedral, frequently with curved faces, cleavage rhombohedral and perfect. Hardness, 3.5 to 4.5; sp. gr. 3.7 to 3.9; lustre, vitreous to pearly; colour, shades of gray, brown, and brownish-red, rarely white; fracture, uneven. Compos. for pure variety: carbonic acid, 87.9; protoxide of iron, 62.1 = 100, which is equivalent to the formula, FeO_2CO_3 , but part of the iron is frequently replaced by manganese, magnesium, or calcium, giving rise to

numerous varieties, which Dana divides as follows:—

A. Ordinary: (1) crystallized; (2) concretionary (sphaeroiderite); (3) granular to compact massive; (4) oolitic; (5) earthy.

B. By replacing part of the iron: (1) nearly pure; (2) containing five to twelve per cent. of protoxide of manganese, with a little magnesia and lime; (3) containing seventeen to eighteen per cent. of protoxide of manganese, having the formula, $2\frac{1}{2}FeOCO_2 + MnOCO_2$; (4) containing twenty-five per cent. of protoxide of manganese, the oligonite, with formula, $1\frac{1}{2}FeOCO_2 + MnOCO_2$; (5) containing little manganese and much magnesia, with the formula, $4FeOCO_2 + MgOCO_2$; (6) a similar composition, with sp. gr. 3.616 to 3.660, the sideropleite; (7) containing twenty per cent. of carbonate of lime, with formula, $8FeOCO_2 + 2MnOCO_2 + 3CaOCO_2$; and (8) including all other kinds. A widely distributed mineral, but only occasionally found in sufficient abundance to work as an iron ore, except as the principal constituent of clay-ironstones.

2. The name given to those meteorites which consist wholly of iron.

3. The same as **SAPPHIRE-QUARTZ** (q.v.).

4. The same as **LAZULITE** (q.v.).

si-dēr-ī-tis, *s.* [Lat., from Gr. *σίδηρος* (*sidēros*) = iron.]

Bot.: Ironwort; a genus of *Marrubidæ*, consisting of herbs or shrubs from the south of Europe, the Canary Islands, &c. They are not known to have medicinal properties. *Sideritis romana* was believed by Sir J. E. Smith to be the *sideritis* of Dioscorides.

si-dēr-ō, *pref.* [Gr. *σίδηρος* (*sidēros*) = iron.] Of, belonging to, or resembling iron in lustre, hardness, or weight, &c.

si-dēr-ō-bōr-ine, *s.* [Pref. *sidero*; Ger. *bor* = boron, and suff. *-ine* (*Min.*.)]

Min.: The same as **LAGONITE** (q.v.).

si-dēr-ō-chāl-cite, *s.* [Pref. *sidero*; Gr. *χαλκός* (*chalkos*) = copper, and suff. *-ite* (*Min.*.)]

Min.: The same as **CLINOCLARE** (q.v.).

si-dēr-ō-chrōme, *s.* [Pref. *sidero*, and Eng. *chrome*.]

Min.: The same as **CHROMITE** (q.v.).

si-dēr-ō-clēp'-tē, *s.* [Pref. *sidero*, and Gr. *κλέπτω* (*kleptō*) = to steal.]

Min.: Limonite having the form of chrysolite, from which it has been derived by chemical alteration.

si-dēr-ō-cō-nite, *s.* [Pref. *sidero*; Gr. *κόινος* (*cois*) = a powder, and suff. *-ite* (*Min.*); Ger. *siderkonit*.]

Min.: A variety of marble of a yellowish-brown colour, owing to the inclusion of pulverulent hydrated sesquioxide of iron.

si-dēr-ō-dēn-drōn, *s.* [Pref. *sidero*, and Gr. *δένδρον* (*dendron*) = a tree.]

Bot.: Iron-tree; a genus of *Psychotridæ*. The popular and scientific names refer to the hardness of the wood.

si-dēr-ō-dōt († silent), *s.* [Pref. *sidero*, and Lat. *dotō* = to endow, to give.]

Min.: A siderite (q.v.), containing carbonate of lime, found at Radstadt, Salzburg, having a sp. gr. of 3.41.

si-dēr-ō-fēr-rite, *s.* [Pref. *sidero*, and Eng. *ferrite*.]

Min.: A name given by Bahr to some grains of native iron found in a fossil wood.

si-dēr-ō-grāph, **sid-ēr-ō-grāph**, *s.* [Pref. *sidero*, and Gr. *γράφω* (*graphō*) = to write, to draw.] An engraving on steel.

si-dēr-ō-grāph-ic, **si-dēr-ō-grāph-ic-al**, **sid-ēr-ō-grāph-ic**, **sid-ēr-ō-grāph-ic-al**, *a.* [Eng. *siderograph(y)*; *-ic*, *-ical*.] Of or pertaining to siderography; performed by engraved plates of steel.

si-dēr-ōg-ra-phist, **sid-ēr-ōg-ra-phist**, *s.* [Eng. *siderograph(y)*; *-ist*.] One who engraves steel plates, or who performs work by means of such plates.

si-dēr-ōg-ra-phŷ, **sid-ēr-ōg-ra-phŷ**, *s.*

[Eng. *siderograph*; *-y*.] The art or practice of engraving on steel; applied especially to a transfer process, in which the design is first engraved on steel blocks, which are afterwards hardened, and the engraving transferred to steel rollers under heavy pressure, the rollers being afterwards hardened and used as dies to impress the engraving upon the printing plates.

si-dēr-ō-lite, *s.* [Pref. *sidero*, and Gr. *λίθος* (*lithos*) = a stone.]

Petrol.: A name proposed for those meteorites which consist partly of iron and partly of stony matter.

***si-dēr-ō-mān-gŷ**, *s.* [Pref. *sidero*, and Gr. *μαντεία* (*mantēia*) = prophecy, divination.] A species of divination performed by burning straw, &c., upon red-hot iron. By observing their figures, bendings, sparkings, and burning, prognostics were obtained.

si-dēr-ō-mēl-āne, *s.* [Pref. *sidero*, and Gr. *μέλας* (*melas*) = black.]

Min.: A name given by Von Waltershausen to the black glassy grains found in the so-called palagonite. Probably an obsidian (q.v.).

si-dēr-ō-nā-trite, *s.* [Pref. *sidero*; Eog. *natrōn*], and suff. *-ite* (*Min.*.)]

Min.: A crystalline massive mineral, found in the mine San Simón, Tarapaca, Peru. Hardness, 2.5; sp. gr. 2.153; colour and streak, shades of yellow. An analysis yielded: sulphuric acid, 43.26; sesquioxide of iron, 21.60; soda, 15.59; water, 15.35; impurities, 4.26 = 100.06, which corresponds to the formula, $Na_2SO_4 + [Fe_2]Si_2O_9 + 6aq$.

si-dēr-ō-phŷll-ite, *s.* [Pref. *sidero*, and Eng. *phyllite*.]

Min.: A variety of mica (q.v.), containing over 25 per cent. of protoxide of iron. Found near Pike's Peak, Colorado.

si-dēr-ō-plōg-ite, *s.* [Pref. *sidero*, and Gr. *πλόγιος* (*plōgios*) = near.]

Min.: A siderite (q.v.) containing much magnesia, and having sp. gr. 3.616 to 3.66. Formula $2FeOCO_2 + MgOCO_2$.

si-dēr-ō-schī-gō-lite, *s.* [Pref. *sidero*; Gr. *σχιστός* (*schistos*) = split, and *λίθος* (*lithos*) = a stone; Ger. *sideroschistolith*.]

Min.: A rhombohedral mineral, occurring in minute crystals, having a perfect basal cleavage. Hardness, 2.5; sp. gr. 3 to 3.4; lustre, splendid; colour, velvet-black to dark-gray; opaque. An analysis yielded: silica, 16.3; alumina, 4.1; proto- and sesquioxide of iron, 75.5; water, 7.3 = 103.2, yielding the formula, $4FeO_2Si_2O_9 + 1\frac{1}{2}HO$. Found in Brazil, with pyrrhotite, &c.

si-dēr-ō-scope, *s.* [Pref. *sidero*, and Gr. *σκοπέω* (*skopēō*) = to observe.] An instrument for detecting minute degrees of magnetism by a delicate combination of magnetic needles.

Invented by Lebaillif.

si-dēr-ōse, *s.* [SIDERITE.]

si-dēr-ō-sil-ī-cite, *s.* [Pref. *sidero*, and Eng. *silicite*.]

Min.: A hypothetical compound, supposed to be a hydrous silicate of sesquioxide of iron and alumina. Named by von Waltershausen.

si-dēr-ō-stāt, *s.* [Pref. *sidero*, and Gr. *στατός* (*statos*) = placed, stationed, standing, from *στηνί* (*hístēmi*) = to stand.] An apparatus for observing the light of the stars. Its action and construction are similar to those of the heliostat (q.v.).

si-dēr-ō-tān-tāl, *s.* [Pref. *sidero*, and Ger. *tantal* = tantalum.]

Min.: A variety of tantalite (q.v.), rich in iron.

***si-dēr-ō-tŷpe**, *s.* [Pref. *sidero*, and Eng. *type* (q.v.).] A old method of producing sun-pictures by means of ammonio-citrate of iron.

si-dēr-ōx-ēno, *s.* [Pref. *sidero*, and Gr. *ξένος* (*zenos*) = a stranger.]

Min.: The same as **HENSENBERGITE** (q.v.).

si-dēr-ōx-ŷ-lōn, *s.* [Pref. *sidero*, and Gr. *ξύλον* (*xulon*) = wood. Named from their very hard wood, which sinks in water.]

Bot.: Iron-wood, a genus of *Sapotacææ*

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt, or. wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, ūnite, cūr, rāle, fūll; trŷ, Sŷrian. s, œ = ē; ey = ā; qu = kw.

containing from thirty to forty species from the tropics. They are evergreen trees, with axillary and lateral fascicles of flowers. The fruit of *Sideroxylon tomentosum*, an Indian tree, is made into pickles and curries. *S. dulcificum* is the Miraculous Berry of West Africa, the sweet fruit of which is taken to correct the acidity of any other article of food or drink.

sides-man, s. [Eng. *sides*, and *man*.]

si-ūr, s. [Fr., contracted from *seigneur*.] A title of respect used by the French; air.

sieve, * seve, * sive, s. [A.S. *sife*; cogn. with Dut. *zeef*; M. H. Ger. *sip*; Ger. *sieb*; probably so called from having been originally made of sedge or rushes; cf. Icel. *sēf* = sedge; Sw. *sif*; Dan. *siv* = a rush.]

1. An instrument for effecting the separation of the finer particles of substances from the grosser. The sifter, strainer, riddle, and colander are all forms of sieves, and have special applications rather than different functions. Sieves are made of various forms and materials, according to the nature of the article to be sifted, but in its ordinary form a sieve consists of a hoop or frame of wood or metal, from two to six inches in depth, having a meshed bottom of wire, basket-weave, horse-hair, gauze, silk, perforated parchment, cloth, canvas, muslin, lawn, &c., according to the use intended.

"Mr. Bank's house admitted the water in every part like a sieve, and it ran through the lower rooms in a stream that would have turned a mill."—*Cook: First Voyage*, bk. III, ch. 2.

2. A kind of coarse basket.

3. A basket used as a measure of fruit. It varies in capacity in different places.

4. *Calico-printing*: A cloth extending over the vat which contains the colour.

¶ (1) *Drum-sieve*: A kind of sieve largely used for sifting very fine powders by druggists, dyers, and confectioners, and so named from its shape. It consists of three parts or sections, the top and bottom section being covered with leather or parchment, and made to fit over and under a sieve of the usual form, which is placed between them. The substance to be sifted being thus closed in, the operator is not annoyed by the clouds of powder, which would otherwise be produced by the agitation, and the material under operation is at the same time saved from waste.

(2) *Sieve & Shears*: A popular name for Coacinnomacy (q.v.).

"The oracle of sieves and shears, That turns as certain as the spheres."—*Butler: Hudibras*, pt. II, c. III.

† **sieve-disc, s.**

† *Bot.*: The partition-wall of a cell when perforated like a sieve. (*Thomé*.)

II. Physiol. : The eye is a camera consisting of a series of lenses and media arranged in a dark chamber, the iris serving as a diaphragm, and the object of the apparatus is to form on the retina a distinct image of external objects. [EYE.] Light falling on the retina excites sensory impulses, and these, passing up the optic nerve to certain parts of the brain, produce sensations. We receive two sensations from each object; these, however, blend into one, for the two eyes virtually constitute a stereoscope, and enable us to form visual judgments concerning the form, size, and distance of objects. The chief defects of sight are: long sight, short sight, double vision, and colour-blindness. (*Foster: Physiol.*)

¶ (1) *At sight, after sight :*

Comm. : In the case of bills drawn payable at sight, or on demand, no days of grace are allowed. When bills are made payable after sight, the customary days of grace are allowed.

* **sig-ül, s.** [Lat. *sigillum* = a seal, dimin. of *signum* = a sign, a mark.] A seal, a signature; an occult sign, mark, or character.

"And *signa* found in planetary hours."

Dryden: Palamon & Arcite, II. 482.

sig-ül-lär-ý-a, s. [Mod. Lat., dimin. from *sigillum* = a seal. Named from the markings like a seal on the stem.]

Palæobot. : The type-genus of Sigillariae (q.v.), or any individual of the genus. The

fäte, fät, fare, amidst, whät, fäll, father; wö, wët, hère, camèl, hër, thère; pine, pít, sire, sir, marine; gö, pöt, or, wöre, wölf, wörk, whö, söm; müte, cüb, cüre, unite, cür, räle, füll; trý, Sýrian. æ, œ = ö: ey = ä: qu = kw.

trunk is arborescent, cylindrical, unjointed, and unbranched, except towards the apex, where in some species it parts dichotomously. The height is from thirty to sixty or seventy feet; the diameter of the stem from one to five. Its interior being largely cellular, speedily decayed, for most of the prostrate stems are flattened, the outer parts being now generally coal without vegetable structure, and the inner portion is replaced by the inorganic rock. The stem is deeply fluted with oblong, discoid, or nearly rounded leaf scars, with three vascular marks in their centre. The arrangement is not distinctly spiral. The long, narrow, rigid, two- or three-nerved leaves, at first called from their sedge-like appearance *Cyperites*, are their leaves. *Stigmaria* (q.v.) has been proved to constitute the roots, the two having been seen actually united. Principal Dawson believes that *Sigillaria* had medullary rays, Mr. Carruthers is of a contrary opinion. The former palaeobotanist believes *Trigonocarpum* to have been their fruit, the latter regards the fruit as having been a cone or strobilus. Brongnart ultimately classified them akin to *Euphorbiaceae*; Principal Dawson places them among *Gymnosperms* near the *Cycads*, or intermediate between these and the higher *Acrogens*; Sir Joseph Hooker deems them *Cryptogams*; Mr. Carruthers, concurring in this view, ranks them among the *Lytopods*. A species is recorded from the Upper Silurian, they occur in the Devonian, reach their maximum in the Carboniferous, with thirty-one British species, and a single doubtful one in the Permian. In the coal measures near Newcastle, about thirty stumps of their stems were found upright just where they grew, within an area of fifty yards square.

SIGILLARIA.

sig-ill-lar'-i-an, a. [Mod. Lat. *Sigillaria*(a); Eng.-am.] *Sigillaria* fossil. (*Geol. Mag.*, 1870, p. 293.)

sig-ill-lar'-i-ōs, s. pl. [Mod. Lat. *Sigillaria*(a); Lat. fem. pl. adj. suff. *-ōs*.] *Sigillaria* fossil. (*Geol. Mag.*, 1870, p. 293.)

sigmoid-flexure, s.

Anat.: A flexure of the colon situated in the left iliac fossa consisting of a double binding of the intestine upon itself in the form of the letter S.

sign (q silent), ***signe, s.** [Fr. *signe*, from Lat. *signum* = a mark, a token; Sp. *signo*, *seña*; Port. *signo*, *senha*; Ital. *segno*.]

1. Ordinary Language:

1. That by which anything is shown, made known, or represented; that which furnishes evidence of the existence or approach of anything; a mark, a token, an indication.

"The first faint signs of a change of public feeling."—*Macaulay: Hist Eng.*, ch. 11.

2. A motion, action, or gesture by which a thought is expressed, a wish made known, or a command given; hence, one of the natural or conventional gestures by which intelligence is communicated or conversation carried on as by deaf-mutes. (*Luke* i. 62.)

3. Something intended or serving to indicate the existence, or preserve the memory, of a thing; a memorial, a monument, a token.

"The fire devoured two hundred and fifty men, and they became a sign."—*Numbers* xxvi. 10.

4. Any symbol or emblem which prefigures, typifies, or represents an idea; hence, sometimes, a picture.

"The holy symbols or signs are not barely significative; but what they represent is as certainly delivered to us as the symbols themselves."—*Brethrenwood*.

5. A remarkable event, regarded as indicating the will of a deity; an omen, a prodigy.

6. Any remarkable event, transaction, or phenomenon, regarded as indicating the will of the deity, or as manifesting an interposition of the divine power for some special end; a wonder.

"If they will not hearken to the voice of the first sign, they will not believe the latter sign."—*Exodus* iv. 7.

*** 7.** A word regarded as the outward manifestation of thought. (*Dacon*.)

*** 8.** A mark of distinction, a cognizance.

"The ensign of Messiah bring'd, Aloit by angels borne, his sign in heav'n."—*Milton: P. L.*, vi., 776.

9. That which, being external, represents or signifies something internal or spiritual. A term used in the formularies of the English Church in speaking of an ordinance considered with reference to that which it represents.

"An outward and visible sign of an inward and spiritual grace given unto us."—*Church Catechism*.

10. A lettered board, carved or painted figure, or the like, set conspicuously over or near a door, shop, &c., to indicate the occupation of the tenant of the premises, or to give notice of the articles sold or made within; a sign-board. (*Shakesp.*: *2 Henry VI.*, iii. 2.)

II. Technically:

1. Astron.: Originally, any constellation; now limited to a constellation of the Zodiac or to the marks representing them. [ZODIAC.]

"There stay until the twelve celestial signs Have brought about their annual reckoning."—*Shakesp.: Love's Labour's Lost*, v. 2.

2. Arith. & Math.: A symbol employed to denote an operation to be performed, to show the nature of a result of some previous operation, or to indicate the sense in which an indicated quantity is to be considered. Thus the sign + (plus) prefixed to a quantity indicates that that quantity is to be added, while the sign - (minus) indicates that the quantity to which it is prefixed is to be subtracted. Other signs are × (into), indicating multiplication; ÷ (divided by), indicating division; √ for the square root; ∛ for the cube root; √n for the nth root, &c. The signs indicating relation are > (greater than), < (less than), = (equal to), &c.

3. Bot.: Certain marks, designed to economize space (*, †, ‡, †, &c.; †, ‡, &c.), in botanical descriptions. They were introduced by Linnaeus, Willdenow, De Candolle, London, &c., but the meanings of the signs are not the same in different authors.

4. Med.: Any indication which may present itself as to the health or morbid state of an individual, and, in the latter case, point out the nature and stage of the disease.

5. Music: Any character, as a flat, sharp, dot, &c.

sign-board, s. A board on which a man sets out his occupation, or gives notice of articles for sale. [*SIGN*, s., 1. 10.]

sign-manual, s. The subscription of one's name to a document; a signature; specifically, a royal signature, which must be admitted to all writs which have to pass the privy seal or great seal.

"Within twenty-four hours after he had assumed the regal title, he put forth several proclamations headed with his sign-manual."—*Macaulay: Hist Eng.*, ch. v.

sign-painter, s. One who paints sign-boards for tradesmen.

sign-post, s. A post on which a sign hangs.

"The sign-post of the White Hart Inn served for a gallows."—*Macaulay: Hist Eng.*, ch. v.

sign (q silent), ***signe, v.t. & t.** [Fr. *signer*, from Lat. *signo*, from *signum* = a mark, a sign (q.v.); Sp. *signar*; Ital. *segnare*.]

A. Transitive:

1. To make a sign upon; to mark with a sign or symbol.

"We receive this child into the congregation of Christ's flock, and do sign him with the sign of the cross, in token that hereafter he shall not be ashamed to confess the faith of Christ crucified."—*Book of Common Prayer; Order of Baptism*.

*** 2.** To express by a sign; to make known in a typical or symbolical manner, as distinguished from speech; to signify.

"The sacraments and symbols are just such as they seem; but because they are made to be signs of a secret mystery, they receive the names of what themselves do signify."—*Taylor*.

3. To affix one's signature to a writing or deed; to mark and ratify by writing one's name; to subscribe in one's own handwriting.

"Send the deed after me And I will sign it."

Shakesp.: Merchant of Venice, iv. 1.

*** 4.** To convey formally; to assign.

*** 5.** To dress or array in insignia.

"Here thy hunters stand."

Shakesp.: Julius Caesar, iii. 1.

*** 6.** To make known; to make distinguishable; to mark.

"You sign your place and calling in full seeming."

With meekness and humility, but your heart Is cramm'd with arrogance.

Shakesp.: Henry VIII., ii. 4.

B. Intransitive:

1. To make a sign or signal.

"Signing to their heralds with his hand."

Dryden: Palamon & Arcite, iii. 494.

2. To write one's signature on a paper, deed, &c.

"One set of men signed on after having only seven hours' absence from work."—*St. James's Gazette*, Sept. 29, 1885.

3. To be a sign or omen.

"It signs well, does it not?"

Shakesp.: Antony & Cleopatra, iv. 2.

sign-a-ble (*g* silent), *a.* [Eng. *sign*, *v.*; *-able*.] Capable of being signed; requiring to be signed.

sig-nal, ***sig-nall**, *s.* & *a.* [Fr. *signal* = a signal, from Low Lat. *signale*, accens. of Lat. *signalis* = pertaining to a sign; *signum* = a sign; Sp. *señal*; Port. *senal*; Ital. *segnale*.]

A. As substantive:

1. A sign, a token, an omen.
"The weary sun hath made a golden net,
And by the bright track of his fiery car,
Gives signal of a goodly day to-morrow."
Shaksp.: *Richard III.*, v. 4.

2. A means of communication by audible or visible signs between two distant points according to a preconcerted system. The means of signalling are numerous, as by motions of the hand or arm, the display of lights of various colours, the firing of guns, the sound of a bugle, rockets, semaphores, heliostats, flags, &c.
"For God's sake, lords, give signal to the fight."
Shaksp.: *Henry VI.*, ii. 2.

B. As adj.: Distinguished or standing out from the rest; eminent, notable, remarkable, conspicuous; as, a *signal* failure.

signal-book, *s.* A book containing a code of signals.

signal-box, *s.*

1. A small house or building in which railway signals are worked.

2. A street-box having a signalling apparatus connected by wires with a central apparatus for ringing alarms of fire.

signal-corps, *s.* A military body in charge of the field-telegraphs and general signal-service.

signal-cry, *s.* A cry intended to act as a signal.

"Monkeys . . . when wild utter signal-cries of danger."
Darwin: *Descent of Man* (ed. 2nd), p. 67.

signal-fire, *s.* A fire intended to act as a signal.

signal-gun, *s.* A gun fired as a signal.
"Mark that the signal-gun be duly fired,
To tell us when the hour of stay's expired."
Byron: *Corsair*, l. 7.

signal-lamp, *s.* A lamp with coloured panes or bull's-eyes, for signalling trains.

signal-light, *s.* A light displayed as a signal.

"His looks are lifted to the skies,
As if the signal-lights of Fate
Were shining to those awful eyes!"
Moore: *Fire-Worshipper*.

signal-man, *s.* [SIGNALMAN.]

signal-post, *s.* A post on which flags, lamps, &c., are displayed as signals.

sig-nal, *v. i. & t.*

A. Intrans.: To make signals.

B. Trans.: To make signals to, or announce by signals.

***sig-nal-ist**, *s.* [Eng. *signal*; *-ist*.] One who makes signals.

***sig-nal-i-ty**, *s.* [Eng. *signal*; *-ity*.] The quality or state of being signal or remarkable.

"And therefore herein significations are natural and concluding upon the infant, but not to be extended into *signalities*, or any other person."
Browne: *Vulgar Errors*, bk. v., ch. xli.

sig-nal-ize, *v. t.* [Eng. *signal*; *-ize*.]

1. To make signal or remarkable; to render distinguished or conspicuous from what is common; to distinguish.

"To mark thy love and signalize my doom."
Byron: *Venus & Euryalus*.

2. To make signals to; to indicate by a signal; to signal.

¶ To *signalize* or make one's self the sign of anything, is a much stronger term than simply to *distinguish*; it is in the power of many to do the latter, but few only have the power of effecting the former; the English have always *signalized* themselves for their unconquerable valour in battle; there is no nation that has not *distinguished* itself at some period or other in war. (*Crabb*.)

sig-nal-ler, *s.* [Eng. *signal*, *v.*; *-er*.] One who signals; one who makes signals.

sig-nal-ly, *adv.* [Eng. *signal*; *-ly*.] In a signal manner or degree; eminently, remarkably, conspicuously, notably.

"The adherence to our purpose proves so *signally* serviceable."
Search: *Light of Nature*, vol. 1, pt. II., ch. xliii.

sig-nal-man, *s.* [Eng. *signal*, and *man*.] A man whose duty it is to convey intelligence, notice, warning, &c., by signals; specif., a man who works the signals on a railway.

sig-na-tör-ÿ, **sig-na-tar-ÿ**, *a. & s.* [Lat. *signatorius* = that serves for sealing.]

A. As adjective:

1. Pertaining or relating to a seal; used in sealing.

2. Signing or subscribing to a document; specif., applied to the head or representative of a state who signs a public document, as a treaty.

B. As subst.: One who signs; specif., the head or representative of a state who signs a public document, as a treaty.

"Hoping to receive the support of the *signatories* of the Treaty of Berlin."
Daily Telegraph, Sept. 23, 1885.

sig-na-ture, *s.* [Fr., from Lat. *signatura*, fem. sing. of fut. part. of *signo* = to sign (q.v.); Sp. *signatura*; Ital. *signatura*, *segnatura*.]

I. Ordinary Language:

* 1. A mark, sign, or stamp impressed.

"The *signatures* and stamp of power divine."
Cooper: *Retirement*, 54.

2. The name of a person written with his own hand, and intended to signify his approval or ratification of the writing which precedes.

3. An external mark or figura by which physiognomists pretend to discover the temper or character of persons.

II. Technically:

1. *Music* (Pl.): The signs of chromatic alteration, sharps or flats, placed at the commencement of a composition, immediately after the clef, and affecting all notes of the same names as the degrees upon which they stand, unless their influence is in any case counteracted by a contrary sign. (*Grove*.)

* 2. *Old Med.*: A mark or sign on any substance, especially on a plant, supposed to indicate its use as a remedy. [¶]

"The doctrine, that plants bear certain marks and *signatures*, indicative of their qualities or properties."
Browne: *Works* (ed. Bohn), i. 189 (Note 8).

3. *Print.*: A distinguishing letter or number at the bottom of the first page of each sheet of a book, to indicate its order to the folder and binder. Signatures are sometimes inserted at the bottoms of other pages, as the third, fifth, and seventh in octavo, the third in quarto, and so on of the other styles. The signature of the first sheet of matter is B, A being reserved for the title-page, index, contents, &c.; the next would be C, and so on. The old Roman alphabet was originally used to designate signatures, but Arabic numerals are now more commonly employed. The word *signature* is also used to denote the full number of pages included under one signature.

4. *Scots Law*: A writing formerly prepared and presented by a writer to the signet, to the baron of exchequer as the ground of a royal grant to the person in whose name it was presented, which having, in the case of an original charter, the sign-manual of the sovereign, and, in other cases, the cachet appointed by the Act of Union for Scotland, attached to it, became the warrant of a conveyance under one or other of the seals, according to the nature of the subject or the object in view.

¶ *Doctrine of Signatures:*

* *Old Med.*: (See extract).

"Such notions as these were elaborated into the old medical theory known as the *Doctrine of Signatures*, which supposed that plants and minerals indicated by their external characters the diseases for which nature had intended them as remedies. Thus the Emphrasia, or Eyebright, was, and is, supposed to be good for the eyes, on the strength of a black pupil-like spot in its corolla, the yellow turmeric was thought good for jaundice, and the blood-stone is probably used to this day for stopping blood. By virtue of a similar association of ideas, the ginseng which is still largely used in China, was also employed by the Indians of North America, and its both countries its virtues were deduced from the shape of the root, which is supposed to resemble the human body."
Tyler: *Early Hist. Mankind* (ed. 1876), pp. 122, 123.

* **sig-na-ture**, *v. t.* [SIGNATURE, *s.*] To mark out, to distinguish.

"Those who, by the order of Providence and situation of life, have been *signatured* to intellectual professions."
Cheyne: *Essay on Regiment*, p. 30.

* **sig-na-tür-ist**, *s.* [Eng. *signature*(*c*); *-ist*.] One who holds to the doctrine that signatures impressed upon various objects indicate their characters or qualities.

"*Signature*ists have somewhat advanced it, who seldom omitting what ancients delivered; dragging into inferences received distinctions of sex, not willing to examine its human resemblance."
Browne: *Vulgar Errors*, bk. II., ch. vi.

* **signe**, *s. & v.* [SIGN.]

sign-ër (*g* silent), *s.* [Eng. *sign*, *v.*; *-er*.] One who signs.

sig-nët, *s.* [Fr., dimia. of *signe* = a sign (q.v.).] A seal, especially the seal used by the seal-manual of a sovereign, as in England, one of the seals for the authentication of royal grants. In Scotland the signet is a seal by which royal warrants for the purpose of justice seem to have been at one time authenticated. Hence the title of "clerks to the signet" or "writers to the signet," a class of legal practitioners in Edinburgh who formerly had important privileges, which are now nearly all abolished. They act generally as agents or attorneys in conducting causes before the Court of Session.

"The Parliament laid claim to a Veto on the nomination of the Judges, and assumed the power of stopping the *signets*, in other words, of suspending the whole administration of justice, till this claim should be allowed."
Macaulay: *Hist. Eng.*, ch. xlii.

¶ *Clerk of the signet*: An officer in England continually in attendance upon the principal Secretary of State, who has the custody of the privy signet.

signet-ring, *s.* A ring containing a signet or private seal.

"His *signet-ring* she bore,
Which oft in sport adorned her hand before."
Byron: *Corsair*, ll. 12.

* **sig-nët-öd**, *a.* [Eng. *signet*; *-ed*.] Stamped, sealed, or marked with a signet.

* **sig-ni-fër**, *s.* [Lat. *signum* = a sign, and *fero* = to bear.] The Zodiac.

* **sig-ni-fi-ance**, * **sig-ni-fi-ance**, *s.* [O. Fr. *signifiance*.] [SIGNIFY.] Signification

* **sig-nif-ic**, *a.* [Lat. *significo* = to signify (q.v.).] Significant.

sig-nif-ÿ-ance, **sig-nif-ÿ-can-çÿ**, *s.* [Fr. *significance*, from Lat. *significancia*, from *significans* = signifying, significant (q.v.); Sp. & Ital. *significanza*.]

1. The quality or state of being significant; meaning, import; that which is intended to be expressed.

"If he declares he intends it for the honour of another, he takes away by his words the *significancy* of his action."
Stillingsfleet.

2. The real import of anything, as opposed to that which appears; the internal and true sense, as distinguished from the external and partial.

3. Expressiveness, impressiveness, force; the power or quality of impressing the mind.

"As far as this duty will admit of privacy, our Saviour hath enjoined it in terms of particular *significancy* and force."
Atterbury.

* 4. Importance, moment, consequence.
"The third commandment would have been of very small *significancy* under the Gospel."
Secker: *Sermons*, vol. II., ser. 80.

sig-nif-ÿ-cant, *a. & s.* [Lat. *significans*, pr. par. of *significo* = to signify (q.v.); Fr. *signifiant*.]

A. As adjective:

1. Serving to signify something; having a meaning expressing or denoting something; having a signification.

"Man . . . survey'd
All creatures, with precision understood
Their purport, uses, properties, assign'd
To each his name *significative*."
Cooper: *Fordley Oak*.

2. Expressive or suggestive of something more than appears on the surface.

"He was designated at the public offices and in the antechambers of the palace by the *significative* nickname of the Cardinal."
Macaulay: *Hist. Eng.*, ch. xlii.

3. Betokening something; representing or standing as a sign of something; thus, figures standing for numbers, as 1, 2, 3, &c., are called *significant* figures.

"It was well said of Plotinus, that the stars were *significant*, but not officious."
Raleigh.

fâte, fât, fare, amidst, whât, fâll, father; wê, wêt, hère, camêl, hêr, thêre; pine, pît, sîre, sîr, marine; gô, pôt, or, wôre, wôlf, wôrkw, whò, sôn; mûte, cûb, cûre, ûnite, cûr, rûle, fûll; trÿ, Sÿrian. æ, œ = ê; ey = ä; qu = kw.

4. Expressive or suggestive in an eminent degree; forcible; full of meaning or significance.

"Other some not so well scene in the English tongue, as perhaps in other languages, if they happen to hear an old word, albeit very natural and significant, cry out straightway, that we speak no English, but gibberish."—Spenser: Epistle to Master Harvey.

* 5. Important, momentous. * B. As subst.: Something intimating one's meaning; a sign, a token, a symbol.

"In dumb significante proclaim your thoughts."—Shaksp.: I Henry VI., II. 4.

sig-nif-i-cant-ly, adv. [Eng. significant; -ly]

1. In a significant manner or degree; so as to convey meaning or signification.

"To do significantly express it, ye do solemnly publish and declare it."—Atterbury: Sermons, vol. IV, ser. 4.

2. Meaningly, expressively; so as to signify or convey more than appears on the surface.

sig-nif-i-cate, v. [Lat. significatus, pa. par. of significo = to signify (q.v.).]

Logic: One of several things signified by a common term.

sig-ni-fi-cā-tion, s. [Fr., from Lat. significatio, acc. of significatio, from significatus, pa. par. of significo = to signify (q.v.); Sp. significación; Ital. significazione.]

1. The act of signifying; the act of making known by signs or other intelligible means.

"For all speaking, or signification of one's mind imports an act or address of one man to another."—Boswell.

2. That which is signified or expressed by signs or words; meaning, import, sense; that which a person by a sign intends to convey, or that which a sign is commonly understood to convey. By custom certain signs or gestures have acquired a determined signification, and so also with figures, algebraic characters, &c.

* 3. That which signifies; a sign.

* sig-nif-i-cā-tive, a. [Fr. significatif.]

1. Betokening or representing by an external sign.

"The holy symbols or signs are not barely significative."—Brerewood.

2. Having signification or meaning; expressive of a meaning; signficatory, significant.

"Neither in the degree of blessed they were destitute of significative words."—Camden: Remains; Language.

sig-nif-i-cā-tive-ly, adv. [Eng. significative; -ly.] In a significative manner; so as to betoken by an external sign; significantly.

"This sentence must either be taken tropically, that bread may be the body of Christ significatively, or else it is plainly absurd and impossible."—Coker: Ans. to Malone, p. 190.

* silk-čr, &c. [SICKER, &c.]

Sikh, Sēikh, s. [Sans. sishya; Mahratta, &c. shishya = a disciple.]

Religious History, &c.: A Hindoo reforming sect and nationality, the former of which commenced with Nānuk Shah, (A.D. 1469-1539). He was an enthusiast who, retaining the whole body of poetical and mythological fiction of Hindooism, still preached the unity of the Godhead, the essential identity of all castes, universal toleration, and the emancipation of the spirit from the tenets of Maya (illusion), by acts of benevolence and self-denial. Persecuted by the Muhammadans, the Sikh enthusiasm became fanaticism; and

about the close of the seventeenth century, their leader, the Guru Govind, the tenth teacher from Nānuk, devoted his followers to steel and the worship of the sword, which he encouraged them to use in defence of the faith. He also ordered his adherents to allow their hair and beards to grow, to wear blue garments, and eat all flesh but that of the cow. Caste was abolished among his followers, and the Das Padishah ka granth was compiled by him, that, with the Adi Granth, containing the sayings of Nānuk and his immediate successors, it might supersede the Vedas and the Puranas. The struggle against the Muhammadan government was sanguinary, but it ended by the Sikhs achieving their independence. Runjeet Singh (1780-1839), the Lion of the Punjab, their chief seat, obtained for them the benefit of European discipline, and laid the foundation of a Sikh empire, which, coming into collision with the Anglo-Indian government, went down in the pitched battles of Moodkee, Ferozeshah, Aliwal, and Sobraon, in 1845-6. Rebellion occurring in 1848, further losses were inflicted, in 1849, at Chillianwallah and Gozerat. When the mutinies broke out in 1857, the Sikhs, who had been well governed during the few years they had been under British rule, fought with exceeding loyalty on the side of their conquerors, to prevent the restoration of a Muhammadan empire like that from which, two centuries before, they had suffered such persecution.

sil'-age (age as ig), s. [An abbrev. of ensilage (q.v.).] Ensilage; fodder prepared by the system of ensilage.

"The superior value of good silage over hay for milk production."—Field, Dec. 19, 1888.

sil'-age (age as ig), v. t. [SILAGE, s.] To prepare or preserve in a silo (q.v.).

"Any grass in excess of the requirements of the stock could be silaged."—Field, Dec. 19, 1888.

sil-a-ō-nite, s. [After Silao, Mexico, where found; n connect, and suff. -ite (Min.).]

Min.: A massive mineral, described as a selenide of bismuth. Now shown to be a mixture.

si-lā-ūs, s. [Lat. = Silaus pratensis.] [See def.]

Bot.: Pepper Saxifrage, a genus of Sceliniæ (Lindley), of Schultzieæ (Sir J. Hooker). Partial involucre, many-leaved, calyx obsolete; petals obovate, subemarginate, with an inflated point appendaged or sessile. Fruit oval; carpels with five sharp, somewhat winged ribs, and many vitæ between. Known species, two; one, Silaus pratensis, the Meadow Pepper Saxifrage, is British.

sil'-hōe'-lite, s. [Etym. doubtful, but probably after Silhoel, Finland; suff. -ite (Min.).]

Min.: A variety of actinolite (q.v.).

sile (1), s. [SILL (2).]

sile (2), s. [Sw. sila = to strain; sil = s strainer; Low Ger. sielen = to draw off water; cf. Icel. sia; Dan. sie = to filter; A.S. sihan = to filter; O. H. Ger. sihan; Ger. siehen.]

1. A sieve, a strainer. (Prov.)

2. Filth, sediment, silt.

sile, v. t. & i. [SILE (2), s.]

A. Trans.: To strain, as fresh milk from the cow.

B. Intrans.: To flow down, to drop, to fall.

¶ Provincial in both uses.

* si-lē-nā-čē-æ, s. pl. [Mod. Lat. silen(e); Lat. fem. pl. adj. suff. -accē.]

Bot.: An old order of plants now generally reduced to a sub-order or tribe Silenæ (q.v.).

si-lē-nād, s. [Mod. Lat. silen(e); Eng. suff. -ad.]

Bot. (Fl.): The Caryophyllaceæ, called also Cloveflowers. (Lindley.)

si-lē-nal, a. [SILENALES.]

Bot.: Of or belonging to the Silenales (q.v.); as, the Silenal Alliance.

si-lē-nā'-lēš, s. pl. [Mod. Lat. silen(e); Lat. masc. or fem. pl. adj. suff. -ales.]

Bot.: The Silenal Alliance; an alliance of Hypogynous Exogens. Flowers monochlamydeous; carpels combined into a compound fruit, having a free central placenta and an external embryo, curved around s

little mealy albumen. Orders: Caryophyllaceae, Illecebraceae, Portulacaceae, and Polygonaceae. (Lindley.)

si-lence, *s.* (Fr., from Lat. *silentia*, from *silens*, genit. *silentis* = silent (q.v.); Sp. & Port. *silencio*; Ital. *silenzio*.)

1. The quality or state of being silent; the state which prevails when everything is silent; entire absence of noise; stillness, quiet.

"I should possess
The poet's treasure, *silence*, and indulge
The dreams of Lancy." Cooper: *Task*, I. 233.

2. Stillness, calmness; a state of rest, quiet, or cessation from agitation, fury, or tumult: as, The winds were hushed to *silence*.

3. The state of holding one's peace; forbearance of speech in man or of noise in other animals; taciturnity, muteness: as, To keep *silence*, to listen in *silence*.

4. The refraining from speaking or of making known something; secrecy: as, To purchase a person's *silence*.

5. Oblivion, obscurity; absence of mention.
¶ *Silence* is either occasional or habitual; it may arise from circumstances or character; *taciturnity* is mostly habitual, and springs from disposition.

si-lence, *v.t.* [SILENCE, *s.*]

1. To make silent; to compel to hold one's peace, or to refrain from speaking.

"The interested individuals, who have been served by their counting, have been *silenced*." Knox: *Winter Evening*, xvii. 24.

2. To oppose or refute with arguments which are unanswerable.

"The king was *silenced*, but not *appressed*." Mucellay: *Hist. Eng.*, ch. vii.

3. To stop from sounding; to quiet; to make to cease.

"*Silence* that dreadful bell."
Shaksp.: *Othello*, II. 3.

4. To stop the noise of firing from; to cause to cease firing, as by a vigorous cannonade.

"To ascertain the comparative efficiency of quick-firing and machine guns in *silencing* a shore battery." Standard, Oct. 13, 1885.

5. To restrain in reference to liberty of speech; especially, to restrain or interdict from preaching by revoking a licence to preach.

"The *silenced* preacher yields to potent strain,
And feels that grace his prayer besought in vain."
Pope: *Imitation of Horace*, Ep. I.

6. To still, to quiet, to appease, to restrain: as, To *silence* opposition, to *silence* complaints.

si-lence, *interj.* [SILENCE, *v.*] Used elliptically for, Let there be silence, or, Keep silence.

"*Silence!* one word more
shall make me obide thee, if not hate thee."
Shaksp.: *Tempest*, I. 2.

si-lé-nô-s, *s.* [From Lat. *silenus* (q.v.) (London), from Gr. *σίλων* (*silon*) = spittle, from the viscid moisture on the stalks of many species, by which small flies are entrapped; hence the English name, Catchfly. (Paxton, Sir J. Hooker, &c.)]

Bot.: Catchfly; the typical genus of Silenaceae. Calyx gamocephalous, tubular, often ventricose, five-toothed, ten-nerved; petals five, clawed, mostly crowned at the mouth, and with the limb generally notched or bifid; stamens ten; styles usually three; capsule three-celled below, six toothed above, many seeded. Species 200, from the north temperate zone. Of these the United States possess ten native and several that have been introduced. These are usually inconspicuous plants, but *Silene regia*, the Splendid Catchfly, is of large size and beautiful in cultivation, it bearing flowers of a bright scarlet color, its range is from Ohio to Louisiana. Europe possesses a considerable number of species, variously known as Campion and Catchfly, the latter name due to their viscid secretions. Many species are cultivated as ornamental plants. Darwin mentions *Silene* as a genus in which it is nearly impossible to produce hybrids, even between the most closely allied species. *S. Otites* is bitter and astringent; it has been given in dropsy. A decoction of the root of *S. virginica* has been used in the United States as an anthelmintic.

si-lé-nô-s, *s.* [Mod. Lat. *silene*(e); Lat. fem. pl. adj. suff. -eae.]

Bot.: A sub-order of Caryophyllaceae. Sepals united into a tube, opposite the stamens, when the latter equal them in number.

si-lent, *a. & s.* [Lat. *silens*, genit. *silentis*, pr.

par. of *siléo* = to be still; cogn. with Goth. (*ana*)*silan* = to become silent.]

A. As adjective:

1. Not speaking; mute, dumb.
"O my God, I cry in the day time, and in the night season I am not *silent*." Psalm xxii. 2.

2. Habitually taciturn; naturally disposed to silence; speaking little; not loquacious.
"Ulysses, adds he, was the most eloquent and most silent of men." Broom: *On the Odyssey*.

3. Not making mention or proclamation; making no noise or rumour.
"This new created world, whereof in hell Fame is not *silent*." Milton: *P. L.*, IV. 938.

4. Perfectly quiet; still; free from noise or sound: as, a *silent* wood.

5. Making no noise; noiseless: as, a *silent* match.

6. Not pronounced or expressed; not sounded in pronunciation: as, The *s* in *fable* is *silent*.

* 7. Having no effect; not operating; inefficient.

"Second and instrumental causes, together with nature itself, without that operative faculty which God gave them, would become *silent*, virtuous, and dead." Raleigh: *Hist. World*.

B. As subst.: A time of silence; silence, quiet.

"Deep night, dark night, the *silent* of the night."
Shaksp.: *2 Henry VI.*, I. 4.

silent partner, *s.* The same as SLEEPING or DORMANT-PARTNER. [DORMANT.]

silence system, *s.* A system of prison discipline which imposes entire silence among the prisoners even when assembled together.

* **si-lén-ti-ar-y** (ti as shí), *s.* [Lat. *silentiarius*; Fr. *silenciaire*.]

1. One appointed to keep silence and order in a court of justice.

2. A privy-councillor; one sworn to secrecy in affairs of state.

"The emperor afterwards sent his rescript by Eustathius, the *silentiary*." Burrow: *Pope's Supremacy*.

* **si-lén-tious**, *a.* [Lat. *silentiosus*.] Habitually silent; taciturn.

si-lent-ly, *adv.* [Eng. *silent*; -ly.]

1. In a silent manner; without words or speech.

"Some head unsee these *silently* display'd."
Thomson: *Castle of Indolence*, I. 34.

2. Without noise; quietly.
"With *silence* step *step* *silently* succeeds."
Cooper: *Esposulation*, 84.

3. Without mention; in silence.
"What the compilers recommended chiefly to our faith, he *silently* passes over." Waterland: *Works*, v. 307.

si-lent-ness, *s.* [Eng. *silent*; -ness.] The quality or state of being silent; silence, stillness, quiet.

"And if my eyes reveal'd it, they, alas!
Were punish'd by the *silence* of thine."
Byron: *Lament of Tasso*, v.

† **si-lé-nūs**, *s.* [Lat., from Gr. *Σειληνός* (*Seilēnos*), the constant attendant and tutor of Bacchus, and the father of the Satyrs. He was represented as drunken, bald-headed, with short horns and a fat nose.]

Zool.: An old genus of Monkeys, with one species, *Silenus vetus*, the Silenus Ape or Wandering (q.v.), now merged in *Macaca*.

silenus-ape, *s.* [SILENUS.]

si-lér, *s.* [Lat. = a kind of willow, *Salix Caprea* or *S. vitellina*. Not of the modern genus.]

Bot.: The typical genus of Sileride (q.v.). *Siler trilobum* occurs in Cambridgeshire, but is rare.

si-lér-í-dæ, *s. pl.* [Mod. Lat. *siler*; Lat. fem. pl. adj. suff. -idae.]

Bot.: A family or tribe of Apiaceae.

síl-ér-y, *s.* [Etym. doubtful.]

Arch.: Foliage carved on the tops of pillars.

si-lé-si-a (si as shí), *s.* [See def.]

Fabric: A kind of thin coarse linen cloth, so called from having been originally manufactured in Silesia, a province of Prussia.

Sí-ló-si-an (sí as shí), *a. & s.* [SILESIA.]

A. As adj.: Pertaining or relating to Silesia: as, *Silesian* linen.

B. As subst.: A native or inhabitant of Silesia.

si-lér, *s.* [Lat. = flint.]

Min., &c.: A word formerly used to designate any flinty substance, also as an equivalent of *silica* (q.v.).

silf-bérg-ite, *s.* [After Vester-Silberget, Sweden, where found; suff. -ite (Min.).]

Min.: A mineral occurring in honey-yellow crystals or in large cleavable masses. Hardness, 5.5; sp. gr. 3.446; lustre, vitreous; transparent. Compos.: silica, 43.83; protoxide of iron, 30.49; protoxide of manganese, 8.34; magnesia, 8.39; lime, 1.74; loss on ignition, 0.44 = 98.23, which nearly corresponds to the proposed formula, 4FeSiO₃ + 2(MgCa)SiO₃ + MnSiO₃.

sil-green, *s.* [SENGREEN.]

sil-hou-ette, *s.* [A name given, about 1757, in derision of the French Minister of Finance, Etienne Silhouette, he having vexed the people of Paris by many salutary and some rather trifling reforms; the wits, therefore, dubbed any very cheap article a silhouette.] A profile or outline representation of an object filled in with black. The inner parts are sometimes touched up with lines of lighter colour, and shadows are indicated by a brightening of gum or other lustrous medium. The first notice of the modern practice of the art was in regard to portraits made by Elizabeth Pyberg, who cut the profiles of William and Mary out of black paper, 1693.

"Converting the old lady's strong equiline profile into a grim silhouette of some warrior of ancient Greece or Rome." Harper's Magazine, June, 1882, p. 117.

sil-i-ca, *s.* [Lat.] [SILICIC-ANHYDRIDE.]

sil-i-cál-cár-é-ous, **sil-i-cí-cál-cár-é-ous**, *a.* [Eng. *silica*, and *calcareous*.]

Min. & Petrol.: Applied to calcareous substances containing free silica.

sil-i-o-ate, *s.* [Eng. *silicic*(e); -ate.]

Chem.: A salt of silicic acid.

sil-i-cát-éd, *a.* [Eng. *silicic*(e); -ed.] Combined with silica; coated with silica.

silicited-hydrogen, *s.*

Chem.: SiH₄. Silicium hydride. A colourless gas produced by treating magnesium containing silicium with hydrochloric acid. In its impure state it takes fire spontaneously when exposed to the air, burning with a white flame, and depositing clouds of silica. On passing pure silicited hydrogen through a tube heated to redness it is decomposed, silica being deposited.

sil-i-cát-i-zā-tion, *s.* [Eng. *silicic*(e); -ization.]

Min. & Petrol.: Becoming more or less changed to silica or a silicate.

si-líc-é-a (or *q* as sh), *s. pl.* [Neut. pl. of Lat. *siliceus* = of flint, flinty.]

Zool.: The Silicispongia (q.v.).

si-lí-CEOUS (ce as sh), **si-lí-cious**, *a* [Lat. *siliceus*.]

Min. & Petrol.: Applied to any mineral substance or rock containing or consisting wholly or in part of impure silica.

siliceous-sinter, *s.*

Min.: A spongy or cellular form of silica, mostly hydrated, and therefore referable to opal (q.v.), brought to the surface and deposited by thermal waters, occasionally the deposit is more or less compact with a vitreous lustre, and in this case is not to be distinguished from true opal.

siliceous-sponges, *s. pl.* [SILICIS-PONGIA.]

si-líc-ic, *a.* [Edg. *silicium*(e); -ic.] Derived from or containing silica.

silicic-acid, *s.*

Chem.: SiH₄O₄. A weak polybasic acid obtained by acting on a solution of sodic and potassic silicate with hydrochloric acid. On concentrating the solution, the silicic acid separates out as a gelatinous precipitate. It is very unstable, having a great tendency to give off water and form the anhydride.

silicic-anhydride, *s.*

Chem.: SiO₂. Silica. Silicic oxide. Occurs in nature as sand, flint, rock crystal, quartz, &c., and readily prepared by heating silicic

acid to 100°. In the amorphous state it is a fine white powder, sp. gr. 1.9-2.3, but in the crystalline condition it exists in the form of hexagonal prisms, terminated by a hexagonal pyramid, as in rock-crystal, sp. gr. 2.69. In both forms it is insoluble in water and acids, with the exception of hydrofluoric acid.

silicic-chloride, s.

Chem.: SiCl₄. Obtained by heating a mixture of finely divided carbon and silicic anhydride in a current of dry chlorine. It is a colourless, mobile liquid, fuming in contact with air; sp. gr. 1.52, and boiling at 59°. Water decomposes it instantaneously, with formation of silicic and hydrochloric acids.

silicic-ethers, s. pl.

Chem.: Silicates of alcohol radicles, produced by the action of alcohols on silicic chloride.

silicic-fluoride, s.

Chem.: SiF₄. A colourless gas with pungent odour, prepared by heating a mixture of quartz, sand, fluor spar, and concentrated sulphuric acid, and collecting in a dry vessel over mercury. It fumes in contact with air, and under a pressure of thirty atmospheres condenses to a colourless liquid.

sil-ī-cīf-ēr-ōūs, a. [Eng. *siliceo*]; Lat. *fero* = to produce, and Eng. *suff. -ous*.]

Petrol.: Applied to rocks containing minutely disseminated free silica.

sil-ī-cī-fī-cā-tion, s. [Eng. *silicification*]; *-ication*.]

Petrol.: Applied to rocks in which silica replaces one or more of their constituents.

sil-ī-cī-fied, pa. par. or a. [SILICIFY.]

silicified-wood, s.

Min.: Quartz pseudomorphous after wood in which the original structure is usually well retained.

sil-ī-cī-fī-y, v. t. & i. [Lat. *silicis*, genit. *silicis* = a flint, and *facio* (pass. *fiō*) = to make.]

A. Trans.: To convert into silica; to mineralize or petrify by silica.

B. Intrans.: To become silica; to be impregnated with silica.

sil-ī-cī-mūr-īte, s. [Eng. *siliceo*]; Lat. *mūr*(ex), genit. *mūr*(icis) = a rock, or point of rock, and *suff. -ite* (*Min.*).]

Min.: A name formerly applied to a compound of silica and magnesia.

sil-ī-cī-ō-phīte, s. [Eng. *silica*, and *ophite*.]

Min.: A name given by Schrauf to a substance supposed to have an intermediate composition between olivine and opal, and resulting from the alteration of the former.

sil-ī-cī-ous, a. [SILICEOUS.]

sil-ī-cī-spōn-ġī-sē, s. pl. [Lat. *silex*, genit. *silicis* = flint, and *spongia* = a sponge (q.v.).]

Zool.: An order of Sponges. Skeleton characterized by siliceous spicules which may or may not be united into a fibrous skeleton. They are the most highly developed of the class, and its most numerous division. They exist in all seas. The only family of freshwater sponges falls under this order. Families, or sub-orders: Monaxonida, Tetractinellidae, and Hexactinellidae.

sil-ī-cīte, s. [Eng. *siliceo*]; *suff. -ite* (*Min.*).]

Min.: Labradorite (q.v.), from Co. Antrim.

sil-ī-cī-īt-ēd, a. [Lat. *silex*, genit. *silicis* = flint; *t* connect, and Eng. *suff. -ed*.]

Min.: Impregnated with silica to a greater or less degree.

sil-ī-cī-ūm, s. [Lat. *silex*, genit. *silicis* = flint. Modelled on calcium, potassium, &c.]

Chem.: Silicon. A tetratomic element, symbol, Si; at wt. 28.2; sp. gr. (crystallized) 2.49, first isolated by Berzelius in 1810; occurs in combination with oxygen as quartz or silica, and enters largely into the composition of many of the rocks of which the earth is composed. With the exception of oxygen

it is the most abundant and widely distributed of the elements. It may be obtained nearly pure by heating the double fluoride of silicon and potassium in a glass vessel with its own weight of potassium or sodium, and treating the fused mass when cold with water, silicon remaining behind as a dark-brown amorphous powder. It may also be obtained in the crystalline form by heating in a crucible a mixture of aluminium, glass, and cryolite. Amorphous silicon is devoid of lustre, inflames when heated in the air, and is insoluble in water and all acids, except hydrofluoric, in which it dissolves readily. Crystallized silicon forms dark lustrous octahedra, hard enough to scratch glass, and is almost infusible.

silicium-hydride, s. [SILICATED-HYDROGEN.]

sil-ī-cī-ūr-ēt-ēd, sil-ī-cī-ūr-ēt-tōd, a. [Eng. *silicate*, and *ureted*.] Silicated (q.v.).

silicuretted-hydrogen, s. [SILICATED-HYDROGEN.]

sil-ī-cīe, sil-ī-cī-ū-la, s. [Lat. *silicula*, dimin. from *siliqua* (q.v.).]

Bot.: A shorter form of a siliqua, in no case more than four times as long as broad, and often much shorter.

sil-ī-cō-bōr-ō-ōāl-cīte, s. [Pref. *silico-*, and Eng. *boracalite*.]

Min.: A compact to earthy mineral occurring in small nodules in anhydrite or gypsum near Windsor, Nova Scotia. Hardness, 3.5; sp. gr. 2.55; lustre, subvitreous; colour, white; subtranslucent. Compos.: boric acid, 43.0; silica, 15.8; lime, 29.4; water, 11.8 = 100. According to How, the formula should be 2CaOSiO₃ + 2(CaO2BO₃ + HO) + 3H2OBO₃.

sil-ī-cō-fū-ōr-īo, a. [Eng. *silico(n)*, and *fluoric*.] A synonym of Hydrofluosilicic (q.v.).

silicofluoric-acid, s. [HYDROFLUOSILICIC-ACID.]

sil-ī-cō-fū-ōr-īdo, s. [Eng. *silico(n)*, and *fluoride*.]

Chem. (Pl.): 2MF.SiF₄. Salts produced by dissolving the metallic oxides, hydrates, or carbonates in silicofluoric acid, till the liquid is saturated. The silicofluorides of sodium, lithium, barium, and calcium are sparingly soluble in water; all the other silicofluorides are very soluble.

sil-ī-cōn, s. [SILICON.]

silicon-chloroform, s.

Chem.: SiHCl₃. Silicic hydrotrichloride. A volatile inflammable liquid formed when silicon is heated to dull redness in a current of hydrochloric acid gas. It burns with a green-edge flame, boils at 36°, sp. gr. 1.6, and is decomposed by chlorine at ordinary temperatures.

sil-ī-cī-ū-la, s. [SILICLE.]

sil-ī-cī-ūle, s. [SILICLE.]

***sil-ī-cī-ū-lō-sa, s. pl.** [Mod. Lat. nent. pl. of *siliculosus*, from *silicula* (q.v.).]

Bot.: Plants having for their fruit a silicle (q.v.). In Linnæus's Artificial System an order of Tetradymania. Genera, Draba, Lunaria, &c.

sil-ī-cī-ū-lōse, sil-ī-cī-ū-loūs, a. [Eng. *silicul*(ē); *-ose, -ous*.]

1. Having silicles or pertaining to silicles.
2. Full of or consisting of husks; husky. (*Bailey*.)

***sil-ī-cī-ūn-ōūs, *sil-ī-cī-ūn-ōse, a.** [Lat. *siliginosus*, from *siligo*, genit. *siliginis* = fine white wheat.] Made of white wheat. (*Bailey*.)

sil-ī-ġng, pr. par. or a. [SILE, v.]

silġng-dish, s. A colander, a strainer.

sil-ī-qua (pl. sil-ī-qua), s. [Lat. = a pod or husk.]

1. *Bot.*: A dry, elongated pericarp, consisting of two valves, held together by a common suture or replum, from which they ultimately dehisce. Many seeds attached to two placenta adhering to the replum, and opposite to the lobes of the stigma. Lindley places it under his Compound Fruits.
2. A weight of four grains used in weighing gold and precious stones; acarat.

sil-ī-quār-ī-a, s. [Mod. Lat., dimin. from *siliqua* (q.v.).]

Zool. & Palæont.: A genus of Turritellidae (*Woodward*), of Vermetidae (*Tate*), with eight recent species, from the Mediterranean (where the typical species, *Silicuarina anguina*, is found embedded in silicious sponges), and North Australia. Fossil species ten, from the Eocene onward.

sil-ī-lique' (que as k), s. [SILIQUA.]

sil-ī-quēl-la, s. [Mod. Lat., dimin. from Lat. *siliqua* (q.v.).]

Bot.: One of the carpels or divisions of certain fruits like that of Papaver with the two placenta.

sil-ī-qui-form, a. [Lat. *siliqua* = a pod, and *forma* = form.] Having the form or shape of a siliqua.

†sil-ī-quō-sa, s. pl. [Nent. pl. of Mod. Lat. *siliquosus*, from Lat. *siliqua* (q.v.).]

Bot.: Plants having for their fruit a siliqua (q.v.). In Linnæus's Artificial System an order of Tetradymania. Genera: Raphanus, Cheiranthus, &c.

***sil-ī-quō-sæ, s. pl.** [Fem. pl. of Mod. Lat. *siliquosus*.] [SILIQUOSA.]

Bot.: The fifty-seventh order in Linnæus's Natural System. The same as CRUCIFERÆ (q.v.).

sil-ī-quōse, sil-ī-quōūs, a. [SILIQUA.]

Bearing siliquæ; having that species of pericarp called a siliqua.

"All the tetrapetalous siliquose plants are alkalocent."—*Arbuthnot*.

silk, *selke, *silke, s. & a. [A.S. *seol*, from Lat. *sericum* = silk, pro naut. sing. of *Sericus* = of or pertaining to the Seres or Chinese; cogn. with Icel. *silki*; Sw. *silke*; Dan. *silke*.]

A. As substantive:

1. A fine, glossy, and tenacious fibre spun by *Bombyx mori* and allied species. [*SILK-woom*.] The Chinese seem to have led the way in rearing the silkworm, a native of their country, and using the silk for textile purposes. The first Greek writer who mentions it is Aristotle (B.C. 384-322). Some think that Virgil alludes to silk in *Georg.* II. 121, but it may be cotton that is referred to. Pliny describes the formation of silk by the Bombyx (*Hist. Nat.*, xi. 17). In the reign of Tiberius a law was passed at Rome that no man should disgrace himself by wearing a silken garment (*Tacit.*: *Ann.*, ii. 33). The Emperor Hellogabalus broke through the regulation and came forth all in silk. His example was followed, and the use of silk spread among all classes. Hitherto the fibre had been imported from China, but in A.D. 551 two Persian monks, resident in China, were encouraged by Justinian to carry off the eggs of the moth to Constantinople. They were successful, and the new industry took root in Europe. It was introduced into Sicily in 1146, whence it passed to the mainland of Italy, to Spain in 1253, and to Lyons, now its great seat in France, in 1521, and to England by refugees from Antwerp in 1555.

The insects are fed by silk producers on mulberry leaves, their appropriate nutriment, though they will also consume lettuce. The cocoons are boiled for a considerable time in an alkaline solution, to which some glycerine may be added. They are then placed in a basin, where a semi-rotating brush is so adjusted as to remove the outer waste shell, and pick out the continuous threads. Then the cocoons are placed in the hot water basin of a reeling machine, cleansed, and a fixed number of threads are wound into a single of uniform thickness. Two or more singles are then thrown together and spun or twisted into a yarn. Two or more threads twisted together are called a tram. When silk is employed in this state in weaving it is called the shoot, or weft. Thrown silk is formed of two, three, or more singles twisted together in a contrary direction to that in which the singles of which it is composed are twisted. This process is termed organzining, and the product organzine. [*SILK-thrower*.] The silk reaches the spinner twisted into the form of knots, and in batches called books or hard yarn. (For the manufacture of silk in India see Tussar.)

A thread of silk will support a weight

bōil, bōy; pōut, jōwl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -ġng. -clan, -tian = shān. -tion, -sion = shūn; -ŷion, -ŷion = zhūn. -cious, -tious, -sious = shūs. -ble, -dle, &c. = bēl, dēl.

standing to that borne by a flax thread of the same diameter in the ratio of 136 to 47, and to one of hemp in the ratio of 102 to 49.

"I need not explain that silk is originally spun from the bowels of a caterpillar, and that it composes a golden loath from whence a worm emerges in the form of a butterfly."—Gibson: *Decline & Fall*, ch. 1.

2. Cloth made of silk.

"He sensed the shore to be covered with Persian silk for him to tread upon."—Knox: *Hist. Turkey*.

¶ In this sense the word admits of a plural.

3. A dress made of silk.

"Let not the creaking of shoes, or rustling of silks, betray by poor heart."—Shakspeare: *Lear*, iii. 4.

4. A name given to the filiform style of the female flower of maize, from its resemblance to real silk in fineness and softness.

B. As adjective:

1. Made of silk; silken: as, a silk dress, silk stockings.

2. Resembling silk; silky: as, silk hair. (Shakspeare: *As You Like It*, iii. 5.)

¶ (1) To take silk: To attain the rank of a queen's counsel.

(2) Virginia silk: [VIRGINIAN-SILK].

silk-cotton, s. A short, silky, elastic fibre obtained from the bombax and some other trees. It is employed by the Hindus for producing a coarse, loose kind of cloth, and has been used instead of silk for covering hat-bodies.

Silk-cotton-tree:

Bot.: (1) The genus *Bombax* (q.v.); (2) the genus *Eriodendron*.

silk-dresser, s. One whose occupation is to dress or stiffen and smooth silk.

silk-flower, s.

Bot.: *Calliandra trinervia*.

silk-fowl, s. The same as SILKY, B.

silk-gelatine, s. [SERICIN.]

silk-gown, s. The technical name of the canonical gown or robe of a queen's counsel, differing from that of an ordinary barrister in being made of silk, and not of stuff; hence, applied to a queen's counsel himself.

† **silk-grass, s.**

Bot.: A popular name for the genus *Yucca*, from the fibres which it yields.

silk-hen, s. The female of the silk-fowl (q.v.).

silk-mercer, s. A dealer in silk.

silk-mill, s. A building where silk is reeled, spun, and woven.

silk-moth, s.

Entomology:

1. *Bombyx mori*.

2. (Pl.): The family Bombycidae.

silk-shag, s. A coarse, rough, woven silk, with a shaggy nap.

silk-stocking, s. Aristocratic, exclusive, composed of aristocrats; as a silk-stocking club, or regiment. (Often used in contempt or ridicule.)

silk-tail, s.

Ornith.: A popular name for any species of the genus *Bombycilla* (q.v.).

silk-thrower, silk-throwster, s. One who winds, twists, spins, or throws silk, to prepare it for weaving.

silk-tree, s.

Bot.: *Acacia Julibrissin*, a native of the Levant.

silk-weaver, s. One whose trade is to weave silken manufactures.

"True English hate your monseurs' paltry arts; For you are all silk-weavers in your hearts."—Dryden: *Epilogue to Astrucus*.

silk-weed, s.

1. *Asclepias Cornuti*, or *syriaca*.

2. (Pl.): The *Convolvaceae*.

silk-winding, s. The operation of winding off the cocoons of the silk-worm.

"Her day that lightens the next twelvemonth's toil At wearisome silk-winding coil on coil."—Browning: *Pippa Passes*.

silk-worm, *silke-worme, s.

Entom., Comm., &c.: A popular name for the caterpillar of any moth, the chrysalis of which is enclosed in a cocoon of silk. Applied to the caterpillars of the genus *Bombyx*,

all the species of which produce silk, and specially to *Bombyx mori*, a native of the northern provinces of China. It is of a yellowish-gray colour, and when full-grown is about three inches long, with a horn-like process on the last segment. The cocoon is yellow or white, and about the size of a pigeon's egg. The perfect male insect is about an inch long, with a wing-expanse of two inches, the female is rather larger; wings yellowish-white, with indistinct, dusky, transverse lines. Eleven genera of the family Saturniidae (*Actias*, *Antheraea*, *Attacus*, *Caligula*, *Circula*, *Lœpa*, *Neoris*, *Rinaca*, *Rhodia*, *Salassa*, and *Saturnia*), natives of China, Japan, or India, also bear silk.

"[I]f silk-worm like, so long within have wrought, That I am lost in my own web of thought."—Dryden: *Conquest of Granada*, l. 2.

Silk-worm disease, silk-worm rot: [PANHISTOPHYTON, PEBRINE].

Silk-worm gut: A fine cord for angling, made of the gut of the silk-worm. Fine worms about to begin spinning are killed by immersion in vinegar. After steeping for about twelve hours, the worms are removed and pulled apart, each exposing two transparent yellowish-green cords. These are stretched to the required extent, and fastened in the elongated condition on a board to dry.

silk'-en, a. [A.S. *seolcen*, from *seol* = silk.]

1. Made of silk. "Off with these silken robes and cap of velvet."—Mickle: *Siege of Marseilles*, l. 2.

2. Like silk; silky; soft to the touch; hence, tender, delicate, smooth, effeminate. "And silken dalliance in the wardrobe lies."—Shakspeare: *Henry V.*, ii. (Chorus.)

* 3. Delicate, smooth. "Time, as he passes us, has a dove's wing. Unsouled, and swift, and of a silken sound."—Cooper: *Task*, iv. 212.

* 4. Dressed in silk; effeminate, soft. "Shall a beardless boy, A cockerd silk wanton, brave our soldiers?"—Shakspeare: *King John*, v. 1.

* **silk'-en, v. t.** [SILKEN, a.] To make like silk; to render soft or smooth. "To house them dry on fern or straw, Silkening their decees."—Dyer: *Floeces*, ll.

silk'-i-ness, s. [Eng. *silky*; -ness.]

1. The quality or state of being silky; softness or smoothness to the touch.

* 2. Smoothness of taste.

* **silk'-man, s.** [Eng. *silk*, and *man*.] A dealer in silk; a silk-mercer. "He is invited to dinner at . . . Master Smooth's, the silkman."—Shakspeare: *2 Henry IV.*, ii. l.

* **silk'-ness, *silk-ness, s.** [Eng. *silk*; -ness.] Silkiness. "This brize hath prickt my patience: sir, your silkness Clearly mistakes Meccenas, and his house."—Ben Jonson: *Poetaster*, iii. l.

silk'-y, a. & s. [Eng. *silky*; -y.]

A. As adjective:

1. Ordinary Language:

1. Made or composed of silk; silken.

2. Resembling silk; soft and smooth to the touch, like silk; delicate, glossy. "To spread upon the field the dew of heaven, And feed the silky fleece."—Dyer: *Floeces*, ll.

3. Delicate, soft, smooth. "The several graces and elegancies of music, the soft and silky touches, the nimble transitions and delicate closes."—Smith: *On Old Age* (1660), p. 144.

II. Botany:

1. (Of hairs): Long, very fine, and pressed closely to the surface, so as to present a sub-lucid silky appearance.

2. (Of leaves, &c.): Covered with such hairs, as the leaves of *Alchemilla alpina*.

B. As substantive:

Ornith.: A fancy variety of the domestic fowl, originally from China, Malacca, or Singapore.

* *Silkie* may be classed as purely fancy poultry, having little but their unique appearance to recommend them. Instead of feathers they are covered with abundance of white, silky hair, the wing and tail-quills also being hung with long silky fringe. The skin and legs are blue, the face and comb a deep purple colour, ear-lobes being slightly tinged with white. The best specimens have five toes, and are feathered on the legs. The plumage should be pure white."—Lewis Wright: *Illus. Book of Poultry*, p. 42.

silky-tamarin, s.

Zool.: *Midas rosalia*, one of the prettiest of the genera. [MIDAS.] The fur is long, yellow, and silky, and arranged like a mane round the neck and face.

silky-wainscot, s.

Entom.: A British night-moth, *Senta maritima*.

silky-wave, s.

Entom.: A British geometer-moth, *Acidalia holosericeata*.

sill (1), **çill**, ***selle**, ***sille**, ***syll**, ***syll**, ***syl**. [A.S. *syl* = a base, a support; cogn. with Icel. *syll*, *svill* = a sill, a door-sill; Sw. *syll*; Sw. dial. *svill*; Dan. *syll* = the base of a framework building; O. H. Ger. *suelli* = a sill, a threshold; Ger. *schwelle*; Goth. *sulfa* = a foundation, the sole of a shoe.]

I. Ordinary Language:

1. A block forming a basis or foundation; a stone or a piece of timber on which a structure rests; the lowest timber in a wooden structure, especially the horizontal piece of timber or stone at the bottom of a framed case, as of a door or window.

2. The shaft or thill of a carriage. (Prov.)

II. Technically:

1. Fort.: The inner edge of the bottom or sole of an embrasure.

2. Mining: The floor of a gallery or passage in a mine.

¶ (1) **Ground-sills:** [CILL, ¶].

(2) **Sills of the port:** [PORT-SILL].

sill (2), **s**. [Cf. Icel. *sil* = a fish allied to the herring.] The young of the herring. (Prov.)

sil-la-būb, ***sil-lī-būb**, ***syll-la-būb**, ***sililbouk, s.** [Ety. doubtful. Perhaps for *svill-bouk* or *suell-bouk*, where *bouk* = Icel. *bukr* = the belly.] A dish made by mixing wine or cider with cream or milk, and thus forming a soft curd.

"Quaſis ſillabubis in cana."—Drayton: *Poly-Olbion*, s. 14.

sil-lā-gō, s. [Ety. not apparent.]

Ichthy.: A genus of Trachanins (q.v.), with eight species. Two dorsals, the first with nine to twelve spines; ventrals thoracic; villiform teeth in jaws and on vomer; operculum unarmed; præoperculum serrated. They are small plain-coloured shore-fishes, common in the Indian Ocean to Australia.

sil-lēr, s. [SILVER.] (Scotch.)

sil-lēr-ŷ, s. [See def.] A non-sparkling champagne wine, so called after the Marquis of Sillery, the owner of the vineyards where it is produced.

sil-lik, s. [SILLOCK.]

sil-lī-lŷ, adv. [Eng. *silky*; -ly.] In a silly manner; foolishly.

"We are caught an *silly* as the bird in the net."—*L'Estrange: Fables*.

sil-lī-man-ite, s. [After Prof. Silliman; suff. -ite (Afia).]

Min.: A variety of fibrolite (q.v.) occurring in long slender crystals at Chester, Connecticut. Because of its distinct crystallization formerly regarded as a distinct species, but its optical analogies with fibrolite were first pointed by Des Cloizeaux, as well as its chemical composition which, like that of fibrolite, is essentially a silicate of alumina.

sil-lī-ness, *se-li-ness, s. [Eng. *silky*; -ness.]

* 1. Simplicity, simpleness.

* 2. Weakness of understanding; want of sound sense or judgment; foolishness. "The silliness of the person does not derogate from the dignity of his character."—*L'Estrange*.

sil-lōck, s. [Eng. *sill* (2); dimin. suff. -ock.] The fry of the Coal-fish (q.v.). Written also *sellock*, *sillik*, *sillock*. (Orkney.)

"A large quantity of *sillocks*, or young *salts*, were got to-day here with the sweep-net."—*Daily Telegraph*, Nov. 26, 1881.

† **sil-lō-grāph, s.** [Lat. *sillographus*; Gr. *σιλλόγραφος* (*sillographos*)] A satirist; a writer of satirical poems.

"His state of mind is coolly described by Timon the *sillograph*."—Lewes: *Hist. Philosophy*, l. 43.

sil-lōn, s. [Fr.]

Fort.: A work raised in a ditch to defend it, or too wide. It must be lower than the main works, but higher than the covered way.

sil-lŷ, *sel-ie, *sel-i, *sel-y, *seel-y, a. [A.S. *seelig* = happy, prosperous, fortunate,

fate, fāt, fare, amidst, whāt, fāll, father; wē, wēt, hère, eamēl, hēr, thère; pine, pīt, sīre, sīr, marine; gō, pōt. or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unte, cūr, rāle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā; qu = kw.

from *sil* = time, season, happiness; cogn. with Dut. *salig* = blessed; Icel. *seill* = blessed, happy; *seila* = bliss; Sw. *säll* = blest, happy; Ger. *seilig*; Goth. *seils*.]

* 1. Blessed. [He] had his head stricken from his shoulders by that silly woman Judith.—Homilies; Sermon against Gluttony.

* 2. Happy, fortunate, prosperous. * 3. Innocent.

* This Miles Forest and John Dighton about midnight (the silly children lying in their beds) came into the chamber, and suddenly lapped them up among the clothes.—Sir T. More: Hist. Richard III.

* 4. Harmless, innocent, inoffensive. * Strange it was thought and absurd above the rest, to chase and keep out of the house silly swallows, harmless and gentle creatures.—P. Holland: Picaresque's Morals, p. 776.

* 5. Plain, simple, rude, rustic. * There was a fourth man, in a silly habit. Shaksp.: Cymbeline, v. 2.

* 6. Weak, impotent, helpless, frail. * Some seely trough of wood or some trees ring. Browne: Britannias Pastoralis, l. 2.

7. Weakly foolish; wanting in sense or judgment; weak of intellect; witless.

8. Foolish, as a term of contempt; characterized by weakness or folly; showing want of judgment; foolish, unwise, stupid. * Foolcs, to raise such silly forts, not worth the least account. Chapman: Homer; Iliad vii.

9. Fatuous, imbecile; having weakness of mind approaching to idioey.

10. Weak in body; not in good health. (Scotch.)

sil-lý-hov, s. [A. S. *selig* = blessed, and *hufe* = a hood.] The membrane that covers the head of the fetus; a caul.

* Great conceits are raised of the membranous covering called the *sillyhow*, sometimes found about the heads of children upon their birth.—Browne: Vulgar Errors, bk. v. ch. li.

* *sil-lý-tón*, s. [SILLY.] A simpleton. * Sillyton, forbear telling.—Bailey: Erasmus, p. 413.

sil-ló (1), s. [O. Fr.] [ENSILAGE, SILAGE.] 1. A store-pit for potatoes or beets. (Amer.) 2. A pit in which green fodder is tightly packed to make silage or ensilage.

* The system of preserving one kind of green food at least was practised in pits or silos more than eighty years ago.—Field, Oct. 2, 1883.

sil-ló (2), s. [Lat. *silus* = snub-nose.] Entom.: A genus of Sericoctomidae. The species, which are mostly small dark insects much resembling each other, usually abound in the localities where they occur, the males flying briskly in the afternoon, especially in bright sunshine, settling on the herbage, among which the less active females occur. Seven or eight species; two, *Silo xulipes* and *S. nigricornis*, are British.

sil-ló, v.t. [SILO (1), s.] To pack or store in a silo.

* Last year, owing partly to commencing too late, and principally to the drought, material was siloed which would have been better made into hay.—Field, Dec. 19, 1885.

sil-lóm-ó-tér, s. [First element doubtful; Diez derives it from Scand. *sila* = to plough, and Littré from Fr. *siller* = to make sail; Gr. *μέτρον* (*metron*) = a measure.]

Naut.: An instrument for measuring, without the aid of the log-line, the distance passed over by a ship. Various forms have been proposed or actually constructed.

sil-pha, s. [Gr. *σίλη* (*silphé*) = a grub, an insect emitting an evil odour, perhaps Blatta.] Entom.: The typical genus of the family Silphidae.

sil-phí-dæ, s. pl. [Mod. Lat. *silph(a)*; Lat. fem. pl. adj. suff. *-idæ*.] Entom.: A family of Pentamerous Beetles, tribe Necrophaga (q. v.). The mandibles end in an entire point, and the antennæ in a knob, generally perfoliate, and having four or five articulations. There are many genera and a considerable number of species, in Europe and elsewhere.

sil-phí-ó-sæ, s. pl. [Mod. Lat. *silph(um)*; Lat. fem. pl. adj. suff. *-ææ*.] Bot.: A sub-tribe of Senecionidae.

sil-phí-úm, s. [Lat., from Gr. *σίλφιον* (*silphion*) = a plant, the juice of which was used for food and medicine. Probably *Thapsia Silphion* or *Frangos pabularia*.]

Bot.: The typical genus of Silphieæ. Perennial herbs from the western part of the United States. *Silphium laciniatum* is the Compass plant (q. v.). The tubers of *S. levis* are eaten by the Indians.

silt, ° *olite*, s. [From the pa. par. of *sile* = to drain, strain, filter.] [SILE.] A fine mixture or deposit of clay and sand from running or standing water; fine soil deposited from water; mud, slime, sediment.

* Covered by the inundation of the fresh and salt waters, and the silt and moorish earth exaggerated upon them.—Hale: Orig. of Mankind, § 2, ch. vii.

silt, v.t. & i. [SILT, s.] A. Trans.: To choke, fill up, or obstruct with silt or mud. (Generally with up.)

* Both [casos] would become silted up on the floor of the estuary.—Quart. Journ. Geol. Soc., xviii. 224.

B. Intransitive: 1. To percolate through crevices; to ooze. 2. To become choked or filled up with silt.

silt-ý, a. [Eng. *silt*; -y.] Consisting of, or of the nature of silt; resembling silt; full of silt.

sil-u-bó-sau-ríus, s. [Gr. *σίλλυβος* (*silubos*) = a kind of thistle, and *σαύρος* (*saurus*) = a lizard.]

Zool.: A genus of Scincidae, with two species peculiar to Australia. The tail is short, conical, and armed with sharp spinous scales.

sil-ür-án-ó-dón, s. [Lat. *silur(us)*, and Gr. *ἀνόδον* (*anodon*) = toothless.]

Ichthy.: An Indian genus of Silurids, group Silurinus (q. v.).

sil-üre, s. [SILURUS.] Any fish of the genus Silurus (q. v.).

Sil-ür-i-an, a. [See def.] Pertaining to the Silures, an old British people, who inhabited part of Wales, Herefordshire, &c. Under their king, Caractacus (Caradoc), they maintained their freedom for a time, but were ultimately subdued by the Romans. (Thomson: Liberty, iv.)

Silurian-system, s. Geol.: A term made public by Sir Roderick Murchison, in 1839, though he had begun to use it as early as 1835. It implied that, speaking broadly, the rocks so described were well developed in the country of the old Silures. The term has been universally adopted. Murchison divided his Silurian system into Upper and Lower Silurian, contending that the Cambrian system of Sedgwick was not independent, but simply Lower Silurian. Whatever be the case with the Cambrian, the Laurentian system, since established, is unequivocally older than the Silurian. In the United States Silurian strata extend southwest along the Alleghanies into Alabama, and probably throughout the interior continental basin, for areas appear at intervals, and they reappear in the Rocky mountains. In Canada they extend from the mouth of the St. Lawrence past the great lakes into the far northwest. The Canadian and the Trenton formations are believed to be Lower Silurian, the Niagara, the Salina, and the Oriskany to be successive strata of Upper Silurian age. The table of strata in England stands:

I. Upper Silurian: 1. Ludlow formation (q. v.); 2. Wenlock formation (q. v.); 3. Llandovery formation or Group (q. v.).

II. Lower Silurian: 1. Bala and Caradoc beds. [CARADOC]; 2. Llandoilo flags (q. v.); 3. Arenig or Stiper Stone Group.

There is a great break between the Upper and Lower Silurian, which are unconformable, and a greater break between the Upper Silurian and the Devonian. During the early part of the Silurian the land was sinking; during the deposition of the Llandoilo the sea was moderately deep. Alge, corals, brachiopods, trilobites, and other crustacea, and, in the upper strata, fishes, are the characteristic fossils. The higher vertebrates had not yet appeared. Vast areas in Russia, &c., are covered by Silurian rocks, and they are found in many other parts of Europe. [GREYWACKE, TRANSMITTON.]

sil-ür-ich-thýs, s. [Lat. *silur(us)*, and Gr. *ἰχθύς* (*ichthys*) = a fish.]

Ichthy.: An Indian genus of Silurids, group Silurinus (q. v.).

sil-ür-i-dæ, s. pl. [Lat. *silur(us)*; fem. pl. adj. suff. *-idæ*.]

1. Ichthy.: Cat-fishes; a family of Physostomi, chiefly from the freshwaters of tropical and temperate regions, and the few which enter the sea keep close to the coast. Scales are never present, and when the skin is not naked it bears osseous scutes; the maxillary bones are reduced to rudiments, and generally

MALAPTERURUS ELECTRICUS.

form the support for a maxillary barbel, so that the margin of the upper jaw is formed by the pre-maxillary bones only; sub-operculum absent; air-bladder generally present, communicating with the organ of hearing by auditory ossicles. The anal and dorsal fins are variable in their development, and the family has been subdivided as under:—

- SUB-DIVISIONS. GROUPS. 1. HOMALOPTERE ... Clarifina, Plectolina. 2. HETEROPTERE ... Silurina. 3. ANOMALOPTERE ... Hypophthalmus. 4. PROTEOPTERE ... Bagrina, Anarina, Pimelodina, Arina, Bagrina. 5. STENOBRANCHIE ... Doradina, Rhioglanina, Malapterurina. 6. PROTEOPTERE ... Hypostomina, Aspredinina. 7. OPISTHOPTERE ... Neomatogeyina, Trichocetylerina. 8. BRANCHIOLE.

2. Palæont.: They appear in the Chalk.

sil-ür-i-dan, s. [SILURIDÆ.] Any fish of the family Siluridæ (q. v.).

sil-ür-i-na, s. pl. [Lat. *silur(us)*; neut. pl. adj. suff. *-ina*.]

Ichthy.: A group of Siluridæ, sub-division Heteroptera. Rayed dorsal very little developed, if present, it belongs to the abdominal portion of the vertebral column; adipose fin exceedingly small or absent. Chief genera, Saccobranchius and Silurus, with numerous less important ones from Africa and East India.

sil-ür-óid, a. & s. [Lat. *silur(us)*; Eng. suff. *-oid*.]

A. As adj.: Of belonging to, or characteristic of the genus Silurus or the family Siluridæ.

* Of all the Silurid genera, this has the greatest number of species.—Günther: Study of Fishes, p. 569.

B. As subst.: Any individual of the genus Silurus or the family Siluridæ.

* The skeleton of the typical Siluridæ shows many peculiarities.—Günther: Study of Fishes, p. 558.

sil-ür-ús, s. [Lat., from Gr. *σίλουρος* (*silourous*) = prob. *S. glanis*. Athenæus Grammaticus, 287 B, derives it from *σειεῖν οὐράν* (*seiein ouran*) = to shake the tail. (Liddell & Scott.)]

1. Ichthy.: The typical genus of Silurina (q. v.). Adipose fin wanting; one very short spineless dorsal; barbels four or six, one to each maxillary; head and body covered with soft skin; caudal rounded. Four species from the temperate parts of Asia, one European, *Silurus glanis*, the Sheat-fish (q. v.).

2. Palæont.: From the Middle Eocene of Bracklesham.

sil-va, *syl-va*, s. [Lat. = a wood.]

1. A word corresponding to Flora and Fauna, meaning the description of the forest trees of a country.

† The word in this sense dates from the publication of John Evelyn's *Sylva*; or, A Discourse of Forest Trees, in 1664.

2. A name given to a woodland plain of the great Amazonian region of South America.

sil-van, *syl-van*, a. & s. [Lat. *silvanus* = belonging to a wood; *silva* = a wood; cogn. with Gr. *σάλη* (*hulé*) = a wood.]

A. As adj.: Pertaining to or consisting of woods; woody.

* Betwixt two rows or rocks, a silvan scene. Appears above, and grows for ever green. Dryden: Virgil; Æneid l. 233.

B. As subst.: An obsolete name for the element Tellurium (q. v.).

sil-van-ite, s. [SYLVANITE.]

böil, **böy**; **pout**, **jöwí**; **cat**, **çell**, **chorus**, **çhin**, **bençh**; **go**, **gem**; **thin**, **thís**; **sin**, **aç**; **expect**, **Xenophon**, **exist**. **ph** = **l** **-cian**, **-tian** = **sham**. **-tion**, **-sion** = **shün**; **-tion**, **-sion** = **shün**. **-cion**, **-tious**, **-sious** = **shüs**. **-ble**, **-dle**, &c. = **bel**, **döl**.

SIL-vā-nūs, s. [Lat.] [SILVAN.]

SILVANUS.
(British Museum.)

sil-vēr, *sel-ver, *syl-ver, s. & a. [A.S. *seolfor*; cogn. with Dut. *zilver*; IceL. *silfr*; Dan. *sølv*; Sw. *silfver*; Goth. *silubr*; Ger. *silber*; Rnsa. *serrebro*; Lith. *sidabras*.]

A. As substantive:

1. Ordinary Language:

In the same sense as II.

"A man, Demetrius his name, a worker in silver."—*Wycliffe: Dedic. xix.*

2. A piece of plate or utensil made of silver: as, To eat off silver.

3. Money; coin made of silver.

"Four and twenty thousand pounds he gat away to go."—*The Banes tok the silver, to Denmark gat, in Robert de Brunne, p. 98.*

4. Anything resembling silver; anything lustrous like silver.

"Pallas, piteous of her plaintive cries,
In slumber closed her silver-streaming eyes."—*Pope: Homer; Odyssey l. 484.*

II. Technically:

1. Chem.: [ARGENTUM].

2. *Coinage, Comm., &c.*: As early as the times of Abraham silver (not coined, but weighed) was given as a medium of exchange (Gen. xxiii. 16). For many ages it has been coined into money, bearing a certain fluctuating relation to the value of gold. Depreciation in the gold price of silver, with corresponding appreciation in the purchasing power of gold, has been a notable result of the practical abandonment of bimetallic in the United States, France, and Germany, about 1870-73; and a large increase in the production of silver here and in Mexico, during the same period, has doubtless intensified this deviation from a former approximate parity. [METAL, s. 1.]

3. *Min.*: Crystallization isometric, only occasionally found in distinct crystals, more often filiform, reticulated and arborescent in calcite and quartz in veins traversing metamorphic rocks. Dana distinguishes the following varieties: (1) Ordinary, (a) crystallized, (b) filiform or arborescent, (c) massive; (2) Auriferous = Küstelite; (3) Cupriferous; (4) Antimonial. Much of the silver from Kongsberg, Norway, contains mercury in variable amounts, which, it is suggested, may account for the fine crystallizations which occur there. In the copper mines of the Lake Superior mining region it is frequently found in a pure state, intimately associated with native copper.

¶ Silver-bromide = *Bromargyrite*; Silver-carbonate = *Selbite*; Silver-chloride = *Chlorargyrite*; Silver-chlorobromide = *Embolite*; Silver-fahlerz = *Tetraehedrite*; Silver-iodide = *Iodargyrite*; Silver-selenide = *Nannannite*; Silver-sulphide = *Argentite* and *Akanthite*; Silver-tellurium = *Hessite*.

4. *Mining & Geol.*: Silver exists in most countries, but the chief mines are in the United States and Mexico. A recent statement makes the total production of the world to be about \$160,000,000 in value. Of this the United States yielded about \$65,000,000, Mexico \$55,000,000, and South America \$20,000,000. In 1865 the total annual yield of all countries was estimated at 43,204,000 ounces, worth about \$60,000,000, so that the subsequent period has shown a great increase. This is mainly due to the very rich mines opened in Nevada and Colorado, which have added enormously to the world's stock of silver bullion.

5. *Pharm.*: Nitrate of silver is used externally as an escharotic, and is given internally in chronic gastric affections of an inflammatory type or epilepsy, &c. Oxide of silver and chloride have both of them somewhat similar effects. (*Garrod*.) [CAUSTIC.]

B. As adjective:

1. Made of silver; silvren.

"Put my silver cup in the sack's mouth."—*Genesis xlv. 2.*

2. Resembling silver in one or more of its characteristics: as,

(1) White like silver; of a pure and bright whiteness.

"Shame to thy silver hair."—*Shakesp.: 2 Henry VI., v. 1.*

(2) Bright and lustrous as silver; shining, glittering.

"Spread o'er the silver waves thy golden hairs."—*Shakesp.: Comedy of Errors, iii. 2.*

(3) Having a pale lustre; of a soft splendor.

"Nor shines the silver moon one half so bright."—*Shakesp.: Love's Labour's Lost, iv. 5.*

(4) Having a soft and clear tone.

"Let your silver chime
Move in melodious time."—*Milton: Ode xiii.*

(5) Soft, quiet, gentle, peaceful.

"All the night in silver sleep I spend."—*Spenser: F. Q., VI. ix. 22.*

¶ (1) *German-silver*: [GERMAN-SILVER].

(2) To be born with a silver spoon in one's mouth: To be born under favorable circumstances; to be born to good fortune.

"I must have been born with a silver spoon in my mouth, I am sure, to have ever come across Peckaniff. And here have I fallen again into my usual good luck with the new pupil."—*Dickens: Martin Chuzzlewit, ch. vi.*

¶ Silver is used in many compounds, the meanings of which are in most cases self-explanatory.

silver-acetyl, s.

Pectoral longer than pelvic limbs; no tail or cheek-pouches; stomach simple, caecum with a vermiform appendix; sternum broad, *os intermedium* sometimes absent from carpus. There are three genera: *Simia*, *Troglodytes*, and *Hyllobates*.

sim'-i-lar, a. & s. [Fr. *similaire*, as if from a Lat. *similaris*, extended from *similis* = like; Ital. *similare*.]
 A. As adjective:
 I. Ordinary Language:
 1. Like; having a like form, appearance,

böll, böÿ; pöüt, jöwî; cat, çell, chorus, çhin, bench; go, gem; thin, ðis; sin, as; expect, Xenophon, exist. -îng, -cian, -tian = shan. -tion, -ston = shün; -ñion, -gion = zhün. -cious, -tiuous, -çious = shüs. -ble, -dle, &c. = bël, dël.

characteristics, or qualities; resembling, alike. Similar sometimes means exactly alike, but generally it denotes a resemblance less than exact likeness, that is, a general likeness in the principal points.

"My present concern is with the commandment to love our neighbor, which is a duty second and similar to that of the love of God."—Waterland: Works, vol. ix., ser. 2.

2. Homogeneous; having all parts alike; uniform.

"Minerals appear to the eye to be perfectly similar, as metals."—Boyle.

II. Geom., &c.: Applied to figures made up of the same number of parts, those parts being arranged in the same manner, so that the figures shall be of the same form and differ from each other only in magnitude.

* B. As subst.: That which is similar to or resembles something else in form, appearance, quality, or the like.

sim-i-lar-i-ty, s. [Fr. similarité.] The quality or state of being similar; perfect or partial resemblance; close likeness.

"The similitude it bore to the spruce."—Cook: Second Voyage, bk. I, ch. iv.

sim-i-lar-ly, adv. [Eng. similar; -ly.] In a similar or like manner; in a manner more or less exactly resembling or corresponding with something else; in like manner.

"Rhyming cadences of similar words."—South: Sermons.

* similar-parts, s. pl. Bot.: Grew's name for the vegetable tissue or elementary organs of plants.

sim-i-lis, s. [Lat. = a like thing; neut. sing. of similis = like, similar (q.v.).]

Rhet.: The likening of two things, which, though differing in other respects, have some strong point, or points, of resemblance; a comparison; a likening by comparison. [METAPHOR.]

"To which let me here add another ear of kin to this, at least in name, and that is letting the mind upon the suggestion of any new notion, run immediately after similes to make it the clearer to itself; which, though it may be a good way, and useful in the explaining our thoughts to others; yet it is by no means a right method to settle true notions of anything in ourselves, because similes always fall in some part, and come short of that exactness which our conceptions should have to things, if we would think aright."—Locke: Conduct of the Understanding, § 1.

¶ Everything is a simile which associates objects together on account of any real or supposed likeness between them; but a similitude signifies a prolonged or continued simile. Every simile is more or less a comparison, but every comparison is not a simile: the latter compares things only as far as they are alike; but the former extends to those things which are different. (Crabb.)

si-mil-i-ter, adv. [Lat. = in like manner.]

Law.: The technical designation of the form by which either party in pleading accepts the issue tendered by his opponent.

si-mil-i-tude, * sy-my-l-i-tude, s. [Fr. from Lat. similitudinem, accus. of similitudo = likeness, from similis = like; Sp. similitud; Ital. similitudine.]

1. Likeness, resemblance, similarity. "Such is the similitude between Judaism, the ancient stock, and Christianity, which was ingrafted upon it."—Gilpin: Sermons, vol. III., ser. 42.

* 2. A comparison, a simile, a likeness, a parable. [SIMILE.]

"He spoke by a similitude."—Luke viii. (1551.)

I. Ordinary Language:

1. Any voluntary transgression of the law of God; disobedience to the divine command; any violation of the divine command; moral depravity, wickedness, iniquity. Sin includes not only actions, but neglect of known duty, all evil thoughts, words, purposes, and all that is contrary to the law of God. It may consist in commission, when a known divine law is violated, or in omission, when a positive divine command or a rule of duty is voluntarily and wilfully neglected.

"All crimes are indeed sins, but not all *sins* crimes. A sin may be in the thought or secret purpose of a man, of which neither a judge, nor a witness, nor any man can take notice; but a crime is such a sin as consists in an action against the law, of which action he can be accused, and tried by a judge, and be convicted or cleared by witnesses. Further, that which is no sin in itself, but indifferent, may be made sin by a positive law."—*Hobbs: On the Common Law of England*.

2. An offence in general; a transgression, a breach: as, a sin against good taste.

* 3. A sin-offering; an offering made to atone for sin.

"He hath made him to be sin for us, who knew no sin, that we might be made the righteousness of God in him"—*2 Corinthians* v. 21.

* 4. A man enormously wicked; the incarnation of sin.

"Thy ambition, Thou scarlet sin, rob'd this bewailing land Of noble Buckingham."—*Shaksp.: Henry VIII.*, III. 2.

II. Technically:

I. Script. & Protes. Theol.: Sin is used generically (1 Kings viii. 34; Rom. vi. 1) and specifically (Exod. xxxiv. 7). It is defined as the transgression of the law (1 John iii. 4). All sins are not equally great (Exod. xxxii. 31; 1 Sam. ii. 17). Distinction is recognized between a "sin unto death" and a sin "not unto death" (1 John v. 16). There are sins against one's self (Num. xvi. 33; Acts xvi. 28) and against one's fellow-man (Gen. xliii. 22; Matt. xviii. 21), but every sin is also a sin against God (Deut. xx. 18), which is so important, that compared with it the others may almost be left unmentioned (cf. Psalm ii. 4, 14). Unlike crime, or transgression of human law, sin may be committed without any overt act; there may be sins of thought as well as sins of word or deed (Matt. v. 22-28). Theologians divide sins into sins of omission and of commission; the former characterized by the omission of some commanded duty, and the latter by the commission of some deed positively forbidden. Another division is into Original and Actual Sin. [ORIGINAL-SIN.]

2. Roman Theol.: Sin was defined by St. Augustine as "any thought, word, or deed against the law of God," and his definition is generally followed by theologians. The Council of Trent (sess. vi., can. 23) defined that "no one can avoid sin altogether, except by a special privilege of God, as the Church holds of the Blessed Virgin." Hence follows the division into mortal and venial. [MORTAL-SIN, VENIAL-SIN.]

* **sin-born, a.** Born of sin; originally sprung or derived from sin. (*Milton: P. L.*, x. 596.)

* **sin-bred, a.** Produced or bred from sin. (*Milton: P. L.*, iv. 315.)

* **sin-eater, s.**

Folklore: A man who, for a small consideration, professed to take upon himself the sins of a person recently deceased. [SIN-EATING.]

"The manner was, that when the corpse was brought out of the house, and laid on the bier, a loaf of bread was brought out and delivered to the *sin-eater*, over the corpse, as also a maazd-bowl, of maple, full of beer (which he was to drink up), and sixpence in money; in consideration thereof he took upon himself, *speco facto*, all the sins of the deceased and freed him or her from walking after they were dead."—*Aubrey, in Fone: Year Book*, July 12.

* **sin-eating, s.**

Folklore: A practice formerly common, by which a man [SIN-EATER], in consideration of a small quantity of food and drink and a trifling money gratuity, professed to take upon himself the sins of a person deceased. The practice is said by Laurence Howel (*Hist. Pontificate*) to have originated from a mistaken interpretation of Hosea iv. 8: "They eat up the sins of my people."

"An usage called *sin-eating* undoubtedly arose in Catholic times, and, however it may have been limited to the clergy in early ages, was afterwards continued and practiced as a profession by certain persons called *sin-eaters*."—*Fone: Year Book*, July 12.

sin-offering, s.

Judaism: Heb. חַטָּאת (*chattath*), a sacrifice for the removal of sin, first instituted in Lev. iv. When a sin had been committed by an anointed priest, a young bullock without blemish was brought to the door of the tabernacle of the congregation before the Lord. The priest laid his hand upon the bullock's head (as if to transfer his sins to the animal), and then killed it before the Lord. [SCAPE-GOAT.] He next sprinkled its blood seven times before the veil of the sanctuary, put some of it on the horns of the altar of incense, burnt the fat, &c., and then the bullock itself outside the camp (Lev. iv. 1-12). There were similar ceremonies in the case of the people at large (13-21), or of a ruler (22-26), or one of the common people (27-35). Sometimes a ram or a kid of the goats was substituted for a bullock, or, in case of poverty, a turtle-dove (v. 7); or, if the indigence was still greater, the tenth part of an ephah of fine flour (11). There were stated times or occasions when such sin-offerings were sacrificed (Num. xviii. 15; xxix. 38). The Christian sees in the sin-offering a vivid type of the propitiatory sacrifice of Christ. (Cf. Heb. vii. 27; ix. 13, 14; x. 26, &c.)

"The flesh of the bullock shalt thou burn without the camp: it is a *sin-offering*."—*Exodus* xxix. 14.

* **sin-sick, a.** Suffering from the effects of sin.

"O God, whose favourable eye The *sin-sick* soul revives."—*Cowper: Olney Hymns*, lviii.

* **sin-worn, a.** Worn by sin. (*Milton: Comus*, 17.)

sin, *sinne, *singen, *sinegen, *sungen, v. t. & t. [A.S. *syngian*, *gesyngian*.] [SIN, s.]

A. Intransitive:

1. To commit sin; to depart voluntarily from the path of duty prescribed by God to man; to violate or transgress the divine law in any particular, either by commission of a sin, or by omission to fulfil a positive command; to transgress.

"All have sinned and come short of the glory of God."—*Romans* iii. 23.

† Frequently followed by *against*.

"Against thee only have I sinned."—*Psalms* li. 4.

2. To offend, to transgress, to trespass. (Followed by *against*.)

"I am a man More sinned against than sinning."—*Shaksp.: Lear*, III. 2.

* **B. Trans.**: To commit, as a sin.

"Dost thou repent thee of the sin we sinned?"—*A. C. Steinburne: Tristram of Lyonesse*.

† **Sinning one's mercies**: Being ungrateful for the gifts of Providence. (*Scott.*)

sin, adv. & conj. [SINCE.]

* **Si-nē'-an, a.** [See def.] Of or pertaining to the Sinae or people of ancient China; Chinese.

"And Samsarand by Orna Temir's throne, To Paquiu, of Sinaean kings."—*Milton: P. L.*, xi. 360.

si-nā'-ite, s. [After Mount Sinsi, where found; suff. -*ite* (*Petrol.*).]

Petrol.: A name suggested by Rozière for the granites of Mount Sinai (q.v.). [SYNITA.]

fāte, fāt, fāre, amidāt, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pine, plt, sire, sir, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unte, oūr, rāle, fūll; trŷ, Sŷirian. se, ce = ē; ey = ā; qu = kw.

si-nā-īl-īc, *Si-nā-īc, a. [See def.] Of or pertaining to Mount Sinal; given or made at Mount Sinal.

sin-a-mine, s. [Lat. sin(apis) = mustard, and Eng. amine.]

Chem.: C4H6N2 = C3H5 } N. A basic compound, discovered in 1839 by Robiquet and Bussy, prepared by rubbing together a mixture of one part thiosinamine and five parts mercuric oxide, exhausting with ether, evaporating, dissolving the viscid mass in boiling water, and allowing it to crystallize. It forms white, shining, triclinic prisms, which melt at 100°, is very bitter to the taste, lodorous, and dissolves in water, alcohol, and ether. Its aqueous solution has an alkaline reaction, and is precipitated by tannic acid. With nitrate of silver it forms a resinous precipitate.

*sin-a-mome, s. [CINNAMON.]

si-nāp-īo, a. [Eng. sinap(tine) -īc.] Of or pertaining to mustard; derived from or contained in mustard.

sinapic acid, s.

Chem.: C11H10O5 = (C11H10O3) } O2. A dibasic acid, obtained by boiling sinapine sulphocyanate with potash or baryta water. It crystallizes in prisms, which melt between 150° and 200°, is sparingly soluble in water and alcohol at the ordinary temperature, very soluble in boiling alcohol, but insoluble in ether. It forms easily soluble salts with the alkalis, sparingly soluble with the earths and metallic oxides, but all the salts decompose with great facility.

sin-a-pine, s. [Lat. sinap(is) = mustard; -īc (Chem.).]

Chem.: C16H23NO5. An organic base, existing as sulphocyanate in the seed of Sinapis alba, and first extracted by Henry and Garot in 1825. It is only known in the form of its salts (q.v.).

sinapine-sulphate, s.

Chem.: C16H23NO5.H2SO4.2H2O. Obtained by adding a small quantity of sulphuric acid to a hot concentrated alcoholic solution of sinapine sulphocyanate. It forms rectangular plates, soluble in water and boiling alcohol, insoluble in ether.

sinapine-sulphocyanate, s.

Chem.: C17H24N2SO5 = C16H23NO5.HSCN. Dry mustard flour freed from fixed oil by pressure, and washed with cold alcohol as long as the alcohol acquires a yellow colour, is boiled with alcohol of 85 per cent., and filtered. On evaporating the filtrate, and removing the layer of fat from the solution, sinapine sulphocyanate crystallizes out in loose tufts of white pearly needles, which melt at 130°. It is inodorous, tastes bitter, and dissolves with a yellow colour in water, alcohol, and ether. When strongly heated, it decomposes, giving off empyreumatic oils which burn with luminous flame, leaving charcoal.

si-nā-pis, s. [Lat. sinapi, sinapis, from Gr. σινάπι, σινάπι, σινάπι (sinapi, sinapis, sinēpi, sinēpi) = mustard.]

1. Bot.: Formerly a genus of Brassicidae, now reduced by Sir J. Hooker to a sub-genus of Brassica, characterized by spreading sepals. Four are British: Brassica nigra, Black, B. adpressa or incana, Floury Mustard; B. Sinapistrum, Charlock; and B. alba, White Mustard.

2. Pharm.: [MUSTARD, 3.]

si-nāp-īg-īnc, s. [Lat. sinapis = mustard; -īnc (Chem.).]

Chem.: Simon's name for a white scaly crystalline substance, obtained from black mustard seed by extracting with alcohol and ether.

sin-ap-īsm, s. [Lat., from Gr. σινάπισμος (sinapismos) = the use of a mustard blister, from σινάπισμα (sinapizō) = to use a mustard blister.]

Pharm.: (1) A mustard plaster or poultice; (2) the application of a mustard plaster or poultice. [POULTICE, s., 2.]

si-nāp-ō-line, s. [Eng. sinap(tic); (alcohol), and suff. -īnc.] [DIALYL-UREA.]

si-nā-ca-line, s. [Fr. sin(aptique), and (al)-ca-line.]

Chem.: C2H3NO. A brownish crystalline mass, obtained, together with sinapic acid, by boiling sinapine sulphocyanate with baryta water. It has a strong alkaline reaction, dissolves sulphur, and precipitates most of the metallic oxides from their solution. Its salts are extremely deliquescent.

si-nce, *sins, *sithens, *sithence, *sithen, *sin, *sith, *sithe, adv., prep., & conj. [A.S. sidhhan, sidhdon, sydhhan, sedhhan, siodhhan = after that, since, for sidh dhām = after that; sidh = after (prep), dhām, dat. masc. of the demonstrative pron.]

A. As adverb:

1. From that time; from then till now; after that time up to now.

"Since, I have not much importuned you." Shakespeare: Comedy of Errors, iv. 1.

2. At a period or point of time subsequent to one already mentioned; as, I have heard since that he is dead.

3. Before this or now; ago.

"Twelve years since, Thy father was the duke of Milan." Shakespeare: Tempest, i. 2.

* 4. When.

"We know the time since he was mild and affable." Shakespeare: Henry VI., iii. 1.

B. As prep.: Even from the time of; in or during the period subsequent to; after. (With a past event for the object.)

"Not since Widow Dido's time." Shakespeare: Tempest, ii. 1.

C. As conjunction:

1. From the time that or when.

"How long is it, count, Since the physician at your father's died?" Shakespeare: All's Well that Ends Well, I. 2.

2. Seeing that; because that; inasmuch as; considering.

"Since thou art dead, lo, here I prophesy: Sorrow on love hereafter shall attend." Shakespeare: Venus & Adonis, l. 135.

si-n-çere, a. [Fr., from Lat. sincerus, a word of doubtful etymology, some considering it a contraction of sine cerā = without wax, like the strained honey, the best in the shop, while others consider si-n- to be the same as in sin-guli = one by one, sem-el = once, sim-ul = together, and -cerus to be connected with cerno = to separate; Sp. & Ital. sincero.]

* 1. Pure, unmixed.

"The mind of a man, as it is not of that content or receipt to comprehend knowledge without help and supplies, so again, it is not sincere, but of an ill and corrupt tincture." Bacon: Interpretation of Nature, ch. xvi.

2. Unhurt, uninjured, whole.

"He tried a tough well chosen spear; Th' inviolable body blood sincere." Dryden: Ovid: Metamorphoses xii.

3. Being in reality what it appears or pretends to be; not feigned, not assumed; genuine, real, true. [See also example under NARR, s., 2.]

"A mourning much more sincere than on the death of one of those princes whose accursed ambition is the sole cause of war." Knox: On the Folly of War.

4. Honest, undissembling, frank, truthful, true; really meaning what one says or does.

"Assure yourself that I never was more sincere." Macaulay: Hist. Eng., ch. xxiii.

si-n-çere-ly, adv. [Eng. sincere; -ly.]

1. In a sincere manner; without mixture or alloy.

"Commonwealths . . . absolutely and sincerely made of any of them . . . but always mixed with another." Smith: Commonwealth, bk. i, ch. vi.

2. Honestly; with purity of heart, purpose, or motives; in sincerity; without simulation or disguise.

"Nothing simply or sincerely done." Daniel: Dedie of Queen's Arcadia.

si-n-çere-ness, s. [Eng. sincere; -ness.] The quality or state of being sincere; sincerity.

"Suddenly see you leave off this sincereness." Beaumont & Fletcher: Woman Pleas'd, iv. 1.

si-n-çer-ī-t-y, s. [Fr. sincérité, from Lat. sinceritatem, accus. of sinceritas, from sincerus = sincere (q.v.); Sp. sinceridad; Ital. sincerità.]

* 1. The quality or state of being pure or unmixed.

"The Germans are a people that more than all the world, I think, may boast sincerity, as being for some thousand years a pure and unmixed people." Faltham: Brief Character of the Low Countries, p. 6.

2. The quality or state of being sincere or honest in mind, motives, or intention; free-

dom from simulation or disguise; genuineness of purpose; truthfulness, earnestness.

"Sincerity is a duty no less plain than important." Knox: Sermons, vol. iii, ser. 3.

si-nch, s. [Sp. cincho.] A strap whereby the loop on the end of the girth of a Spanish saddle is laced to the loop on the saddle. The Spaniards and Mexicans do not use a buckle, but pass a strap, rope, or raw-hide over and over around the loops, and tuck the end in.

"Has quietly wrigged and swelled himself until he has got far enough through the cinch to try his experiment." Scribner's Magazine, April, 1880, p. 933.

si-n-çip-īt-ā, a. [Lat. sinciput, genit. sincipitis = the fore-part of the head.] Of or pertaining to the sineiput (q.v.).

si-n-çī-pūt, s. [Lat., from semi = half, and caput = the head.]

Anat.: The upper part of the head.

* si-n-dēr, s. [CINDER.]

si-n-dōc, s. [SINTOC.]

si-n-dōn, s. [Lat., from Gr. σινδών (sindōn).]

* 1. Ord. Lang.: A piece of cotton or linen; a wrapper.

"There were found a book and a letter, both written in fine parchment, and wrapped in sindons of linen." Bacon.

2. Surg.: A small piece of rag or a round pledget introduced into the hole made in the cranium by a trephine.

* si-n-dry, a. [SUNRAY.]

si-ne, s. [Lat. sinus = a curve, a fold, a bosom, a gulf.]

* 1. Ord. Lang.: A gulf, a bay.

"The Persian sine." Sylvester: Colones, 94.

2. Trigon.: The straight line drawn from one extremity of an arc perpendicular to the diameter passing through the other extremity. If from any point on one side of a plane angle a perpendicular be let fall upon the other side, thus forming a right-angled triangle, the ratio of the hypotenuse of this triangle to the perpendicular is the sine of the angle.

(1) Arithmetic of sines: Analytical trigonometry, the object of which is to exhibit the relations of the sines, cosines, tangents, &c., of arcs, multiple arcs, &c.

(2) Artificial sines: Logarithms of the natural sines or logarithmic sines.

(3) Line of sines: A line on the sector, or Gunter's scale, &c., divided according to the sines, or expressing the sines.

(4) Natural sines: Sines expressed by natural numbers.

(5) Versed sine of an arc or angle: The segment of the diameter intercepted between the sine and the extremity of the arc.

si-ne-galvanometer, si-ne-com-pass, s.

Elect.: A galvanometer in which the strength of the current is measured by the sine of the angle through which the coil has to be turned to be parallel to the deflected needle.

"It may be worth while to point out that any galvanometer may be used as a sine-galvanometer, even though it is not provided with a graduation to show the angle through which it has been turned." Proc. Phys. Soc. London, pt. ii, p. 105.

si-nē, prep. [LAT.] Without.

si-ne die, phr. [Lat. = without a day.] A phrase used in reference to an adjournment or prorogation of an assembly or meeting, as of a court or parliament, when no specified day or time is fixed for its re-assembling or for the resuming of business. sínking-fund, s. A fund set aside by a borrowing state or company for the gradual extinction of the debt, as in the case of the reduction of the National Debt.

Sinking funds exist in many of the states and cities of this country for the gradual reduction and ultimate extinction of the public debt. Frequently they have proved of no special utility, new debts being created faster than the old were extinguished, while the fund itself is occasionally appropriated to meet current demands. In England the first establishment of a Sinking Fund took place in 1716. The system was re-established on a great scale in 1786 by Mr. Pitt, but the debt went on increasing, and the system, as administered, proved a fallacy. In 1876 a new Sinking Fund was formed, £28,000,000 annually to be raised, the surplus over interest to be applied to the payment of principal. The reduction of the debt by this means has been very small.

sín-nét, s. [SINNET.]

sí-nó-dén-drón, s. [Gr. sínos (sinos) = hurt, harm, mischief, and déndron (dendron) = a tree.]

Entom.: A genus of Lucanida. Body narrow, cylindrical; the anterior legs broad, digitate. One species, *Sinodendron cylindricum*, is British, and is found in the interior of dead ash trees.

sín-ó-lóg-íe-al, a. [Eng. sinology(y); -ical.] Of or pertaining to sinology.

sí-nól-ó-gíst, s. [Eng. sinology(y); -ist.] A sinologue.

sín-ó-lógue, s. [Fr., from Gr. Síva (Sina) = China, and lógos (logos) = a word, a discourse.] A student of the Chinese language, literature, history, &c.; one who is versed in Chinese language and literature.

sí-nól-ó-gý, s. [SINOLOGUE.] That branch of knowledge which deals with the language, literature, history, &c., of China.

sí-nó-pér, s. [SINOPEL.]

sí-nó-pí-a, sí-nó-pis, s. [SINOPEL.] A pigment of a fine red colour, prepared from the earth sinople.

sí-nó-pite, a. [After SINOPE, Asiatic Turkey, where found; suff. -ite (Mia.).]

Mia.: A doubtful species, belonging to the silicates or earthy hydrous aluminous silicates. Coloured brick-red with oxide of iron.

sí-nó-ple, sí-nó-píte, s. [Fr. sinople, from Low Lat. sinopis = a lead colour, also a green colour, from Lat. sinopis; Gr. sínos (sinopis) = earth of Sinope, red ochre, from Sinope, a town on the Black Sea, where it is found.]

1. Mia.: [SINOPEL.]

2. Her.: The Continental term for the colour green; called by English heralds vert.

sí-nók-ý-lón, s. [Gr. sínos (sinos) = hurt, and ýlos (ýlon) = wood.]

Entom.: A genus of B. strichide. *Sinzydon scordium* is sometimes very destructive to the vine in France.

*sínque, s. [CINQUE.]

*sín-sion, *sén-ciôn (ci as sh), s. [SINSON.]

síns-ríng, s. [Native name.]

Zool.: Any individual of the family Tupaiidae (q.v.). The Singings, or Bannings (as they are also called, live in and about trees, and their activity and general appearance give them considerable resemblance to small squirrels or lemmings. Their fur is fine and soft, the tail generally long and well-clothed with hair, and they feed on fruit and insects.

sín-tér, s. [Ger., from statera = to drop.] A rock precipitated from mineral waters. It may be calcareous [CALCAREOUS-TERRA] or siliceous.

sín-tóc, sín-dóc, sýn-dóc, s. [Amboyna (C. Linae).]

Bot., &c.: Cullawan bark (q.v.).

Sín-toó, Sín-toó-ísm, &c. [SINTOO, &c.]

sí-nú-, pref. [SINUS.] Sinuated.

sínu-pállial, a. Of or pertaining to the Sínú-pálliala (q.v.).

sínu-pállialia, s. pl.

Zool.: A section of siphonida (q.v.), having the pallial line sinuated, and the respiratory siphons long. Families: Veneridae, Mastridae, Tellinidae, Soleoidae, Myacidae, Anatinidae, Gastrochaniidae, and Pholadidae. (S. P. Woodward.)

*sín-ú-áte, v.t. [Lat. sinuatus, pa. par. of sinuo = to bend, to curve.] To bend or curve in and out; to wind, to turn.

"Another was very perfect, somewhat less with the margin, and more sinuated." - Woodwards: On Fossils.

sín-ú-áte, sín-ú-át-éd, a. [SINUATE, v.]

*1. Ord. Lang.: Bending; winding in and out; sinuous.

2. Bot. (Of a leaf, &c.): Bending in and out; having the margin uneven alternately with concave and convex curvatures, as the leaf of *Quercus Robur*.

sín-ú-át-ion, s. [Lat. sinuatio, from sinuatus = sinuate (q.v.).] A bending or winding in and out.

"The human brain is, in proportion to the body, much larger than the brains of brutes, in proportion to their bodies, and fuller of anfractus, or sinuosities." - Huxl.: Orig. of Man, p. 96.

sín-ú-át-to-, pref. [SINUATE.]

sinuato-dentate, a.

Bot.: At once sinuate and dentate.

sín-ú-át-láte, a. [A dimin. form of sinuatus (q.v.).]

Bot.: Repand (q.v.).

*sín-ú-óse, a. [SINUOSUS.]

sín-ú-és-ý-tý, s. [Fr. sinuosité.]

1. The quality or state of being sinuous, or of bending or winding in and out.

"Meander is a river in Lydia, a province of Naxos, or Ana Minor, famous for the sinuosity and often returning thereof." - Drayton: Eclogues to K. Henry. (Annot.)

2. A series of bends or curves in arches or other irregular figures; a bend, a curve, a wavy line.

"Their sinuosities and turnings become more numerous as they proceed." - Goldsmith: A Animated Nature, pt. 1, ch. xiv.

sín-ú-ósa, a. [Fr. sinués, from Lat. sinuosus, from sinuo = a curve.] Bending or curving in and out; winding, crooked, meandering, serpentine.

sín-ú-ósa-lý, adv. [Eng. sinuous; -ly.] In a sinuous manner; in bends or curves.

sín-nús, s. [Lat. = a bay of the sea; a curve, a bend, a bosom.]

*I. Ordinary Language:

1. A bay of the sea; a recess in the coast; an opening into the land.

"I do not think it impossible that some arms of the sea, or sinuses, might have had such an original." - Burnt: Theory of the Earth.

2. An opening, a hollow, a sinuosity; a bend or curve.

II. Technically:

1. Anat.: A hollow. There are sinuses of the veins, a coronary sinus of the heart, a sinus of the vestibule, a frontal sinus, &c. Owen applies the term specially to a dilated vein or receptacle of blood.

2. Bot.: A recess between two lobes of a lobed leaf.

3. Zool.: A bay in the pallial impression of a conchiferous mollusc, indicating that the animal had retractile siphons.

4. Surg.: A little elongated cavity in which pus is collected; an elongated abscess with a small opening.

síó-gún (i as h), a. [SHOGRUN.]

sí-ón, s. [SIOON.]

Bot.: *Heliosiodium nodiflorum*. (Britten & Holand.)

sí-ón-na, s. [Named from Mount Sion, "on account of the barrenness of its markings." (MacNutt.)]

Entom.: The typical genus of Sioidæ (q.v.), with two European species.

sí-ón-i-dæ, s. pl. [Mod. Lat. síon(o); Lat. íon, pl. adj. suff. -iæ.]

Entom.: A family of Geometridæ. Antennæ of the male simple; and men very slender; wings entire, of one colour, erect in repose, the anterior pair rather blunt at the tip.

Sí-ón-ites, s. pl. [See def.]

Charac. Hist.: A small sect which arose in Norway in the first half of the eighteenth century. They embraced the word Sion, with some mystical characters on their sleeves, and endeavoured to establish a community, which should be the germ of the kingdom of Sion. In the reign of Christian VI. (1730-42), the community was dissolved by legal process.

ból, bóy; pónt, jówl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, &c. -íng -cian, -tian = shán. -tíon, -sion = shún; -tíon, -tíon = zhún. -cious, -tions, -cious = shús. -ble, -dle, &c. = bəl, dəl.

A. Transitive:

1. To imbibe or take into the mouth in small quantities; to drink in small draughts.

2. To drink in or absorb in small quantities.

3. To draw into the mouth; to extract, to suck up; as, A bees sips nectar from the flowers.

4. To drink out of.

The purple bumper. Cooper: Hope, 337.

B. Intrans. : To drink in small quantities; to take a sip.

"Ridotta sips and dances, till she see the doubling lustrous dance as fast as she." Pope: Imit. of Horace, bk. II, sat. 1.

sip, s. [SIP, v.]

1. The act of sipping; and the taking of a liquor with the lips.

2. A very small draught taken with the lips.

"One sip of this will bathe the drooping spirits with delight." Milton: Comus, 811.

*3. Sup, drink.

"Thus smeth he without meat or sip." Chaucer: G. Aneliida & Palas Arctis.

sipe, seep, v.t. [A.S. sipan; cogn. with Dut. sipen; Low Ger. seipen.] To issue slowly as a liquid; to ooze. (Prov.)

"The siping through of the waters into the house." Grainger: On Ecclesiastes, p. 916.

si-peur'-a, si-peir'-a, si-pi'-ra, s. [Etym. doubtful.]

Bot.: The Greenheart (q.v.).

si-peur'-ine, s. [Eng. siper(a); -ine.]

Chem.: Siperine, Saperine. An alkaloid discovered by Rodie, in 1834, in the Greenheart tree (Nectandra Rodia). It forms reddish-brown, shining scales, slightly soluble in water, very soluble in alcohol, but insoluble in ether. It neutralizes acids, forming brownish-coloured salts.

si-phag'-o-nus, s. [Gr. σίφων (siphōn) = a small pipe, and Mod. Lat. agonus (q.v.).]

Ichthy.: A genus of Cataphracti, from Behring's Straits and Japan. The snout is produced into a long tube like that of a Pipe-fish; chin prominent, with a barbel.

* si-phér, s. [CIPHER.]

* siph'-i-lis, s. [SYPHILIS.]

siph-né'-i-næ, s. pl. [Mod. Lat. siphne(us); Lat. fem. pl. adj. -inæ.]

Zool.: A sub-family of Muridæ, with two genera, Siphneus and Elobius. Form cylindrical, ear-conch rudimentary, limbs and tail very short.

siph'-nè-us, s. [Gr. σίφνης (siphneus) = a mole, from its supposed blindness; σίφος, σίφνης (siphlos, siphnos) = crippled, blinking, purblind.]

Zool.: The typical genus of Siphneinæ (q.v.); forming a connecting link between the Muridæ and the Spalacidæ. Two species, one from the Altai Mountains and one from the north of China.

si-phé-cám'-pý-lus, s. [Gr. σίφων (siphōn) = a siphon, and κάμπυλος (kampylos) = bent, curved.]

Bot.: A genus of Lobeliæ. Siphocampylus Canachou, growing near Popayan, is distinguished for the tenacity of its juice.

si-phôid, s. [Fr. siphoidé.] An apparatus for manufacturing soda-water.

si-phôn, *sý-phôn, s. [Fr. siphon, from Lat. siphonem, acus. of siphon = a siphon; Gr. σίφων (siphōn) = a small pipe or reed.]

1. A curved tube having one branch longer than the other; used for transferring liquids from higher to lower levels. It acts by atmospheric pressure, and consequently cannot be depended on for overcoming heights greater than about thirty feet near the level of the sea, and a less height at great elevations. It is used in transferring liquids in the following manner: the siphon is filled with some liquid, and the two ends being closed, the shorter leg is dipped in the liquid, or the shorter leg having been dipped in the liquid, the air is exhausted by applying the mouth at

the extremity of the longer leg. A vacuum is thus produced, the liquid in the vessel rises and fills the tube in consequence of the atmospheric pressure. It will then run out through the siphon as long as the shorter end dips in the liquid. In the illustration, c is the surface of the liquid; c d a the siphon. The pressure acting on the right and left hand sides of the bend equals the pressure of the atmosphere, less the pressure of the column of liquid a b, d c respectively. Since a h is greater than d c, the pressure tending to keep the liquid in the tube is less on the right hand side; the liquid consequently flows, and will continue to flow from the lower end of the siphon so long as the shorter end remains in the liquid, and the end a is lower than the surface c. [INTERMITTENT-SIPHON.]

SIPHON.

2. A siphon-bottle (q.v.).

3. Zool.: A canal, often drawn out into a long tube, through which water passes to the respiratory chamber in various conchiferous molluscs, especially those which burrow in sand. Though the combined siphons of Mya are much longer than the shell, and those of some Tellinidæ three or four times as long, they may be retracted within the shell. There is also a tubular prolongation or folding of the mantle, constituting a siphon to convey water to and from the breathing apparatus of some Gasteropoda.

siphon-barometer, s. [BAROMETER.]

siphon-bottle, s. A flask for containing aerated waters, which may be discharged without uncorking, through a bent tube provided with a downwardly opening valve operated by a lever, and kept to its seat by pressure of the contained gas, which, when the valve is displaced by pressure on the lever, forces out the liquid until all is discharged.

siphon-cup, s.

Mach.: A form of lubricator in which the oil is led over the edge of the vessel by capillary action, ascending and descending in a cotton wick and dropping on the journal.

siphon-gauge, s. A bent glass tube partially filled with mercury, used for ascertaining the degree of exhaustion effected by an air-pump, and also for ascertaining the degree of vacuum in the condenser of a steam-engine, or for indicating the pressure of a fluid contained in a vessel when greater than the pressure of the external atmosphere, and also the pressure of liquids, as of water in pipes, &c.

si-phôn, v.t. [SIPHON, s.] To convey or transfer, as water, by means of a siphon; to transmit or remove by a siphon.

si-phôn-age (age as íg), s. [Eng. siphon, a; -age.] The action or operation of a siphon.

si-phôn-al, a. [Eng. siphon; -al.] Pertaining to or resembling a siphon.

siphonal-impression, s. [PALLIAL-ELIUS.]

siphonal-stomach, s.

Compar. Anat.: A term applied to the stomach of fishes, when, as in the genus Salmo, that organ presents the form of a bent tube or canal (U), one arm being formed by the cardiac, the other by the pyloric portion.

si-phô-nâr'-i-a, s. pl. [Mod. Lat., from Lat. siphon (q.v.).]

Zool. & Palæont.: A genus of Gasteropoda, placed by Woodward in the family Patellidæ, by others among the Ioopeculata Pulmonifera. Shell flattened and tent-shaped, like that of Patella (q.v.), rugose externally, divided on the right side by a deep siphonal groove, which makes a slight projection on the margin. The species, which are numerous and very

widely distributed, live between tide-marks. They commence in the Miocene.

* si-phô-nâ'-ta, s. pl. [SIPHONIDA.]

si-phô-né'-æ, si-phô-nâ'-cè-sæ, s. pl. [Mod. Lat. siphon(a); Lat. fem. pl. adj. suff. -ææ or -accæ.]

Bot.: A sub-order of Confervaceæ. Frond either consisting of a single cell, with continuous or jointed, distinct or variously united branches, or of many tubular cells in contact, branched, and variously united, or held together by intercellular matter. Marine plants usually covered with calcareous encrustations. Tribes, Caulerpiidæ, Acetabulariidæ, and Haly-medidæ.

si-phô-nî'-a, s. [Lat. siphon, genit. siphonis = a siphon (q.v.).]

1. Bot.: A genus of Crotonææ. Siphonia elastica is a tree fifty to sixty feet high, common in Guiana and Brazil, and has been introduced into the West India. It yields the bottle india-rubber of Europe, which the natives obtain by amearing clay moulds with the juice in successive layers.

2. Zool. & Palæont.: A genus of Siliceone Sponges, family Tetractolodias. Mass poly-morphous, free or fixed, ramose or simple, concave or flatulous above, porous at the surface, and penetrated by anastomosing canals which terminate in sub-radiating orifices within the cup. Type, Siphonia tyrrum, from Sicily. They occur in great numbers in the Greensand.

si-phôn'-ic, a. [Eng. siphon, s; -ic.] Of or pertaining to a siphon; siphonal.

si-phôn'-i-da, * si-phô-nâ'-ta, s. pl. [Mod. Lat., from Lat. siphon = a tube, a siphon (q.v.).]

Zool.: A section of Conchifera, with fifteen families, seven of which belong to the subsection Integro-pallialia, the remaining eight constituting the Sino-pallialia (q.v.). The animal has respiratory siphons, and the mantle-lobes are more or less united.

* si-phôn'-if-ér, s. [SIPHONIFERA.] Any member of the order Siphonifera (q.v.).

* si-phô-nif'-ér-a, s. pl. [Eng. siphon, and Lat. fero = to bear.]

Zool.: D'Orbigny's name for an order of Mollusca, approximately equivalent to the modern Tetrabranchiata (q.v.).

* si-phô-nif'-ér-ôis, a. [SIPHONIFERA.] Bearing siphons, as the chambered shells of the nautilus.

si-phôn-i-zân'-tî-a (or t as sh), s. pl. [Gr. σίφωνίζω (siphonizō) = to tap a wine-cask with a siphon.]

Zool.: A family of Chilognatha, akin to Inilidæ. Body semi-cylindrical, the dorsal plates of the segments encroaching but slightly on the under surface; head small; oral apparatus a conical sucking organ; legs short. Small millipedes in rotten stumps of trees. Species few.

si-phôn-ô-, pref. [SIPHON.] Resembling a siphon or tube; furnished with a siphon.

* si-phôn-ô-brân-chî-â-ta, s. pl. [Pref. siphono-, and Mod. Lat. branchiata.]

Zool.: De Blainville's name for an order of his Malacozoa, approximately equivalent to the modern Siphonostomata (q.v.).

si-phôn-ô-brân-chî-ate, a. [SIPHONOBRANCHIATA.] Of, or belonging to De Blainville's order Siphonobranchiata (q.v.); siphonostomatous.

si-phôn-ôg'-na-thus, s. [Pref. siphono-, and Gr. γνάθος (gnathos) = a jaw.]

Ichthy.: An aberrant genus of Labridæ, with one species, Siphonognathus argyrophanes, from King George's Sound. It retains the principal characters of a Wrasse, but in shape the body resembles that of a Pipe-fish.

si-phô-nôph'-ôr-a, s. pl. [Pref. siphono-, and Gr. φάρος (pharos) = bearing.]

Zool.: Oceanic Hydrozoa; an order or a sub-class of Hydrozoa (q.v.), possessing a free and oceanic hydrozooma, consisting of several polypites, united by a flexible, contractile, unbranched or slightly branched

âte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hère, camel, hêr, thère; pine, pît, sîre, sîr, marine; gô, pôtt, or, wôre, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, quite, cûr, rûle, fûll; trÿ, Sÿrian. æ, œ = ê; ey = â; qu = kw.

omosome, the proximal end of which is usually furnished with nectocalyces, and dilated into a somatocyst or into a pneumatophore. (Greene.) All are unattached, permanently free, and have the hydrosoma components. They are beautiful organisms, usually found floating on the surface of tropical seas. Physalia utricularis, the Portuguese Man-of-war, is the most familiar member of this group. The sub-class is divided into two orders: Calycephoride and Physophoride; and the order into four sub-orders: Physophora, Physalia, Calycephora, and Discoida.

si-phôn-ôps, s. [SIPHONOPSIS.]

si-phôn-ôp-sis, si-phôn-ôps, s. [Pref. siphon(o)-, and Gr. ôpsis (opsis) = outward appearance.]

Zool.: A genus of vermiform Amphibia, family Caeciliadae. The muzzle is short; head and body cylindrical; eyes distinct through the skin; a false nostril in front of and a little below each eye.

si-phôn-ô-s-tô-ma, s. [Pref. siphono-, and Gr. stôma (stoma) = a mouth.]

1. Ichthy.: A genus of Pipe-fishes, group Syngnathina. Body with distinct ridges; pectorals and caudal well-developed, dorsal of moderate length, opposite the vent. Males with an egg-pouch on the tail, the eggs being covered by cutaneous folds. There are only two species.
2. Palaeont.: From the Eocene of Monte Bolca and Licaia.

si-phôn-ô-stôm-a-ta, s. pl. [Pref. siphono-, and Gr. stômata (stomata), pl. of stôma (stoma) = a mouth.]

Zool.: Carnivorous Gastropods; a section of Prosobranchiata (q.v.). Shell spiral, usually imperforate; aperture notched or produced into a canal in front; operculum horny, lamellar. Animal with retractile proboscis; eye-pedicels connected with the tentacles; margin of mantle prolonged into a siphon, by which the water is conveyed to the branchial chamber; gills one or two, pectinate, placed obliquely over the back. Families: Strombidæ, Muricidæ, Buccinidæ, Conidæ, Volutidæ, and Cypridæ; all marine. (Woodward.)

si-phôn-ô-stôm-a-toûs, a. [Mod. Lat. siphonostomat(o); Eng. adj. suff. -ous.] Of or pertaining to the Siphonostomata (q.v.).

si-phôn-ô-stôme, s. [SIPHONOSTOMATA.] Any mollusc belonging to the division Siphonostomata (q.v.).

si-phôn-ô-s-tô-môus, a. [Eng. siphonostoma(e); -ous.] The same as SIPHONOSTOMATOUS (q.v.).

* si-phô-rî-nî, s. pl. [Gr. síphôn (siphôn) = a tube, and rîs (rhîs), genit. rînos (rhînos) = the nose.]

Ornith.: A family of Natstores, founded by Vieillot, containing the Petrels and Albatrosses. [TUBINARES.]

si-phũn-cle, s. [SIPUNCULUS.]

Zool.: The tube which connects together the air-chambers of the shell in many Cephalopods. In the Ammonitidæ the siphuncle is external, and close to the outer margin of the shell; in the Nautilidæ it is usually central or internal.

si-phũn-cu-lar, a. [Eng. siphuncul(e); -ar.] Of or pertaining to a siphuncle.

si-phũn-cu-lât-êd, si-phũn-cled, a. [Eng. siphuncul(e); -atad, -ed.] Having or being provided with a siphuncle.

"The internal shells may even be chambered and siphunculatad."—Huxley: Anat. Invert. Anim., p. 651.

* sip-id, a. [Lat. sipidus; cf. insipid.] Having a taste or flavour; savorily.

si-pî-ra, s. [SIPERA.]

sip-për, s. [Eng. sip, v.; -er.] One who sips.

sip-pêt, s. [Eng. sip, s.; dimin. suff. -et.]

1. A small sup; a small piece of bread dipped in milk, gravy, broth, &c.
2. A little sup or drink; a sip.

"Give me a sippet."—Bacon: His own Humming.
3. Cook (Pl.): Triangular pieces of toasted or fried bread, used for garnishing.

* sip-ple, v.t. [Eng. sip, v.; freq. suff. -le; cf. tipple.] To sip frequently; to tipple.

si-pũn-ôũ-lî-dæ, s. pl. [Mod. Lat. sipuncul(us); Lat. fem. pl. adj. suff. -idæ]

Zool.: The typical family of the Sipunculoidæ or Gephyrea (q.v.), with three genera, Sipunculus, Syrix, and Phascosoma. The proboscis is retractile, furnished with tentacles at its tip; vent at base.

si-pũn-cu-lô-dæ, s. pl. [Mod. Lat. from sipuncul(us) (q.v.), and Gr. sîdos (eidos) = resemblance.]

Zool.: A synonym of Gephyrea (q.v.).

si-pũn-cu-lũs, s. [Lat. sipunculus = a little tube, dimin. from siphon (q.v.).]

Zool.: The type-genus of Sipunculidæ (q.v.). The proboscis, which is retractile, is as long as the body, furnished with short tentacular appendages arranged in a circle round the mouth; intestine coiled and bent upon itself, so as to terminate in the middle of the body. Sipunculus bernhardus is common on the British coasts, living at a depth of ten to thirty fathoms, occupying the shell of some univalve mollusc for the protection of its soft vermiform body, plastering up the entrance, leaving only a hole for the protrusion of its proboscis. Other species burrow in sand, as does S. adultis, eaten by the Chinese.

sip'-y-lite, s. [After Sipylus, one of Niobe's children; suff. -ite (Min.).]

Min.: A tetragonal mineral, occurring in octahedrons. Hardness, 6.0; sp. gr. 4.89; lustre, resinous; colour, brownish-black to brownish-orange. Comp. essentially a columbate of erbium, lanthanum, didymium, cerium, &c. Found in Amerhat county, Virginia.

si quis, phr. [Lat. = if any one, so called from the opening words of the notice formerly given in Latin.]

Eccles. Law: A notification by a candidate for orders of his intention to inquire whether any impediment may be alleged against him.

sir, s. [Fr. sieur, from Lat. senior = older, senior (q.v.); Icel. sira; Sp. ser; Ital. ser. The older form of sir was sire (q.v.); senior, seignior, señor, signor, and sir are doublets.]

1. A term of complimentary address applied commonly, without regard to position or standing, to men of any degree; a general title by which a person addresses the man to whom he is speaking. Commonly used as a title of respect by servants to their masters, sons to their fathers, pupils to their teachers, and generally by inferiors to superiors; also in phrases expressing doubt, displeasure, astonishment, or the like.

4. Used as a noun appellative to signify—

(1) A lord, a master, a sovereign.
"Shake up the world."
Shakespeare: Antony & Cleopatra, v. 2.
(2) A gentleman.
"In the habit of some sir of note."
Shakespeare: Twelfth Night, III. 4.

sir, v.t. [SIR, s.] To address as sir.
"Sir'd him at every word."—Richardson: Clarissa, L. 47.

* sir-reverence, * sur-reverence, phr. [A corrupt. of sure-reverence (q.v.).]

1. An apologetical apostrophe for introducing an indelicate word or expression.
"A very reverend body: ay, such a one as a man may not speak of, without he say, sir-reverence."—Shakespeare: Comedy of Errors, III. 2.
2. The thing signified by the word or expression. (Shakespeare: Romeo & Juliet, I. 4.)

si-ra-bâl-lî, s. [A Demerara word.]
Bot. & Comm.: A valuable timber brought from Demerara. It is supposed to come from a Neotandra or Oreodajhnic.

si-râs-kiër, s. [SERASKIER.]

sir'-dar, s. [Hind.] A chieftain, a captain, a head-man.

sirdar-bearer (or simply sirdar), s. The chief of the palanquin-bearers, who is generally his master's valet.

sir'-kar, s. [CIRCAR.]

- 1. A Hindu clerk or accountant.
2. A circar.
3. The government.

sire, s. [The same word as sir (q.v.).]

1. A title of respect, addressed to seniors or superiors; sir. It is now used only in addressing a king or other sovereign prince.
"Sire knight, (quod he) my maister and my lord."—Chaucer: C. T., 858. (Prolog.)

2. A father, a progenitor. (Used only in poetry, and in composition, as grandsire = grandfather, &c.)

"Whether his hoary sire he spies,
While thousand grateful thoughts arise,
Or meets his spouse's fondler eye."
Pope: Chorus to Brutus.

3. The male parent of a beast, and especially of a horse; an entire animal, as a bull or stallion, kept for breeding purposes. Opposed to dam. [DAM (I), s., 3.]

* 4. A maker, an author.
"Who was the sire of an immortal strain."
Shelley: Adonais, IV.

sire, v.t. [SIRE, s.] To be the sire or father of; to beget, to procreate. (Used now only of beasts, and especially of stallions.)

"Farnham was a dark chestnut horse by Ratcatcher, who also sired the noted chaser Rat-trap."—Field, Dec. 26, 1865.

sired, a. [Eng. sire(e); -ed.] Having a sire or father.

† si-rê-dôn, s. [Late Gr. σεῖρηδών (seirêdôn) = a siren (q.v.).]

Zool.: An old name for the Axolotl (q.v.), the larval form of Amblystoma mexicanum. As will be seen from the illustration, in the perfect animal the gills are absorbed, and the

A. Larval form, or Axolotl. B. Adult form.

whole body becomes altered. Both larval and adult forms are oviparous, and from the eggs of both branchiate and abranchiate young have been produced, so that the Amblystome or perfect form may be born from an egg, or lose its gills and change its shape by metamorphosis.

* sire-less, a. [Eng. sire, a.; -less.] Having no sire or father; fatherless, orphaned.

"The sireless offspring and the lonely spouse."
Byron: Address for Caledonian Meeting (1814).

sir'-ên, * ser-ên, * sir-ene, * syr-ene, s. & a. [Lat. siren; Gr. σεῖρην (seirên), a word of doubtful etymology; Fr. sirene; Sp. & Ital. sirena.]

A. As substantive:
I. Ordinary Language:
1. In the same sense as II. 2.
"Next, where the sirens dwell, you plough the seas!"
Pope: Homer; Odyssey XII. 51.

* 2. A mermaid.
"Over-against the creek Preston, there is Lencasia, called so of a mermaid or sirene there buried."—P. Holland: Plinius, bk. III., ch. VII.

3. A charming, alluring, or seductive woman; a woman dangerous from her powers of alluring or enticing.
"O, train me not, sweet mermaid, with thy note,
To drown me in thy sister's flood of tears:
Sing, siren, to thyself, and I will dote."
Shakespeare: Comedy of Errors, III. 2.

* 4. Something alluring, seductive, or insidious.

II. Technically:
1. Acoustics: An instrument for determining the number of vibrations corresponding to a note of any given pitch. In its most elementary form the siren is simply a perforated rotating disk, against which a current of air is directed, producing sounds of higher or lower pitch, according to the velocity of rotation. The improved siren of Helmholtz

consists of two equal discs, one forming the top of a hollow fixed cylinder into which air can be driven, the other capable of revolving concentrically upon it with the smallest possible amount of friction. A circle of small holes, equidistant from each other, is bored upon each disk, and concentric with it, those in the upper disk being inclined slantwise to its plane, those in the lower being slantwise also, but in the opposite direction. There are arrangements for registering the number of revolutions the upper disk performs in a minute. Thus, when air is forced into the cylinder, it will pass through the perforations, and, by reason of their obliquity, will cause the movable disc to revolve with a rapidity corresponding to the pressure, and each time that the holes coincide, a number of little puffs of air get through simultaneously, and, if the pressure of the air in the cylinder is sufficient, the series of impulses thus given will link themselves together, forming a continuous note. From the deep, piercing nature of the sound which the siren emits, it is well adapted for fog-

signals or alarms. In this case two disks rotating with great rapidity in opposite directions are employed. They are driven by a steam-engine, which also forces a blast of steam through their apertures when those in the two disks come in apposition. The device is placed at the smaller extremity of a large trumpet, which intensifies the sound.

2. *Class. Mythol.*: Certain melodious divinities, who dwell on the shores of Sicily, and are charmed passing mariners by the sweetness of their song, that they forgot their homes, and remained there till they perished of hunger. According to one legend, they threw themselves into the sea, from rage and despair, on hearing the more melodious song of Orpheus. Originally there were only two sirens; but their number was afterwards increased to three, and their names are given with great variety.

3. *Zool.*: Mod-eels: a genus of Urodela or of Perennibranchiate Ichthyoida, constituting the family Sirenidae. They are eel-like Amphibians, with two anterior feet and permanent branchiae, and range from Texas to Carolina. There are three species. *Siren lacertina* is the Mud-eel (q. v.).

B. As adj.: Pertaining to a siren; like or befitting a siren; bewitching, alluring, fascinating.

"Her siren voice, enchanting, draws him on
To gulfed shores, and meads of fatal joy."
Thomson: *Spring*, 394.

si-rēnō', s. [Fr.] The same as SIREN, A. II. 1.

si-rēn'-i-a, s. pl. [Mod. Lat., from *siren*.] Named from the pectoral position of the mammae.]

1. *Zool.*: An order of aquatic Mammalia, allied to the Cetacea, with which they were formerly and are still occasionally classed. The body is long, compact, and cylindrical, narrowing towards the tail, which is set horizontally and terminates either in forked flukes or a flat fibrous expansion. Hind limbs and sacrum absent; anterior limbs converted into paddles. Snout fleshy and well-developed; nostrils on upper surface; lips fleshy, the upper lip usually with a mousethick. The skin is rough and sparsely hairy, or smooth like that of the Whale. The two mammae are on the breast, close to the armpits, and there is little doubt that from the habit of the Dugong (q. v.) raising the upper part of its body perpendicularly out of the water and clasping its young to its breast, the stories of Sirens and Mermaids took their rise. There are two recent genera, *Halicore* and *Manatus*. The former is monophyodont, the latter diphyo-

dont, the permanent teeth consisting of molars with flattened crowns adapted for bruising vegetable food. The recently extinct genus *Rhytina* (q. v.) had no true teeth. The Sirenia pass their life in the water, living chiefly in shallow bays, estuaries, lagoons, and rivers, never straying far from shore, and feeding solely on aquatic vegetation.

2. *Palæont.*: From the Eocene onward. [EOTHERIUM, RHYTINA.]

si-rē-ni-an, a. & s. [SIRENIA.]

A. As adj.: Of or pertaining to the order Sirenia.

B. As subst.: Any individual member of the order Sirenia.

***si-rēn'-ic-al, a.** [Eng. *siren*; -ical.] Like or appropriate to a siren.

"A couple of sirenic rascals." Marston.

si-rēn'-i-dæ, s. pl. [Mod. Lat. *siren*; Lat. fem. pl. adj. suff. -idæ.]

1. *Ichthy.*: A family of Dipnoi, with three genera, *Lepidosiren*, *Protopterus*, and *Ceratodus*. The caudal fin is diphyocercal; no gular plates, scales cycloid. Two molars, above and below, and a pair of vomerine teeth.

2. *Palæont.*: [CERATODUS.]

3. *Zool.*: [SIREN, S.]

***si-rēn'-ize, v. i.** [Eng. *siren*; -ize.] To use the enticements or allurements of a siren; to charm, to fascinate.

†si-rē-nōl'-dæ, s. pl. [Mod. Lat., from *siren* (q. v.), and Gr. εἶδος (*eidos*) = resemblance.]

Ichthy.: A synonym of Sirenidae, I. (q. v.).

†si-rē-nōl'-dē-i, s. pl. [SIRENOIDA.]

Ichthy.: An order containing a single family, similarly named, constituting Muller's subclass Dipnoi (q. v.).

si-rē-ox, s. [Gr. σειρήν (*seirēn*)] [SIREN.]

Entom.: The typical genus of Uroceridae. It was formerly called Urocerus. *Sirex gigas* is the Great-tailed Waip. It is, however, an aberrant ovipositor, the apparent sting being a projecting ovipositor. It is black, the antennae, the hinder part of the head on each side, the tibiae and tarsi, and the base and apex of the abdomen yellow, abdomen of the male reddish, spotted with black at the sides and apex. It is not uncommon in pine and fir woods in Britain. The eggs are deposited about an inch from the surface, and the hatched grubs bore deeper. *S. javanicus*, also British, is smaller. The male is banded with orange, while the female is dark purple.

Si-rī-am, s. [Native name.] (See compound.)

Siriam-garnet, s.

Min.: A variety of almandine (q. v.), of a beautiful crimson colour tinged with violet, found at Siriam or Syrian, in Pegu.

***si-rī-a-sis, s.** [Lat., from Gr. σειρήν (*seirias*) = aunstroke.] (See etym.)

si-riq'-i-dæ, s. pl. [Mod. Lat. *sirex*, genit. *siriq'(is)*; Lat. fem. pl. adj. suff. -idæ.]

Entom.: The same as UROCERIDÆ. Darwin uses *Siriidae*.

si-rī-tch, s. [Arab.] A sweet oil expressed from the seeds of *Sesamum orientale*, much used as an article of diet, for friction of the body, and for lamps.

Si-rī-ūs, s. [Lat., from Gr. Σεῖρος (*Seiros*).]

Astron.: The Dog-star, by far the brightest fixed star in the sky. It is a *Canis Major*, situated a little below Orion, and is mythologically regarded as one of two hounds held in leash by Orion, Procyon in *Canis Minor* being the other. A line drawn from the Pleiades through the three stars of Orion's belt will pass it closely; straight lines connecting it with Procyon and Betelgeuse will constitute a nearly equilateral triangle; and Aldebaran, Betelgeuse, Sirius, and Regel, all of the first magnitude, form a lozenge-shaped figure, with Orion's belt in the centre. Ptolemy, in the second century, ranked Sirius among red stars; now it is white, and is a very brilliant object, its light being 324 times as great as that of a star of the sixth magnitude. It is about a million times as far from us as the sun, and its mass is about twenty times as great. Viewed by the spectroscope, its chief lines are those of incandescent hydrogen, with

feebler ones of sodium and magnesium; the metal mercury seems also to be present. Some irregular movements of Sirius led to the belief that a heavenly body existed near enough to produce a perturbation, and a son of Mr. Alvan Clark, of Boston (Mass.), discovered, on Jan. 31, 1862, that appears to be a planet revolving around Sirius as its sun, it is thought in about forty-nine years. The heliacal rising of Sirius varies in different latitudes, and the precession of the equinoxes makes it do so also in successive ages. When the heliacal rising of Sirius (called by the old Egyptians Sothis) took place, it indicated to them that the overflow of the Nile was at hand. In England, Sirius rises heliacally on Aug. 25, fourteen days after the termination of the "dog days" (July 3 to Aug. 11), to which he has given their name. Some consider the Dog-star to have been Procyon; but that hound rises, like the other dogs, far behind the "dog days," in place of ushering them in.

si-r'-loin, si-r'-loin, *sur-loyn, a. [Fr. *surloin*, from *sur* (Lat. *super*) = above, upon, and *loin* = a loin (q. v.).] The loin, or upper part of the loin, of beef, or part covering either kidney. The spelling *sirlain* is derived from the erroneous idea that this joint was knighted by Charles II. in a merry moment.

"The strong table groans
Beneath the smoking sirlain stretched immense
From side to side."
Thomson: *Autumn*, 504.

si-r'-mark, s. [SURMARK.]

si-r'-name, s. [SURNAME.]

si-rōc'-cō, si-rōc', s. [Ital. *sirocco* = the south-east wind, from Arab. *sharqā* = (the sun) arose.] A hot, oppressive wind, coming from northern Africa, over the Mediterranean, to Italy, Sicily, &c.

"But come, the board is spread; our silver lamp
Is trimmed, and heads not the *sirocco's* damp."
Byron: *Corair*, l. 14.

si-r'-rah, si-r'-ra, *ser-rha, *sir-rha, s. [Heb. *sira* = sir; *sirrah*, from Fr. *sira* = sir (q. v.).] A term of address used in anger or contempt, and generally equivalent to fellow. It is sometimes applied to children in play, and was formerly used also as an address to women.

"Who is here! What! art you packing, *sirrah!*"
Shakspeare: *Cymbeline*, III. 4.

***sirt, s.** [SYRT.] A quicksand, a bog.

"They discovered the immense and vast ocean of the courts to be all over full of flats, shelves, shallows, quicksands, crags, rocks, gulfs, whirlpools, *sirts*, &c."—*Transit of Boccaltini* (1626), p. 42.

si-r'-ūp, si-r'-ūp-ŷ, &c. [SVAUP, &c.]

***sirurgeon, s.** [CHIRURGEON, SURGEON.]

si-r'-vante (e as a), si-r'-vante, s. [Fr. *servante* = a poem of service, originally a poem in praise of some one, from Lat. *serviens*, pr. par. of *servio* = to serve.] In mediæval literature, a species of poem in common use among the Troubadours and Trouveres, usually satirical, though sometimes devoted to love or praises, and divided into strophes of a peculiar construction.

***sis, s.** [Fr. *six* = six.] The cast of six; the highest throw on a die.

Si-sal, s. [See def.]

Geog.: A port in Yucatan.

Sisal-hemp, s.

Bot.: *Agave sisalana*.

***size, *sise, s.** [See def.] A contraction of *assize* (q. v.).

"You said, if I return'd next *size* in Lent,
I should be in remitter of your grace." *Donna*.

siš'-el, s. [RUSS.]

Zool.: *Spermophilus citillus*, a small squirrel-like rodent, abundant in central and eastern Europe and in Siberia. Called also *Sushik* and *Earless Marmot*.

sis'-ē-ra-ra, sis'-ē-ra-rŷ, s. [A corrupt. of *certiorari* (q. v.).] A hard blow. (*Pron.*)

sis'-kin, s. [Dan. *sisken*; Sw. *siska*; Ger. *zeisig*.]

Ornith.: *Carduelis spinus*, an autumnal migrant from the north to England, generally leaving in the spring, though many pairs remain and breed, especially in Scotland. The adult male is rather less than five inches long. Its plumage is chiefly green, spread over the

back and upper parts of the body, with the centre of each feather dark olive-green; top of head and chin black; patches of yellow behind the ear, on neck, breast, greater coverts and tail, and edge of quill feathers; abdomen and under tail-coverts white, deepening into gray on flanks. They nest usually in the fork of a bough, and lay from three to five eggs, bluish-white, spotted at the larger end with brown or gray. Breeders often pair the Siskin with the Canary to obtain a songbird whose note is less shrill than that of the pure Canary.

sisk-wit, s. [American Indian name.] *Ichthy.*: *Salmo siscowet* (Agass.). "The siskowit is of large size, stout and thick, of a rich flavour, but so fat as to be almost unfit for food."—*Riple's & Dana's Amer. Cyclop.*, vi. 8.

sisk-mom-è-tër, s. [SEISMO-METER.]

sisk-môn-dins, sisk-môn-dite, s. [After Prof. A. Sismonda, of Turin; suff. *-ine, -ite* (*Mfin.*)]

Mfn.: A black variety of Chloritoid (q.v.), but Des Cloizeaux states that very thin cleavage laminae are grass-green. Occurs at San Marcel, Val d'Aosta, Italy.

sisk-sôn, s. [Lat., from Gr. *σίσων* (*sisôn*) = *Sison Amomum*. (See def.)]

Bot.: A genus of Amminidæ (*Lindley*); umbelliferous plants, section Amminidæ (*Str. J. Hooker*). Involucre of few leaves, partial, subinduplicate; calyx-teeth obsolete; petals broadly obovate, deeply curved and notched, with an inflexed point; carpels with five ribs and single clavate vittæ between them. Only known species *Sison Amomum*, the Bastard Stoneparsley. It is a plant two or three feet high, the lower leaves pinnate, the upper cut into narrow segments. Found in Britain and in the Coastland in moist ground under hedges. It is aromatic and carminative.

sisk-sor, s. [From the native name.]

Ichthy.: A genus of Siluridæ Proteropodes, group Hypoatomatina. Head depressed, apulately; trunk depressed; tail long and thin; eyes very small; mouth inferior, small, transverse, with barbels; no teeth. One species, *Sisor rhabdophorus*, from the rivers of northern Bengal.

siss, v. [Dut. *sissen*.] To hiss. (*Prov. & Amer.*) (Often used of the noise made by grooms when rubbing down horses.)

siss-ôrs-kite, s. [After Sissersk, Urals, Russia, where found; suff. *-ite* (*Mfin.*)]

Mfn.: A variety of Iridosmine (q.v.), occurring frequently in hexagonal flat scales. Sp. gr. 20° to 21°2. Iridium not over 30 per cent.

sisk-sot, sis-sûm, s. [Hind. *sissoo, sissai*.]

Bot.: *Dalbergia Sissoo*, a large timber-tree, with pinnate, drooping leaves, growing along the base of the Himalayas. It is used by shipbuilders in Bengal when crooked timbers and knees are required.

sist, v. [Lat. *sisto* = to stop.]

"For sus-terhode and companions Of love." *Gower: C. A., v.*

2. Sisters collectively; a number, society, or community of sisters, or of females united in one faith or order.
"The members of a religious sisterhood were trained to habits of order and obedience."—*Victoria Magazine*, Nov., 1885, p. 64.

¶ In the early ages of the Church the object of religious women living in community was their own sanctification by means of retirement from the world, prayer, and meditation. In course of time they extended their sphere of work, and founded hospitals, penitentiaries, and schools, and for the last four centuries among Roman Catholics the education of girls of all classes has been largely connected with sisterhoods. The most important of these is that of the Sisters of Charity (q.v.). This, after its origin in 1633, spread with remarkable rapidity, and now numbers between 30,000 and 40,000 sisters, with two thousand houses, in all parts of the world, and devoted to works of charity of every description. All are in connection with the mother house, Rue de Bac, Paris, and are under the control of the superiress, who is elected every three years, and who resides there. The first sisterhood in the Church of England was founded at Plymouth in 1848, for the benefit of the poor of that city. Since then several others have been founded. The first Protestant sisterhood in the United States was organized in 1852 at New York, the sisters afterwards taking charge of St. Luke's hospital, founded in 1859. The following are some of the most important Roman sisterhoods:

(1) *Little Sisters of the Poor*: Founded in 1849 by M. le Pailleur, the Curé of St. Survan, for the support, relief, and nursing of the aged or infirm poor. Their only resources

are the alms of the charitable, in many gathered from door to door.

(2) *School Sisters of Notre Dame*: Founded at Amiens in 1797. The sisters devote themselves to teaching, especially among the poor.

(3) *Sisters of Charity*: Founded by St. Vincent de Paul at Paris in 1634, for the work of nursing the sick in hospitals, to which are sometimes added the charge of orphanages and the management of poor schools. In 1883 they had eighteen houses in England, two in Scotland, and three in Ireland. Called also Gray Sisters, Daughters of Charity, and Sisters of St. Vincent de Paul.

(4) *Sisters of Charity (Irish)*: Founded in Dublin in 1815, by Mary Francis Aikenhead, for the purpose of nursing the sick in hospitals and at their own homes. There are twenty-two convents of this institute in Ireland.

(5) *Sisters of Charity of St. Paul*: Founded by M. Chauvet, a French curé, in 1704, for educational work.

(6) *Sisters of Mercy*: Founded in Dublin in 1827 by Catherine McAuley, for carrying on the spiritual and corporal works of mercy. The order has 109 houses in Ireland, forty-nine in Great Britain, with offshoots in America, Australia, and New Zealand.

(7) *Sisters of Providence*: Founded a little before the French Revolution, by M. Moye, for educational work in country districts.

(8) *Sisters of St. Brigid, or of the Holy Faith*: Founded by Cardinal Cullen in 1857, to take charge of poor schools.

(9) *Sisters of the Assumption*: An educational order, founded by Monsignor Affre of Paris, in 1839.

(10) *Sisters of the Good Shepherd*: Founded by Père Eudes (whence they are also called Eudistes) and Margaret l'Ami, in 1646. Their object is the reformation of fallen women. They have seven houses in Great Britain and five in Ireland.

sis-tër-lëss, a. [*Eug. sister; -less.*] Having no sister.

sis-tër-ly, a. [*Eog. sister; -ly.*] Like a sister; becoming or befitting a sister; affectionate.

"And after much debatement My sister's remorse confutes mine honour, And I did yield to him." *Shakspeare: Measure for Measure, v. 1.*

Sis-tine, a. [See def.] Of or pertaining to Pope Sixtus V.: as, the *Sistine Chapel* in the Vatican at Rome.

sis-trüm, s. [Lat., from Gr. *σειτρον* (*seitron*), from *σειω* (*seio*) = to shake.]

Music: A jingling instrument of ancient Egypt. It had four loose rods in a lyre-shaped metallic head. It was, in fact, a rattle made of bronze or silver, according to ability. It was used in the services of Isis or Athor, which were introduced into Rome before the Christian era, and is still employed in Christian churches in Nubia and Abyssinia.

si-sür-a (s as zh), s. [SEISURA.]

si-sým-brí-de, si-sým-brí-ô-a, s. pl. [Lat. *sisymbri(um)*; fem. pl. adj. suff. *-(i)æ, -eæ*.]

Bot.: A family or tribe of Notorhizæ. Seeds usually in a single series; cotyledons incumbent, straight, plano-convex. Flowers white, yellow, or lilac.

si-sým-brí-üm, s. [Lat., from Gr. *σισυμβριον* (*sisymbrium*) = a sweet smelling plant, probably mint or thyme. Not the modern genus.]

Bot.: Hedge-mustard; the typical genus of Sisymbriidæ (q.v.). Annuals or biennials, with simple hairs. Flowers usually racemes, yellow or white; pod narrow, linear, rounded, or six-winged; valves convex or three-angled, three-nerved; stigma entire. Known species about eighty; chiefly from the north temperate zone. The Common Hedge-mustard, (*Sisymbrium officinale*) is a native of Europe, and was once employed in medicine for catarrhs and other ailments. In taste it is mildly pungent, and is sometimes cultivated as a pot-herb. It is an annual plant, plentiful in waste places and by waysides, sometimes two feet high. The pods are erect and closely pressed to the stalk, flowers very small and yellow in color. *S. Irio* is found in

ból, bóy; pòut, jówl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -ing. -lan, -tian = shàn. -tion, -sion = shùn; -tion, -sion = zhùn. -cious, -tious, -sious = shüs. -ble, -dle, &c. = bel, dël.

North India from Rajpootana to the Punjab. The seed is stimulant, restorative, and, it is said, febrifuge; it is used in India also externally as a stimulant poultice. *S. Thalianum* is often called *Arabis Thaliana*.

Sis-ÿ-phō-an, a. [See def.]

Gr. Mythol.: Of or pertaining to Sisyphus, a king, prince, or, according to other accounts, a notorious robber of Corinth. He was distinguished for his craftiness and cunning; and his punishment in Tartarus for his crimes committed on earth consisted in rolling a huge stone to the top of a high hill, which constantly recoiled, and thus rendered his labour incessant. The term is hence applied to something unending or unceasing: as, a Sisyphæan task.

sīs-ÿ-rīn-chī-ūm, *sis-ÿ-rhÿn-ohi-ūm, s. [Lat. *sisyrrinchion*; Gr. *σισυγγιον* (*sisyrringhion*)] = a bulbous plant of the Iris kind. Not the modern genus, which has fibrous roots, and is American.]

Bot.: Blue-eyed grass; a genus of Iridaceæ. sī-tā-rīs, s. [Gr. *σῆταριον* (*sitarion*) = a little corn, bread, or food.]

Entom.: A genus of Meloïdæ (q.v.). One species, *Sitaris muratis*, is found in Britain. It is parasitic in the nest of the Mason-bee (q.v.). M. Fabre has shown that, emerging from the egg as a minute insect, with six legs, two long antennæ, and four eyes, it affixes itself to the male bees as they emerge from the combs in spring. Thence it transfers itself to the females. Whenever a bee deposits her eggs the *Sitaris* devours them. Next the parasite loses its eyes, its antennæ and legs become rudimentary, and it emerges as a perfect beetle. (*Darwin*: *Orig. Species*, ch. xiv.)

The first is three or four feet high, the second is smaller. *S. sisarrum* is the Skillet (q.v.).

Sit'-va, † **Sit'-wa**, s. [Sansk., &c., from Sans. *siva* = happy, happiness.]

1. **Brahmanism**: The Destroyer and Reproducer; the third person of the Hindoo triad. Modern views of Siva seem to have been evolved from two distinct germs, one Aryan, the other Turanian. The Aryans of Vedic times, deeply impressed on hearing the noise and viewing the devastation produced by a cyclone, framed the conception of Rudra, the Roarer, or Storm-god, afterwards developed into Siva, the Destroyer. Reflecting next that the death of living organisms cleared the way for younger and more fruitful life, they added the conception of Siva, the Reproducer as well as the Destroyer. The Turanian aborigines were in that state of religious barbarism when every god is an object of terror. When converted to Brahmanism, they had to choose between Vishnu, the Preserver, and Siva, the Destroyer (Brahma having become nearly obsolete, and instinctively preferred Siva as their patron divinity. The image of Siva, on the Brahmanical conception, is a man of fair colour, in profound thought, with the symbol of the Ganges above his head, and the Brahman-bull (q.v.) at his side. The Turanians added a necklace of skulls, a collar of twining serpents, a tiger skin and a club with a human head at the end, five faces and four arms; his wife is Durga, or Kali; the Linga (q.v.) is his symbol, and the chief form in which he is now worshipped in India. [SAIVA.]

2. **Geol.** (Pl.): The Siwalik strata.

Siwalik-strata, s. pl.

Geol.: Certain freshwater strata found in the Siwalik Hills in Sirmoor, &c. They were originally regarded as Miocene, but Mr. Blanford believes that, while the Lower Siwalik or Nahun beds are not older than Upper Miocene, the mass of the strata is Pliocene. They have been investigated by Dr. Hugh Falconer, Sir Proby T. Cantley, Lieuts. Baker & Durand (Sir Henry Durand), and by the Geological Survey of India—leading to a series of publications beginning in Calcutta in 1836. They yielded mollusca belonging chiefly to living species. Forty-eight genera and ninety-three species of mammalia, some recent, others extinct, have been described; they include *Macacus*, *Semnopitheca*, *Felis*, *Machairodus*, *Elephas*, *Mastodon*, *Rhinoceros*, *Equus*, *Hipparion*, *Hippopotamus*, *Cervus*, *Sivatherium*, *Antelope*, *Capra*, *Ovis*, *Camelus*, *Mus*, and *Hystrix*. Some species have lingered on in the Nerbuddah and the Godavery Valley to the Pleistocene, with flint implements.

† **si'-va-thër'-i-dæ**, s. pl. [Mod. Lat. *sivatherium*]; Lat. fem. pl. adj. suff. *-idæ*.]

Palæont.: A family of Cavicornia, proposed by Dr. Murie, for the reception of *Sivatherium* (q.v.), which he regards as most nearly related to the Antilocapridæ.

si'-va-thër'-i-üm, s. [Eng., &c. *Siva*, I, and Gr. *ἄπιον* (*thëron*) = a wild beast.]

Palæont.: A genus of Antilocapridæ or Sivatheridæ, with one species, *Sivatherium giganteum*, discovered by Falconer and Cantley in the Siwalik Hills. [SIVALIK-STRA-TA.] It must have been far larger than any living Ruminant, for the skull was nearly as long as that of an elephant.

Dr. Falconer (*Palæont. Notes*, ed. Murchison), considered that it connected the Ruminantia with the Pachydermata. It had two pairs of horns; the anterior pair simple, the posterior possessing two snags or branches. [BRAMATHERIUM.] (See extract.)

SKULL OF SIVATHERIUM.

"That the *Sivatherium* had a huge long proboscis, tactile and prehensile, as in the Elephant, or, to a lessened extent, as in the Tapir, does not seem to be established. Falconer and Cantley, from the structure of the facial bones, infer as much. The bones of the face of *Sivatherium* and *Sais asinifolia* closely in pattern, and individually correspond; and, as in the latter we have a soft, fleshy, enlarged, patulous nostril of moderate dimension, it follows, as a matter of probability, that the same existed in the former, as in the Elk and others. For it is to be borne in mind, when we attribute a pachyderm's trunk to the *Sivatherium*, that the animal had large, heavy horns occipital and prefrontal, a circumstance vastly different from the Elephant and Tapir."—Dr. Murie, in *Geol. Mag.*, 1871, p. 442.

2. *Fig.*: Something annoying, usually kept secret.

"No skeleton is allowed to remain peacefully in his cupboard."—*Daily News*, Oct., 1886.

II. Anat.: The support or framework of an animal body, in life protecting the central parts of the nervous system, and forming a fulcrum for the limbs. It is made up of different parts—in the human adult of 198 separate bones. The skeleton proper consists of the skull and bones of the trunk, the pectoral and pelvic limbs forming the appendicular skeleton, the whole constituting the interior or endoskeleton. This, when removed from the body for purposes of examination and study, is termed a natural skeleton, if connected by the dried ligaments; an artificial skeleton, if the various bones are joined together by wire; and a disarticulated skeleton, if the bones are separated from each other. In the majority of vertebrates the skeleton is osseous; in some fishes it is cartilaginous, and in the Lancelet (*Branchiostoma lanceolatum*) the vertebral column is reduced to a notochord. [CHORDA-DORSALIS.] Owen looks upon the endoskeleton as a whole made up of three parts: the neuroskeleton, the scleroskeleton, and the splanchnoskeleton. (See these words.) In the typical skeleton the axial or chief portion comprises the skull, the vertebral column, the sternum, and the ribs. The anterior or pectoral portion of the appendicular skeleton consists of the humerus, the radius and ulna, and the carpals, metacarpals, and phalanges. The posterior or pelvic portion consists of the femur, the tibia and fibula, the tarsals, metatarsals, and phalanges. In the Pinnipedia, Cetacea, and Fishes all four limbs are modified; in Bats and

Birds the pectoral limbs are converted into organs of flight; in the Pythona the pelvic, and in some lizards—e.g., the British Slow-worm—both pelvic and pectoral limbs are rudimentary. [Vestriæ.] There is no endoskeleton in the Invertebrata, though the internal bone of some of the Cephalopoda may foreshadow the neuro-, as the phragmacone foreshadows the aplanchoskeleton. The armadillo, crocodile, and the sturgeon among Vertebrates, and the crab and lobster among Invertebrates, are familiar examples of animals furnished with an exo- or dermo-skeleton (q.v.).

B. *As adj.*: Containing only the heads or outlines: as, a skeleton sermon.

I. Ordinary Language:

1. Literally:
 (1) In the same sense as II. 1.
 "The body is consumed to nothing, the skin feeling rough and dry like leather."
Harvey: On Consumptions.

(2) A hide, a pelt; the skin of an animal stripped off the body, whether green, dry, or tanned. In commercial language the term skin is applied to those pelts as of calves, sheep, deer, goats, lambs, &c., which, when prepared, are used for the lighter uses of bookbinding, the manufacture of gloves, parchment, &c.; while the term hide is applied to those which are tanned and used for stronger and heavier purposes, as for boots, harness, belts for machinery, &c.

"A lamentable thing, that of the skin of an innocent lamb should be made parchment."
Shakspeare: Henry VI., IV. 2.

(3) The hide of an animal still retaining its shape, and used as a vessel for containing liquids.

(4) Any external covering resembling skin in appearance; a membranous substance formed or attached to a surface.

2. Fig.: The body, the person.
 "We meet with many of these dangerous civilities, wherein 'tis hard for a man to save both his skin and his credit."
L'Estrange.

II. Technically:

1. Anat.: The integument everywhere surrounding the body. It consists of an outer layer called the cuticle, epidermis, or scarf-skin, and an inner one, the *cutis vera*, the *cutis*, or the *corium*. These constitute the proper skin. Under them is a third layer, called the subcutaneous cellular tissue, considered also as pertaining to the skin when that word is used in its most comprehensive sense. In man the skin is more or less covered with scattered hairs; in some lower mammals the hairs are much more dense; in birds they are replaced by feathers, and in reptiles and fishes by scales, or, in some cases, by plates; the typical Amphibia have a naked skin. An integument homologous with the skin exists in the Invertebrates.

2. Physiol.: The skin acts as a protection to the organs below. It is also a vast excretory system, sending out a large amount of perspiration (q.v.) through the sudoriferous glands. To a small extent it is also an absorbent of fluids from without.

† **3. Bot.:** The epidermis of a plant or of a fruit.

4. Naut.: That part of a sail when furled which remains outside and covers the whole.

To furl with a smooth skin, or skin the sail up in the bunt, is to turn the skin well up, so as to cover the sail neatly.

2. A thin riven slab of slate used in roofing. The upper surface of a slate is called its back, the under surface the bed, the lower edge the tail, the upper edge the head. The part of each course of slates expoed to view is called the margin of the course, and the width of the margin is called the gauge. The portion hidden from view is the cover. The bond or lap is the distance which the lower edge of any course overlaps the slates of the second course below, measuring from the nail-hole, and may be from two to four inches. Slates are laid on laths, battens, or sheathing, and must break joint. (BREAK, v., C. 21.) The nails are of copper, zinc, or tinned iron. In England, 1,200 slates constitute a thousand, common sizes. Slates are known technically as Doubles, Ladies, Countesses, Duchesses, Princesses, Queens, Imperials. (See these words.) A square of slate or slating is 100 superficial feet.

B. Trans. : To besmear with slaver or saliva; to slaver.

"Twitch'd by the slave, he mouths it more and more,
Till with white froth his gown is slaver'd o'er."
Dryden: (Toda.)

slāv-ēr-ēr, s. [Eng. *slaver, v.; -er.*] One who slaves; a slaver, a driver.

slāv-ēr-īng, pr. par. & a. [SLAVER, v.]

* **slāv-ēr-īng-lý, adv.** [Eng. *slavering; -ly.*] In a slaving manner; with slaver or driver.

slāv-ēr-ý, s. [Eng. *slave; -ry.*]

1. The state or condition of a slave; bondage; the state or condition of being entirely subject to the will of another. Slavery is the obligation of the slave to work for the benefit of his master, without the consent or contract of the former; or it is the establishment of a right which gives one person such a power over another as to make him absolute master of the other's life and property.

¶ In barbarous times the man who overcame an adversary in battle never thought his victory completed till he had killed him. In the next stage of development it was discovered that by sparing him, he could be put to some use; and slavery arose as a reform. Though tending to stop slaughter in the battlefield, it caused fresh wars of its own, the object being to overcome the men of feeble tribes, and reduce them, with their wives and families, to servitude.

The subjection of some at least of Ham's race to slavery is prophesied in Gen. ix. 25, and slavery very early existed in the world. The 318 trained servants (A.V.), men (R.V.) born in Abraham's house, seem to have been slaves, and the patriarch must have habitually treated them well or he would not have ventured to arm them (Gen. xiv. 14). The Mosaic law found slavery previously existing among the Jews, and regulated it, making it milder (Exod. xxi. 16), especially in the case of the poor of their own race temporarily in bondage (Lev. xxv. 39), for whom it had a year of release (Exod. xxi. 2) and a jubilee (Lev. xxv. 39-54).

The Egyptians (Gen. xxxix. 1, Exod. i.-xii.), the Carthaginians, the Greeks, and the Romans, even when their civilization was at its highest, all had slaves. The New Testament did not directly attack slavery (Philemon 10-19), but the principles of Jesus were quite inconsistent with its maintenance (Matt. vii. 12), and, as Christianity gained the power of moulding European faith and practice, the severe slavery of the ancient times was transformed into the milder servitude of the Middle Ages. With regard to Muhammadan slavery, Hughes (*Dict. Islam, p. 596*) says:

"From the teaching of the Qur'an . . . it can be seen that all male and female slaves taken as plunder in war are the lawful property of their master; that the master has power to take to himself any female slave either married or single; that the position of a slave is as helpless as that of the stone idols of Arabia; but they should be treated with kindness, and granted their freedom when they are able to ask for and pay for it."

On the conquest of Hispaniola, Peru, and Mexico by the Spaniards, the American Indian natives, reduced to bondage, were compelled to labour long hours in mining and other occupations, Las Casas (1474-1566), a Spanish Dominican, "the Father and Protector of the Indians," in vain urging their emancipation. The mortality among them was so great that negroes from Africa were introduced to take their place. It was found that a negro did four times as much work as an Indian, and lived when the Indian died. The first slaves were brought to Hispaniola in 1503, and a larger number in 1511. American slavery once begun gradually reached large proportions, and culled the fair fame of all European nations which possessed colonies abroad. In 1713, Great Britain was no better than the rest. (Assessivo.) The worst feature of slavery was the slave trade. As early as A.D. 1688, William Penn, the Quaker, had denounced it. The London Society of Friends did so also in 1727, and resolved in 1760 to expel any member who engaged in the traffic. On June 22, 1772, the English Court of King's Bench, in the case of Somerset, decided that a slave reaching England was free, and the Scotch Court of Session, about the same time, came to the same decision. In 1785, the Vice-

Chancellor of the University of Cambridge offered a prize for the best essay on the question whether slavery was right, and the successful candidate was Mr. Thomas Clarkson (1760-1846), who commenced an agitation for the abolition of the slave trade. Many of his warmest supporters belonged to the Society of Friends. In 1786, William Wilberforce (1759-1833) brought the subject before Parliament, but the Act abolishing it did not become law till March 25, 1807. Agitation was now directed against slavery itself, and in 1833 an Emancipation Act was passed, which, on August 1, 1834, set free 770,280 slaves in the British West Indies, with a compensation of £20,000,000 to their owners. On August 1, 1838, slavery was abolished in British India.

As time went forward, the struggle between the advocates of slavery and the abolitionists in the United States became more determined, the former being generally Democrats and the latter Republicans, and when on Nov. 6, 1860, Abraham Lincoln, the Republican candidate, was elected President, great excitement arose among the Southern or slave-holding States, one after another of which seceded from the Union. [CONFEDERATE.] Lincoln, at the head of the Northern States, declared war against the revolted South. The war was undertaken for the preservation of the Union, yet the President found it expedient, in 1863, to proclaim the emancipation of the slaves in the unsubdued portions of the South, and the ultimate success of the North led to the abolition of slavery throughout the Union. Slavery was abolished in Cuba in 1886, and in Brazil in 1888. It no longer exists anywhere upon the American continent.

2. The keeping or possessing of slaves; slaveholding; as, To abolish slavery.

3. The office of a slave; exhausting and mean labour; drudgery.

II. Physiol.: The periodical lethargy and repose of the organs of sense and locomotion and some of the intellectual powers. The salient feature of sleep is the cessation of the automatic activity of the brain. When sleep is approaching, the mind becomes less active, the power of attention being among the first to give way; finally greater or less loss of

consciousness takes place. [**ДРЕМ.**] All the higher animals sleep, and some hibernate [**HIbernation.**] The functions of organic life are not much affected by sleep. The pulse and breathing are slower, the latter more thoracic than diaphragmatic; the intestines and other muscular mechanisms and the secreting organs less active, or even some of them quiescent, and the pupil of the eye is contracted proportionally to the depth of the sleep. The temperature of the body is lower, and from two to five in the morning vitality is low, and this period is marked by a high rate of mortality among the old and weak. The cause of sleep is not yet fully understood. The very young require much sleep; in adult life about eight hours' sleep are required; in old age there should be more, for the repair of waste, but generally there is less. A morbid tendency to sleep denotes imperfect nutrition and degeneracy of the nervous tissue, and is often the precursor of apoplexy. It may be caused also by undue heat or cold, by dyspepsia, passion, mental excitement, overwork, anxiety, or drunkenness. [**SLEEPlessness.**]

¶ Sleep denotes an entire relaxation of the physical frame; a *drowse* is a short, light sleep. Sleep is the general term; to slumber is to sleep lightly and softly; to doze is to incline to sleep, or to begin sleeping; to nap is to sleep for a time.

¶ Sleep of plants:

Bot.: The folding of leaves during the night. Simple leaves may rest face to face, or may envelop the stem, &c.; trifoliate ones be divergent, pendent, &c., and compound pinnae leaves may be turned up or down, or be imbricated or retrorse. (4) *English Economical History*: Two methods for raising the duty on imported wheat and other cereals when they became cheap, and lowering it when they became dear. The first came into operation on July 13, 1823. The highest duty in the scale was £1 5s. 6d. per quarter, when the average price of wheat was under 62s. over all England, and the lowest was 1s., when the average price was 73s. The attempt to substitute a uniform duty of 8s. on wheat overthrew the Melbourne administration on August 30, 1841, and transferred power to Sir Robert Peel, who carried the Act 5 Vict., c. 14, establishing the second sliding-scale. The highest duty was now £1, and took effect when wheat fell below 51s.; and the lowest was 1s., when wheat rose above 73s. The Corn Importation Act, 9 & 10 Vict., c. 22, passed June 26, 1846, reduced the duty on wheat to 4s., when the average price was 53s.; but after June 24, 1849, it was to be 1s. whatever the average price, and the impost was abolished in 1869. [CORN-LAW.]

A. As substantive: I. Ordinary Language:

*1. Slowness, dilatoriness.

2. Disinclination to work or exertion; laziness, idleness; habitual indolence; sluggishness.

"Nor slòth hath seized me, but thy word restrains." Pope: Homer; Iliad v. 1013.

II. Zool.: The popular name for any individual of the Edentate group Tardigrada (q.v.), from their slow and awkward movements on the ground, owing to the peculiar structure of the wrist and ankle-joints. The feet are armed with long claws, and turned towards the body, so that the animal is compelled to rest on the side of the hind foot, while the disproportionate length of the fore-limbs causes it to rest also on the elbow. It shuffles forward, alternately stretching the fore-legs and hooking the claws into the ground, or grasping some object to draw itself along. Sloths are natives of South America, nocturnal in habit, and are found in the forests of that region, passing their lives among the branches of trees, on the leaves and young shoots of which they feed. In moving from one limb of a tree to another, they hang back downwards, embracing the limb with their hind, and drawing themselves forward with their fore feet. They are covered with coarse, shaggy hair, not unlike withered grass, which protects them from insects and shields them from observation when at rest in the daytime. The stomach is complicated, but there is no rumination. The female produces but one at a birth, which clings to its mother till able to provide for itself. Their chief enemies are snakes and the Carnivora; their arboreal habits are a partial protection against the latter, and against the former they defend themselves by their powerful fore-limbs and claws. There are several species, the most important of which are described in this Dictionary under their popular names. [At, Two-toed Sloth, Three-toed Sloth.]

*B. As adj.: Slow, slothful.

"God is . . . very sloth to revenge." Latimer.

sloth-animalcules, s. pl.

Zool.: The Arachnid order Tardigrada (q.v.). Called also Bear Animalcules.

sloth-bear, s.

Zool.: Melursus labiatus, an Indian bear, found throughout the Peninsula and in Ceylon. It feeds on ants, honey, fruit, and, occasionally, birds' eggs. It is between five and six feet long, extremely awkward and ungainly in appearance, and the snout and lower lips are prolonged. [PNOCHILUS.] The fur is mostly black, the muzzle and tips of the feet being of a dirty white or yellowish colour, and the breast ornamented with a light crescentic or V-shaped mark.

*sloth, v. i. [SLOTH, s.] To be slothful or idle.

slòth-fùl, *slòth-full, a. [Eng. slòth; -full.] Inactive, sluggish, lazy, indolent.

II. Zool.: Any individual of the family Limacidae (q.v.). They are naked, air-breathing molluscs, universally distributed, committing great ravages in fields and garden crops in moist weather, but becoming dormant during frosts. The body is generally oval or oblong, elongated, from one to three inches in length; the creeping disk, or sole of the foot, extends the whole length of the animal, but, like snails, slugs frequently raise their heads and move their tentacles in search of objects above them. They often climb trees, and can lower themselves to the ground by the accumulation of mucus at the extremity of the tail hardening into a gelatinous thread. They oviposit in moist places in spring and summer, often at roots of grass; the eggs resemble small oval clusters of jelly. *Limax agrestis*, the Gray Slug, is the commonest, and *L. maximus* (or *antiquorum*), the Great Gray Slug, one of the largest species. *Arion ater*, the Black Slug, or Black Snail, and *A. agrestis*, the Red Slug, are also plentiful. Various means are employed by gardeners to check the ravages of these animals. One of the most efficacious is the sprinkling of coal ashes, lime, or soot round young and tender plants. [SEA-SLUG.]

Pathol.: Variola; a contagious disease, distinguished by an eruption of the skin, passing through several stages, from simple congestion of the papillæ, followed by small red spots, which develop around infiltrations, called vesicles, with their characteristic central depression, changing to pustules, which invade the deeper tissue under the skin, and leave

bôil, boy; pôit, jôwl; cat, çell, chorus, çhin, bench; go, çem; thin, çhis; sin, aç; expect, Xenophon, exist. -îng. -cian, -tian = çhan. -tion, -sion = çhün; -çion, -çion = çhün. -çious, -çious, -çious = çhüs. -ble, -dle, &c. = çpl, çpl

elcitrices in the form of pitting. After the pustules have formed, a crust is produced, contracting in the centre, and ultimately falling off, when in favourable cases, recovery takes place; but often sloughing, pyæmia, pneumonia, laryngitis, &c., supervene, and increase the danger to life. The sight also is liable to be destroyed by the formation of pustules on the cornea, and the eruption is also found in severe cases in the nostrils, mouth, and other mucous passages. The period of incubation is usually about twelve days, in which fever, headache, backache, and restlessness and anxiety are prominent symptoms. Three days after the invasion of the initial fever, the eruption appears, going on to suppuration, with secondary fever about the eighth day, and terminating from the eleventh to the fourteenth day, with desiccation, which lasts for three to six weeks or more, according to the severity of the attack. There are three chief forms of the disease, *variola discreta* (simple small-pox), usually terminating in recovery; *variola confusa* (confluent small-pox, where the spots run into one another), in which almost half the cases end fatally; and *variola hemorrhagica* (the spots being of a purplish-black from hemorrhagic effusion), usually fatal in forty-eight hours. Vaccination (q.v.) is ordinarily a preventive, and where it does not prevent, greatly modifies the disease, although fatal cases sometimes occur among vaccinated persons. The mortality from small-pox unmodified by vaccination is about 50 per cent. [RE-VACCINATION.] From the very contagious nature of the disease, isolation of the patient, and vaccination or revaccination of all who have been in contact with him, are absolutely indicated to prevent it becoming, as it too frequently does through neglect of these precautions, epidemic.

Hardness, 5.5 to 6; sp. gr. 6.4 to 7.2; lustre, metallic; colour, tin-white to steel-gray; streak, grayish-black; brittle. Compos.: somewhat variable owing to the replacement of a part of the cobalt by nickel, but typical kinds would contain, arsenic, 72.1; cobalt, 9.4; nickel, 9.5; iron, 9.0 = 100, corresponding with the formula, (Co, Fe, Ni)₃As₂. Dana divides as follows: (1) Cobaltic = smaltine; (2) Nickeliferous = chloanthite, in which cobalt is sometimes almost absent; (3) Ferriferous = safflorite, which contains over ten per cent of iron. Mixtures of these lead to other groups, which however blend more or less with one another. Found in veins frequently associated with silver.

smálltz, s. [SMALT.]

***smär-ägd, *smä-räg-düs, s.** [*Lat. smaragdus*, from Gr. *σμάραγδος* (*smaragdos*) = an emerald (q.v.); O. Fr. *smaragde, esmeraulte*.] The emerald; also applied to the jasper, beryl, malachite, &c.

2. The quality of a thing or substance, or emanation therefrom, which affects the olfactory nerves; scent, odour, perfume. "All the *smell* of plants, and of other bodies, is caused by these volatile parts."—*Reid: On the Human Mind*, ch. ii. § 1.

II. Physiol. The perception of odorous emanations, the nature of which is not certainly known. They may consist of aerial waves, or may be aerial particles of the odorous substance. In either case, they are extremely delicate; air containing only a millionth part of hydrogen sulphide, having a distinct odour, and a minute portion of musk will continue, without appreciable loss of weight, to render its presence perceptible in a large room for years. These particles must be conducted to the nostrils by the air, or no impression will be perceived. The organ of smell is situated in the upper part of the nose, a portion of the mucous membrane covering the upper and middle turbinals, and the *septum nasi* being specially modified for this purpose. [ANOSMIA.] Smell exists in all the higher animals. Darwin (*Descent of Man*, pt. i, ch. i.) says that it is of supreme importance to the Ruminants in warning them of danger, to the Carnivora for finding their prey, and to others again, as the wild boar, for both purposes combined. Mr. S. P. Woodward finds it present in the Cephalopods and Gasteropods.

smell-smoek, s. *Bot.*: (1) *Cardamine pratensis*; (2) *Anemone nemorosa*. (*Britten & Holland*.)

sméll-ér, s. [Eng. *smell*, v.; -er.]

smélt-îng, *pr. par., a., & s.* [SMELT, v.]

A. & B. *As pr. par. & particip. adj.:* (See the verb).

C. As subst.: The act or process of obtaining metal from ore by the combined action of heat, air, and fluxes. The operation varies according to the different metallic ores to be operated on. In smelting iron, the ore is first roasted in a kiln, in order to drive off the water, sulphur, and arsenic with which it is more or less combined in its native state, and is then subjected to the heat of a blast-furnace, along with certain proportions of coke or coal and limestone, varying according to the quality and composition of the ore to be heated. [BLAST-FURNACE.] The smelting of copper consists in alternate roastings and fusions. The first of these operations is calcining the ore in furnaces in which the heat is applied, and increased gradually, till the temperature be as high as the ore can support without melting or agglutinating, when the ore is thrown into an arch formed under the sole of the furnace. The second operation, or fusion of the calcined ore, is performed in a lifted furnace, the ore having been spread uniformly over the hearth, and fluxes, such as lime, sand, or fluor-spar, being added when required, although the necessity

for this addition is sought to be obviated by a careful admixture of ores of different qualities, the several earthy components of which shall serve as fluxes in the fusion of the mass. These two processes of calcination and fusion are repeated alternately until the ore is completely freed from all the earthy materials, and pure metal is obtained. In smelting lead, the ores, after being sorted, cleaned, ground, and washed, are roasted in furnaces, which are without any blast or blowing apparatus, the ores being separable from the metal by its great fusibility. The smelting of tin consists of the calcining or roasting of the ores after they have been cleaned, sorted, stamped, and washed.

smelting-furnace, *s.* A furnace for disengaging the metal from its gangue or the non-metalliferous portions of the ore. The furnaces differ much, according to the metals to be treated. [BLAST-FURNACE, REVERBERATORY-FURNACE.]

smër-dis, *s.* [Etym. doubtful, perhaps from Gr. *Σαέρδης* (*Smerdis*) = the son of Cyrus.]

smi-lâ-çö-æ, *s. pl.* [Mod. Lat. *smilax*, genit. *smilacis*]; Lat. fem. pl. adj. suff. -accæ.]

Bot.: *Sarsaparilla*; an order of Dietyogena. Herbs or under-shrubs often climbing, and with fleshy tuberous rhizomes; leaves reticulated; perianth six-parted; stamens six; style generally trifid; stigmas three; ovary with three cells, each with one or many seeds; fruit, a roundish berry. Known genera two; species 120, widely distributed, but most numerous in Asia and America.

smi-la-chîn, *s.* [SMILACIN.]

Chem.: Reinsch's name for a crystalline substance which he extracted from the root of smilax.

smi-la-çin, *s.* [Mod. Lat. *smilax*, genit. *smilacis*]; -in (Chem.) [SARRAFARILLIN.]

smi-la-çî-na, *s.* [Dimin. from Lat. *smilax* (q.v.).]

Bot.: A genus of Asparagæe, or Asparagineæ. Rootstock slender, creeping; stem erect, leafy; leaves alternate; flowers white, or terminal racemes; perianth of four free segments in one series, or six in two series; stamens four or six; ovary with two to three cells, each cell with one or two ovules; fruit a berry. Known species about ten, from the north temperate zone. One, *Smilacina bifolia* (formerly called *Maianthemum bifolium*), is found in woods in England, but is very rare. The berries of *Smilacina ramosa* are said to be diuretic.

smi-lâx, *s.* [Lat., from Gr. *σμίλαξ* (*smilax*) = the holly, the yew, &c.]

1. **Bot.**: The typical genus of Smilacæe (q.v.). Perianth petaloid, six-partite; stamens six; stigmas three, spreading; ovary with three cells, each one-seeded, pendulous; berry one to three-celled, one to three seeded. Climbing shrubs from tropical countries, as far north as Southern Europe. Many species furnish sarsaparilla (q.v.). The leaves of the Australian *Smilax glycyphylla* are called Sweet Tea. The Chinese eat the rhizome of *S. China* instead of rice, and, like the Hindus, prescribe it to rheumatism, &c. The large tuberous rhizomes of *S. lanceolata* are often eaten, the juice is used in rheumatism, and the residue laid over the affected parts. *S. pseudo-China* in the United States, is used as an alternative by the herbalists. With corn, saffras, and molasses it is manufactured by the Carolina negroes into beer.

2. **Palaeobot.**: The genus occurs in the Lignitic-series (q.v.). Eight species are in the Miocene of Gningen, &c., in Switzerland, flowers and leaves being preserved in the slate. Some occur in the Pliocene of Italy.

smöke, *smoake, *smok, s. [*A.S. smoca, from smocan, pa. par. of smocan = to smoke, to reek; cogn. with Dut. smook = smoke; Dan. smöge = to smoke; Ger. schmauch = smoke; Irish smuid = vapour, smoke; much = smoke; Wel. mug = smoke.*]

1. Literally:

1. Any volatile, and specially any carbonaceous matter escaping from a burning substance. When wood or coal is in process of combustion, it emits, not merely minute particles of unconsumed carbon, but invisible gaseous matter. Appliances for consuming smoke aim simply at preventing the rise of the carbonaceous particles, ignoring the unseen gases. They turn on the furnishing of a supply of air containing an abundance of oxygen, the absence of which is the reason why any carbon escapes unconsumed.

"And there arose the smok of a great furnace."—*Revelation ix. (1851).*

2. Something resembling smoke; a vapour; an exhalation.

"For smoke and dusty vapours of the night."—*Shakespeare: Henry VII., ll. 2.*

3. The act of drawing in and puffing out the fumes of burning tobacco.

4. A cigar. (*Slang.*)

* 5. A chimney.

"Dublin bath Houses of more than one Smoak."—*Petty: Polit. Survey of Ireland, p. 3.*

Rogers: Naaman the Syrian, p. 14.

snäg (2), v.t. [SNAO, s.]

1. To trim by lopping branches; to trim or cut the branches, knots, or protuberances from, as from the stem of a tree.

2. To injure or destroy by running against a snag, or the trunk or branches of a sunken tree: as, To *snag* a steamboat. (*Amer.*)

snägged, a. [Eng. *snag*, s.; *-ed*.] Full of or covered with snags or short stumps or points; full of knots.

"The eye reposes on a secret bridge,
Half gray, half snagg'd with ivy to its ridge."
Wordsworth: Evening Walk.

snäg-gÿ, a. [Eng. *snag*, s.; *-y*.]

1. Lit.: Full of or abounding with snags; snagged, gnarled.

"His stalking steps are stay'd
Upon a snaggy oak."
Spenser: F. Q., I. vii. 10.

2. Fig.: Ill-tempered. (*Tennyson: Northern Cobbler*.)

snäil, * **snayle**, * **snegge**, s. [A.S. *snegol*, *snegol*, a dimin. from *snaca* = a snake (q.v.); Sw. *snäcka*; Ger. *schnecke*; Icel. *snigill*; Dan. *snegl*.]

I. Ordinary Language:

1. In the same sense as II. 4.

"Bearing his powerful hands upon his back,
As snails their shells, or pebbles do their pack."
Sp. Ball: Satires, IV. 2.

2. A drone; a slow-moving person. [SLOO (1), s., I. 1.]

* 3. A tortoise; hence the name of an ancient military engine, called also a *Testudo*. (*Maundeville*.)

II. Technically:

1. *Bot.*: The same as *SNAIL-CLOVER* (q.v.).

2. *Horol.*: A flat piece of metal of spirally-curved outline, used for lifting a movable part, as the hammer-tail of a striking clock.

3. *Mach.*: A spiral cam.

4. *Zool.*: Any individual of the family *Helicidae*. The foot of the animal is long, pointed behind, head with four retractile tentacles (of which the anterior pair are the larger), at the tops of which the eyes are situated; mouth with a strong horny upper mandible; the tongue broad and oblong, armed with numerous rows of small teeth. Snails are shell-bearing, pulmoniferous molluscs, universally distributed, feeding chiefly on vegetable substances, and causing great damage to garden crops. They are most active in warm, moist weather. At the approach of winter, or during a season of drought, they close the mouth of their shell with an epiphragm of hardened mucus, and become inactive and torpid. They possess in a high degree the power of repairing injuries both to the shell and to the soft parts. *Helix pomatia*, the Edible Snail of Europe, was a favorite article of food with the ancient Romans, and is still much esteemed as an article of food in Southern Europe. *H. aspersa* is also eaten. Snails are found in nearly every part of the earth, several thousand species having been described.

"Snails boiled in milk are popularly regarded as a remedy for diseases of the chest, and for this purpose they are brought to Covent Garden market."
Cyclop., VIII. 736.

snake, s. [A.S. *snaca*, from *snaca* (pa. t. *snac*, pa. par. *snacen*) = to sneak (q. v.); cogn. with Icel. *snakr*, *snök*; Dan. *snog*; Sw. *snök*; Sansc. *naga*.]

Zool.: A serpent; any member of the reptilian family Ophidia; specially marked by the absence of limbs, and by their slender, elongated shape. This shape is probably an adaptation to their habit of creeping through crevices and among dense herbage, concealment being one of the characteristics of this family of animals. They may be broadly distinguished into tree snakes, usually green to color, slender in body, and active in motion; water snakes, found both in fresh and salt water; burrowing snakes, with rigid cylindrical bodies and narrow mouths; and ground snakes, to which class the majority of species belong. They are covered with scales, which ventrally are developed into strong shields. These shields are essential to the life of the animal, for to each of them is attached a pair of ribs, and by their grip on the ground the animal moves. The number of vertebrae is very great, in some of the pythons more than four hundred. Many snakes are poisonous, the poison being conveyed through a hollow fang to the blood of the victim. They vary greatly in size. The number of species is variously estimated at from 1000 to 1800.

† A snake in the grass: A secret enemy. (Cf. Virgil: *Ecl.* iii. 93.)

snake-bird, snake-neck, s.

Ornith.: Any individual of the genus *Plotsus* (q. v.). [See extract, and illustration under *Darter*.]

"They are also called *Snake-necks*, from the habit they have of swimming with the body submerged, and only the neck exposed above the water, so that they really look not unlike a snake coming along."—Cassell's *Nat. Hist.*, iv. 200.

snake-boat, s. [PAMBANMANCHE]

snake-cane, s.

Bot.: *Kunthia montana*.

snake-charmer, s. [SERPENT-CHARMER.]

snake-charming, s. [SERPENT-CHARMING.]

snake-eel, s.

snake-rat, s.

Zool.: (See extract.)

"Some *snake-rats* (*Mus alexandrinus*) escaped in the Zoological Gardens of London, and for a long time afterwards the keepers frequently caught cross-bred rats, at first half-breeds, afterwards with less and less of the character of the *snake-rat*, till at length all traces of it disappeared."—Darwin: *Var. of Anim. & Plants*, ii. 87.

snake-seed, s.

Bot.: The genus *Ophiopermum*.

snake-stone, s.

1. A popular name for any species of *Ammonite* (q. v.).

2. A kind of hone or whetstone occurring in Scotland.

3. The name given to any substance applied as a specific to snake-bites in various countries. Three which had been used in Ceylon were submitted to Fraser for analysis. One proved to be a piece of animal charcoal, the second was chalk, and the third was of a vegetable nature, and resembled a bezoar. Only the first could have any effect, and, possibly, animal charcoal, if instantaneously applied, may be sufficiently porous and absorbent to extract the venom from a recent wound before it can be carried into the system. (Tennent: *Ceylon*, ed. 3rd, l. 200.)

4. A local name for a spindle-whorl (q. v.) (See extract.)

"In Harris & Lewis the distaff and spindle are still in common use, and yet the original intention of the stone spindle-whorls, which occur there and elsewhere, appears to be unknown. They are called *clach-natarrach*, *adder-stones*, or *snake-stones*, and have an origin assigned them much like the *ovum angustum* of Pliny."—Evans: *Ancient Stone Implements*, p. 301.

snake-tail, s. [SNAKE'S TAIL.]

snake-worship, s. Serpent-worship (q. v.).

"The name of *Nāgpar*, and the number of non-Aryan families which claim a *Nāg* ancestry, seems to show that *snake-worship* formerly existed in *Gondwana*."—W. W. Hunter: *Imp. Gazetteer of India*, ii. 361.

snake's beard, s.

Bot.: The genus *Ophiopogon*.

snake's flower, s.

Bot.: *Lychnis respertina*.

snake's head, s.

Botany:

1. *Fritillaria Melegris*; so named from the chequered markings on the petals, like the scales on a snake's head. (Prior.)

2. The genus *Chelone*. (Amer.)

Snake's head Iris: [IRIS, ¶.]

snake's tail, s.

Bot.: *Rottbilia incurvata*. Called also *Lepurus incurvatus* and *L. incurvus*. Named from its cylindrical spikes. (Prior.)

snake's tongue, s.

Bot.: (1) The genus *Ophioglossum*; (2) The genus *Lygodium*.

"Like a dog that is compelled to fight,
Snatch at his master that doth tarre him on."
Shakspeare: King John, IV. 1.

2. To poach for fish in the manner described in the extract.
"Snatching is a form of lillet pisciculture. A large triangle is attached to a line of blue gut well weighted with swan shot or small plummet. Some 'snatchers' will use two, three, or even four triangles; but the mode of operation is, of course, the same. The line is then dropped into some quiet place where fish are plentiful—a deep corner pool, or the outfall of a drain, or the mouth of a small affluent—and, as soon as the plummet has touched the bottom, it is twitched violently up. It is almost a certainty that on some one or other of the hooks, and possibly on more than one, will be a fish foul-hooked."—Standard, Oct. 21, 1878.

A. & B. As *pr. par.* & *particp. adj.*: (See the verb).

C. As substantive:

1. A sudden violent and convulsive expulsion of air through the nostrils, with a peculiar sound. It is preceded by a more or less long-drawn and deep inspiration, like that which precedes coughing; but the opening from the pharynx into the mouth is closed by the contraction of the anterior pillars of the fauces and the descent of the soft palate, so that the force of the blast is driven entirely through the nose. It is caused by the irrita-

tion of the inner membrane of the nostrils, and is designed to throw off any particles causing the morbid action. It is often one of the earliest symptoms in coryza.

"Repeated sneezings proceed from the invisible steams of spirit of sal armoniak."
—*Boyle: Works*, iii. 667.

2. A medicine to promote sneezing; an emetic; a sternutatory. (*Bacon*.)

¶ A large body of folklore has gathered round sneezing. According to Aristotle (*Prob.*, xxxiii. 7), in his days a single sneeze was considered a holy thing. The custom of saluting a person sneezing existed in classic times, is still found among the Jews and Moslems and almost every race of lower culture, and lingers in Europe, though here the early idea that sneezing was due to spiritual possession has vanished. (See *Taylor: Prim. Cult.*, ch. iii., for copious references.)

Firearms: A breech-loading rifle, the system of which was applied in 1867 to the Enfield rifle then in use in the British army. The breech action consisted of a simple plug containing an oblique needle, and being hinged on its

right side, was opened by means of a thumb-piece in a short motion from left to right. The cartridge, at first of paper, but afterwards of thin sheet brass, with a metallic base cup containing the detonator, and assisting to prevent the escape of gas, was put in, and the breech closed. The gun was fired by pulling an ordinary trigger, releasing a common hammer which drove the needle into the base-cup. It was also provided with an automatic extractor for the latter, which came into operation when the breech was opened.

If I would time expend with such a snipe."
—*Shakspeare: Othello*, I. 3.

II. Ornith.: The name of certain well-known game birds of the order Grallae, family Scolopacidae, and genus Gallinago. The Snipes have a long, straight, flexible bill, the tip of the upper mandible being decurved at the point and projecting over the lower. The wings are moderate in size; the legs rather long. Snipes are found in most parts of the earth. There are several species in the United States, the Common Snipe of this country (*G. Wilsoni*) closely resembling the Common Snipe of Europe, but with more feathers in its tail. *G. calesitis*, the European Snipe, extends also into Asia and north Africa, being found commonly in marshy districts. It makes its nest of a little dry grass in a depression of the ground, or in a tuft of grass or rushes. It is a favorite game bird, and is in high esteem for the table, but is difficult to shoot, from its zigzag habit of flight when flushed, followed by a swift dart through the air. The species of the genus *Macrorhamphus* are also called snipes. To these belong *M. griseus*, the American Red-breast or Brown Snipe.

snipe-bill, *s.*

1. *Joinery*: A narrow, deep-working moulding-plane, used for forming quirks.

snöw (1), s. [A.S. *snáw*; cogn. with Dut. *sneeuw*; Icel. *snær*, *snjár*, *snjó*; Dan. *sne*; Sw. *snö*; Goth. *snawis*; Ger. *schnee*; Lith. *snėgas*; Russ. *snieg*; Lat. *nix* (genit. *nivis*); Gr. (acc.) *νίφα* (*nípha*), from a nom. *νίφος* (*níphos*), not found; *νίφας* (*níphas*) = a snow-flake; Ir. & Gael. *sneachá*; Wel. *nyff*.]
1. *Lit. & Meteor.*: Aqueous particles frozen in their descent through the atmosphere into separate crystals, afterwards uniting into assemblages of crystals called snow-flakes. To view the crystals to advantage under the microscope they should be allowed to fall on a black surface. The finest are observed in the polar regions, where Captain Scoresby keenly examined them, arranging them in five classes. They belong to the rhombohedral or hexagonal system, and so vary that about a thousand forms of them have been observed. Some appear as hexagonal or dodecahedral plates, others as hexagonal prisms, either single or stellate, or terminated by rectangularly placed plates or secondary groups of needles. The angles of these crystals often form secondary centres, around which others of more skeleton form aggregate. Snow does not fall at all on low tropical plains, though it does on high mountains. [SNOW-LINE.] It is absent from Malta; it falls at Palermo on an average one day each year, at Rome two days, at Venice five, at Paris twelve, at Copenhagen thirty, and at St. Petersburg 170. Where it falls it protects the ground from sinking to a temperature which would injure the seeds in the superficial mould. The snow and ice of the polar regions are among the great elements affecting the winds, and through them the climates, of the several regions of the globe. The cold of the snow on the lofty mountain chains is carried down to the tropical places in which they are chiefly situated, and tempers their heat. [RED-SNOW.]
"Snow is the small particles of water frozen before they unite into drops."—*Locke: Elements of Nat. Phil.*, ch. vi.
2. *Fig.*: Something which resembles snow.
¶ Snow is largely used in composition, the meanings of the various compounds being in most cases sufficiently obvious: as, *snow-capped*, *snow-clad*, *snow-covered*, *snow-crowned*, &c.

snöw-bank, s. A snow-drift.

snow-berry, s.
Botany:
1. The fruit of *Symphoricarpos racemosa*; a caprifoli.

snow-blindness, s. An affection of the eyes caused by the reflection of light from snow.

snow-blink, s. The peculiar reflection arising from fields of ice or snow.

***snow-block, v.t.** To block or impede the passage of by snow.
"The trains have been *snow-blocked* between two stations."—*Daily Telegraph*, Jan. 14, 1886.

snow-boot, s. A boot to protect the feet from snow; specif., a kind of goshaw with an india-rubber sole and felt uppers, covering the boot worn inside of it.

snow-broth, s. Snow and water mixed; very cold liquor.
"Anglo, a man whose blood
Is very *snow-broth*, one who never feels
The wanton stings and motions of the sense."
Shakesp.: Measure for Measure, I. 4.

snow-bunting, s.
Ornith.: *Plectrophanes nivalis*, an Arctic passerine bird, visiting the continents of America and Europe in the winter. It is about seven inches in length, and its plumage varies considerably at different seasons. (See extract.) In winter the upper part of the head, cheeks, and a band on the lower neck are light reddish-brown; lower parts white, upper parts black, edged with yellowish-brown, but varying much in individuals. In summer the head, neck, lower parts, and a patch on the wings are pure white, the rest of the plumage black. They feed on seeds and insects, and soon after their arrival in temperate regions become very fat, and are then esteemed a delicacy. The Greenlanders kill them in great numbers, and dry them for winter use. Their song is not unlike that of the lark, and when singing they perch near a mate; their call is a shrill piping note, generally uttered on the wing.
"There arrive every year in this country, from the north, flocks of pretty little birds called *snow-bunting*. They come from within the Arctic Circle, and are so variable in their plumage that naturalists almost despaired of ever getting a characteristic description. Indeed, so much a puzzle did these little strangers offer, that for long they were described by the same names as three different birds. Of course, we now know that the mountain *lawn*, and *snow-bunting* are one; and this because we got them in almost every possible stage of transition. They breed upon the summits of the highest hills with the ptarmigan; and, like that bird, they regulate their plumage according to the prevailing aspect of their haunts. In this they succeed admirably, and flourish accordingly."—*St. James's Gazette*, Jan. 5, 1887.

snow-cock, s. [SNOW-PARTRIDGE.]

snow-drift, s. A drift of snow; snow driven by the wind; a bank of snow driven together by the wind.
"White his hair was as a *snow-drift*."
Longfellow: Hiawatha, xli.

snow-cyces, s. pl. A contrivance used by the Esquimaux to prevent snow-blindness. They are made of extremely light wood, with a bridge resting on the nose like spectacles, and a narrow slit for the passage of the light.

snow-flake, s.

I. Ord. Lang.: A small feathery flake or particle of falling snow.

"Restore me the rocks, where the snow-flake reposes."
Byron: Lachin-y-Gair.

II. Technically:

1. Bot.: The genus *Lencojum* (q.v.), and spec. *Lencojum aestivum*. Prior says that the English name was given by W. Curtis to distinguish it from the Snowdrop.

2. Ornith.: The Snow-bunting (q.v.). Called also Snow-fleck.

"Seen against a dark hill-side, or a lowering sky, a flock of these birds presents an exceedingly beautiful appearance, and it may then be seen how aptly the term *snow-flake* has been applied to the species."
Farrall: Brit. Birds (ed. 4th), II. 7.

snow-fleck, s. [SNOW-FLAKE, S.]

snow-flood, s. A flood caused by melting snow.

snow-flower, s.

Bot.: (1) The Snowdrop (q.v.); (2) *Chionanthus virginica*.

snow-goose, s.

Ornith.: *Anser hyperboreus*. Colour white, sometimes with more or less of a ferruginous tinge on the head; bill, feet, and orbits aurora-red. It obtains its snow-white plumage only at maturity. It breeds in large numbers in the barren grounds of Arctic America, and migrates southward during the winter.

snow-house, snow-hut, s. A house or hut, constructed of blocks of snow. Capt. Lyon (*Private Journal*, ch. III.) thus describes some he saw in the Arctic regions: "Each dwelling might be averaged at fourteen or sixteen feet in diameter, by six or seven feet

SNOW-HOUSE.

in height . . . The blocks of snow used in the building were from four to six inches in thickness, and about a couple of feet in length, carefully pared with a large knife . . . The building of a house was but the work of an hour or two, and a couple of men, one to cut the slabs and the other to lay them, were labourers sufficient."

snow-hut, s. [SNOW-HOUSE.]

snow-light, s. Snow-blink (q.v.)

snow-line, s.

Physical Geog.: The line of perpetual snow or congelation; the line above which snow does not melt, even in summer, but continues from age to age, unless it descends in glaciers. It is highest on the northern side of the Himalayas and the western slope of the Andes, on both of which it is 18,500 feet high; on Mont Blanc it is 8,500 feet; at the North Cape 2,300 feet; and in Spitzbergen, lat. 78° N., it falls to the sea level.

snow mould, s.

snow-plant, s. [PROTOCOCCUS.]

snow-plough, s. An implement used to clear a road or track of snow. It is of two kinds: one is adapted to be hauled by horses or oxen on a common highway, and the other to be placed in front of a locomotive. A variety of the latter is adapted for street tramways. The simplest form for common highways consists of boards framed together so as to form a sharp angle, like the letter A, in front, and spreading out behind to a greater or less width. Being drawn along with the

apex in front, the snow is thrown off by the boards to the side of the road or path, and thus a free passage is opened for traffic.

For railway purposes the forms are various, according to the character of the country, the amount of snow-fall, tendency to drift, &c.

SNOW-PLOUGH.

snow-shed, s. A protection for a line of railway in exposed situations, where snow-drifts are likely to occur. Uprights are placed on both sides of the lines, which is roughly roofed in.

snow-shoe, s. A light frame made of bent wood and interlacing thongs, used to give the wearer a broader base of support when walking on snow. The tread of the shoe is formed of strips of raw hide, hard-twisted twine, or, among the Indians, of deer-skins. In use, the toe is placed beneath the strap and the foot rests on the thongs; as the heel rises in walking, the snow-shoe is not raised, but as the foot is lifted, the toe elevates the forward end of the snow-shoe, which is then dragged along on the snow as the leg is advanced. They are usually from three to four feet in length, and a foot to eighteen inches broad in the middle.

"Armed with arrows, shod with snow-shoes."
Longfellow: Hiawatha, xv.

snow-shoer, s. One who indulges in the pastimes of snow-shoeing.

"So far, at least, the country snow-shoers showed a most decided superiority."

soap, *soape, *sope, s. [A.S. *sāfe*; cogn. with Dnt. *zeep*; lecl. *sāpa*; Dan. *sæbe*; Sw. *såpa*; M. H. Ger. *saifā*; O. H. Ger. *seifā*; Ger. *seife*; Lat. *sapo* (accus. *saponem*, whence Fr. *savon*; Ital. *sapone*; Sp. *sabon*; Wel. *sebon*; Gael. *siopunn*, *siabunn*; Ir. *slabunn*.)

I. Ordinary Language:

1. *Lit.*: An alkaline unctuous substance, used chiefly for washing and cleansing purposes. (II.)

"All soaps and soapy substances, and consequently ripe fruits, the juices of pungent and aromatical plants; all those substances resolve solids, and sometimes attenuate or thin the fluids."—*Arbucknot: On Diet*, ch. I.

2. *Fig.*: Flattery. (*Slang*.)

II. Technically:

1. *Chem. & Comm.*: In a chemical sense, a soap includes all compounds of an organic acid with a metallic or organic base. Commercially, it is a detergent substance, consisting of the potassium and sodium salts of the fatty acids derived from animal or vegetable oils and fats, and prepared by boiling the neutral fat, such as tallow, palm oil, or olive oil, with caustic soda or potash, until saponification (q.v.) is complete. To separate the soap from the excess of alkali and glycerin, a weak solution of common salt is added, and the boiling continued for a certain time. The soap being thereby rendered insoluble in the ley, rises to the top in the form of a granular mass or curd, and is ladled out or run off into frames, where it cools and solidifies. Hard soaps are compounds of the fatty acids and soda, the best known being curd and yellow soaps, the latter containing

a small percentage of rosin. A good hard soap should contain not more than 26 per cent. water, 7 per cent. soda, and 66 per cent. of fatty acids. Soft soap is a combination of potash, or potash and soda, with the fatty acids derived from the drying oils, such as whale-oil, seal-oil, linseed-oil, &c. It is soft and nasty to the touch, and dissolves more readily in water than hard soap. Hard soaps constitute the great bulk of the soaps used, and may be divided into the three varieties of curd, mottled, and yellow. Yellow soaps contain rosin as an essential ingredient. Curd and mottled soaps are made from tallow, in a special manner, the mottling in the latter being due to the presence in the ley of small quantities of lime, magnesia, &c. The basis of toilet soap is generally good curd or yellow soap.

2. *Pharm.*: Medicinal soap is an antacid and slightly aperient, but is used chiefly as an adjunct to other drugs, or in the manufacture of pills. [CASTILE-SOAP.]

soap-bark, s.

Bot.: The genus *Quillaja* (q.v.).

4. A shire, circuit, or territory.

*sôo-age, *sôc-cage (age as îg), s. [Low Lat. *sociagium*, from A.S. *sôc*.]

Old Law: A tenure by any certain and determinate service; being in this sense put in opposition to knight-service, where the render was precarious and uncertain, and to villenage, where the service was of the meanest kind. These tenures are generally considered to be relics of Saxon liberty; retained by such persons as had neither forfeited their estates to the crown, nor been obliged to exchange their tenure for the more honourable, but, at the same time, more burdensome tenure of knight-service. As, therefore, the distinguishing mark of socage is the having its renders or services ascertained, it includes all other methods of holding free lands by certain and invariable rents and duties; and, in particular, petit serjeanty, tenure in burgage, and gavelkind. Socage is distinguished as free and villein: free socage (also called common or simple socage), where the service was not only certain but honourable, as by fealty and the payment of a small sum, in name of annual rent; villein socage, when the service, though certain, was of a baser nature. From this last tenure have sprung our present copyhold tenures.

"In cheerful prattle about . . . gardien in socage."—*Daily Telegraph*, Aug. 4, 1874.

*sôo-ag-êr (ag as îg), s. [ENG. socag(e); -er.] A tenant by socage; a socman.

sôo-dôl-a-gôr, s. [SOCKDOLAGER.]

sô-cî-a-bîl-î-tÿ (c as sh), s. [Fr. *sociabilité*, from *sociable* = sociable (q.v.); Sp. *sociabilidad*.] The quality or state of being sociable; sociableness.

"The sociability of religion in the ancient world."—*Warburton: Divine Legation*, bk. ii., § 1.

sô-o-ia-ble (o as sh), a. & s. [Fr. from Lat. *sociabilis*, from *soci* = to accompany;

bôll, bôy; pôut, jôwl; cat, çell, chorus, çhln, bench; go, çem; thin, çhis; sin, as; expect, Xénophon, exist. ph = f. -cian, -tian = shan. -tion, -sion = shün; -çion, -çion = zhün. -cious, -tious, -siuous = shüs. -ble, -dle, &c. = bël, dël.

socius = a companion, from the same root as sequor = to follow.]

A. As adjective:

1. Fit to be joined together; capable of being conjoined.

"Another how toucheth them, as they are sociable parts united into one body."—Hooker: Eccles. Polity.

2. Inclined to associate; ready or willing to unite with others.

"God having designed man for a sociable creature, made him . . . under a necessity to have fellowship with those of his own kind."—Locke: Human Understanding, bk. II, ch. I.

3. Disposed to company; fond of companions; companionable, social, conversable.

"Society is no comfort To one not sociable."—Shakspeare: Cymbeline, IV. 2.

4. No longer hostile; friendly, well-disposed.

5. Affording opportunities for conversation and the enjoyment of the company of others.

B. As substantive:

2. Ready or disposed to mix or associate with others in friendly converse; sociable, conversible, companionable.

3. Consisting in union or mutual converse. "Thou in thy secrecy although alone, Best with thyself accompanied, seek'st not Social communication."—Milton: P. L., VIII. 423.

II. Technically:

1. Bot.: Growing in large numbers together, to the almost total exclusion of other plants. (Henslow.)

"The bog-moss (Sphagnum) is freely developed in peaty swamps, and becomes like the heath, in the language of botanists, a social plant."—Lyeil: Princ. of Geol., ch. XII.

2. Zool.: A term confined to its strict application to such animals as live in communities, as ants or bees, but often loosely employed as a synonym of gregarious (q.v.).

¶ Brethren of Social Life:

Church Hist.: An order of secular clerks without vows, founded by Gerard Groote, who died 1384. Habit like that of the Dominicans, but with shorter sleeves and hood.

social-ascidians, s. pl.

Zool.: The family Clavellinidae (q.v.). The members are compound, each individual having its own heart, respiratory system, and

organs of nutrition, but attached to stalks or bases, common to the group, through which the blood circulates in opposite directions.

social-contract, or original-contract, s. That imaginary bond of union which keeps mankind together, and which consists in a sense of mutual weakness and dependence.

¶ Jean Jacques Rousseau (1712-1778) maintained that the natural and proper state of man is the savage state, when he possesses complete liberty, and that every social organization is an infraction of natural right. "All men he believed are born equal, and society is founded on a 'Contract social,' a social contract. His views on the subject prepared the way for the first French Revolution. David Hume (1711-1776) says:

"It cannot be denied that all government is at first founded on a contract, and that the most ancient rule combinations of mankind were formed chiefly by that principle. In vain are we asked in what record this charter of our liberties is registered. It was not written on parchment, nor yet on leaves or barks of trees. It preceded the use of writing and all the other arts of civilised life."—Essays (ed. 2nd, pt. II, p. 47).

Social Democrats, s. pl. The name given on the Continent to Socialists generally, and in England to the members of the Social Democratic Federation. [SOCIALISM.]

"This long period of activity has enabled the Social Democrats to found no fewer than twenty-five clubs in London."—St. James's Gazette, March 7, 1877.

social-dynamics, s. [SOCIOLOGY.]

social-science, s.

1. The systematic investigation of questions relating to public and domestic hygiene, education, labour, the punishment and reformation of criminals, the prevention of pauperism, and the like. The Sociétés de Bienfaisance, established in France in the eighteenth century, were founded for the purpose of discussing similar matters, and the National Association for the Promotion of Social Science originated in England in 1857. The association held annual meetings, and published its proceedings, classed under the heads of Jurisprudence, Education, Punishment and Reformation, Public Health, Social Economy, and Trade and International Law, but its action was temporarily suspended in 1886. Similar associations have since been organized in the United States and in other countries, and active discussion of the subjects involved, and movements to overcome social evils, are increasing. The steps taken are those of new sanitary methods, regulation of prison management, establishment of reformatories, reconstruction of hospital charities, the extension of industrial education, and numerous plans for the amelioration of the condition of the poor.

† 2. Sociology (q.v.).

"It is now needful to consider whether Comte may rightfully be claimed as having created social science."—G. H. Lewes: Hist. Philos. Ind. Rev., II. 725.

¶ National Association for the Promotion of Social Science: [SOCIAL SCIENCE, 1.]

social-statics, s. [SOCIOLOGY.]

social-war, s.

Roman Hist.: A name given to the war (b.c. 91) between the Romans and those of the Italian tribes who were specially termed the allies (Socii) of the Roman State, in which the latter fought for admission to the rights and privileges of Roman citizenship, an object which they ultimately obtained.

so-clal-ism (c as sh), s. [Eng. social; -ism.]

Hist. & Sociology: The word Socialism is employed in several different senses. Loosely, it includes all schemes for abolishing social inequality, and in this sense it is generally distinguished as Utopian Socialism, under which designation communities like those of the Essenes, the early Christians, and the Shakers in America at the present day, and the ideal commonwealths of Plato, More, and H. rington, are to be classed. St. Simon (1760-1825), Owen (1771-1858), and Fourier (1768-1830) were the leading modern Utopians. Scientific Socialism is an economic theory which affirms that the materials from

which labour produces wealth—i.e., the land—should be the property of the community, not of individuals forming a separate class. Socialists also demand that the existing capital, having (as they contend) been unjustly appropriated by the landholding class or its assignees, be restored, with the land, to the community. It vests all authority in the hands of delegates elected by the community, and seeks to substitute public co-operation for private enterprise in supplying all social needs. Modern Socialism is of Continental origin; but Ball in the fourteenth, and Kett again in the sixteenth century, endeavoured to carry Socialistic theories into practice in England. In the first half of the nineteenth century, F. D. Maurice (1805-72), and Charles Kingsley (1819-75), two English clergymen, advocated a large extension of the system of co-operation. The work begun by them is carried on on more extended lines by Christian Socialism, which claims to be the result of applying Christ's teaching to national, social, and commercial life, and not merely to personal conduct. Political Socialism is largely the outcome of the doctrines of Karl Marx and Lassalle, two German writers and active propagandists whose labors have resulted in the growth of a vigorous political party of Socialists in the German Empire, efficiently strong to give Socialism a large representation in the German Reichstag. This party is steadily growing in strength, and is likely to have a powerful voice in the future of German politics. In other countries of Europe political socialism seems steadily increasing.

Scientific Socialism embraces:

(1) Collectivism: An ideal Socialistic state of society, in which the functions of the government will include the organization of all the industries of the country. In a Collectivist State every person would be a State official, and the State would be coextensive with the whole people. Safeguards would be provided against the formation of an oligarchy by the controlling officials.

(2) Anarchism (meaning mistrust of government, and not abandonment of social order) would secure individual liberty against encroachment on the part of the State in the Socialistic commonwealth. Anarchists deny that the legislation of yesterday is enlightened enough for the affairs of to-day, and seek to make laws and other institutions as fluid as possible. They admit no authority except that which carries conviction, and would treat an incorrigible criminal as a dangerous lunatic. They are divided into Mutualists, who hope to attain their ends by banks of exchange and free currency, and Communists, whose motto is "From every man according to his capacity, to every man according to his needs."

About 1880 the first English Socialist organization—the Social Democratic Federation—came into existence. The Socialist League was formed in 1884 by seceders from the Federation, under the auspices of William Morris, the poet. The Fabian Society was founded (Jan. 4, 1884) to advocate Socialism among the educated and intellectual classes. The object of all the Socialist bodies is the nationalization of rent and interest, but the politically active ones agitate for the shortening of the working day, payment of members of parliament, adult suffrage, and similar intermediate measures. Socialistic views are held by many persons in the United States, and the ideas involved are rapidly gaining strength in this country, though as yet there are no strong organizations like those of Europe. Immigration has brought not only Socialism but Anarchism to our shores, and the advocates of the latter have already produced serious trouble.

so-clal-ist (o as sh), s. & a. [Eng. social; -ist.]

A. As subst.: A supporter or advocate of the doctrine of Socialism.

"The Socialists are only kept from active disturbance by the sternest repression. Their opinion is growing in extent and intensity, though in silence."—St. James's Gazette, Feb. 8, 1867.

B. As adj.: Socialistic.

"The Metropolitan Police authorities evidently attach great importance to the Socialist Socialistic procession."—St. James's Gazette, Feb. 8, 1867.

so-clal-ist-ic (c as sh), a. [Eng. socialist; -ic.] Pertaining to Socialism, or the doctrines of the Socialists.

"That is a proposal of a directly socialistic tendency."—Daily Telegraph, Sept. 5, 1885.

A. As adj.: Joined together, associated. "Both we the one and the other, are sociate and abreact together."—Udal: John x. B. As subst.: An associate.

sō-cī-ate (o as sh), v.t. [SOCIATE, a.] To associate. (Shelford: Learned Discourses, p. 68.)

sō-cī-ē-tār-ī-an, a. [Eng. society(y); -arian.] Of or pertaining to society; societary.

"The all-sweeping beam of societarian reformation."—Lamb: Essays of Elia; Decay of Beggars.

sō-cī-ē-tar-ŷ, a. [Eng. society(y); -ary.] Of or pertaining to society.

sō-cī-ē-tŷ, s. [Fr. société, from Lat. societas, accus. of socius, from socius = a companion [SOCIABLE]; Sp. sociedad; Ital. società.]

* 1. Partnership, participation, connection. "Heaven's greatness no society can bear." Dryden. (Todd.)

2. The relationship of men to one another when associated in any way; companionship, fellowship, company. "Thoughts . . . as well might recommend Such solitude before chokelent society." Milton: P. R., l. 302.

3. A number of persons united together by common consent to debate, determine, and act conjointly for some purpose or object; an association for the attainment or promotion of some object, religious, political, literary, benevolent, convivial, or the like; an association formed to promote mutual profit, pleasure, or usefulness; a club; a social union; a partnership.

"For few were then aware that trade is in general carried on to much more advantage by individuals than by great societies."—Macaulay: Hist Eng., ch. xx.

4. The persons, collectively considered, who live in any region or at any period; any community of individuals united together by any common bond of nearness or intercourse; those who recognise each other as associates, friends, and acquaintances; specifically, the more cultivated portion of any community in its social relations and influences; often those who give and receive formal entertainments mutually. (Used without the article.)

¶ Numerous societies, devoted to a great number of literary, artistic, scientific and other purposes, now exist in the United States and elsewhere, and their number and influence are steadily growing. The most important societies will be found under the word denoting their object.

5. Fashionable society. "Society became interested, and opened its ranks to welcome one who had just received the brevet of 'Man of Letters.'"—Hayward Letters, l., ch. 11.

society-journals (or newspapers), s. pl. Journals whose chief object is to chronicle the sayings and doings of fashionable society.

society-verses, s. pl. (A translation of the French vers de société.) Verses for the amusement of polite society; poetry of a light, entertaining, polished character.

sō-cī-ē-tŷ-lēss, a. [Eng. society; -less.] Without society or companions.

"Societyless and bookless."—Mad. D'Arday: Diary, iv. 372.

sō-cīn-ī-an, a. & s. [See def.]

A. As adj.: Of or belonging to the two most celebrated Socii, their tenets, or those of the Socinians in general.

B. As subst.: One who accepts the teaching of the Socii; a believer in the doctrines of Socinianism (q.v.).

sō-cīn-ī-an-ism, s. [Eng. Socinian; -ism.]

Church Hist.: A form of Unitarianism which is identified with Laetius and Faustus Socinus. The former, born in 1525, early adopted anti-Trinitarian views, and diligently propagated them among his friends, but making no public avowal of them, he escaped persecution, and died a natural death at Zurich in 1562. His papers came into the hands of his nephew, Faustus (1539-1604), who in the main adopted his convictions, and zealously promulgated them, both in Transylvania and in Poland. He denied the existence of Jesus Christ previous to his birth of the Virgin Mary, and to this extent was opposed to Arianism (q.v.) as well as to Trinitarianism (q.v.). He, however, accepted the doctrine of the Miraculous Conception, and allowed to the teachings of Christ peculiar authority, on the ground that during his life he was translated to heaven, where revelations were made to him. He also taught that after Christ's final ascension, power was delegated to him to assist men in working out their salvation, and that he was invested with attributes by which he was virtually deified, so that he may be spoken of as God, and is entitled to our worship and obedience. Socinianism is sometimes used loosely as synonymous with Unitarianism (q.v.), but it differs in important particulars, not only from Arianism, but from the more modern and rationalistic phase of Unitarianism which represents Christ as simply a man in whose birth and life there was no element of the supernatural. No sect calling itself Socinian seems at the present time, to be in existence.

sō-cīn-ī-an-ize, v.t. [Eng. Socinian; -ize.] To cause to conform to Socinianism; to regulate by the principles of Socinianism.

sō-cī-ō-lōg-īc, sō-cī-ō-lōg-ī-cal (cī as sh), a. [Eng. sociology; -ic, -ical.] Of or pertaining to sociology.

"The antagonism felt toward the Indian seems to result, not so much from conflicts incident to our possessing the land, as from his sociologic status which differs so widely from our own."—Century Magazine, June, 1883, p. 312.

sō-cī-ō-l-ē-gist (c as sh), s. [Eng. sociology; -ist.] One who studies, treats of, or is versed in sociology.

sō-cī-ō-l-ē-gŷ (c as sh), s. [Fr. sociologie, a hybrid word, coined by Auguste Comte, from Fr. société = society, and Gr. λόγος (logos) = a discourse.]

Philos.: The science of the evolution and constitution of human society, and, therefore, one aspect of the wider question of evolution in general. It is claimed for Comte that he created the science of Sociology, but according to Mill, he only rendered such a science possible. Lewes (Hist. Philos., ii. 721) points out that Macchiavelli, Montesquieu, Adam Smith, and Bentham had had a full conviction that social phenomena conform to invariable laws, but that it was reserved for Comte to bring them under his Law of the Three Stages (STAGE, s., ¶) and to show that all societies pass through a theological, a metaphysical, and a positive stage. The subject of Sociology embraces all social phenomena under their ethical and dynamical aspects. Social statics is the study of the conditions of existence and permanence of the social state; social dynamics studies the laws which govern the evolution of society. Herbert Spencer, in the Plan of his Principles of Sociology (prefixed to his First Principles) proposes to begin with the data of Sociology (the several sets of factors entering into social phenomena), and to give the empirical generalizations arrived at by comparing different societies and successive phases of the same society; next to deal with political, ecclesiastical, ceremonial, and industrial organizations; then to treat of the evolution of languages, knowledge, esthetics, and morals, and lastly, the necessary interdependence of structures and of functions in each type of society, and in the successive phases of social development.

sō-cī-ūs (c as sh), s. [Lat. = a companion.]

Law: Used in the phrase socius criminis, that is an accomplice or associate in the commission of a crime.

sōck (l), *socke, s. [A.S. socc, from Lat. soccus = a light shoe, a slipper, worn by comic actors.]

* 1. The light shoe worn by ancient comic

actors; hence used for comedy, as distinguished from tragedy, in which the actors wore the buskin.

"Then to the walled, in which the actors wore the buskin. If Jocosus's learned sock be on." Milton: L'Allegro, 132.

2. A knitted or woven covering for the foot, shorter than the stocking; a stocking reaching only a short distance up the leg.

3. A warm inner side for a shoe.

4. An overgrown baby.

5. The Etion name for tuck (q.v.).

sōck (2), s. [Fr. soc = a ploughshare, from Gael. soc; Corn. soek.] A ploughshare.

sōck-plate, s. A plate from which a ploughshare is made.

sōck-dōl-a-gēr, sōck-dōl-ō-gēr, s. [A corruption of doxology (q.v.).] (Amer.)

1. A conclusive argument; the winding-up of a debate; a settler.

2. A knock-down or decisive blow.

3. A fish-hook having a supplementary spring-hook to catch the fish which touches the bait.

sōck-ōt, sock-et, s. [A dimm. from sock (1).] 1. An opening, or tubular recess, in which anything is fitted; any hollow thing or place in which anything is fitted; any hollow thing or place which receives and holds something else.

"His eye-balls in their hollow sockets sink." Dryden: Palamon & Arcite, l. 622.

2. Specifically, a little hollow tube or place into which a candle is fitted in a candlestick.

"From down till the candles had burned down to their sockets the ranks kept unbroken order."—Macaulay: Hist. Eng., ch. xv.

socket-bolt, s. Mech.: A bolt passing through a thimble or sleeve between the parts bolted together.

socket-chisel, s. A stout chisel employed for heavy mortising and having a hollow tang to receive the handle. It is used with a mallet.

socket-drill, s. A drill for chamfering or enlarging a hole to a given depth.

socket-joint, s. [BALL-AND-SOCKET JOINT.]

socket-pipe, s. A pipe with an enlarged end or branch to receive the end of a connecting pipe, and hold the clay, lead, or other packing which unites the two, to make a water or gas tight joint.

socket-pole, s. An iron-shod pole used in propelling boats. (Amer.)

sōc'-kēt-ēd, a. [Eng. socket; -ed.] Furnished with a socket, for the reception of a handle or anything similar.

"Two socketed spear-heads, one yalstave, and one socketed celt have been recovered from burial-places of the Bronze Age in Britain."—Jaschinski: Early Man in Britain, ch. x.

sōck'-lēss, a. [Eng. sock (1); -less.] Destitute of socks or shoes.

sōck'-ŷ, a. [SOAKY.]

sōc'-cle, s. [Fr., from Lat. socculus, dimin. from soccus = a light shoe.] [Sock (1).]

Arch.: A plain block or plinth, forming a low pedestal to a statue or column; or a plain face or plinth at the lower part of a wall.

"A socle differs from a pedestal in being without base or cornice."—Brande & Cox.

* sōc'-mān, * sōke'-mān, s. [Eng. soc, soke, and man.] One who holds land or tenements by socage; a socager.

"And I presume that the socmen, who so frequently occur in that record, though far more in some counties than in others, were certainly more fortunate than the rest, who by purchase had acquired freeholds, or by prescription and the indulgence of their lords had obtained such a property in the outlands allotted to them, that they could not be removed, and in many instances might dispose of them at pleasure. They are the root of a noble plant, the free socage tenants or English yeomanry, whose independence has stamped with peculiar features both our constitution and our national character."—Hallam: Middle Ages, pt. 1, ch. viii.

* sōc'-man-rŷ, * sōke'-man-rŷ, s. [Eng. socman, sokeman; -ry.] Tenure by socage.

* sōc'-ōmc, s. [Soc.] A custom of tenants to grind corn at the lord's mill.

Sō-cō-trine, Sō-cō-tran, a. & s. Glee def.]

A. *As adj.*: Of or pertaining to Socotra, an island in the Indian Ocean, off the east coast of Africa.

B. *As subst.*: A native or inhabitant of Socotra.

Socotrine-aloë, s.

Bot.: *Aloe socotrina*. It has sword-shaped serrate leaves, one and a half to two feet long, with their apex sharp; flowers red, tipped with green, on peduncles rising from among the leaves, which are often aggregated round the tip of the stem. It is about three or four feet high, is a native of Southern Africa as well as of Socotra, but is now cultivated in the West Indies.

Socotrine-aloës, s. [ALOES, II. (2.)]

Sō-crāt'-ic, Sō-crāt'-io-al, a. [Lat. *Socraticus*.] Of or belonging to Socrates.

Socratic-method, s.

Philos.: The method of exact definition and induction introduced by Socrates (B.C. 469-399) (*Arist. Metaph.*, xiii. 4). It was his custom to carry on his investigations from propositions generally received as true, and to place the particular statement to be examined in a variety of combinations, thus implying that each thought must, if true, maintain its validity under every possible combination. From the fact that this method was employed by its author in the form of dialogue, the term Socratic method is often loosely applied to any inquiry carried on in the form of question and answer, without reference to the fulfilment of the conditions which Socrates considered all-important.

"With respect to the Socratic method, in its employment of induction, I cannot agree with those who consider it an anticipation of Bacon."—*G. H. Lewis: Hist. Philos.*, ed. 1890, p. 162.

Socratic-philosophy, s.

Philosophy:

1. A term sometimes used to include the development of Greek philosophy from the time of Socrates to the rise of the Neoplatonists, because, with the exception of the Epicureans, the chief philosophical schools up to that period professed to ground their teachings on the authority of Socrates.

2. The ethics of Socrates, as gathered from the writings of Xenophon, Plato, and Aristotle. It is not known when Socrates commenced his career as a public teacher, but he first attracted notice as an opponent of the Sophists (q.v.), and was about forty-six years of age when Aristophanes introduced him on the stage in *The Clouds*, strange to say, in the character of a Sophist. All previous philosophers had been occupied with the Universe as a whole; the chief business of Socrates was with man as a moral being. His reforming tendencies made many enemies. In B.C. 399 Meletus, a leather-seller, seconded by Anytus, a poet, and Lycon, a rhetor, preferred this indictment against him: "Socrates is guilty of reviling the gods acknowledged by the State, and of preaching new gods; moreover he is guilty of corrupting the youth." He was tried and condemned to death, and, refusing the means of escape provided by his friends, drank the fatal hemlock in the seventieth year of his age. Bishop Blomfield (*Evng. Metrop.*, s. v. *Socrates*) says: "Socrates taught that the divine attributes might be inferred from the works of creation. He maintained the omniscience, ubiquity, and providence of the Deity; and, from the existence of conscience in the human breast, he inferred that man is a moral agent, the object of reward and punishment; and that the great distinction of virtue and vice was ordained by the Deity."

sō-crāt'-ic-al-ly, adv. [Eng. *socratical*; -ly.] In the Socratic manner; by the Socratic method.

"Is it such a pleasure to be non-plused in mood and figure, that you had rather be snapp'd in the mousetrap of a syllogism, than treated socratically and geotely?"—*Goodman: Winter Evenings*, pt. III.

Sōc'-ra-tism, s. [Eng. *Socrat(es)*; -ism.] The doctrines or philosophy of Socrates.

Sōc'-ra-tist, s. [Eng. *Socrat(es)*; -ist.] A follower or disciple of Socrates.

"The *socraticus* said it was better and more commendable that all things should be in commotion."—*Martin: Marriage of Priests*, (1554).

sōd, 'sodde, s. & a. [So called from the sodden condition of turf after rain, or in marshy places; cf. *Dut. zode* = a sod, from

O. Dut. zode = a seething or boiling . . . a sod; *O. Fris. satha, soda* = a sod; *Low Ger. zode* = sod; *Ger. zode*.] [SEETHE.]

A. *As subst.*: The stratum of earth on the surface which is filled with the roots of grass, &c.; any portion of such surface; turf, sward.

"Avoiding only as I trod,
My brothers' graves without a sod."
Dryden: Prisoner of Chillon, xl.

B. *As adj.*: Made or consisting of soda; as, a sod seat.

sod-burning, s.

Agric.: The burning of the turf of old pasture-lands for the sake of the ashes, as manure.

sōd, v.t. [SOD, s.] To cover with sod or turf; to turf.

***sōd, pret. & pa. par. of v.** [SEETHE.]

sō-dā, s. [Ital. *soda*, fem. of *sodo*, contract. from *solido* = solid; *O. Fr. soude*; *Fr. soude*. (*Skeat*.)]

1. *Chem.*: An oxide of sodium; thus, anhydrous soda, Na₂O, caustic soda, NaHO. In ordinary language it denotes an impure carbonate of soda, used in washing, for glass-making, for the manufacture of hard soap, &c. [SODIUM-CARBONATE.]

2. *Pharm.*: Caustic soda (Sodium hydrate) may be used externally as a caustic; the bicarbonate as a direct astringent and alterative; sulphate of soda is an antiseptic. [HYPO-SULPHATE OF SODIUM.] A solution of chlorinated soda is an antiseptic and stimulant given in low malignant fever, as a gargle in ulcerated sore throat, and externally in gangrene. [BORAX, GLAUBER-SALT, SODIUM-ACETATE, CHLORIDE, &c.]

¶ Soda-alum = *Mendozite*; Soda-copperas = *Jarosite*; Soda-spodumene = *Oligoclase*; Soda-nitrate = *Nitratine*; Soda table-spar, Soda-wollastonite = *pectolite*.

soda-ash, s.

Comm.: Crude carbonate of sodium.

soda-lime, s.

Chem.: An intimate mixture of caustic soda and quicklime, used chiefly for the determination of nitrogen in organic analysis. It converts the organic nitrogen of the substance into ammonia, which is collected apart and the quantity estimated.

soda-paper, s. A paper made by saturating filtering paper with carbonate of soda. Used for inclosing pipes which are to be ignited under the blow-pipe, so that they may not be blown away, and as a test paper.

soda-plant, s.

Bot.: *Salsola Soda*; applied also to any plant containing some salt of soda, as *Salicornia Salsola*, *Plantago squarrosa*, &c.

soda-powder, s. The same as SEIDLITZ-POWDER (q.v.).

soda-salts, s. pl. A popular name for the several salts of sodium (q.v.).

soda-water, s.

Chem.: An artificial aerated water containing a minute quantity of sodic bicarbonate. Many of the soda-waters manufactured in this country are simply aerated water, being entirely free from soda.

sō-dā-ite, s. [Eng. *soda*; suff. -ite (*Min*).]

Min.: The same as EKEBERGITE (q.v.).

sō-dā-lite, s. [Eng. *soda*, and Gr. *λίθος* (*lithos*) = a stone; *Ger. sodalith*.]

Min.: An isometric mineral occurring in rhombic dodecahedrons, also massive. Cleavage, dodecahedral. Hardness, 5 to 6; sp. gr. 2.136 to 2.4; lustre, vitreous to greasy; colours, gray, green, yellow, white, sometimes shades of blue, light red; fracture, conchoidal, uneven. Compos.: silica, 37.1; alumina, 31.7; soda, 19.2; sodium, 4.7; chlorine, 7.3 = 100, corresponding with the formula 2(3NaO)₂ 3SiO₂ + 3(2Al₂O₃ 3SiO₂) + 2NaCl. Occurs in metamorphic and old igneous rocks, also in recent volcanic rocks.

***sō-dāl'-i-tý, s.** [Lat. *sodalitas*, from *sodalis* = a companion.] A fellowship, a fraternity; an association for mutual protection, and objects, such as church services at deaths, &c.

"Sodalities of all sorts and conditions whatsoever, either secular or ecclesiastical."—*Parthena Sacra* (1633), p. 180.

sōd'-am-ide, s. [Eng. *sod(a)*, and *amide*.]

Chem.: An olive-green fusible compound, formed when sodium, which had been partly acted on with water, is heated in ammoniacal gas. The ammonia is absorbed and the hydrogen set free. It is also formed when oxygen and ammonia are passed over sodium.

sōd'-am-mō'-ni-um, s. [Eng. *sod(a)*, and *ammonium*.]

Chem.: H₂NNa. A compound formed by bringing pure bright sodium in contact with ammonia gas in a sealed tube, in presence of silver chloride. The sodium swells up and becomes liquid, appearing copper-red by reflection, and blue by transmitted light. The compound soon decomposes, pure sodium being left behind in a spongy condition.

sōd'-dēd, pa. par. or a. [SOD, v.]

sōd'-den, pa. par. & a. [SEETHE.]

A. *As pa. par.*: (See the verb).

B. *As adjective*:

1. Boiled, seethed.
2. Soaked and softened, as in water. (Applied to bread not well baked.)
3. Soaked, saturated: as, *sodden* with drink.

sōd'-den, v.t. & t. [SODDEN, a.]

A. *Intrans.*: To be seethed or soaked; to settle down as if by seething or boiling.

B. *Trans.*: To soak, to saturate; to fill the tissues of with water, as in the process of seething.

sōd'-dy, a. [Eng. *sod, s.*; -y.] Consisting of sod; covered with sod; turfy.

***sod-en, a.** [SUDDEN.]

***sō'-dēr, s. & v.** [SOLDER.]

***sod-eyn-liche, 'sod-eyn-ly, adv.** [SUDDENLY.]

sō-dī-ō-, pref. [SODIUM.] Having sodium in its composition.

sodio-potassic tartrate, s.

Chem.: C₄H₄KNaO₆ + 4H₂O. Rochelle or Seignette salt. Prepared by neutralising a hot solution of cream of tartar with sodium carbonate, and evaporating to a thin syrup. It crystallizes in large prismatic crystals, which effloresce slightly in the air, and dissolve in one and a half parts of cold water. It is purgative, and has a mild saline taste.

sō-dī-ūm, s. [SODA.]

Chem.: Sodium. A monad metallic element recognized as a distinct substance by Duhamel in 1736, and obtained in the metallic state by Davy in 1807. *Symb. Na.* At. wt. = 23. It is very widely diffused and abundant, occurring as chloride in sea water and salt springs, and as nitrate in South America, and is prepared by introducing an intimate mixture of thirty parts dry sodic carbonate, thirteen parts coal, and three parts chalk into an iron cylinder, heated in a reverberatory furnace, the pure metal distilling over. It has a high lustre and silver-white colour, sp. gr. 972, is hard at -20°, soft at ordinary temperatures, semifluid at 50°, and melts at 97°. It rapidly oxidizes in the air, and when dropped upon water decomposes it, liberating hydrogen, which takes fire if the water be previously heated. Sodium and its salts impart a beautiful yellow colour to the flame of the blow-pipe. It forms a monoxide and a dioxide, and a hydrate corresponding to the former.

¶ Sodium-alum = *Mendozite*; Sodium-borate = *Borax*; Sodium-carbonate = *Sodatron* and *Trona*; Sodium-chabasite = *Gmelinite*; Sodium-chloride = *Salt*; Sodium-mesotype = *Natrolite*; Sodium-nitrate = *Nitratine*; Sodium-spodumene = *Oligoclase*; Sodium-sulphate = *Thenardite* and *Mirabilite*.

sodium-bicarbonate, s.

Chem.: NaHCO₃. Bicarbonate of soda. Prepared by passing carbonic acid gas into a cold solution of the carbonate, or by placing the crystals in an atmosphere of the gas. It is a crystalline white powder, soluble in ten parts of water at 15.5°, but which cannot be dissolved in warm water without partial decomposition, feebly alkaline, and more pleasant to the taste than the carbonate. It is employed in the preparation of effervescent powders and draughts, and is an ingredient in baking-powders.

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hère, camēl, hēr, thère; pine, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, quito, oūr, rūle, fūll; trý, Sýrian. se, oe = ē; ey = ā; qu = kw.

sodium-bromide, s.

Chem.: NaBr. Obtained by saturating hydrobromic acid with soda. It crystallizes in anhydrous cubes or oblique rhombic prisms according to the temperature of evaporation. Sp. gr. at 17° = 3.079. Dissolves easily in water and alcohol.

sodium-carbonate, s.

Chem.: Na2CO3·10H2O. Washing-soda. Prepared by decomposing common salt with sulphuric acid, heating the resulting sulphate of sodium with chalk and small coal in a reverberatory furnace, lixiviating the mass with cold or tepid water, evaporating the solution to dryness, and calcining the product with sawdust in a suitable furnace. By dissolving the soda-ash (q.v.) formed in hot water, filtering, and allowing to cool slowly, the carbonate is deposited in large transparent crystals, which effloresce in dry air, and crumble to a white powder. When this is redissolved in water, filtered, and the solution carefully crystallized, it constitutes the pure carbonate of soda used in pharmacy.

sodium-chloride, s.

Chem.: NaCl. Common salt. Sea salt. Formed by direct union of its elements, and obtained in a state of considerable purity by recrystallization from brine springs. The rock-salt of Poland is nearly pure chloride of sodium, that of Cheshire contains 98.5 per cent. of the pure salt. It has an agreeable taste, crystallizes in colorless, anhydrous cubes, sp. gr. 2.1—2.57, melts at a red heat, dissolves in about three parts of cold water, and is only a little more soluble in boiling water; insoluble in absolute alcohol.

sodium-hydrate, s.

Chem.: NaHO. Caustic soda. Formed when protoxide of sodium (Na2O) is brought into contact with water, and prepared by decomposing the carbonate of soda with milk of lime, concentrating the clear filtrate and afterwards purifying by alcohol. The final product, when concentration is complete, is poured into moulds or on to plates to solidify. It is a white, opaque, brittle substance having a fibrous texture, melts below redness, is highly soluble in water, less easily in alcohol; sp. gr. = 2.0, and is extensively used for making soap.

sodium-iodide, s.

Chem.: NaI. This salt is contained in the mother liquor of kelp, and is prepared by dissolving iodine in soda and slightly calcining the residue to decompose the iodate. It crystallizes from water in anhydrous cubes, which are very soluble in water and alcohol.

sodium-oxide, s.

Chem.: (1) Monoxide or Protoxide, Na2O. Produced together with dioxide when sodium is burned in the air, and obtained pure when the dioxide is strongly heated or when equivalent quantities of oxide hydrate and sodium are heated. It is a gray mass, sp. gr. 2.805, and melts at a red heat. (2) Dioxide, or peroxide of sodium, Na2O2. Formed when sodium is burnt in oxygen gas until the weight is constant. It has a pure white colour, but turns yellow when heated, and white again on cooling. Added in the state of powder, very cautiously to water, it dissolves without decomposition, forming a solution of the dioxide.

sodium-salicylate, s. [SALICYLATE OF SODA.]

Sōd' -ōm, s. [Gr. Σόδα (Sōdōma); Heb. סוֹדָם (Sōdōm) = a burning, Sodom.]

Script. Geog.: One of the wicked cities of the plain destroyed by fire from heaven. (Gen. xix. 24, 25.)

Sodom-apple, s. [A. PLE, L. 4.]

Sōd' -ōm-īte, s. [Eng. Sodom; -īte.]

- 1. An inhabitant of Sodom.
2. One given to or guilty of sodomy.

sōd' -ōm-īt' -ō-āl, a. [Eng. sodomite(s); -īteal.] Pertaining or relating to sodomy.

sōd' -ō-mŷ, s. [Fr. sodomie, from Sodomite = Sodom, from the crime being imputed to the inhabitants of Sodom.] An unnatural crime; carnal copulation against nature.

sōs, * sō, s. [A.S. sa; Fr. seau; Ger. sau, sau.] A tub with two handles, carried by

means of a pole passing through the handles; a large wooden vessel for water.

"Filde ther a muckel so." Havelok, 822.

sōe' -fūl, s. [Eng. see; -fūl(l).] As much as a see will hold.

"Then for one basonful you may fetch up so many softils." H. More: Antidote against Atheism, pt. 1, bk. II, ch. vi.

Soem'-mēr-īng, s. [Dr. Samuel Thomas Soemmering, a German anatomist (1755-1830).] (See etym. and compound.)

Soemmering's gazelle, s.

Zool.: Antelope soemmeringii, from Eastern Abyssinia. It is about thirty inches high, sandy fawn above, with massive lyrate horns, which are more slender in the female. It is sometimes called the Abyssinian Mohr to distinguish it from the Mohr or Mohrr (Antelope mohr), an allied species in Western Africa.

Soemmering's mirror, s. An instrument for drawing objects under the microscope. It is a plane mirror of polished steel, less in diameter than the pupil of the eye, supported opposite the focus of the eyepiece. It inverts the objects. (Griffith & Henfrey.)

sō-ēv' -ēr, adv. [Eng. so, and ever.] A word used in composition with pronouns or adverbs to extend or emphasize the meaning; as, whosoever, whatsoever, wheresoever. It is sometimes separated from its pronoun, as, "What bloody work soever." (Shakespeare: Othello, iii. 3.)

sō'-fa, * sō'-phā, s. [Arab. suffat, suffah = a sofa, a couch, from safa = to draw up in line, to put a seat to a saddle; Fr. & Sp. sofa.] A long stuffed couch, with seat, back, and ends upholstered.

"The king leaped off from the sofa on which he sat, and cried out, 'Tū my Abdallah.'" Guardian, No. 167.

sō'-fi, s. [Per soft, soft; cf. Gr. σοφός (sophos) = wise.] One of a religious order in Persia, also called Dervishes. [SOFISM.]

sō'-fiṣm, sū'-fiṣm, s. [SOFI.]

Muham.: The mystical and pantheistic doctrines of the Sofis. They consider that God alone exists; that he is in all nature, and that all nature is in him, the visible universe being an emanation from his essence. God is the real author of the deeds of men, and there is therefore no valid distinction between good and evil. The passages in the Koran which speak of a paradise and a hell are only allegorical. Man's soul existed before his body, and will transmigrate when he dies into other bodies till sufficiently purified to be absorbed into the Deity.

sōft', * softē, a., adv., & interj. [A.S. sōfte softly; O. Sax. sōfto; Ger. sanft; O. H. Ger. samfto.]

A. As adjective: 1. Ordinary Language: 1. Easily yielding to pressure; yielding, impressible, easily penetrated; not hard or compact.

"Hard and soft are names we give things, only in relation to the constitutions of our own bodies; that being called hard, which will hurt us to pain sooner than change figure, by the pressure of any part of our bodies; and that soft, which changes the situation of its parts upon an easy touch." Locke: Human Understanding, bk. II, ch. iv.

2. Easily assuming or altered to a change of form; hence, easily worked, malleable.

"Spirits can either see assume: so soft And uncompounded is their essence pure." Milton: P. L., l. 424.

3. Easily yielding to pressure, persuasion, or motives; impressible, facile, weak, impressionable.

"A few divines of so soft and servile tempers as disposed them to so sudden acting and compliance." King Charles: Eikon Basilike.

4. Delicate, fine, not coarse; hence, feminine. "Her foris . . . more soft and feminine." Milton: P. L., bk. ix. 458.

5. Tender, timorous, fearful, timid. "However soft within themselves they are, To you they will be valiant by deed." Dryden, (Todd.)

6. Civil, complaisant, courteous; not rough, rude, or irritating.

"A soft answer turneth away wrath." Prov. xv. 1.

7. Mild, gentle, kind; easily moved by pity; lenient, not harsh or severe; susceptible of kindness, mercy, or other tender affections.

"His mind was at best of too soft a temper for such work as he had now to do, and had been recently made softer by severe affliction." Macaulay: Hist. Eng., ch. xlv.

8. Gentle in action or motion; steady and even; not rough.

9. Effeminate; not manly or spirited; viciously nice or delicate.

"And more than all, his blood-red flag soft. He marvel'd how his heart could seem so soft." Byron: Corsair, l. 14.

10. Gentle, easy, undisturbed. "Soft stillness and the night Become the touches of sweet harmony." Shakespeare: Merchant of Venice, v.

11. Not harsh or plain-spoken; mild.

"For these faults excuses and soft names were found." Macaulay: Hist. Eng., ch. xv.

12. Affecting the senses in a gentle, mild, or delicate manner; as,

(1) Smooth, flowing; not rough or harsh; gentle or melodious to the ear.

"Her voice was ever soft, Gentle and low." Shakespeare: Lear, v. 3.

(2) Smooth to the taste; not sharp or acrid.

(3) Not harsh or offensive to the sight; not strong or glaring; not exciting or offensive by intensity of colour or violent contrast; as, soft colours.

(4) Agreeable to perceive or feel.

"As sweet as balm, as soft as air." Shakespeare: Antony & Cleopatra, v. 2.

(5) Smooth and agreeable to the touch; not rough, rugged, or harsh; delicate, fine.

"What went ye out for to see? A man clothed in soft raiment? Behold they that wear soft clothing are in kings' houses." Matthew xl. 5.

¶ Hence, applied to textile fabrics, as opposed to hardware; as, soft goods.

13. Foolish, simple, silly.

14. Free from mineral salts, and washing well with soap; as soft water.

II. Pronoun.: Not pronounced with a hard, explosive utterance, but with more or less of a sibilant sound; as the c in cinder, and the g in gin, as distinguished from the same letters in candle and gift.

B. As adv.: Softly, gently, quietly. "Soft unto himself he said." Chaucer: C. T., l. 1724.

C. As subst.: A soft person; one who is silly, weak, or foolish. (Colloq.)

"If you've got a soft to drive you." G. Eliot: Adam Bede, ch. ix.

D. As interj.: Be gentle, go gently or softly; hold! stop!

"Soft! no haste!" Shakespeare: Merchant of Venice, iv. 1.

¶ To tread softly is an art which is acquired from the dancing-master; to go gently is a voluntary act; we may go a gentle or a quick pace at pleasure. Words are either soft or gentle; a soft word falls lightly upon the person to whom it is addressed; it does not excite any angry sentiment. A censure, an admonition, or a hint, is gentle, which bears indirectly on the offender, and does not expose the whole of his infirmity to view; a prudent friend will always try to correct our errors by gentle remonstrances. Persons, or their manners, are termed soft and gentle, but still with similar distinctions: a soft address, a soft air, and the like, are becoming or not, according to the sex; in that which is denominated the softer sex, these qualities of softness are characteristic excellencies; but even in this sex they may degenerate, by their

cross, into insipidity; and in the males sex they are compatible only in a small degree with manly firmness of carriage. Gentle manners are becoming in all persons who take a part in social life; gentleness is, in fact, that due medium of softness which is alike suitable to both sexes, and which it is the object of polite education to produce. (*Orabh.*)

¶ *Soft* is largely used in compounds, the meanings being in most cases sufficiently obvious: as, *soft-breathing*.

soft-tortoises, s. pl. [MUD-TORTOISES.]

* **soft, v.t.** [SOFT, a.] To make soft; to soften.

sof-tag, s. pl. [From Pers. *soulte* = burnt, meaning consumed by the divine love and devoted to a life of meditation.]

Muhammadanism: The pupils who study Muhammad law and theology in the medrissas or secondary schools attached to the mosques. They are hoarded in the imarets or free hotels kept up with the revenues of the vakouf property or pious legacies. Their clothing and bedding are furnished by their families, if these are in a position to do so, if not by charity. The number of softas is very great, because they are exempt from military service. After long study of the Arabic language, the Koran, and its commentaries, they pass an examination, which is almost always successful, and which authorizes them to assume the title of *khodjas* (q.v.). The name is also applied to all the classes connected with the mosques: Ulemas, Imams, *Khodjas*, and students of theology or of the jurisprudence of the Koran. Most of them are distinguishable by wearing a white turban around their fez. The Sultan Abdul Medjid (1839-1861) endeavoured to induce his subjects to wear a European dress, and succeeded so far that almost every one, except the very lowest

in the public service, adopted it. But the softas, to a man, retain the old-fashioned baggy, slouching dress which Abdul Medjid wished to get rid of. This is an indication of the conservatism of the class. In May, 1876, the softas were the authors of a revolution at Constantinople, their chief seat; they dictated the dismissal of the grand vizier, and were obeyed. Afterwards they made a movement against the sultan himself.

* **softe, a. & adv.** [SOFT, a.]

1. Chem. & Agric.: The top stratum of the earth's crust, whence plants derive their mineral food. It also contains a certain proportion of humous substances derived from the decayed organic matter of plants which have grown on it. This acts the part of a weak acid, and possesses the property of decomposing salts, as sulphates of ammonia, potash, &c., retaining the base, and giving up its lime or magnesia to the mineral acid. The humous principles also yield, under the oxidizing action of the air, ammonia, carbonic acid gas, and nitrates for the nutriment of the plant. [See soil.] Soils are classified according to their chief ingredients, as loamy, clayey, sandy, chalky, and peaty. The first is the best for most purposes, but the others may be improved by the addition of the constituents of which they are deficient.

"The vine is more affected by the difference of soils than any other fruit-tree."—Smith: Wealth of Nations, bk. I, ch. xi.

so'-kô, s. [Native name.]

Zool.: An anthropoid ape, probably a species of Troglodytes, described by Livingstone as living west of Lake Tanganyika. (See extract.)

"They often go erect, but place the hand on the head as if to steady the body. . . . When seen thus, the soke is an ungainly beast. . . . His right yellow face shows off his hairy whiskers and his faint apology for a beard; the forehead villainously low, with high ears, is well in the background of the great dog-mouth; the teeth are slightly human, but the canines show the best by their large development. The hands, or rather the fingers, are like those of the natives. The flesh of the feet is yellow. . . . The soke is represented by some to be extremely knowing, successfully stalking men and women while at their work; kidnapping children, and running up trees with them."—Livingstone: Last Journals (ed. W. A. Leitch), li. 62, 63.

soil (1), s. [Lat.]

*1. Ovil. Lang.: The sun.

"Not yet—not yet—not passing on the hill— The precious hour of partings still."—Byron: Corsair, li. 1.

II. Technically:

- *1. Alchemy: Gold.
- *2. Her.: A term implying or, or gold, in blazoning the arms of emperors, kings, and princes by planets, instead of metals and colours.

soil-lunar, a.

Pathol.: Emanating from the sun and the moon. Applied to an influence said to be excited by the sun and moon in conjunction on the paroxysms of fever.

soil (2), s. [Sov.] A small bronze French coin, now called a Sou.

soil (3), s. [Ital.]

Music:

- 1. A syllable applied in solmization (q.v.) to the fifth tone of the diatonic scale.
- 2. The tone itself.

sol-fa, v.t. & t.

A. Intrans.: To sing the notes of the musical scale up or down to the syllables do (or ut), re, mi, fa, sol, la, si.

B. Trans.: To sing a musical composition to the syllables do (or ut), re, mi, fa, sol, la, si.

so-la', interj. [Of no etym.] Here! Stop!

"Sola! Did you see master Lorenzo? Master Lorenzo, sola, sola!"—Shakespeare: Merchant of Venice, v.

so'-la, shô'-la, s. [Bengalee.]

Bot. & Comm.: Aschyromene aspera, a small, half-floating papilionaceous bush found in marshes in Bengal, and growing most during the season of inundation. In Burmah a fibre is made from the bark. The pith is used in India for making light sola hats, worn constantly by Europeans. They are generally covered with white cloth and sometimes have a cream-coloured turban round. The Bengalees use the sola as floats for nets, and the pith for decorations in temples.

soil'-age, v.t. & i. [O. Fr. solasier, solacere.] [SOLACE, s.]

A. Transitive:

- 1. To cheer in grief, trouble, or calamity; to comfort, to console; to relieve in affliction. (Applied to persons.)

"Those lips are thine—thy own sweet smile I see, The same that oft in childhood soothed me."—Cooper: On My Mother's Picture.

2. To allay, to assuage, to alleviate.

"Solace our anguish."—Blackmore: Creation, v.

*3. To delight, to amuse.

"Themselves did solace each one with his dame."—Spenser: F. Q., li. ix. 4.

* B. Intransitive:

- 1. To take comfort; to be cheered, comforted, or consoled.

"Were they to be rul'd, and not to rule, This sickly land might solace us before."—Shakespeare: Titus Andronicus, iii. 1.

2. To be happy; to take delight.

"One poor and loving child, But one thing to rejoice and solace in."—Shakespeare: Romeo & Juliet, iv. 5.

soil'-age, *sol-as, s. [O. Fr. solaz, from Lat. solatium = comfort, from solatus, pa. par. of solare = to console (q.v.).]

1. Comfort in grief, trouble, or calamity; consolation; alleviation of grief or anxiety; that which solaces, comforts, or relieves.

"By the solace of his own pure thoughts Upheld."—Wordsworth: Excursion, bk. vii.

*2. Happiness, delight.

*soil'-age-mént, s. [Eng. solace; -ment.] The act of solacing or comforting; the state of being solaced or comforted.

*so'-la'-cious, *so-la-cy-ouse, a. [O. Fr. solacieux.] Affording solace, comfort, or amusement; solacing.

"His matter is delectable, Solacious and commendable."—Shelton: Philip Sparrow.

so'-lan, so'-land, *su-land, s. [Icel. sulá = gainet, (Skál.)] [BOOBY.] (See compound.)

solan-goose, soland-goose, s.

Ornith.: The gannet, Sula leucogaster. Bill grayish white, naked skin of the face blue, iris pale yellow, head and neck buff, the primaries black, all the rest of the plumage white in the adult, front of the legs and tarsi green. Length thirty-four inches. They breed in immense numbers on the Bass Rock, in the Frith of Forth, the coasts of the Baltic,

Iceland, North America, and South Africa. [BOOBY, GANNET.]

sō-la-nā'-pō-sē, s. pl. [Lat. *solan(um)*]; fem. pl. adj. suff. -*aceæ*.]

Bot.: Nightshades; the typical order of Solanaceae (q.v.). Herbs or shrubs; alternate, undivided, lobed leaves; calyx five or four-parted, persistent, inferior; corolla monopetalous; the limb five or four-cleft, generally nearly regular, deciduous; stamens alternate with the segments of the corolla and as numerous; ovary two-celled, composed of one carpel to the right and the other to the left of the axis, rarely four-, five-, or many-seeded, with axile placentae; fruit capsular, with a double dissepiment parallel to the valves, or a berry with the placentae adhering to the dissepiment; seeds numerous, albumen fleshy. Chiefly tropical plants, narcotic and excitant, or bitter and tonic, pungent or stimulant. (Lindley.) Endlicher divided the order into six tribes: Nicotianae, Datureae, Hyoscyameae, Solanaceae, Cestrineae, Vestigiae, and made Retziaceae a distinct order. Mr. Miens separates the order into two, Atropaceae and Solanaceae. Known genera sixty, species about 1,000. They are widely distributed through all the continents.

sō-la-nā'-ceōūs (ce as sh), a. [SOLANACEAE.] Of, pertaining to, or resembling plants belonging to the order Solanaceae.

sō-la-nā'-nal, a. [SOLANAE.] Of or belonging to Solanum or the Solanaceae; as, the Solanal Alliance.

sō-la-nā'-lēp, s. pl. [Masc. or fem. pl. of Mod. Lat. *solanatis*, from Lat. *solanum* (q.v.).]

Bot.: The Solanal Alliance; Perigynous Exogens, with dichlamydeous, monopetalous, symmetrical flowers; axile placentae, two to three-celled fruit, and a large embryo lying in a small quantity of albumen. Orders: Oleaceae, Solanaceae, Asclepiadaceae, Cordiaceae, Convolvulaceae, Cuscutaceae, and Polemoniaceae.

sō-land, s. [SOLAN.]

sō-lān'-dēr, s. [Fr. *soulardres*.] A disease in horses.

sō-lān'-dra, s. [Named after Daniel Charles Solander, LL.D. F.R.S., a Swede, who accompanied Sir Joseph Banks as botanist in his voyage round the world.]

Bot.: A genus of Solanaceae akin to Datura. Chiefly from tropical America. Cultivated in greenhouses for their fine flowers.

sō-lā'-nō-sē, s. pl. [Lat. *solan(um)*]; fem. pl. adj. suff. -*ex*.]

Botany:

1. The same as SOLANACEAE.
2. The typical tribe of Solanaceae.

sō-lān'-ī-cīno, s. [Eng. *solan(ine)*; *c* connect., and suff. -*ine*.]

Chem.: C₅₀H₇₈N₂O (?) A base produced by the action of cold concentrated hydrochloric acid on solanine. It is very slightly soluble in alcohol and water, yields slender needles, melts above 250°, is coloured red by strong acids, and forms yellow amorphous salts.

sō-lān'-ī-dīno, s. [Eng. *solan(ine)*; *id* connect. and suff. -*ine*.]

Chem.: C₂₆H₄₁N₂O₂ (?) A base produced together with glucose by the action of dilute boiling hydrochloric acid on solanine. It dissolves easily in ether and alcohol, and crystallizes from the latter in colourless, silky needles, which melt above 200°. With strong sulphuric acid it forms a dark red solution, and with more dilute acid a transient bluish-red. Its solutions are bitter.

sō-lān'-īno, s. [Mod. Lat. *solan(um)*]; -*ine* (Chem.).]

Chem.: C₄₃H₇₁N₂O₁₆ (?) An organic base existing in several species of Solanum. To obtain it the juice of the ripe berries is precipitated by ammonia, and the precipitate purified by recrystallization from alcohol. It crystallizes in slender silky needles, slightly soluble in cold, easily in hot alcohol, nearly insoluble in water and ether, has a slightly bitter and burning taste, and is very poisonous. It melts at 235°, and forms acid and neutral salts, all of which are soluble in water.

sō-la'-nō, s. [Sp., from Lat. *solanus* (*venetus*) = an easterly (wind), from *sol* = the sun.] A hot, oppressive, south-east wind in Spain. It is a modification of the windoom (q.v.).

sō-lā'-nūm, s. [Lat. = a kind of nightshade, *Solanum nigrum*.] (See def.)

Bot.: Nightshade; the typical genus of Solanaceae. Herbs or shrubs, rarely trees. Flowers in or above the forks of the stem, solitary, fascicled, or cymose, white or blue; calyx with four to ten segments, corolla rotate, five to ten lobed, with five exserted stamens, anthers opening by two pores at the extremity; berry roundish, two or more celled, with many reniform seeds. Known species between 500 and 600, most of them from the tropics, others from temperate climates. Two well-known species are: *Solanum Dulcamara*, the Woody Nightshade or Bittersweet (q.v.) and *S. nigrum*, the Common Nightshade. The latter has a herbaceous and thornless stem; ovate, binately toothed and waved leaves; lateral drooping umbels of white flowers, and black, rarely green, berries. It is frequent in waste places, fields, &c., flowering from June to November. It is distributed through most parts of the world. A variety, *S. miniatum*, with scarlet berries, is found in Jersey and Guernsey. The foliage of *S. Dulcamara* is narcotic, and its berries are unsafe to eat. In India it is used in decoction in chronic rheumatism, psoriasis, &c. A grain or two of the dried leaf of *S. nigrum* produce narcotic effects and visceral disturbance. The leaves when bruised are applied in poultices or baths to painful wounds. The berries are considered by the Hindoos to be tonic and diuretic, and the juice a hydragogue, cathartic, and diuretic; they are given in dropsy, &c. A syrup prepared from the plant is used as a cooling drink in fevers, and as an expectorant and diaphoretic. *S. tuberosum* is the Potato (q.v.), the leaves are powerfully narcotic and used in chronic rheumatism, painful affections of the stomach, &c. The fruit of *S. Melongena*, the egg-plant, and *S. verbascifolium* are used in India in curries. The berries of *S. coagulans*, *S. zanthocarpum*, wild in India, and the fruits of *S. gracilipes*, a garden escape there, are eaten. The last two, with *S. feroc*, *S. indicum*, *S. trilobatum*, are also used medicinally in India. Fumigation with the burnt fruit of many of them is a domestic remedy for toothache. *S. pseudoquina* produces the quina of Brazil. *S. mammosum*, *S. paniculatum*, *S. guineense* are diuretic; a decoction of the leaves of *S. cernuum* is a powerful astringent. *S. marginatum* is used in Abyssinia for tanning leather. The berries of *S. muricatum*, *S. nemorense*, and *S. quittoense* are eaten. *S. laciniatum* produces the Kangaroo Apple of Tasmania, which is eaten.

sō-lar, a. [Lat. *solaris*, from *sol* = the sun; Fr. *solaire*; Sp. *solar*; Ital. *solare*.]

1. Of or pertaining to the sun.
2. Produced by or proceeding from the sun.
 - "Our solar system consists of the sun, and the planets and comets moving about it."—Locke: *Natural Philosophy*, ch. iii.
 - "By her instructed, meets the solar ray, And grows familiar with the blaze of day!"—Boyle: *To the Duke of Gordon*.
3. Measured by the progress of the sun, or by its apparent revolution.
 - "Ve Adar was an intercalary month, added, some years, unto the other twelve, to make the solar and lunar year agree."—Raleigh: *His. World*, bk. ii, ch. iii.
 - "4. Born under the sun in the predominant influence of the sun.
 - "And proud beside, as solar people are."—Dryden: *Cock & Fox*, 652.

solar-apex, s.
Astron.: The point of space to which it has been supposed the solar system is tending. [SOLAR-SYSTEM.]

solar-aphyxia, s. Same as SUNSTROEA.

solar-camera, s.
Photog.: A camera in which the sun's rays are transmitted through a transparent negative.

solar-constant, s. The constant expressing the amount of solar heat received by the earth; estimated at 30 calories a minute for each square meter of the earth's surface.

solar-cycle, s. [CYCLE.]
solar-day, s. [DAY.]
solar-eclipse, s. [ECLIPSE, s.]

solar-engine, s. An engine in which the heat of the solar rays is concentrated to evaporate water or expand air used as a motor for a steam or air engine.

solar-eye-piece, s. An arrangement by which the light and heat are reduced in solar observations by observing only a very minute portion of the solar surface.

solar-flowers, s. pl. Flowers which open and shut daily at certain determinate hours.

solar-lamp, s. An Argand-lamp (q.v.).

solar-microscope, s. A microscope which throws the magnified image of an object illuminated by the sun's rays upon a wall or screen.

solar-month, s. [MONTH.]

solar-myth, s.
Compar. Mythol.: A nature myth embodying, or supposed to embody a description of the sun's course in heroic legend, and used, notably by Max Müller and Cox, to explain the mythology of Aryan nations. (See extract.)

"Of this vast mass of solar-myths, some have merged into independent legends, others have furnished the groundwork of whole epics. . . . The legends of Kephelos and Prokris, of Daphné, Narxissos, and Eudamion, have come down to us in a less artificial form than that of Heraklis, while the myth of Heraklis has been arrested at a less advanced stage than those of Zeus and Apollon. But all alike can be translated back into mythical expressions, and most of these expressions are found in the Vedas with their strict mythological meaning."—Cox: *Myth. Aryan Nations*, l. 85.

solar-oil, s.
Chem.: A name given in commerce chiefly to the heavier portions of petroleum or shale-oil.

solar-phosphori, s. pl. Substances which become luminous in the dark, after having been exposed to solar rays, the electric, or, in a less degree, lime the light. Calcined oyster shells are a good example.

solar-physics, s. The science treating of the various physical phenomena of the sun.

solar-plexus, s.
Anat.: A plexus at the upper part of the abdomen behind the stomach and in front of the aorta and the pillars of the diaphragm. It is the largest of the pre-vertebral centres. Called also the Epigastric Plexus.

solar-prominences, s. pl. [PROMINENCE, II. 1., SUN.]

solar-spectrum, s. [SPECTRUM.]

solar-spots, s. pl. [SUN-SPOTS.]

solar-system, s.
Astron.: The sun and the various bodies which revolve around him, deriving from him their light and heat. The enumeration of these bodies, deemed by the ancients complete, was: the Earth (in the centre), then the Moon, Mercury, Venus, the Sun, Mars, Jupiter, and Saturn, seven in all. [WEEK.] Now planets, primary and secondary, are regarded as only one, though certainly a very important, part of the solar system. Of the major planets, called simply the planets, eight are recognized: Mercury, Venus, the Earth, Mars, Jupiter, Saturn, Uranus, and Neptune. Of the secondary planets, or satellites, including the Moon, twenty. The minor planets—which have been popularly designated as asteroids—but are now more generally termed planetoids—number about 350 so far as is now known; and very few of these exceed 100 miles in diameter. [See ASTEROID.]

Among other bodies revolving round the sun in more or less eccentric orbits are many comets, and a number of meteoric rings, some of which have been found to have a close relation to certain comets.

The orderly movements of the several bodies in the solar system is effected mainly by gravitation. Loosely stated, the planets revolve around the sun. What really takes place is that they revolve around the centre of gravity common to him and them, but his mass so much outweighs the aggregate of their masses that the point around which the revolution takes place, though not the sun's centre, is still within his mass. Their revolution also somewhat alters his position. When several of the large planets are together on the same side they draw the sun a certain small distance from his place; then, as they go round to the other side, they gradually

attract him back again: so that the stability of the solar system is not disturbed. [PERJURATION.] That system constitutes part of the Galaxy (q.v.) and is moving to a point in the constellation Hercules.

The Nebular Hypothesis (q.v.), as to the origin of the solar system, after being discredited for a time, revived with the discoveries made by the spectroscopy (q.v.), and in 1877 Dr. T. H. Gladstone, F.R.S. (*Brit. Assoc. Report*, 1877, ii. 41, *Phil. Mag.*, 1877), said:—

"Supposing the solar system to have been originally a great revolving nebula of the description common to certain smaller masses, and forming from its outer portions smaller masses, such as the planets and their satellites, or the comets and meteorites, we may expect them to consist principally of the more volatile or the lightest elements, with smaller portions of the less volatile or heavier ones. On arranging the elements of which the earth is composed according to the known or presumed density of the vapours it is found that such is actually the case."

Regarding the age of the earth and of the solar system generally, physicists, as represented by Sir Wm. Thomson, Prof. Tait, &c., and geologists, led by Prof. Huxley, are at variance. [GEOLOGY, I. (3).] Nor is there any agreement as to its probable future duration. [COPERNICAN, KEPLER, PTOLEMAIC, &c.]

solar-telegraph, s. A telegraph in which the rays of the sun are projected from and upon mirrors. The duration of the rays makes the alphabet, after the system of Morae. [HELIOGRAPH.]

solar-time, s. The same as APPARENT-TIME. [TIME.]

solar-year, s. [YEAR.]

sō-lar, s. [Lat. *solarium* = a gallery or balcony exposed to the sun; *sol* = the sun.]

Arch.: A loft or upper chamber; a sollar.

sō-lār-i-dēs, s. pl. [Mod. Lat. *solarium*]; Lat. fem. pl. adj. suff. *-idēs*.]

Zool.: A family of Prosobranchiate Gasteropods, with several genera. Type, *Solarium* (q.v.). [Tate.]

sō-lar-ism, s. [Eng. *solar*; *-ism*.] The doctrine of solar myths. [SOLAR-MYTH.]

"Whom he charges with a wrong use of etymology in regard to *solarism* as the exclusive key to solve the problems of Aryan religions."—*Daily Telegraph*, Dec. 31, 1885.

sō-lar-ist, s. [Eng. *solarism*]; *-ist*.] A supporter of the doctrine of solar myths.

"The use made by the solarists of far-fetched etymologies."—*Standard*, Oct. 20, 1885.

sō-lār-i-ūm, s. [Lat. = s. sun-dial.]

Zool. & Palaeont.: Staircase-shell; a genus of Littorinidae (*Woodward*), of Solaridae (*Tate*). Shell orbicular, depressed, umbilicus wide and deep; aperture rhombic, peristome thin; operculum horny, sub-spiral. The edges of the whorls seen in the umbilicus have been fancifully compared to a winding staircase. Twenty-five recent species, widely distributed over sub-tropical and tropical seas; fossil species numerous, from the Oolite onward.

sō-lar-i-zā-tion, s. [Eng. *solarize*(*o*); *-ation*.] Photog.: Injury caused to a photographic picture by exposing it for too long a time in the camera to the light of the sun.

sō-lar-ize, v. i. [Eng. *solar*, a.; *-ize*.] Photog.: To become injured, as a photographic picture, by too long exposure to the rays of the sun.

sō-lar-ī (1), a. [Lat. *solaris*, from *sol* = the sun.] Solar.

"Months are not only lunar, and measured by the moon, but also solar, and determined by the motion of the sun."—*Brownie: Vulgar Errors*, bk. iv., ch. xii.

sō-lar-ī (2), a. [Lat. *solatus* = the ground.] Of or belonging to the ground; proceeding from the ground.

"From the like spirits in the earth the plants thereof perhaps acquire their verdure. And from such solary irradiations may those wondrous varieties arise, which are observable in animals."—*Brownie: Vulgar Errors*, bk. vi., ch. xii.

sō-las, s. [SOLACE.]

sō-lā-tl-ūm (tl ss shī), s. [Lat. = a comfort, a solace (q.v.).]

I. *Ord. Lang.*: Anything which consoles or compensates for suffering or loss; a compensation.

II. *Technically*:

1. *Law*: A sum of money paid over and

above actual damages to an injured party, by the person who inflicted the injury, as solace for wounded feelings.

2. *Eccles.*: An additional daily portion of food allotted to the inmates of religious houses under exceptional circumstances.

sōld, pret. & pa. par. of *v.* [SKILL, *v.*]

sōld-note, s. [BOUGHT & SOLD NOTE.]

***sōld**, ***sōuld**, s. [Fr. *solde*, *sould*, from Lat. *solidus* = a piece of money.] Military pay; salary, pay.

"Smyte ye no man wrongfully, nether mak ye fals challenge, and be ye awayed with yours *sould*."—*Wyclif: Luke* iii.

***sōl-da-dō**, s. [Sp.] A soldier.

1. *Lit.*: A metal or alloy used to unite adjacent metallic edges or surfaces. It must be rather more fusible than the metal or metals to be united, and with this object the components and their relative amounts are varied to suit the character of the work. (See extract.)

"Hard solders are such as require a red heat to fuse them; they are employed for joining brass, iron, and the more refractory metals. Soft solders melt at a comparatively low temperature, and are used with tin and lead, of which metals they are wholly or in part composed. Common tin solder, composed of 1 tin and 3 lead, is perhaps the best-known example of this class. Spelter and silver solders are the most generally used among the hard solders."—*Knights: Dict. "A concave sphere of gold filled with water and soldered up."—*Newton: Opticks*.

*2. *Fig.*: To unite or cement together in any way; to patch up.

"As if the world should cleave, and that slain men Should solder up the rift."—*Shakesp.: Antony & Cleop.*, III. 4.

sōl-dēr-ēr, s. [Eng. *solder*, v.; *-er*.] One who or a machine which solders.

sōl-dēr-īng, s. [SOLDER, *v.*] The process of uniting two pieces of the same or of different metals by the interposition of a metal or alloy, which, by fusion, combines with each. In autogenous soldering, the two pieces are directly united by the partial fusion of their contiguous surfaces. In the ordinary process of soldering small articles, together, and then, with his soldering-iron, which has been previously heated in a furnace, melts off sufficient solder from the stick or cake, allowing it to flow on and between the parts to be joined; the hot iron is then applied to the joint, so as to cause the solder to become uniformly fluid, equalize its distribution, and smooth its exposed surface. The surfaces to be joined must be perfectly cleaned by filing or scraping, and the flow of the melted solder is also assisted by the employment of certain substances as either deoxidisers or fluxes; amongst these, resin, sal-ammoniac, or muriatic acid are chiefly used. Instead of a soldering-iron, some form of blow-pipe is often employed to heat the solder. Another

method sometimes employed to solder small brass articles is to face and clean the two surfaces, rub them with sal-ammoniac or dilute acid, and then squeeze them into contact with a piece of tinfoil between them. When the whole is heated, the two are soldered together by the melted tinfoil.

soldering-blowpipe, s. A portable gas blowpipe, which can be attached by a flexible tube to any gas supply. Another flexible tube allows a blast from the mouth to be blown through the centre of the gas flame, which can be directed to any part of a water-pipe or other article. The usual form of blow-pipe is also often used for soldering purposes.

soldering-bolt, **soldering-iron**, **soldering-tool**, s. A copper-bit (q.v.).

sóle (2), ***sóal** (2), s. [Fr. *sole*, from Lat. *solea* = the sole of the foot, a sole.] [SOLE (1), s.]

Ichthy.: Any individual of the genus *Solea* (q.v.); specif., *Solea vulgaris*, the Common Sole, in high estimation as a food-fish, the flesh being white, firm, and well-flavoured, and only inferior to that of the turbot. Soles abound on the west coast of Europe and throughout the Mediterranean. The largest supply comes from the North Sea. Several other European species are used for food, in a minor degree. The upper side of the body is dark brown, the lower side white, and they stain a weight of six or seven pounds. They spawn in the spring, and, except for a few weeks in the breeding season, are in condition all the year round.

sóle, v.t. [SOLE (1), s.] To furnish with a sole: as, To sole a pair of boots; to cover with a sole.

"His feet were soled with a treble tuft of a close short lawn down."—Grew: *Museum*.

sóle, a. & adv. [O. Fr. *sol* (Fr. *seul*) = sole, from Lat. *solus* = alone; Sp. & Ital. *solo*.]

A. As adjective:

I. Ord. Lang.: Single, unique; alone in its kind; only; being or acting alone, without another or others.

"The offspring of one sole unmade Deity."—Cudworth: *Intel. System*, p. 570.

* 1. Ord. Lang.: The under surface of the foot or hoof of an animal.

2. *Ichthy.*: A genus of Pleuronectidae, with about forty species, from the coasts of temperate and tropical seas; absent only from the southern portion of the southern temperate zone. Some of the species enter or live in fresh water. Eyes on right side, upper in advance of lower; mouth-cleft narrow, twisted to the left side; villiform teeth, on the blind side only. Dorsal commences on snout, distinct from caudal; lateral line straight; scales small and ctenoid. There are no Soles of any economic value on the Atlantic coast of the United States, but several species which are used for food occur in Europe, particularly the Common Sole (*S. vulgaris*). [SOLE.]

† **só-lé-æ-form**, a. [Lat. *solea* = a sandal, and *forma* = form.]

Bot.: Slipper-shaped.

sól-é-cis-m, ***sol-e-cis-m**, s. [O. Fr. *solecismus*, from Lat. *solecismus*, accus. of *solecismus*; Gr. *σολοικισμός* (*sololikismos*) = a solecism, from *σολοικίζω* (*sololikizō*) = to speak incorrectly, from *σολοικος* (*sololikos*) = speaking incorrectly, like an inhabitant of Σόλοι (Sóloi), in Cilicia, a place colonised by Athenian emigrants, who soon corrupted the Attic dialect, which they at first spoke correctly; Fr. *solecisme*; Sp. & Ital. *solecismo*.]

1. An impropriety of speech; an impropriety of language arising from ignorance; a gross deviation from the idiom of a language or from the rules of syntax. By modern grammarians the term is often applied to any word or expression which violates any established usage of speaking or writing. Hence, that which is considered at one time a solecism may at another be considered as correct language, owing to the change constantly going on in the use and application of words or idioms.

"The learned doctor represents it as a great solecism to speak of an ell or a mile of consciousness."—Waterland: *Works*, I. 209.

2. Any unfitness, absurdity, or impropriety, as in behaviour; a violation of the rules of society.

"My mind lately prompted me, that I should commit a great solecism, if among the rest of my friends in England, I should leave you unassailed."—Howell: *Letters*, II. l. et. 40.

* **sól-é-cist**, s. [Gr. *σολοικιστής* (*sololikistēs*).] One who is guilty of a solecism in language or behaviour.

"Shall a noble writer, and an inspired noble writer, be called a *solecist*, and barbarian, for giving a new turn to a word so agreeable to the analogy and genius of the Greek tongue?"—Blackwell: *Sacred Classics*, I. 159.

* **sól-é-cist-ic**, * **sól-é-cist-ic-al**, a. [Eng. *solecist*; -ic, -ical.] Pertaining to, involving, or of the nature of a solecism; incongruous, incorrect.

"The use of these combinations with respect to the pronouns is almost always solecistical."—Tyrwhitt: *Gloss. to Chaucer*, a. v. *Self*.

* **sól-é-cist-ic-al-ly**, adv. [Eng. *solecistical*; -ly.] In a solecistical manner.

"I have . . . set down some of them, briefly and almost solecistically."—Wollaston: *Religion of Nature*. (Intro.)

* **sól-é-cize**, v.t. [Gr. *σολοικίζω* (*sololikizō*).] To commit or make use of solecisms, in language or behaviour.

"To fancy the holy writers to solecise in their language."—Morr: *Mystery of Godliness*, bk. I., ch. ix.

só-lé-cúr-tús, s. [Lat. *solen* (q.v.), and *curtus* = short.]

Zool. & Paleont.: A genus of Solenidae (q.v.), with twenty-five recent species, from the United States, Britain, the Mediterranean, West Africa, and Madeira. Shell ovate-oblong, umbo small, margins almost parallel, ends rounded, gaping, ligaments external, hinge-teeth 3, pallial sinus very deep, rounded. Animal very large and thick, not entirely retractile within the shell. They bury themselves deeply in mud or sand, and are difficult to obtain alive. Fossil, thirty species, from the Neocomian of the United States and Europe.

* **sol-ein**, a. [SULLEN.]

sóle-ly, * **sol-y**, adv. [Eng. *sole*, a.; -ly.] Only, singly, alone; without another or others.

"This is a matter solely with Oed."—Günin: *Sermos*, vol. III., ser. 17.

sól-é-mn (n silent), ***sol-ém-ne**, ***sol-é-mné**, a. [O. Fr. *solempne* (Fr. *solemnel*), from Lat. *solemnem*, accus. of *solemnis* (older forms *solemnis*, *sollemnis*) = yearly, annual, religious, solemn, from *sollis* = entire, complete, and *annus* = a year; Sp. *solemne*; Ital. *solemne*.]

1. Marked with religious rites or ceremonies; connected with religion; sacred.

"And his fadir and modir wenten eche yere into Jerusalem in the *solemne* day of pasch."—Wycliffe: *Luke* II.

2. Fitted or calculated to inspire, excite, or express awe, reverence, or serious reflections; awe-inspiring, awful, serious, grave, impressive.

"How ceremonious, solemn, and unwearily." Shakspeare: *Winters Tale*, III. 1.

3. Accompanied or marked by seriousness or earnestness; earnest, grave, serious.

"With a solemn earnestness . . . He begged of me to steal life." Shakspeare: *Othello*, V. 2.

4. Accompanied with all due forms or ceremonies; made or done in due form; formal; as, To prove a will in solemn form.

5. Affectedly grave, serious, or important; as, To put on a solemn face.

* 6. Sad, melancholy, sullen.

All solemn things Should answer solemn accidents." Shakspeare: *Cymbeline*, IV. 1.

* For the difference between solemn and grave, see GRAVE.

solemn-league, s. [COVENANT, II. 3. (4).]

* **sól-em-néss**, s. [Eng. *solemn*; -ness.] The quality or state of being solemn; solemnity, seriousness, gravity.

"Some think he wanted *solemnness*."—Reliquie: *Wottonianus*, p. 66.

só-lém-ni-tý, ***so-lémp-ni-te**, ***so-lémp-ni-tee**, s. [O. Fr. *solempnité* (Fr. *solemnité*), from Lat. *solemnitatem*, accus. of *solemnitas*, from *solemnis* = solemn (q.v.); Sp. *solemnidad*; Ital. *solemnità*.]

I. Ordinary Language:

1. The quality or state of being solemn; gravity, seriousness, impressiveness.

"With such solemnity of tone And gesture." Cooper: *Task*, v. 648.

2. Affecting or mock gravity or seriousness; a look or show of pompous importance.

"The solemnity worn by many of our modern writers is, I fear, often the mask of dulness."—Goldsmith: *Polite Learning*, ch. xi.

* 3. Statelyness, dignity; any grandeur.

"My staff, Seldom but sumptuous, showed like a feast, And won by rareness such solemnity." Shakspeare: *I Henry IV*, III. 2.

fáte, fát, fáre, amidst, whát, fáll, father; wē, wēt, hère, camél, hēr, thère; pine, pít, síre, sír, maríno; gō, pót, or, wōro, wólz, wōrk, whó, són; müte, oüb, cüre, ünite, cür, rúle, füll; trý, Sýrian. æ, œ = é; ey = ā; qu = kw.

4. A rite or ceremony performed with religious reverence; religions or ritual ceremony.

"The moon, like to a silver bow, New bent in heaven, shall behold the sight Of our solemnities."—*Alberbury*.

5. A proceeding calculated to impress with awe or reverence.

"Though the forms and solemnities of the last Judgment may bear some resemblance to those we are acquainted with here, yet the rule of proceeding shall be very different."—*Atterbury*.

II. Law: A solemn or formal observance; a formality requisite to render a thing done valid.

*sō-lēm-nī-zāte, v.t. [Eng. solemniz(e); -ate.] To solemnize.

"That they not any of them from henceforth, do presume to solemnize matrimony in their churches, chapels, or elsewhere."—*Burnet: Reformation*, pt. II, bk. III, No. 26. (*Richardson*.)

sō-lēm-nī-zā-tion, s. [Eng. solemniz(e); -ation.] The act of solemnizing; celebration.

"Soon followed the solemnization of the marriage between Charles and Anne dutchess of Bretagne."—*Bacon: Henry VII.*

sōl-ēm-nīze, *sol-emp-nyse, v.t. [Fr. solemniser, solenniser.]

1. To dignify by solemn formalities or ceremonies; to celebrate; to do solemn honour to.

"Lords, ladies, captains, counselors, or priests . . . Met from all parts to solemnize this feast."—*Milton: Samson Agonistes*, 1, 656.

2. To perform with due ritual ceremonies or respect; to celebrate or perform according to legal forms.

"Whether they, and every of them, have solemnized matrimony between his parishioners, or any other persons, the names not before asked, three several Sundays, or holidays."—*Burnet: Records*, pt. II, bk. II, No. 15.

*3. To make solemn, grave, serious, and reverential: as, To solemnize the mind.

Bot.: A genus of True Asclepiadeae, with only one species, *Solenostemma Argel*, which grows in Egypt and Arabia. It is a hoary undershrub, with white umbellate flowers. Its fleshy leaves are used for adulterating senna.

sō-lēm-ōs'-tō-mā, s. [Pref. soleno-, and Gr. στόμα (stoma) = a mouth.]

Ichthy.: The sole recent genus of Solenostoma.

SOLENIOSTOMA CYANOPTERUM.

midre (q.v.), with two or three small species from the Indian Ocean. Snout produced into a long tube; body compressed, tail very short. All parts covered with thin skin, below which there is a dermal skeleton, formed by large star-like ossifications. No air-bladder or pseudobranchiae; branchiostegals four, very thin. This genus is remarkable as being one of the two genera of fishes in which the care of the eggs and young is undertaken by the female, the other being the Sitaroid genus *Aspreto*. In *Solenostoma* the inner side of the ventral fins coalesces with the integuments of the body, forming a large pouch for the reception of the eggs. In the illustration the ventral fins have been pushed aside so as to show the pouch.

sō-lēm-ō-stēm'-ī-dā, s. pl. [Mod. Lat. solenostoma(q); Lat. fem. pl. adj. snuff. -ida.]

Ichthy.: A family of Lophobranchii (q.v.) Gill-openings wide; two dorsals, the rays of the anterior not articulated, all the other fins well developed. [SOLENIOSTOMINUS, SOLENIOSTOMA.]

sō-lēm-ō-strō'-būs, s. [Pref. soleno-, and Gr. στροβός (strobos) = a top, a whirling round.]

"The sollicitor to every evil act, all that defiles the man."—Atterbury, vol. iv., ser. 7.

II. Law: An attorney, a law-agent; one who represents another in court. The term was formerly restricted to agents practising in the courts of chancery, but by the Judicature Act, 1873, § 87, all persons practising in the supreme courts in England are called sollicitors. [ATTORNEY.] In Scotland the term is applied to writers to the signet, or general legal practitioners, and is synonymous with attorney in England. In the United States the terms attorney and sollicitor are synonymous, and they also act as counsel.

sollicitor-general, s.

Law: An English law officer ranking next to the attorney-general, with whom he is associated in the transaction of legal business for the crown and public offices. On him generally devolves the maintenance of the rights of the crown in revenue cases, patent causes, &c. In Scotland, the solicitor-general is a law officer of the crown, ranking next to the lord-advocate, whom he assists in conducting prosecutions and protecting the interests of the crown, &c. In Ireland, and in many of the colonies, there is a solicitor-general, with functions analogous to those of the English solicitor-general. In this country the solicitor-general is attached to the attorney-general's office, and ranks next to that official, as in England.

sól-lic-it-ór-ship, s. [Eng. sollicitor; -ship.] The rank, position, or condition of a solicitor.

sól-lic-ít-óus, a. [Lat. sollicitus, sollicitus, pa. par. of sollicito = to agitate; Sp. & Port. sollicito; Ital. sollicito, sollicito.] Anxious, either to obtain, as something desirable, or to avoid, as something evil or dangerous; con-

cerned, apprehensive, uneasy, disturbed. (Followed by about or for, and rarely by of.)

sól-id, *sol-ide, a. & s. [Fr. solide, from Lat. solidum, accus. of solidus = firm, solid; allied to Gr. sólós (holos) = whole, entire; Sp. & Ital. solido.]

A. As adjective:

I. Ordinary Language:

1. Literally:

(1) Having the constituent parts so firmly connected that their relative positions cannot be altered without the application of sensible force; possessing the property of excluding all other bodies from the space occupied by itself; hard, firm, compact, impenetrable.

"Tempered so, that neither keen Nor solid might resist that edge."—Milton: P. L., vi, 322.

(2) Not hollow; full of matter.

(3) Having all the geometrical dimensions; having length, breadth, and thickness; cubic; as, a solid foot.

(4) Firm, compact, strong.

"A noble pile, built after this manner, which makes it look very solid and majestic."—Addison: On Italy.

2. Figuratively:

* (1) Sound, strong; not weakly.

"If persons devote themselves to science, they should be well assured of a solid and strong constitution of body."—Watts: On the Mind.

(2) Substantial, as opposed to frivolous, fallacious, or the like; not empty or vain; real, true, just, valid, strong.

"How solid a science never may be erected on ideal qualities it rests in speculation only."—Search: Light of Nature, (Introd., p. xxviii.)

(3) Financially firm, safe, or sound; well-established, wealthy; having plenty of capital.

* (4) Grave, serious, solemn; not frivolous or light.

"These, wanting wit, affect gravity, and go by the name of solid men; and a solid man is, in plain English, a solid solemn fool."—Dryden. (Todd.)

(5) Given in a body; united; as, a solid vote.

II. Bot.: Not hollow. (Used of a stem, &c.)

B. As substantive:

I. Ordinary Language:

1. A firm, compact body; a body the constituent parts of which are so firmly connected that their relative positions cannot be altered without the application of sensible force. It thus differs from a liquid, the parts or particles of which yield to the slightest impression, and are easily made to move amongst each other.

2. (Pl.): Solid food as distinguished from slops (q.v.).

II. Technically:

1. Anat. (Pl.): The bones, flesh, &c., as distinguished from the blood, the chyle, and other fluids.

2. Geom.: A magnitude possessing length, breadth, and thickness. [VOLUME.] The boundaries of solids are surfaces.

solid-hoofed, a. Solidungulata; without separate digits; having the digits enclosed in a solid hoof.

Solid-hoofed Pigs:

Zool.: Pigs having solid hoofs, the terminal phalanges, forming one solid bone, supporting an undivided hoof. Darwin considers that this peculiarity has appeared at different times and places. In Texas, however, according to Coates, there is a breed in which this modification is persistent.

solid-measure, s. A measure for volumes, in which the units are each a cube of fixed linear measurement, as a cubic foot, yard, or the like.

solid-newel, s. [NEWEL.]

solid-problem, s. A problem which cannot be constructed geometrically, that is by the intersections of straight lines and circles, but requires the introduction of some curves of a higher order, as the ellipse, parabola, and hyperbola, which, being the sections of solids, give rise to the term solid problem. The algebraic solution of a solid problem leads to a cubic or a biquadratic equation.

solid-square, s.

Mil.: A square body of troops; a body in which the ranks and files are equal.

sól-íd-a-ġin-ē-ō, s. pl. [Mod. Lat. solidago, genit. solidagin(is); Lat. fem. pl. adj. suff. -eæ.]

Bot.: A sub-tribe of Asteroideæ.

sól-íd-dā-gō, a. [Lat. solido = to unite, from the vulnery qualities which have been attributed to some species. (Hooker & Arnott, &c.)]

Bot.: Golden-rod, the typical genus of Solidagineæ (q.v.). Herbs often aromatic at the base; leaves alternate, entire or serrate; involucre closely imbricated; heads usually in scorpioid cymes, yellow; florets of the ray few, in one row; pappus pilose, rough, in a single row; achenes terete. More than 100 species of this genus belong to North America, largely to the United States, where their bright yellow flowers add greatly to the beauty of the autumn scenery. There are only a few species elsewhere. The leaves of *S. odora*, a fragrant American species, have been used for tea. They are mildly toxic and astringent.

*** sól-íd-dāire, a. [Fr.]** Having community of interests and responsibilities; mutually responsible.

"They would never have got their last loan on such favourable terms if it were not supposed that in that matter they were *solidaire* with the mother country."—*Pail Mail Gazette*, Sept. 9, 1882.

*** sól-íd-dāre, s. [Lat. solidus = a piece of money.]** A small piece of money.

Söl-i-tär-y-üs, s. [Lat. = solitary.]

Astron.: A small constellation, established by Lemmon, above Centaurus, and near the tail of Hydra. The largest star is of the sixth magnitude.

söl-i-tär-y, * *söl-i-tär-y*, a. & s. [Fr. *solitaire*, from Lat. *solitarius*, from *solitudo* = loneliness, from *solus* = alone; Sp. & Port. *solitario*.]

A. As adjective:

I. Ordinary Language:

1. Living or being alone; not having company; being by one's self; inclined to live or be by one's self. (Couper: *Task*, vi. 948.)

2. Not much visited or frequented; retired, secluded; remote from society; lonely.

"Alone within her solitary hut."—*Wordsworth: Excursion*, bk. v.

3. Passed or spent alone or without company; lonely: as, a *solitary* life.

4. Away from the sounds of human life; still, gloomy, dismal.

"Let that night be *solitary*, let no joyful voice come therein."—*Job* iii. 7.

5. Single, individual, only, sole, unique: as, a *solitary* example.

II. Bot.: Growing singly. A solitary flower is usually situated in the axil of a leaf, less frequently at the apex of a stem or of a scape.

* B. As subst.: One who lives alone or in solitude; a hermit, a recluse.

"I noted that the *Solitary's* cheek Confess'd the power of nature."—*Wordsworth: Excursion*, bk. vi.

¶ *Solitary* simply denotes the absence of all beings of the same kind: thus a place is *solitary* to a man where there is no human being but himself; and it is *solitary* to a brute when there are no brutes with which it can hold society. *Desert* conveys the idea of a place made *solitary* by being shunned, from its unfitness as a place of residence; all *deserts* are places of such wildness as seem to frighten away almost all inhabitants. *Desolate* conveys the idea of a place made *solitary*, or bare of inhabitants, and all traces of habitation, by violent means; every country may become *desolate* which is exposed to the inroads of a ravaging army. (Crabb.)

solitary-ants, s. pl.

Entom.: The Mutillidae (q.v.).

solitary-bees, s. pl.

Entom.: Bees not living, like *Apis mellifica*, the Bombi, &c., in society. They consist only of true males and true females. Some form their nests in old posts or the trunks of trees, others in the stems of plants of which the pith is easily extracted, or in cut reeds, and many burrow in the ground or in the mortar

of old walls. The cells are made of earthy or vegetable material, and there are not the fine hexagonal combs of the genus *Apis*.

solitary-confinement, s.

Law: Confinement apart from other prisoners and with no society of any kind. In England the present law prohibits the solitary confinement of a prisoner for more than one month at a time or more than three months in one year.

solitary-glands, s. pl.

Anat.: Simple glands. [GLAND, s. ¶ (4).]

solitary-snipe, s. [SNIFE, II.]

solitary-wasps, s. pl.

Entom.: The Eumenidae; wasps not living in society. They consist of true males and true females, and have deeply-toothed or bifid tarsal claws, and generally long, slender mandibles. They are a little smaller than social wasps, are often black, with the thorax spotted and the abdomen with yellow rings. They breed in holes in sandy banks, decaying wood, or old walls, to which they bring stores of caterpillars, &c., for the sustenance of the future larvae.

söl-i-tüde, s. [Fr., from Lat. *solitudo*, from *solus* = alone, single; Ital. *solitudine*.]

1. The state or condition of being alone; a lonely life; loneliness.

"O *solitude!* where are the charms That escape have seen in thy face?"—*Cowper: Alexander Selkirk*.

2. Remoteness from society; seclusion, loneliness: as, the *solitude* of a wood, &c.

3. A lonely place; a desert.

* *söl-liv-a-gant*, * *söl-liv-a-gouüs*, a. [Lat. *solus* = alone, and *vagans*, pr. par. of *vagor* = to wander.] Wandering alone.

"A description of the impure drudge; . . . that is to say, a *solingant* or solitary vagrant."—*Granger: Ecclesiastes*, p. 89.

söl-live, s. [Fr.]

Build.: A joist, rafter, or piece of wood, either slit or sawed, with which builders lay their ceilings.

söl-lar, * *sol-ere*, * *sol-lare*, s. [Lat. *solarium* = a gallery or balcony exposed to the sun, from *sol* = the sun.]

* I. Ord. Lang.: An open gallery or balcony, at the top of a house, exposed to the sun; a loft, a garret, an apple-room.

"The rearrange of grains from the same into lefts and *sollars*."—*Holmshed: Descript. England*, bk. ii. ch. xviii.

2. Mining:

(1) One of the platforms at the ends of the successive ladders in a mine.

(2) A mine entrance.

söl-lëc-i-tö (c as ch), adv. [Ital.]

Music: A direction denoting that the music is to be performed with care.

* *söl-lër-ët*, s. [Fr., dimiu. of O. Fr. *soller* = a slipper.]

Old Cost.: One of the overlapping plates that formed the iron shoe of an armed knight;

SOLLETET.

hence, often applied to the shoe itself, which varied somewhat in shape at different periods.

"The toes of the *sollertes* are made preposterously wide in conformity with the shoe of the period."—*Knight: Pict. Hist. Eng.*, ii. 558.

söl-lÿ-a s. [Named after Mr. Richard Horsman Solly, F.R.S., a vegetable physiologist and anatomist.]

Bot.: A genus of Pittosporaceae. Climbing shrubs, with blue flowers in cymes opposite to the leaves, introduced into British gardens from Australia and Tasmania.

söl-mi-zäte', * *söl-mi-gäte'*, v. i. To practice solitization (q.v.).

söl-mi-zä-tion, *söl-mi-gä-tion*, s. [Fr. *solmiser* = to sol-fa. (See def.)]

Music: The art of singing certain syllables to the notes of the musical scale, as opposed to the use of a vowel sound, such as a (ah), e

(ä), i (è), &c. The earliest known form in use among the Greeks was $\alpha, \beta, \gamma, \delta, \epsilon$, pronounced probably *ta, té, tē, tō*. The basis of our present system is to be found in that of Guido d'Arezzo, in the eleventh century, who named his six notes *ut, re, mi, fa, sol, la*, after the initial notes of a Latin hymn. [SCALE.] This system was gradually superseded in this country by the repetition of *fa, sol, la* for the six notes of the scale, from any starting-point, the syllable *mi* being reserved for the leading note only: thus, *fa, sol, la, fa, sol, la, mi, fa*. But where this system was not adopted the name *ut* was gradually rejected in favour of *do* in this country, and *si* was the name given to the seventh degree. We now reach the seven recurring syllables, *do, re, mi, fa, sol, la, si*; but about the middle of the eighteenth century, Boisselou, a Frenchman, suggested the following chromatic series, *do (or ut), re, re, ma, mi, fa, fa, fa, la, sa, si*. This idea has been improved and expanded in the *Tonic sol-fa* system as now used. The use of *sol-fa* syllables gives to the singer merely a rough notion of tones and semitones; it gives no clue to the mathematical ratios, or "proportion," of notes.

söl-lö (pl. *söl-lög*, *söl-lö*), s. [Ital., from Lat. *solus* = alone.]

Music: A tune, air, or strain to be played by a single instrument or sung by a single voice, with or without accompaniment, which should always be strictly subordinate.

"There is not a labourer or handicraftsman that, in the cool of the evening, does not relieve himself with *solos* and *sonatas*!"—*Taylor*, No. 222.

solo-organ, s.

Music: A manual or clavier of an organ, having associated with it stops which, for the most part, are intended for use *solo*—in simple notes as opposed to chords.

solo-stop, s.

Music:

1. A stop or register of a solo organ.

2. Any stop which can be used in single notes.

* *söl-ö-graph*, s. [Lat. *sol* = the sun, and Gr. $\gamma\rho\alpha\phi\omega$ (*graphō*) = to write, to draw.]

Photog.: A picture taken by the talbotype or calotype process.

söl-lö-ist, s. [Eng. *solo*; -ist.] One who sings or performs alone, with or without the aid of accompaniment.

"An insuperable difficulty seems to be found in the reluctance of the *solista* to undertake the music."—*Pall Mall Gazette*, Nov. 26, 1852.

Söl-ö-mön, s. [Gr. $\Sigma\omicron\lambda\omicron\mu\omicron\gamma$ (*Solomon*), $\Sigma\alpha\lambda\omicron\mu\omicron\nu$ (*Salomön*); Heb. שְׁלֹמֹה (*Shelomoh*) = the peaceful one, Solomon; שְׁלוֹמִי (*shalomi*) = peaceful, from שָׁלוֹם (*shalom*) = to be safe, to be at peace.]

Script. Biog.: The younger son of David and Bathsheba (2 Sam. xii. 24; 1 Chron. iii. 5). He was proclaimed king in opposition to Adonijah by David's orders just before his death (1 Kings i. 5-53). Asking from God "an understanding heart" to qualify him for judging the people, he was made the wisest of men (iii. 5-28, iv. 31, &c.). "He spake three thousand proverbs, and his songs were a thousand and five" (iv. 32); he "spake also of plants and animals" (33), and built the first Temple (vi.). He lived in great magnificence (iv. 22-28, vii. 1-12, x.), and Israel, though too heavily taxed (xii. 10), enjoyed great prosperity under his rule (iv. 20, 21). In his old age he had an extensive harem of Gentile women, by whom he was led into idolatry, and the way was prepared for the disruption of the kingdom, the limits of which were wider than at any previous or subsequent period (iv. 21, xi.). By the received Hebrew chronology, Solomon was born about B.C. 1033. His reign of forty years (xi. 42) extended from A.C. 1015 to 975.

¶ (1) *The Song of Solomon*:

Old Test. Canon: Heb. $\text{שִׁיר הַשְּׁחִירִים}$ (*Shir hashshirim*), Sept. ᾠδα ἀσμαράτων (*Asma amaron*), Vulg. *Canticum Canticorum*, all = the Song of Songs [CANTICLES], i. e., the song more beautiful or more excellent than all others. It stands in the A.V. and Septuagint between Ecclesiastes and Isaiah, and in the Hebrew Bible between Job and Ruth. The external evidence that it formed part of the

fä, fät, färe, ämidst, whät, fäll, father; wë, wët, höre, camel, hör, thero; pine, pít, síre, sír, marine; gö, pöt, or, wöre, wöf, wörk, whó, sön; müte, öüb, cüre, ünite, cür, rüle, füll; trÿ, Sÿrian. æ, œ = ē; ey = ä; qu = kw.

Jewish canon is unimpeachable, almost the only point connected with the book about which there has been no controversy. The chief divergences have turned on the method of interpretation. Three views have been entertained: (1) that it should be taken literally as a poetic description of actual occurrences, or perhaps, of conceptions like those of a modern novel; (2) that it is a spiritual allegory; and (3) (a combination of both views) that it has a literal meaning typifying spiritual truth. The second hypothesis arose in the Jewish Church prior to A.D. 90, for in that year the Sanhedrim decided in its favour. The Talmudists strongly held it, and it has ever since been the prevalent view among the Jews. They believe that the Beloved (ii. 8, 9, 16, &c.) is God, his loved one (ii. 10-13, &c.) the Jewish nation and Church, and the theme of the book his dealings with his people from the time of the Exodus, or even from the call of Abraham to the coming of the Messiah, and the building of the third temple. This explanation soon found its way into the Christian Church, and prevailed till Origen substituted for it the view, now generally received, that the Beloved is Christ and his love the Christian Church. (See the headings in the A. V. to the several chapters.) Theodore of Mopsuestia introduced the typical explanation that the Song primarily celebrated the marriage of Solomon with Pharaoh's daughter (1 Kings iii. 1, ix. 24). This view is still held by many.

The literal view and the uncanonicity of the Song were maintained about the time of our Lord by the School of Shammai, in opposition to that of Hillel, who adopted the allegorical interpretation. It arose again among the Jews about A.D. 1100, and still has supporters. Sebastian Castellio (1515-1563) timidly suggested it in the Reformed Church, and wished the work removed from the Canon. Jacobi (1771), Herder (1778), Ewald (1826), Dr. P. Smith (1818-21), Dr. Davidson (1856), and many others also took the literal view. Some held that if the work had no spiritual reference it should be deemed uncanonical; others maintained that the sanctity of virtuous courtship and marriage, as opposed to polygamy and seduction, was a theme worthy of a place in Scripture. Dr. Gensburg, who holds this opinion, considers that the book, which he divides into five sections, celebrates the fidelity to her lover of a humble village maid betrothed to a shepherd, and her successful resistance to the arts with which King Solomon tried to induce her to enter his harem. He does not believe that it was written by Solomon, but that it was composed just after his age. It is not directly quoted in the New Testament.

(2) *The Wisdom of Solomon*: [WISDOM.]

Solomon's puzzle, a.
Bot.: *Setium Telephium*.

Solomon's seal, s.

Bot.: *Polygonatum multiflorum*, and the genus *Polygonatum* (q.v.). The stem is terete, and two to three feet high; the leaves, which are three to four inches long, are alternate, sub-lanceolate, and second; the peduncles with two to five flowers; the perianth is tubular campanulate, greenish-white; the berry blue-black. It is wild in England, but in Scotland and Ireland is generally an escape. The young leaves have sometimes been eaten as a vegetable.

SOLOMON'S SEAL.
1. Flower. 2. Longitudinal Section of Flower.

sól-pū-gā, s. [Lat. *solpuga, solipuga, solypuga* = prob. *Galeodes arenoides*.]

Zool.: A genus of Galeodidae (q.v.); tarsi of the second and third pairs of legs four-jointed, of the fourth pair seven-jointed.

sól-pū-gíd, s. [SOLPUGIDÆA.] Any individual of the Solpugidae (q.v.).

"The muscular system of *Solpugidae* appears to be very similar to that of other Arachnida."—*Encyc. Brit.* (ed. 9th), II. 281.

sól-pū-gíd-ō-a, s. pl. [Mod. Lat., from Lat. *solpuga* (q.v.), and Gr. *ídōs* (*eidōs*) = form.]

Zool.: A tropical or sub-tropical order of Arachnida, with one family, Galeodidae or Galeodidae (q.v.), containing five genera: Rhax, Allopax, Galeodes, Solpuga, and Gluvia, characterized by the sub-divisions of the tarsal joints of the second, third, and fourth pairs of legs. They are nocturnal in habits and extremely pugnacious, but it is doubtful whether they are venomous.

† **sól-pū-gí-dēs, † sól-pū-gí-dæ, s. pl.** [SOLPUGIDÆA.]

Zool.: The same as GALEODIDÆA (q.v.).

* **sól-stēad, s.** [Lat. *sol* = the sun, and Eng. *stead*.] The same as SOLSTICE (q.v.).

"If it be gathered about the summer solstead."—*P. Holland: Plinie*, bk. xxvi., ch. v.

sól-stīce, s. {Fr. from Lat. *solstitium* = lit. a point in the ecliptic at which the sun seems to stand still: *sol* = the sun, and *stitium* for *statum*, pa. par. of *sisto*, a reduplicated form of *sto* = to stand; Sp. & Port. *solsticio*; Ital. *solstizio*.}

* 1. *Ord. Lang.*: A stopping or standing still of the sun.

"The supernatural *solstices* of the sun in the days of Joshua."—*Sir T. Browne*. (Webster.)

2. *Astronomy*:

(1) (Pl.). The solstitial points (q.v.).

(2) The time at which the sun stands for a little at one or other of the solstitial points before again moving back obliquely towards the equator. The summer solstice of the northern hemisphere is on June 21, the winter on Dec. 22; the summer solstice in the southern hemisphere is on Dec. 22, the winter on June 21. [CANCER, CAPRICORN.]

sól-stī-tīal, * sól-stī-tīall (t as sh), a. [Fr. *solstitial, solsticial*.]

1. Pertaining or belonging to the solstices.

"The summer *solstitial tropic*."—*P. Holland: Plinie*, bk. ii., ch. lxx.

2. Happening at a solstice, or at midsummer.

"Strius parched with heat
Solstitial the green herb." *Philips: Cider*, bk. I.

solstitial-coloure, s. [COLURE.]

solstitial-points, s. pl. Those two points in the ecliptic which are farthest from the equator, and at which the sun arrives at the time of a solstice. The distance of each from the equator is equal to the obliquity of the ecliptic, about 23° 27'.

sól-ū-bil-ī-tý, s. [Eng. *soluble*; -ity.]

I. *Ordinary Language*:

1. The quality or state of being soluble; that quality of a substance which makes it susceptible of solution; susceptibility of being dissolved in a fluid.

"By its colour, weight, and *solubility* in aq. regia."—*Locke: Hum. Understand.*, bk. iii., ch. ix.

* 2. Capability of being solved, resolved, answered, cleared up, or disentangled; as, the *solubility* of a problem.

II. *Bot.* (Of a pericarp): Separation at the transverse contractions into several closed portions, as in Ornithopus.

sól-ū-blo, * sol-ū-bil, a. [Fr. *soluble*, from Lat. *solubilis*, from *solutus*, pa. par. of *solvo* = to dissolve; Sp. *soluble*; Ital. *solubile*.]

1. Capable of being dissolved in a fluid; admitting or capable of solution; dissolvable.

* 2. Relaxed.

"Ale is their eating and drinking surely, which keeps their bodies clear and *soluble*."—*Beaumont & Fletcher: Scornful Lady*, iv. 1.

* 3. Capable of being solved, resolved, answered, cleared up, or disentangled, as a problem, doubt, question, &c.

soluble-glass, s.

Chem.: An impure alkaline silicate, prepared by fusing for five or six hours a mixture of quartz, carbonate of soda or carbonate of potash, and powdered charcoal, pulverising the fused mass, boiling with water for three or four hours, and concentrating the solution to a sp. gr. of 1.24 to 1.26. It is used to render textile fabrics less combustible, and as a varnish to preserve stone. The soda compound is largely used by calico-printers and soap manufacturers.

sól-ū-ble-nēss, s. [Eng. *soluble*; -ness.] The quality or state of being soluble; solubility.

sō-lūm, v. [Lat. = ground.]

Scots Law: Ground; a piece of ground.

sō-lūs (fem. **sō-lā**), a. [Lat.] Alone. (Used in dramatic directions or the like: as, Enter the king *solus*.)

sō-lūte, a. [Lat. *solutus*, pa. par. of *solvo* = to loose, to melt.]

* I. *Ordinary Language*:

1. Loose, free, discursive.

"As to the interpretation of the Scriptures *solute* and at large, there have been divers kinds."—*Bacon: Advancement of Learning*.

2. Relaxed; hence, merry, joyous.

"A brow *solute*, and eye-laughing eye." *Young: Night Thoughts*, II. 579.

3. Soluble: as, a *solute* salt.

II. *Bot.*: Completely separate from the neighbouring parts.

* **sō-lūte, v. i.** [SOLUTE, a.]

1. To dissolve.

2. To resolve, to answer, to confute.

"With this special note of remembrance in the margin, M. Juel's allegation *solute*."—*Jewell: Repts.*, p. 151.

3. To absolve.

"Without the hynde busings of a papist may no sinne be *solute*."—*Bate: Image*, pt. II.

sō-lū-tion, * so-lu-cl-on, s. [Fr. *solution*, from Lat. *solutionem*, accus. of *solutio* = a loosing, from *solutus*, pa. par. of *solvo* = to loose, to melt; Sp. *solucion*; Ital. *soluzione*.]

I. *Ordinary Language*:

1. The act of separating the parts of any body; disruption, breach.

* 2. Disolution, disunion.

"This *solution* of the souls or spirits of wicked men and demons from their vehicles."—*Mercer: Immort.* of the Soul, bk. iii., ch. xvii.

* 3. Release, deliverance, discharge.

4. In the same sense as II. 1.

5. The act of solving, explaining, answering, or clearing up, as a problem, question, doubt; the state of being solved, explained, answered, or cleared up.

"Hellen took on her
Th' ostents *solution*, and did this prefer." *Chapman: Homer's Odyssey*, xv.

6. That which serves to solve, explain, answer, or clear up; a problem, question, doubt, or the like; explanation, resolution.

"Two sentences, 'It is very common, or 'It is very strange,' make at once the sum and the detail of their philosophy and of their belief, and are to them a *solution* of all difficulties."—*Bishop Horley: Sermons*, vol. I., ser. 11.

II. *Technically*:

1. *Chem.*: A term applied to the product of the action, as well as the action itself, whereby a solid or gaseous body in contact with a liquid, suffers liquefaction; or to the union of one liquid with another when each is capable of taking up only a limited quantity of the other. The solution of a solid in a liquid is usually attended with a fall of temperature, excepting where solution is preceded by the formation of a definite chemical compound. The solution of one liquid with another occurs without change of temperature, excepting in cases in which chemical union takes place, as in the dilution of sulphuric acid with water. The solvent power of liquids, with few exceptions, is increased by rise of temperature.

2. *Civil Law*: Payment; satisfaction of a creditor.

3. *Math.*: The operation of finding such values for the unknown parts as will satisfy the conditions of the problem. Problems may be solved algebraically or geometrically. The term is frequently used to denote the answer or result of the operation itself.

4. *Pathol.*: The termination of a disease, either with or without critical signs. Applied also to a crisis.

5. *Pharm.*: A watery preparation, either of inorganic substances or of certain definite active organic principles. (*Garrod*.)

"Aretæus, to procure sleep, recommends a *solution* opoplin in water to foment the forehead."—*Arbuthnot*.

* **sól-ū-tive, a.** [Fr. *solutif*; Sp. & Ital. *solutivo*.]

1. Tending to dissolve; loosening, laxative.

"Though it would not be so abstrusive, opening, and *solutive* as usual, yet it will be more lenitive in sharp diseases."—*Bacon*.

2. Capable of being dissolved or loosened.

sól-va, s. [See def. of compound.]

Solva-group, s.

Geol.: A group of Lower Cambrian Rocks, consisting of Purple, Red, and Gray Grit flags and slates, with Crustaceans (Ostracoda and Trilobites). Found at Solva, near St. Davids, Pembrokeshire, the Harlech Mountains, Bray Head, &c. (*Ethridge*.)

sól-va-blí-ty, s. [Eng. *solvable*; -*ity*.]

- 1. Capability of being solved; solubility.
- 2. The quality or state of being solvent, or able to pay all just debts.

sól-va-ble, ***sól-ví-ble**, a. [Fr. = *payable*.]

- 1. Capable of being solved, resolved, or explained.

"I do not inquire how or where, because it is not soluble."—*Hale: Orig. of Manhood*, p. 56.

- * 2. Capable of being paid.

"A set annuals soluble out of the exchequer."—*Puller: Church Hist.*, vi. 226.

- * 3. Solvent.

"Be sure their men are solvable."—*Wycherley: Love in a Wood*, iii. 4.

* **sól-va-ble-ness**, s. [Eng. *solvable*; -*ness*.] Solvability.

sólve, v.t. [Lat. *solvo* = to loosen, to relax, to solve, for *solvo*, from *se* = apart, and *luo* = to loosen; Sp. & Port. *solver*; Ital. *solvere*.]

- 1. To explain or clear up the difficulties in; to free from difficulty or perplexity; to make clear; to give or furnish a solution of.

"Nor could this difficulty have been solved, if the Scriptures had not solved it for us."—*Gilpin: Sermons*, vol. iii., ser. 34.

- * 2. To put an end to; to stop.

"He would solve high dispute With conjugal carresses."—*Milton: P. L.*, viii. 56.

- 3. To operate upon by calculation or mathematical processes, so as to bring out the required result: as, To solve a problem.

sólve, s. [SOLVE, v.] Solution.

"The solve is this, that thou dost common grow."—*Shaksp.: Sonnet* 69.

sól-ven-çy, s. [Eng. *solvent*(*ty*); -*cy*.] The quality or state of being solvent; ability to pay all just debts or claims.

"The debtor prescrib[ing] . . . the medium of his solvency to the creditor."—*Burke: French Revolution*.

sól-vénd, s. [Lat. *solvendus*, fut. pass. par. of *solvo* = to solve (q.v.).]

Chem.: A substance designed to be dissolved, as distinguished from a solvent (q.v.).

sól-vent, a. & s. [Lat. *solvens*, genit. *solventis*, pr. par. of *solvo* = to solve (q.v.).]

A. As adjective:

- 1. Having the power or quality of dissolving.
- 2. Able to pay or meet all just debts or claims.

"He [the good man] thinks God abundantly solvent, and himself never the poorer for laying out in his behalf."—*Bishop: Sermons*, vol. 1, ser. 31.

- 3. Sufficient to meet and pay all just debts or claims.

"The directors and other shareholders contended that the company was solvent."—*Standard*, Oct. 2, 1888.

B. As substantive:

1. *Chem.*: Any liquid or menstruum which may be employed to absorb or take up into solution a solid, a gas, or other liquid.

2. *Fig.*: That which reduces and takes up; as, money is the universal solvent (of debt).

sól-vér, s. [Eng. *solver*(*s*); -*er*.] One who or that which solves or explains.

* **sól-ví-ble**, a. [SOLVABLE]

sō-ma-, pref. [SOMATO-]

sō-ma, s. [Sansk. = (1) the moon, (2) (see def.).]

Compar. Religions: A plant growing in Northern India, probably *Asclepias acida*, from which in Vedic times was manufactured an intoxicating liquor, acceptable not merely to men, but to the gods, whom it was supposed to animate to great achievements.

sō-máj, s. [Bengalee, &c. = a society.] (See etym. and compound.)

† *Brahmá Somáj, Brahma Samáj:*

Compar. Religions: A Hindu theistic sect,

existing chiefly in Bengal. It was founded by a Brahman of high descent, Rammohun Roy. Born about 1774, at the age of six he began to attack the idolatry of modern Hindooism, and continued to do so throughout his life, on the ground that it was not countenanced by the Vedas (q.v.), and translated the Vedant (an old summary of the Vedas) into Hindooistane and Bengalee, publishing in 1861 an extract of it into English. He opposed the burning of widows. [SUTTEE.] In 1820 he sent forth in English, Sanscrit, and Bengalee a series of extracts from the New Testament, entitled *The Precepts of Jesus, the Guide to Peace and Happiness*. He believed in the divine mission of Christ, but held at the same time the Vedas to be a revelation from God. In 1828 he established the Brahma Somáj, which called into existence as an antagonist to it the Dharma Sabha, to defend Hindoo orthodoxy. Sent in 1830 by the Emperor of Delhi to London with the title of Rajah, to prefer a complaint about a financial matter, he arrived in April, 1831, gained what he had come to seek, fraternised with the English Unitarians, and, dying on Sept. 27, 1833, near Bristol, was interred, according to instructions which he had left, without Christian rites, lest the report that he had been converted and lost caste might, by a law then existing in Bengal, deprive his children of their inheritance. Rammohun predicted that after his death Christians, Hindoos, and Muhammadans would all claim him. They did; but in his final stage of religious evolution he seems to have held only the doctrines of philosophic theism or natural religion. (*Calcutta Review*, iv. 355-393.) The Brahma Somáj, when deprived of its founder, languished for a time, but in 1841 it received a fresh impulse from Babu Debendra Nath Tagore, and again made way, drawing to it many of the youths educated in the Hindoo College and the Missionary Institutions. As numbers increased, it became evident that there were in the Somáj a conservative and a progressive party, and about 1863 the latter broke off from the association on the question of the divine authority of the Vedas, and, under the leadership of Babu Keahub Chunder Sen, founded what they considered churches rather than societies throughout Bengal, the north-western provinces, the Punjab, Bombay, and Madras. In 1870 Keahub visited England, finding his nearest allies in the Unitarians. Both sections have singing, prayer, and addresses or sermons in their assemblies. The seceding brethren consider themselves to be founding the Indian Church of the future, adopting the essence of the gospel without the distinctive doctrines of Christianity.

són-nánt, *a. & s.* [Lat. *sonans*, pr. par. of *sono* = to sound.]
A. As adjective:
* 1. *Ord. Lang.*: Pertaining to sound; sounding.
2. *Pronunc.*: Applied to certain alphabetic sounds, as those of the vowels, semi-vowels, nasals, and flat mutes, as *b, d, v, z, g*, the sound of which is prolonged, or uttered with some degree of resonance or intonation, in opposition to aspirates, as *s, th*, and hard mutes or surds, as *f, p, t*.

B. As substantive:
Pronunc.: A sonant letter.
"Since the sonant elements in connected speech are (including the vowels) much more numerous than the surd, the general weight of the sensative force is in the direction of sonancy, and surds are converted into sonants more often than the reverse."—*Whitney: Life & Growth of Language*, ch. v.

són-na-tá, *s.* [Ital., from *sonare* (Lat. *sono*) = to sound.]
Musé: A term originally applied to any kind of musical composition for instruments, as distinguished from vocal compositions, which were called Cantatas. It is now, however, confined to compositions for solo instruments, generally the pianoforte. The term Sonata or Sinfonata, as applied to a musical composition, was first used about the beginning of the seventeenth century. Those of

that time so called had but one movement; they were in fact simply airs arranged in parts for an instrument or instruments. A modern sonata is generally constructed upon the following plan: The first movement is an allegro, sometimes with an introduction, but more frequently without one; the second, "the slow movement," is set in any time, between adagio and andante; and the final movement is an allegro. [CONCERTO.]

són-chús, *s.* [Lat., from Gr. *σύνχος* (*synchos*) = the sow-thistle.]
Bot.: Sowthistle; a genus of Lactuceæ. Involucres imbricated with two or three rows of unequal and at length connivent scales, tumid at the base; few-flowered; receptacle naked; pappus pilose; achenes much compressed, not hooked. Known species about forty, from temperate climates. The Common Saw-thistle (*S. oleraceus*) abounds in most parts of Europe, as a weed in gardens and cultivated fields. The young tops and leaves are much used as greens, and the plant is eaten by sheep and swine. It is a favorite food with the rabbit and hare.

sóng, *s.* [A.S. *sang*, *song*, from *sang*, pa. t. of *singan* = to sing; cogn. with Dut. *zang*; Icel. *söngur*; Sw. *sång*; Dut. & Ger. *sang*; Goth. *saggus*.]
I. Literally:
1. That which is sung or uttered with musical modulations of the voice, whether of a human being or of a bird; a singing.
"The night-warbling bird, that now awake
Tunes sweetest his love-labour'd song."
Milton: P. L., v. 41.
2. A short poem to be sung or uttered with musical modulations. A musical setting of a short poem or portion of prose. The word is generally applied to solos, but sometimes also to compositions for two or more voices. The second subject of a sonata is sometimes called the "song."
"This curious piece [a song or catch in praise of the cuckoo] which is thought to be the most ancient English song, with (or without) the musical notes, anywhere extant," is preserved in a manuscript of the Harleian Library.—*Hilton: Ancient Songs*, I. 1.
3. A lay, a strain, a poem.
"Nothing but songs of death."
Shaksp.: Henry VIII., I. 2.

4. Poetry in general; poetical compositions, various. (*Milton: P. L.*, III. 29.)
II. Fig.: A mere trifle; something of little or no value.

¶ (1) **An old song**: A mere trifle; an insignificant sum.
"A hopeful youth, newly advanced to great honour, was forced by a cozier to resign for an old song."
Addison.
(2) **Song of Solomon**: [SOLOMON'S SONG].
(3) **Song of the Three Holy Children**:
Apocrypha: One of the three pieces formerly incorporated with the narrative of Daniel. It constitutes a single chapter, with sixty-eight verses. According to Westcott, "the abruptness of the narrative in Daniel, furnished an occasion for the introduction of the prayer and the hymn" immediately after iii. 23, but the fragment is now placed in most copies of the Apocrypha between Baruch and the History of Susanna. It opens with a prayer of Azarias from the midst of the flame (23-27), describes the fierceness of the flame (28-29), and concludes with a call from the three confessors to the heavens, the angels, the earth, the winds, the animals, man, the servants of God, and specially themselves, to worship and bless the Lord. The prayer of Azarias seems to have had a different author from the rest of the book. It makes no allusion to the fiery furnace, and while verse 15 tells that the temple with its worship had ceased to exist, verses 31, 32, 62 imply that it had not passed

away. Neither the authorship nor the date is known. The *Codex Alexandrinus* places the book as two psalms at the end of the Psalter, calling them "The prayer of Azarias" and the "Hymn of our Fathers." Other Greek and Latin psalters adopt the same arrangement, and verses 35-66, under the name of the Benedicite, have been used liturgically in the Christian Church from the fourth century till now.

1. A short poem, especially of an amatory kind. At first it was not imperative that it should consist of exactly fourteen lines.

"He [Aron] had a wonderful desire to chaunt a sonnet or hymn unto Apollo Pythias."—P. Holland: *Plutarch's Morals, p. 248.*

2. The sonnet proper is a form of verse of Italian origin, and consists of fourteen lines, each of five accents, the whole being divided into two unequal parts—(1) the first of eight lines, (2) the second of six. (1) In the first part there are two four-line stanzas. In each stanza the two middle lines rhyme together, and the two outside lines rhyme together, and the second stanza repeats the same rhymes as the first. (2) The second part consists of two three-line stanzas. The first, second, and third lines in the first stanza rhyme severally with the first, second, and third lines in the second stanza. In the second part of the sonnet great variety prevails. The six lines all rhyme in some way together; but sometimes there are only two rhymes instead of three. Shakespeare's sonnet consists of fourteen lines, each of five accents. The first twelve rhyme alternately; the last two rhyme together.

* sōph-ic, s. [Gr. σοφία (sophia), from σοφός = wise.] Wisdom. "That in my shield The seven fold *sophie* of Minerva contain A match more meete, ayre, kin, than any here." Poems of *Vincentine Auctors*; *Death of Zerora*.

* sōphime, s. [SOPHISM.]

sōph-ism, * sōph-isme, s. [Fr. *sophisme*, from Lat. *sophisma*; Gr. σοφισμα (sophisma), from σοφός (sophos) = wise; Sp. *sofismo*; Ital. *sophisma*, *sophismo*.] A specious but fallacious argument; a specious proposition; a fallacy; a subtlety in reasoning; an argument which is not supported by sound reasoning, or in which the inference is not justly deduced from the premises.

"Full of subtle *sophismes*, which doe play With double senses." Spenser: *F. Q.*, III. iv. 23.

sōph-ist, s. [Fr. *sophiste*, from Low Lat. *sophista*; Gr. σοφιστής (sophistēs) = a cunning or skillful man, a sophist, a teacher of arts and sciences for money, from σοφίζω (sophizō) = to instruct; σοφός (sophos) = wise; Sp. & Ital. *sofista*.]

1. Lit. & Greek Hist.: A word used at first as an honourable title, but afterwards as a term of reproach.

(1) A master of one's craft; a person distinguished for learning or ability.

"A *Sophist*, in the genuine sense of the word, was a wise man, a clever man, one who stood prominently before the public as distinguished for intellect or talent of some kind. Thus Solon and Pythagoras are both called *Sophists*."—Grote: *Hist. Greece*, viii. 460.

(2) One who demanded payment for philosophical instruction.

"Zeller (*Phil. a. Greece*, *erst*, Theil, 1856, p. 750) says that the specific name of sophist at first merely designated one who taught philosophy for pay. The philosophy might be good or bad; the characteristic designated by the epithet *sophistical* was its demand of money less."—G. H. Lewes: *Hist. Philos.* (ed. 1880), II. 109.

(3) One of a class of men at Athens in the fifth century before Christ, who were the chief public teachers, especially of the art of disputation, which had a special charm for the Greeks. Chief among the Sophists were Protagoras of Abdera, with his scholars Gorgias and Prodicus, and Hippias of Elia. Blomfield (*Encyc. Metrop.*, s.v. *Socrates*) says of them "that the principal merit to which they laid claim was that of communicating to their disciples a ready, off-hand kind of knowledge, which might enable them to talk speciously and fluently upon all subjects whatever, and to impart to them that pernicious skill in dialectics by which they might baffle their adversary, whether right or wrong, and 'make

the worse appear the better canae.'" It should be borne in mind that the Sophists are known only from the writings of their antagonists; Grote points out that the hostility supposed to have been entertained by Socrates to the Sophists is Platonic rather than Socratic, and Jowett (*Introduct. to Sophists*) and Lewes take a similar view.

"That the Athenians did not consider the *Sophists* as corruptors of youth is unequivocally shown in two facts; they did not impeach the *Sophists*, and they did not impeach Socrates. When Anaxagoras the philosopher and Protagoras the *sophist* 'sapped the foundations of morality' by expressing opinions contrary to the religion of Athens, they were banished; but who impeached Gorgias, or Hippias, or Prodicus?"—G. H. Lewes: *Hist. Philos.* (ed. 1880), II. 117.

2. A captious and fallacious reasoner; a quibbler; one given to the use of sophisms.

sōph-ist-er, a. [Eng. *sophist*; -er.]

1. A professional teacher of philosophy; a sophist.

2. A quibbling disputant.

"A subtle traitor needs no *sophister*." Shakespeare: *2 Henry VI.*, v. 1.

3. A University term:

(1) At Cambridge University, applied to a student in his second and third years of residence. In the first year he is called a Freshman, or first-year man; in the second, a Junior sophister (or soph), or a second-year man; in the third year a Senior sophister (or soph), or a third-year man; and in the last term a Questionist, in reference to the approaching examination for degrees.

(2) In Dublin University, a student in his third and fourth years. In his first year he is called a Junior freshman; in his second, a Senior freshman; in his third, a Junior sophister; and in his fourth, a Senior sophister.

(3) In the older American Colleges the junior and senior classes were (and in some cases still are) called Junior sophisters and Senior sophisters respectively.

* sōph-ist-er, v.t. [SOPHISTER, s.] To maintain or support by fallacious arguments or sophistry.

"It is well *sophistered* of you to-morrow. Preposterous are your judgments evermore."—Fox: *Book of Martyrs*, p. 517.

sō-phist-ic, sō-phist-ic-al, a. [Fr. *sophistique*, from Lat. *sophisticus* = pertaining to a sophist, *sophistical*.]

1. Of or pertaining to the Sophists.

"We cannot wonder that he should turn the rhetorical element of the Greek drama into a *sophistical* one."—Donaldson: *Theatre of the Greeks*, p. 137.

2. Containing or of the nature of sophistry; fallaciously subtle; quibbling, unsound.

"A solution of the difficulty, which, I think, and am not afraid to call inconclusive and *sophistical*."—Bolton: *Fragments*, § 21.

sō-phist-ic-al-ly, adv. [Eng. *sophistical*; -ly.] In a *sophistical* manner; fallaciously; with sophistry.

"He *sophistically* argues that society would certainly not like him to die of starvation."—*Daily Telegraph*, Jan. 19, 1886.

sō-phist-ic-al-ness, s. [Eng. *sophistical*; -ness.] The quality or state of being *sophistical*.

sō-phist-ic-ate, v.t. [Low Lat. *sophisticatus*, pa. par. of *sophistico* = to corrupt, to adulterate; Fr. *sophistiquer*; Sp. *sofisticar*; Ital. *sustificare*.]

* 1. To corrupt, to pervert, to wrest from the truth.

"If the passions of the mind be strong, they easily *sophisticate* the understanding."—Hooker: *Ecclia. Polity*.

2. To adulterate; to make spurious by admixture.

"It is a crime of a high nature to mingle or *sophisticate* any wine here."—Howell: *Letters*, bk. 1, let. 38.

sō-phist-ic-ate-ly, adv. [Fr. *sophistiquement*, v.] Adulterated; not genuine.

"The only way to know what is *sophisticate* and what is not so, is to bring all to the examen of the touchstone."—Glanvill: *Scopis Scientifica*, ch. viii.

sō-phist-ic-ation, s. [SOPHISTICATE, v.]

1. The act of adulterating or making not genuine by admixture; adulteration.

"[Drugs] whose preciousness may make their *sophistication* very beneficial to them that practice it."—Boyle: *Works*, i. 319.

2. Something adulterated or not genuine; a spurious imitation.

"The *sophistications* of our substitutes for butter sold in the metropolitan and urban markets."—*Daily Telegraph*, March 20, 1886.

* 3. The act of quibbling or arguing *sophistically*; sophistry.

* 4. A fallacious argument intended to deceive; a quibble.

sō-phist-ic-ā-tōr, s. [Eng. *sophisticat(e)*; -or.] One who *sophisticates*; one who adulterates or destroys the genuineness or purity of anything by foreign admixture.

"I cordially commend that the *sophisticators* of wine may suffer punishment above any ordinary thief."—Whitaker: *Blood of the Grape* (1654), p. 107.

* sōph-ist-ress, s. [Eng. *sophist*; -ress.] A female sophist.

"You seem to be a *sophistress*, you answer so smartly."—Bailey: *Erasmus*, p. 194.

sōph-ist-ry, * sōph-ist-ric, s. [Fr. *sophisterie*.]

* 1. Logical exercises; argument for exercises only.

"The more youthful exercises of *sophistry*, theses, and declamations."—Fulton.

2. Sophistic influence; sophists collectively.

"Euripides was nursed in the lap of *sophistry*."—Donaldson: *Theatre of the Greeks*, p. 157.

3. Fallacious reasoning, un sound argument, quibbling, fallacy.

"A person whose conscience can be set at rest by *immoral sophistry*."—Macaulay: *Hist. Eng.*, ch. xv.

* sōph-ist-ry, v.t. [SOPHISTRY, s.] To reason *sophistically*.

"It is well *sophistried* of you."—Baird: *Select Works*, p. 24.

sōph-ō-mōr-e, s. [Gr. σοφός (sophos) = wise, and μόρος (mōros) = a fool.] In American colleges, a student belonging to the second of the four classes; a student next above a freshman.

sōph-ō-mōr-ic, sōph-ō-mōr-ic-al, a. [Eng. *sophomore*(e); -ic, -ical.] Pertaining or relating to a sophomore; characteristic of a sophomore; inflated in style. (Amer.)

"The American idea of architecture had passed from its untrained innocence to a *sophomoric* affectation of Greek forms."—*Century Magazine*, June, 1868, p. 222.

sō-phōr-ā, s. [Arab. *sophera* = a papilionaceous tree.]

Bot. The typical genus of Sopheræ (q.v.). Leaves unequally pinnate, inflorescence in racemes or panicles of yellow, white, or blue flowers; stamens ten, all distinct; legumes moniliform, without joints or wings. Ornamental shrubs or trees, from the hotter parts of Asia and America. Two, *Sophora japonica* (called also *Styphnolobium japonicum*), and *S. chinensis* are grown as garden plants. The former yields a beautiful yellow or orange dye from the pulp of the legumes. The roots and seeds of the latter have been regarded as specific in bilious sickness.

sō-phōr-ē-æ, s. pl. [Mod. Lat. *sophora*(a); Lat. fem. pl. adj. suff. -eæ.]

Bot.: A tribe of Papilionacæ. Filaments distinct; legume continuous; leaves pinnated, with one or several leaflets. (Lindley.)

Sō-phrōs-ŷ-nē, s. [Gr. = moderation, diacretion.]

Astron.: [ASTEROID, 134.]

sōph-tā, s. [SOFTA.]

* sōp-ite, v.t. [Lat. *sopitus*, pa. par. of *sopio* = to put to sleep.]

1. *Ord. Lang.*: To lay asleep; to put to sleep or rest; to lull.

"Our natural powers are tied down, *sopited*, and fettered."—Cheyne: *Philosophical Conjectures*.

2. *Scotts Law*: To set at rest; to quash.

* sō-pŷ-tion, s. [SOPITE, v.] The act of putting to sleep or rest; sleep, slumber, dormancy.

"Dementation and *sopition* of reason."—Broom, (Webster.)

* sō-por, s. [Lat.] A deep sleep from which one can with difficulty be awakened.

"To awaken the Christian would out of this deep *sopor* or lethargy."—Dr. H. More: *Mystery of Iniquity* pt. II. (Pref.)

* sō-pōr-ate, v.t. [Lat. *soporatus*, pa. par. of *soporare* = to put to sleep; *sopor* = sleep.] To put to sleep.

"The soul seeming not to be thoroughly awake here, but, as it were, *soporated* with the dull steams and optick vapours of this gross body."—*Outward*; *Intel. System*, p. 196.

Bot.: † (1) The Service-tree; (2) the Wild Service-tree. [SERVICE-TREE.]

sorb-apple, s. The fruit of the Sorb or Service-tree.

sorb-ām'-ide, s. [Eng. *sorb(ic)*, and *amide*.]

Chem.: H₂(C₆H₇O)₂N. An amide produced by the action of aqueous ammonia on sorbic ether at 120°. It forms white fusible needles, soluble in water and alcohol.

sorb-ān'-il-ide, s. [Eng. *sorb(ic)*; *aniline*, and suff. -ide.]

Chem.: C₆H₅(C₆H₇NO). Phenyl-sorbamide. Produced by the action of aniline on sorbic chloride, as an oil which solidifies in the crystalline form. (Watts.)

sor-bāte, s. [Eng. *sorb(ic)*; -ate.]

Chem.: A salt of sorbic acid.

sor-bē-fā'-ci-ēnt (c as sh), a. & s. [Lat. *sorbere* = to absorb, and *faciens*, pl. par. of *facio* = to make.]

A. As adj.: Causing or producing absorption.

B. As subst.: A substance or preparation which causes or produces absorption.

* **sor-bent, s.** [Lat. *sorbens*, pl. par. of *sorbere* = to absorb.] A substance producing absorption; an absorbent (q.v.).

* **sor'-bēt, s.** [SHERBET.]

Cook.: A lemon ice flavoured with spirit, usually run, served at dinner.

sorb'-io, a. [Eng. *sorb(in)*; -ic.] Derived from or contained in mountain ash.

sorbic acid, s.

Chem.: C₆H₇O·HO. A monobasic acid, found in mountain-ash berries, and produced from parasorbic acid by the action of caustic potash, and then boiling with hydrochloric acid. It is purified by recrystallization from water, and is obtained in long colourless needles, very difficultly soluble in cold, more readily in hot water and in alcohol, melts at 134°5', and is inodorous.

sorbic-chloride, s.

Chem.: C₆H₇O·Cl. Chloride of sorbyl. Produced by the action of phosphoric chloride on sorbic acid or its potassium salt. It is converted by water into sorbic and hydrochloric acids.

sorbic-ether, s.

Chem.: C₆H₇(C₂H₅)O₂. Ethylic sorbate. Prepared by passing hydrochloric acid gas into an alcoholic solution of the acid. It is a liquid boiling at 195°5', and having an aromatic odour like benzoic ether.

* **sor'-bile, a.** [Lat. *sorbere* = to absorb.] That may be drunk or sipped.

sorb'-in, s. [Mod. Lat. *sorb(in)*; Eng. suff. -in.]

Chem.: C₆H₇O₂. A sugar, discovered by Pelouse, isomeric with glucose, and obtained from the fermented juice of the mountain-ash berries. It does not exist ready formed in the berries, and its formation is not yet clearly understood.

sor-bi-tar-tār'-io, a. [Eng. *sorbic*, and *tartaric*.] Containing sorbic and tartaric acid.

sorbitartaric-acid, s.

Chem.: An acid produced by heating sorbite with tartaric acid to 100°. (Watts.)

sorb'-ite, s. [Mod. Lat. *sorb(itus)*; Eng. suff. -ite.]

Chem.: C₆H₇O₆. An unfermentable sugar present in the berries of the mountain-ash. It is isomeric with mannite and dulcitol, and deposits in regular transparent crystals, for the most part rhombic octahedrons, from the expressed juice after standing for several months. It is nearly insoluble in cold alcohol, moderately soluble in boiling alcohol, the hydrated sugar melts at 102°, is inactive to polarized light, does not reduce copper salts, nor is it carbonised with sulphuric acid even with heat.

sorb-it'-ic, a. [Eng. *sorb(itic)*; -ic.] Contained in or derived from sorbite (q.v.).

sorbitic-acid, s.

Chem.: An acid obtained by heating sorbite for some time to 150–180°. It is insoluble in water, acids, and alcohol; but dissolves in aqueous ammonia or potash, from which hydrochloric acid throws it down in amorphous dark-red flakes. Its composition is doubtful.

* **sor-bi-tion, s.** [Lat. *sorbition*, from *sorbere* = to absorb.] The act of drinking or sipping.

sor-bōn'-ic-al, a. [Eng. *Sorbon(ce)*; -ical.] Pertaining or belonging to a Sorbonist.

"The sorbonical or theological wine, and their feasts or gaudy days, are now come to be proverbially lasted at."—*Florio: Montaigne*, p. 626.

Sor'-bōn-ist, s. [Fr. *Sorboniste*.]

Ecles. Hist.: A professor or doctor of the Sorbonne, a theological college founded within the University of Paris by Robert de Sorbon in 1252, for sixteen students, four from each of the French, Norman, Picard, and English "nations" [NATION, s., ff.], burses being soon afterwards added for German and Flemish students. The majority of the Paris doctors were trained there, and the Sorbonne and the theological faculty became identified as early as the beginning of the sixteenth century. Cardinal Richelieu, in 1629, opened the present buildings in the Quartier Latin. The old University of Paris was destroyed after the Revolution, and when it was reorganized by Napoleon in 1803, a faculty of theology, with seven chairs, was established at the Sorbonne, where lectures are also given and

degrees conferred in the faculties of science and literature.

"He a rope of sand could twist
As tough as learned Sorbonist."
Butler: Hudibras, l. 1

sor'-būs, s. [Lat. = the true service tree.]

Bot.: A section or sub-genus of *Pyrus* (q.v.), having small fruits, with two to eight cells, each one-seeded, the endocarp brittle; flowers in compound corymbose cymes. (Sir J. Hooker.) British species three, *Pyrus torminalis*, *P. Aria*, and *P. Aucuparia*.

sorb'-yl, s. [Mod. Lat. *sorb(itus)*; -yl.]

Chem.: C₆H₇O. The hypothetical radical of sorbic acid.

sor'-qēr-ēr, s. [Fr. *sorcier*, from Low Lat. *sortarius* = a teller of fortunes by the casting of lots, from *sortio* = to cast lots, from Lat. *sortis*, genit. *sortis* = a lot [SORR, s.]; Ital. *sorciere*; Sp. *sortero*.] A conjuror, a magician.

"This is my hammer,
Moliner the mighty;
Giants and sorcerers

9. A spiritual being; a disembodied spirit.

10. A human being; a person; as, Not a soul knew of his coming. "Now mistress Gillpin, careful soul! Had two stone bottles found."—*Cowper*: *John Gillpin*.

II. Technically:

1. *Philo.*: The Scholastics, following Aristotle, by soul meant the primary principle of life, and held that a plant was endowed with a vegetable soul, that brutes and man had in addition a sensitive soul, while man alone had a rational and immaterial soul. They based their proof of the immateriality of the distinctively human soul on the power of the mind to form abstract ideas.

2. *Script. & Theol.*: The word soul is used chiefly for "that apiritual, reasonable, and immortal substance in man which is the origin of our thoughts, of our desires, of our reasonings, which distinguishes us from the brute creation, and which bears some resemblance to its Divine Master." (*Cruden*.) All Christians admit the responsibility of the soul to God for the deeds done in the body; and the orthodox view—that of the Anglican, Roman, and Greek Churches, and of the great dissenting bodies—is that at the final judgment the lot of every soul will be irrevocably fixed, and that it will either eternally enjoy the Beatific Vision in heaven or share the endless torments prepared for the devil and his angels. Two other views—both of which have found supporters in the Church from early ages—are coming increasingly to the front: (1) That of the Restorationists, of whom there are two schools: (a) the Dogmatic, who assert, and (b) those, represented by Archdeacon Farrar, who express a hope, that all men will be finally saved [RESTORATIONIST, UNIVERSALIST]; and (2) the Annihilationists or Destructionists, who hold that while the righteous will be for ever in a state of bliss, the wicked, after receiving the punishment of their sins, will be blotted out of existence. Origen, with Plato, held the doctrine of the pre-existence of souls, which was condemned by a synod at Constantinople in 543. [TRANSMIGRATION.] Two distinct views have at different times found supporters in the Christian Church: (1) That the soul is produced by natural generation [TRADUCIANISM]; (2) that each soul is separately created by God. [CREATIONISM.]

¶ Soul is largely used in composition, forming compounds, the meanings of which are in general self-explanatory: as, soul-betraying, soul-calming, soul-cheering, soul-deadening, soul-destroying, soul-entrancing, soul-refreshing, soul-stirring, soul-vexed, &c.

¶ Cure of souls: Church of Eng.: An ecclesiastical benefice in which parochial duties and the administration of the sacraments are included, primarily vested in the bishop of the diocese, the clergy of each parish acting as his deputies.

* soul-bell, s. The passing-bell (q.v.). "We call them soul-bells, for that they signify the departure of the soul, not for that they help the passage of the soul."—*Bp. Hall*.

sound-headed, a. Having a sound, clear head or mind.

sound-hearted, a. Straightforward, trustworthily, upright.

sound (1), * son, * soun, * soune, * sown, * sound, * sowne, s. [Properly *soun*, the *d* being extrinsic, as in round for roun (to whisper), &c.; Fr. *son* = a sound, from Lat. *sonum*, accus. of *sonus* = a sound; Sansc. *śrṇa*.]

I. Ordinary Language:

1. In the same sense as II. "The nature of sounds hath, in some sort, been inquired."—*Bacon*: *Nat. Hist.*, l. 114.

2. A particular manner of striking the ear, so as to produce a certain effect. "And these his accents had a sound of mirth."—*Byron*: *Corrair*, ii. 13.

3. Noise without sense or significance; empty noise; noise and nothing else. "To be words, unprofitable sounds."—*Shakesp.*: *Rape of Lucrece*, l. 107.

II. Physics & Physiol.: Sound is properly considered under a twofold aspect—(1) the effect produced when the brain takes cognizance of sensations excited in the auditory nerve, and (2) a phenomenon actually produced in nature by a sounding body when the particles of that body are in such a state of vibration as to make an impression on normal auditory nerves. This would exist, even if no living being were possessed of a sense of hearing,

and some of the effects of sound-waves would still be observable; for instance, the shattering of windows by the impact of sound-waves. When a sonorous body is struck, or an explosion takes place, or a person speaks, a sound-wave is propagated by molecular motion, the particles of the air moving forward, each impinging on that immediately before it, and then rebounding, till those which fill the cavity of the ear are finally driven against the tympanic membrane, the vibration of which is transmitted to the auditory nerve, and thence to the brain, which takes cognizance of the sensation. By this alternate movement of advance and rebound the air is alternately condensed and rarefied, and the length of a sound-wave is measured from condensation to condensation, just as in water the length of a wave is measured from crest to crest. Solids, when they possess elasticity, are better conductors of sounds than gases or liquids. This fact is known experimentally to savages, who place their ears to the ground to detect the approach of an enemy, and has been utilized in medicine in the construction of the stethoscope (q.v.). [For the rate of sound, see Acoustics.] Sound radiates from a sounding body in all directions in straight lines, and diminishes in intensity in inverse proportion to the square of the distance. Sound-waves may be reflected, refracted, and inflected. By reflection they produce echoes [ECHO], by refraction they may be converged on any given spot, and by inflection they bend round solid obstacles. Tyndall (*On Sound*, p. 23) notes a striking instance of their inflection when the powder magazine at Erith exploded in 1864. The village was some miles distant from the magazine, yet every window in the church, back and front, was bent inwards, the building being, so to speak, clasped by a girle of intensely-compressed air. Sounds are classified as musical sounds and noises, a musical sound depending upon a succession of impulses at a regular rate, the pitch of the note rising with the rapidity; it will also be readily understood how greater rapidity must shorten the sound-wave, the air when rebounding from one compression being more quickly again compressed by the succeeding impulse. The human ear is limited in its range of hearing musical sounds. If the vibrations are less than sixteen per second the separate shocks are perceived, if they exceed 8,500 per second consciousness of sound ceases. [Acoustics.]

sound-board, s.
1. A wooden screen placed behind a pulpit, for the purpose of reflecting the preacher's voice; or over it, to prevent the sound from ascending.
2. *Carp.*: Deadening; a partition or an additional division between two apartments to prevent the propagation of sound from one to the other.

3. Music:
(1) A piece of resonant wood placed behind the strings of a pianoforte for the purpose of increasing the power of the sounds.
(2) The upper surface-board of a wind-chest in an organ, that chamber of air into which the feet of the pipes are placed.

"As in an organ from one blast of wind,
To many a row of pipes the sound-board breathes."
Milton: P. L., l. 798.

sound-boarding, s.
Build.: Short boards, disposed transversely between the joists, to hold the pugging which prevents the transmission of sound.

sound-bow, s. That part of a bell on which the clapper strikes. The sound-bow is the point of the greatest thickness, and is considered as unity in stating the proportions of the bell.

sound-figures, s. pl. [SONOROUS-FIGURES.]

sound-post, s. A sounding-post (q.v.).

sound-wave, s. [SOUND, II.]

sound (2), * sounde, * sund, s. [A.S. *sund* (1) a swimming, (2) power to swim, (3) a strait of the sea; cogn. with Icel., Dan., Sw., & Ger. *sund*. Cf. Icel. *sund-magi* (lit. sound-maw) = the swimming-bladder of a fish.]

1. A narrow passage of water, as a strait between a mainland and an island, or a strait connecting two seas, or connecting a sea or lake with the ocean.
"To go farther up the sound, and come back along the west shore."—*Cook: Second Voyage*, bk. lv., ch. viii.

2. The swimming- or air-bladder of a fish. [CON-SOUNDS.]

3. A name for the Cuttle-fish (q.v.).

Sound-dues, s. pl. The sea-toll or dues formerly collected at Elsinore on all vessels passing the Sound between Denmark and Sweden.

sound (3), s. [Fr. *sonds* = a sounding-line, a probe.] [SOUND (3), v.]

Surg.: An instrument for exploring the cavities of the body. [LITHOTOMY-SOUND, PROBE, s., l.]

* **sound (1), * sounde, * soune (1), v. t.** [SOUND, a.] To become sound; to be cured or healed; to heal.
"That gyfte with many a wound
That likely are never for to sound."
Lydgate: Complaint of Black Knight.

sound (2), * sounde (2), * soun-lat, sowne, v. t. & l. [Fr. *sonner*, from Lat. *sona*, from *sonus* = a sound (q.v.); Sp. *sonar*; Ital. *suonare*.]

A. Intransitive:
1. To make a sound or noise; to utter or emit a voice; to cause an impulse of the air that shall strike the organs of hearing with a particular effect. (1 *Corinth.* xv. 52.)
2. To play on an instrument; to cause an instrument to give out a noise.
"O bagpipe wel come he blowe and soune."
Chaucer: C. T., 567. (ProL.)

* 3. To be conveyed by or in sound; to be spread or published.
"From you sounded out the word of the Lord."
1 Theat. l. 8.

4. To seem or appear when uttered; to appear or convey an impression on narration.
"The praises which he knew that he had not deserved sounded to him like reproaches."
Macaulay: Hist. Eng., ch. xxii.

* 5. To tend.
"Done aile thing sounding to the breach of the same."
Holinshead: Hist. Scotland; Peritharia.

* 6. To be consonant or in accord; to harmonize. (Followed by *to, unto, or into*.)
"As fer as soundeth into honestie."
Chaucer: C. T., 13,580.

B. Transitive:
1. To cause to make or emit a noise; to play on.
"Sound all the lofty instruments of war."
Shakspeare: 1 Henry IV., v. 2.

2. To utter audibly; to express or pronounce: as, To sound a note with the voice.
3. To order or direct by a sound; to give a signal for by sound or noise.
"Our author seems to sound a charge."
Dryden: Virgi; Zenid. (Dedic.)

4. To spread or celebrate in sound or report; to spread abroad, to publish, to proclaim.
5. To declare, to tell, to describe.
"No words can that we sound."
Shakspeare: Romeo & Juliet, III. 2.

* 6. To signify, to mean, to import.
"In Hebrew it sounds nakedness of sight, or any real nakedness."
Milton: Of Divorce.

* **To sound in damages:** To have the essential quality of damages. (Said of an action brought, not for the recovery of any specific thing, as replevin, debt, &c., but for damages only, as trespass.)

sound (3), * sownde, v. t. & l. [Prob. from Fr. *souder* = to sound, try, prove, search the depth of, from a supposed Lat. *subundo* = to submerge, from *sub* = under, and *unda* = a wave. But Skeat also points out that the Sp. *sonda* means not only a sounding-line, but also a sound or channel [SOUND (2), s.], and that the Fr. *souder* was probably taken from the Scandinavian *sund* = a sound; cf. A.S. *sund-gyrd*, *sund-line* = a sounding-rod or line.]

A. Transitive:
I. Ordinary Language:
1. *Lit.*: In the same sense as II. 1.
2. *Fig.*: To try, to examine; to discover or endeavour to discover, as something concealed in the depth of another's breast; to search out the intention, opinion, will, or desires of; to probe.
"His Holiness, however, on being sounded on the subject by the Spanish Ambassador in Rome, declined."
Evening Standard, Oct. 3, 1885.

II. Technically:
1. *Naut.*: To measure the depth of; to fathom; to try or test the depth of water in, and the quality of the bottom of, as of the sea, by sinking a plummet or piece of lead attached to a line on which are marked the

number of fathoms. The lead is elongated, has an eye at one end to receive the line, and a cavity, which is partially filled with an arming (tallow), at the other, to which the ground, especially if it be sand, shells, or fine gravel, adheres when the lead strikes the ground. Numerous contrivances are employed for ascertaining the nature of the bottom. The form generally used in the British service consists of a strong tube with upwardly opening valves, which admit the mud or sand composing the bottom when the sinker strikes, but are closed by gravity during the upward movement.
2. *Surg.*: To examine any cavity in the body by means of a sound. Also used of external examination by means of a stethoscope or by percussion.

B. Intrans.: To use the line and lead in order to ascertain the depth of the water.
"They sounded again, and found it fifteen fathoms."
Act. xxviii. 28.

* **sound, v. i.** [SWOON.]

* **sound'-a-ble, a.** [Eng. *sound* (2), v.; -*abl.*] Capable of being sounded.

sound'-age (age as íg), s. [Eng. *sound* (3), v.; -*age*] Dues for sounding.

* **sounde, v. t.** [SOUND (1), v.]

sound'-er (1), s. [Eng. *sound* (2), v.; -*er*.] One who or that which sounds; specif. in telegraphy, a device used instead of a register, the communications being read by sound alone. It consists of an electro-magnet with an armature having a lever attached; the movement of the armature, as it is attracted by the electro-magnet or withdrawn by a spring, is limited by two stops, between which the end of the lever plays, and by the striking of which the sound is produced.

sound'-er (2), s. [SWINE.]
1. A herd of wild swine.
"We had just about finished eating, when a large sounder of pigs—not less than twenty of all sizes, headed by a big boar—broke out of the jungle about eighty paces from us."
Field, April 4, 1884.

* 2. (See extract).
"A sounder (i.e., in the language of the period, a boar of only two years old) had crossed the track of the proper object of the chase."
Scott: Quentin Durward, ch. ix.

sound'-ing (1), pr. par., a., & s. [SOUND (2), v.]
A. As *pr. par.*: (See the verb).
B. As *adjective*:
1. *Lit.*: Causing sound; making a noise; sonorous, resonant.
"I am become as sounding brass, or a tinkling cymbal."
1 Corinthian xiii. 1.

2. Having a magnificent or lofty sound; high-sounding, bombastic.
"Keep to your subject close in all you say;
Not for a sounding sentence ever stray."
Dryden: Art of Poetry, l.

C. As *subst.*: The act of emitting or causing a sound or noise.

sounding-board, s. [SOUND-BOARD.]

South-côt-ti-ang, s. pl. [See def.]

Church Hist. (Pl.): The followers of Joanna Southcott (1750-1814), who claimed to be descended from an old Hertfordshire family, but whose own circumstances were so poor that she had to become a domestic servant. She had strong religious feelings, and, till about the age of forty, was a member of the Methodist body. In 1792 she professed to receive revelations, which she published in 1801-3. These were partly in prose, but chiefly in doggerel. From that time to her death the number of believers in her pretensions largely increased. These were by no means confined to the uneducated classes, and they made such provision for her as enabled her to live in considerable style. In return for their offerings her followers received "seals"—papers which purported to number them with the mystical "hundred and forty and four thousand" of the Apocalypse (vii. 4). In 1813 Joanna announced that she was about to become a mother, that the child would be miraculously conceived, and would be the Shiloh (Gen. xlix. 10) in whom the Millennium was to be established. She died Dec. 27, 1814, and on her tombstone, in Marylebone Churchyard, is an inscription foretelling her reappearance. Shortly before her death, the Rev. J. T. Foley, Rector of Old Swinford, on her behalf, announced to her followers that she had received a heavenly command that they were not to assemble for worship till after the birth of Shiloh, but to attend Protestant churches. In 1825, Charles William Twort pretended to be the Shiloh, and another impostor, George Turner (whose followers were called Turnerites), arose about the same time. The last leader of the Southcottians was John Wroe, of Bowling, near Bradford. He claimed prophetic gifts, and taught that the Second Advent was at hand. His adherents, who are called Christian Israelites, are stronger in Australia (where Wroe died in 1863) than in England, where only three or four congregations exist.

sōw-ang, sōw-ing, sōw-ang, s. pl. [Etyim. doubtful.] An article of food made from the farina remaining among the seeds (husks) of oats, and much used in Scotland. The husks are steeped in water till the farinaceous matter is dissolved, and until the liquid has become sour. The whole is then put into a sieve, which allows the milky liquid to pass through into a barrel or other vessel, but retains the husks. The starchy matter gradually subsides to the bottom of the vessel. The sour liquid is then decanted off, and about an equal quantity of fresh water added. This mixture, when boiled, forms sowens. In England it is more commonly known as flummary.

sōw-ēr (1), s. [Eng. *sow* (1), s.; -er.]

1. One who sows or scatters seed for growth. "A sower went forth to sow."—*Matz*. xiii. 3.

sōwm, s. & v. [SOWMING.]

sōwm-ing, s. [Etyim. doubtful.] Sows Law: A word used in the phrase Sowing and rowning, applied to an action whereby the number of cattle to be brought upon a common by the persons respectively having a servitude of pasturage may be ascertained. The criterion is the number of cattle which each of the dominant proprietors is able to fodder during winter. A sown of land is as much as will pasture one cow or ten sheep; and, strictly speaking, to sown the common is to ascertain the several sowms it may hold, and to rowm it is to portion it out among the dominant proprietors.

spāce, s. [Fr. *espace*, from Lat. *spatium*, lit. = that which is drawn out, from the root *spā* = to draw out; cf. Fr. *étirer* (*spāer*) = to draw out; Sp. *espacio*; Port. *espaco*; Ital. *spazio*.]

I. Ordinary Language:

1. Extension, considered independently of anything which it may contain; extension considered in its own nature without regard to anything external; room.

2. Any quantity or portion of extension; the interval between any two or more objects. "Apart, some little *space*, was made The grave where Francis must be hid."—*Wordsworth*: *White Doe*, vi.

3. Quantity of time; duration; the interval between two points of time. "After some small *space* he sent me hither."—*Shakspeare*: *As You Like It*, iv. 3.

*4. A short time; a while. (*Spenser*.)

II. Technically:

1. Geom.: The room in which an object, actual or imaginary, exists. All material objects possess length, breadth, and thickness; in other words, they exist in space of three dimensions. Plane surfaces have only two dimensions—length and breadth, and straight lines but one dimension—length. Hence we have notions of space of one dimension and of two dimensions, as distinguished from the three-dimensional space in which we live. The question has arisen, and has been warily discussed, as to whether space of four, and perhaps of higher dimensions exists. Zöllner (*Transcendental Physics*) believes that it does, and that some persons have some of the powers of beings living in space of four dimensions, and thus accounts for many of the phenomena of Spiritualism. For example, while a being living in space of two dimensions could only get in or out of a square by passing through one of its sides, a human being could enter the square from above; so, he argues, a person having the properties of a four-dimensional being could enter or leave a closed box or room on its fourth-dimensional side. (See *Abbott*: *Flat Land*, and *Hinton*: *What is the Fourth Dimension?*)

2. Metaphysics: A conjugate of material existence. Empirical philosophers maintain that notions of space are derived from our knowledge of existence; transcendentalists that these notions are innate. [TIME.]

bōil, bōy; pōut, jōwl; cat, çell, chorns, çhin, bench; go, çem; thin, this; sin, as; expect, Xonophon, exist. -ing. -clan, -tian = shān. -tion, -sion = shūn; -tion, -sion = zhōn. -cious, -tiuous, -siuous = shūs. -ble, -dle, &c. = bel, del.

3. Music: One of the four intervals between the five lines of a staff. They take their names from the notes which occupy them: thus, the spaces of the treble staff, counting upwards, are F, A, C, and E, and of the bass A, C, E, and G.

4. Physics: The room in which the Cosmos or universe exists.

"As to the infinity of physical space, or the infinity of actual material existence, all that we can say is that however far we advance (and we have advanced a great deal) in the power of discerning distant objects, we have uniformly found new objects to discern, and we have, therefore, good analogical reason for supposing that no limit can be assigned to their still further existence. This view of what is commonly called the infinity of space is further supported by the fact that metaphysical space as a conjunct of material existence in no way precludes the possibility of its infinite extension."—*Brandé & Cox.*

5. Printing:

(1) The interval between words in printed matter.

(2) A thin piece of type-metal, shorter than a type, and used to separate the letters in a word or words in a line, so as to justify the line.

space-being, s. A being living in actual space; a human being.

"A space-being can put an object inside the square without going through any of the sides."—*Hassell's Cyclopaedia* (1856), p. 185.

space-line, s.

A. As substantive:

1. *Lit. & Zool.:* A popular name for a class of dogs, distinguished chiefly by large drooping ears, long silky coat, and a gentle, timid, and affectionate disposition. *Spaniels* may be grouped in three natural divisions:

(1) *Land Spaniels:* The Cocker is one of the smallest of its kind, and is chiefly used for flushing woodcocks. The coat should be wavy and thick, and the colour black and white, pure black, liver and white, or red and white. The Springer is heavier, slower, and more easily kept within range than the Cocker. The Clumber, the Sussex, and the Norfolk Spaniel are breeds of Springers. The Clumber is a low, strong-limbed dog, never giving tongue, highly valued for batue-shooting. Colour lemon and white, or yellow and white; coat thick, legs well feathered, feet round; head square and heavy, muzzle broad, ears long. The Sussex Spaniel is lighter in shape and richer in colour than the Clumber, and gives tongue freely. The Norfolk Spaniel varies greatly, and is perhaps the commonest breed in England. Colour black, or liver and white.

(2) *Water Spaniels:* The body should be round and compact, covered with short, crisp curls; ears long and deeply fringed; legs very strong, with broad spreading feet; tail curled to the end; head long, face smooth, forehead high; the colour should be a brown-liver, but liver and white is common. They are excellent water-dogs, and extremely faithful and affectionate. They run into several strains.

(3) *Toy Spaniels:* Of these there are several varieties, the chief being the King Charles and the Blenheim. The former is the larger of the two, and should be rich black and tan. They were the special pets of Charles II. The Blenheim is white, with patches of red or yellow. Both should have a short muzzle, round head, full prominent eyes, ears close to the head and fringed with long silky hair, and hairs growing from the toes and reaching beyond the claws.

"He might be seen, before the dew was off the grass, in St. James's Park, striding among the trees, playing with his *spaniels*, and ringing corn to his ducks."—*Macaulay; Hist. Eng., ch. iv.*

2. *Fig.:* An emblem of fawning subsmissiveness; a mean, cringing, or fawning person.
